#	ARTICLE	IF	CITATIONS
1	Axillary or Subclavian Impella 5.0 Support in Cardiogenic Shock: A Systematic Review and Meta-analysis. <i>ASAIO Journal</i> , 2022, 68, 233-238.	1.6	2
2	HVAD to Heartmate 3 Device Exchange: A Society of Thoracic Surgeons Intermacs Analysis. <i>Annals of Thoracic Surgery</i> , 2022, 114, 1672-1678.	1.3	18
3	Pre-operative sarcopenia is predictive of recurrent gastrointestinal bleeding on left ventricular assist device support: A multicenter analysis. <i>Journal of Heart and Lung Transplantation</i> , 2022, 41, 757-762.	0.6	6
4	Exploring Physician Perceptions of the 2018 United States Heart Transplant Allocation System. <i>Journal of Cardiac Failure</i> , 2022, 28, 670-674.	1.7	7
5	Women Empowering Women in Heart Transplantation and Mechanical Circulatory Support. <i>Journal of Cardiac Failure</i> , 2022, 28, 1031-1034.	1.7	4
6	Assessment of U.S. heart transplantation equity as a function of race: Observational analyses of the OPTN database. <i>The Lancet Regional Health Americas</i> , 2022, 13, 100290.	2.6	1
7	ISHLT consensus statement: Perioperative management of patients with pulmonary hypertension and right heart failure undergoing surgery. <i>Journal of Heart and Lung Transplantation</i> , 2022, 41, 1135-1194.	0.6	17
8	Future developments in left ventricular assist device therapy. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2021, 162, 605-611.	0.8	10
9	The new heart transplant allocation system: Early observations and mechanical circulatory support considerations. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2021, 161, 1839-1846.	0.8	32
10	Letter by Cogswell et al Regarding Article, "Polypharmacy in Older Adults Hospitalized for Heart Failure." <i>Circulation: Heart Failure</i> , 2021, 14, e008160.	3.9	3
11	Editorial: A call to action: let's work together to end racial disparities in heart failure. <i>Current Opinion in Cardiology</i> , 2021, 36, 318-319.	1.8	0
12	Heart Failure Severity Stratification Beyond INTERMACS Profiles: A Step Toward Optimal Left Ventricular Assist Device Timing. <i>ASAIO Journal</i> , 2021, 67, 554-560.	1.6	8
13	Association between digoxin use and gastrointestinal bleeding in contemporary continuous flow left ventricular assist device support. <i>Journal of Heart and Lung Transplantation</i> , 2021, 40, 671-676.	0.6	7
14	External assessment of the EUROMACS right-sided heart failure risk score. <i>Scientific Reports</i> , 2021, 11, 16064.	3.3	6
15	Association between early ventricular arrhythmias and mortality in destination vs. bridge patients on continuous flow LVAD support. <i>Scientific Reports</i> , 2021, 11, 19196.	3.3	10
16	Rapidly Progressive Left Ventricular Assist Device Outflow Graft Thrombosis Associated With COVID-19 Infection. <i>Circulation: Heart Failure</i> , 2021, 14, CIRCHEARTFAILURE121008334.	3.9	4
17	A Novel Model Incorporating Pectoralis Muscle Measures to Predict Mortality After Ventricular Assist Device Implantation. <i>Journal of Cardiac Failure</i> , 2020, 26, 308-315.	1.7	18
18	Nonsustained ventricular tachycardia in heart failure with preserved ejection fraction. <i>PACE - Pacing and Clinical Electrophysiology</i> , 2020, 43, 1126-1131.	1.2	14

#	ARTICLE	IF	CITATIONS
19	Is It Time to Reexamine Psychosocial Criteria for Left Ventricular Assist Device Candidacy?. <i>Circulation: Heart Failure</i> , 2020, 13, e007478.	3.9	3
20	Right Ventricular Failure After Left Ventricular Assist Device. <i>Cardiology Clinics</i> , 2020, 38, 219-225.	2.2	18
21	Pulmonary Arterial Elastance and INTERMACS-Defined Right Heart Failure Following Left Ventricular Assist Device. <i>Circulation: Heart Failure</i> , 2019, 12, e005923.	3.9	28
22	Association between angiotensin II antagonism and gastrointestinal bleeding on left ventricular assist device support. <i>Journal of Heart and Lung Transplantation</i> , 2019, 38, 469-471.	0.6	9
23	Prevalence of Myocardial Fibrosis by Left Ventricular Assist Device Apical Core Biopsy and Correlation with Other Markers of Myocardial Recovery. <i>ASAIO Journal</i> , 2019, 65, 123-126.	1.6	2
24	Impact of age, sex, therapeutic intent, race and severity of advanced heart failure on short-term principal outcomes in the MOMENTUM 3 trial. <i>Journal of Heart and Lung Transplantation</i> , 2018, 37, 7-14.	0.6	35
25	Left ventricular assist device is protective against cardiac transplant delisting for medical unsuitability. <i>International Journal of Cardiology</i> , 2018, 268, 51-54.	1.7	3
26	Preoperative Pectoralis Muscle Quantity and Attenuation by Computed Tomography Are Novel and Powerful Predictors of Mortality After Left Ventricular Assist Device Implantation. <i>Circulation: Heart Failure</i> , 2017, 10, .	3.9	67
27	Aortic insufficiency in continuous-flow left ventricular assist device support patients is common but does not impact long-term mortality. <i>Journal of Heart and Lung Transplantation</i> , 2017, 36, 91-96.	0.6	46
28	Implantable Cardioverter-Defibrillator Use in Patients With Left Ventricular Assist Devices. <i>JACC: Heart Failure</i> , 2016, 4, 772-779.	4.1	69
29	A Decade of Experience With Continuous-Flow Left Ventricular Assist Devices. <i>Seminars in Thoracic and Cardiovascular Surgery</i> , 2016, 28, 363-375.	0.6	25
30	How to Develop and Implement a Specialized Heart Failure with Preserved Ejection Fraction Clinical Program. <i>Current Cardiology Reports</i> , 2016, 18, 122.	2.9	27
31	Stroke After Left Ventricular Assist Device Implantation: Outcomes in the Continuous-Flow Era. <i>Annals of Thoracic Surgery</i> , 2015, 100, 535-541.	1.3	93
32	Substance abuse at the time of left ventricular assist device implantation is associated with increased mortality. <i>Journal of Heart and Lung Transplantation</i> , 2014, 33, 1048-1055.	0.6	29
33	Performance of the REVEAL pulmonary arterial hypertension prediction model using non-invasive and routinely measured parameters. <i>Journal of Heart and Lung Transplantation</i> , 2014, 33, 382-387.	0.6	35
