Version: 2024-02-01

579 papers	37,025 citations	2101 100 h-index	6471 157 g-index
616 all docs	616 docs citations	616 times ranked	42025 citing authors

#	Article	IF	Citations
1	Intersectional Discrimination and Change in Blood Pressure Control Among Older Adults: The Health and Retirement Study. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2022, 77, 375-382.	3.6	4
2	Explaining Ethnic Differentials in COVID-19 Mortality: A Cohort Study. American Journal of Epidemiology, 2022, 191, 275-281.	3.4	17
3	Pre-pandemic mental and physical health as predictors of COVID-19 vaccine hesitancy: evidence from a UK-wide cohort study. Annals of Medicine, 2022, 54, 274-282.	3.8	25
4	Mortality among rough sleepers, squatters, residents of homeless shelters or hotels and sofa-surfers: a pooled analysis of UK birth cohorts. International Journal of Epidemiology, 2022, 51, 839-846.	1.9	9
5	State care in childhood and adult mortality: a systematic review and meta-analysis of prospective cohort studies. Lancet Public Health, The, 2022, 7, e504-e514.	10.0	10
6	Association of alcohol use with years lived without major chronic diseases: A multicohort study from the IPD-Work consortium and UK Biobank. Lancet Regional Health - Europe, The, 2022, 19, 100417.	5.6	4
7	Discrimination, Mediating Psychosocial or Economic Factors, and Antihypertensive Treatment: A 4-Way Decomposition Analysis in the Health and Retirement Study. American Journal of Epidemiology, 2022, 191, 1710-1721.	3.4	1
8	Overweight, obesity, and individual symptoms of depression: A multicohort study with replication in UK Biobank. Brain, Behavior, and Immunity, 2022, 105, 192-200.	4.1	26
9	Association of public care in childhood with social, criminal, cognitive, and health outcomes in middle-age: five decades of follow-up of members of the 1958 birth cohort study. Journal of Epidemiology and Community Health, 2021, 75, jech-2020-214737.	3.7	4
10	Pulmonary Function and Risk of Alzheimer Dementia. Chest, 2021, 160, 274-276.	0.8	3
11	Batty and Hamer Respond to â€œOut-of-Home Care and Mortality Riskâ€. American Journal of Epidemiology, 2021, 190, 183-184.	3.4	2
12	PUBLIC CARE DURING CHILDHOOD AND BIOMEDICAL RISK FACTORS IN MIDDLE AGE: THE 1970 BRITISH COHORT STUDY. American Journal of Epidemiology, 2021, 190, 176-178.	3.4	7
13	Association of Early-Life Mental Health With Biomarkers in Midlife and Premature Mortality. JAMA Psychiatry, 2021, 78, 38.	11.0	29
14	Examining gender differentials in the association of low control work with cognitive performance in older workers. European Journal of Public Health, 2021, 31, 174-180.	0.3	4
15	Life course psychological distress and cardiovascular disease risk factors in middle age: birth cohort study. Cardiovascular Research, 2021, 117, 364-366.	3.8	1
16	Risk Factors for Hospital Admission After a Fall: A Prospective Cohort Study of Community-Dwelling Older People. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2021, 76, 666-674.	3.6	15
17	Adverse childhood experiences and adult health: the need for stronger study designs to evaluate impact. Journal of Epidemiology and Community Health, 2021, 75, 485-488.	3.7	9
18	Biomarker-assessed passive smoking in relation to cause-specific mortality: pooled data from 12 prospective cohort studies comprising 36 584 individuals. Journal of Epidemiology and Community Health, 2021, 75, 794-799.	3.7	2

#	Article	IF	Citations
19	Pre-pandemic mental illness and risk of death from COVID-19. Lancet Psychiatry,the, 2021, 8, 182-183.	7.4	9
20	Pre-pandemic cognitive function and COVID-19 mortality: prospective cohort study. European Journal of Epidemiology, 2021, 36, 559-564.	5.7	21
21	Life-course Psychological Distress and Total Mortality by Middle Age. Epidemiology, 2021, 32, 740-743.	2.7	5
22	Modifications to residential neighbourhood characteristics and risk of 79 common health conditions: a prospective cohort study. Lancet Public Health, The, 2021, 6, e396-e407.	10.0	32
23	Association between change in cardiovascular risk scores and future cardiovascular disease: analyses of data from the Whitehall II longitudinal, prospective cohort study. The Lancet Digital Health, 2021, 3, e434-e444.	12.3	14
24	Predicting COVID-19 vaccine take-up: Moving beyond demographics. Brain, Behavior, and Immunity, 2021, 95, 17-18.	4.1	1
25	Pre-pandemic cognitive function and COVID-19 vaccine hesitancy: cohort study. Brain, Behavior, and Immunity, 2021, 96, 100-105.	4.1	31
26	Association of pre-pandemic high-density lipoprotein cholesterol with risk of COVID-19 hospitalisation and death: The UK Biobank cohort study. Preventive Medicine Reports, 2021, 23, 101461.	1.8	13
27	Long working hours and risk of 50 health conditions and mortality outcomes: a multicohort study in four European countries. Lancet Regional Health - Europe, The, 2021, 11, 100212.	5.6	21
28	Homelessness in early adulthood and biomedical risk factors by middle-age: the 1970 British Cohort Study. Journal of Epidemiology and Community Health, 2021, , jech-2021-217457.	3.7	0
29	Are a lack of social relationships and cigarette smoking really equally powerful predictors of mortality? Analyses of data from two cohort studies. Public Health in Practice, 2021, 2, 100140.	1.5	2
30	Cohort Profile Update: The Harmonised Cognitive Assessment Protocol Sub-study of the English Longitudinal Study of Ageing (ELSA-HCAP). International Journal of Epidemiology, 2021, 50, 725-726i.	1.9	20
31	Pre-Morbid Risk Factors for Amyotrophic Lateral Sclerosis: Prospective Cohort Study. Clinical Epidemiology, 2021, Volume 13, 941-947.	3.0	1
32	Modifiable risk factors for dementia and dementia risk profiling. A user manual for Brain Health Servicesâ€"part 2 of 6. Alzheimer's Research and Therapy, 2021, 13, 169.	6.2	35
33	Association Between Systemic Inflammation and Individual Symptoms of Depression: A Pooled Analysis of 15 Population-Based Cohort Studies. American Journal of Psychiatry, 2021, 178, 1107-1118.	7.2	72
34	Aluminium and fluoride in drinking water in relation to later dementia risk. British Journal of Psychiatry, 2020, 216, 29-34.	2.8	37
35	Association of inflammatory markers with hearing impairment: The English Longitudinal Study of Ageing. Brain, Behavior, and Immunity, 2020, 83, 112-119.	4.1	21
36	Reply to Veronese and Smith: Healthy dietary indices and risk of depressive outcomes: a systematic review and meta-analysis of observational studies. Molecular Psychiatry, 2020, 25, 3121-3122.	7.9	5

#	Article	IF	Citations
37	Comparison of risk factors for coronary heart disease morbidity versus mortality. European Journal of Preventive Cardiology, 2020, 27, 2232-2234.	1.8	8
38	Personality, disabilityâ€free life years, and life expectancy: Individual participant metaâ€analysis of 131,195 individuals from 10 cohort studies. Journal of Personality, 2020, 88, 596-605.	3.2	14
39	Outâ€ofâ€home care in childhood and biomedical risk factors in middleâ€age: National birth cohort study. American Journal of Human Biology, 2020, 32, e23343.	1.6	14
40	BLOOD PRESSURE TRAJECTORIES IN YOUTH AND HYPERTENSION RISK IN ADULTHOOD: THE 1970 BRITISH COHORT STUDY. American Journal of Epidemiology, 2020, 189, 162-163.	3.4	4
41	Does the social context of early alcohol use affect alcohol-related harms in adulthood? Findings from a national birth cohort. Preventive Medicine, 2020, 130, 105947.	3.4	2
42	Long working hours and change in body weight: analysis of individual-participant data from 19 cohort studies. International Journal of Obesity, 2020, 44, 1368-1375.	3.4	29
43	Association of anthropometry and weight change with risk of dementia and its major subtypes: A metaâ€analysis consisting 2.8 million adults with 57 294 cases of dementia. Obesity Reviews, 2020, 21, e12989.	6.5	62
44	Response. Chest, 2020, 158, 834-835.	0.8	0
45	Vascular risk factors, Framingham risk score, and COVID-19: community-based cohort study. Cardiovascular Research, 2020, 116, 1664-1665.	3.8	13
46	Overweight, obesity, and risk of hospitalization for COVID-19: A community-based cohort study of adults in the United Kingdom. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 21011-21013.	7.1	171
47	Diabetes, glycaemic control, and risk of COVID-19 hospitalisation: Population-based, prospective cohort study. Metabolism: Clinical and Experimental, 2020, 112, 154344.	3.4	34
48	Association of Alcohol-Induced Loss of Consciousness and Overall Alcohol Consumption With Risk for Dementia. JAMA Network Open, 2020, 3, e2016084.	5.9	18
49	Stroke, genetic risk and incidence of dementia. Alzheimer's and Dementia, 2020, 16, e045870.	0.8	0
50	Genetic risk, education and incidence of dementia. Alzheimer's and Dementia, 2020, 16, e045903.	0.8	2
51	Identifying key features for dementia diagnosis using machine learning. Alzheimer's and Dementia, 2020, 16, e046092.	0.8	3
52	Association of Childhood Psychomotor Coordination With Survival Up to 6 Decades Later. JAMA Network Open, 2020, 3, e204031.	5.9	3
53	The WHO/ILO report on long working hours and ischaemic heart disease â€“ Conclusions are not supported by the evidence. Environment International, 2020, 144, 106048.	10.0	11
54	Systolic inter-arm blood pressure difference and risk of cognitive decline in older people: a cohort study. British Journal of General Practice, 2020, 70, e472-e480.	1.4	7

#	Article	IF	Citations
55	Association of illicit drug use in adolescence with socioeconomic and criminal justice outcomes in adulthood: prospective findings from a UK national birth cohort. Journal of Epidemiology and Community Health, 2020, 74, jech-2019-213282.	3.7	1
56	Comparison of risk factor associations in UK Biobank against representative, general population based studies with conventional response rates: prospective cohort study and individual participant meta-analysis. BMJ, The, 2020, 368, m131.	6.0	363
57	Ethnic disparities in hospitalisation for COVID-19 in England: The role of socioeconomic factors, mental health, and inflammatory and pro-inflammatory factors in a community-based cohort study. Brain, Behavior, and Immunity, 2020, 88, 44-49.	4.1	174
58	Markers of Early Life Infection in Relation to Adult Diabetes: Prospective Evidence From a National Birth Cohort Study Over Four Decades. Diabetes Care, 2020, 43, e61-e62.	8.6	2
59	Psychosocial factors and hospitalisations for COVID-19: Prospective cohort study based on a community sample. Brain, Behavior, and Immunity, 2020, 89, 569-578.	4.1	92
60	Estimated cardiorespiratory fitness in childhood and cardiometabolic health in adulthood: 1970 British Cohort Study. Scandinavian Journal of Medicine and Science in Sports, 2020, 30, 932-938.	2.9	17
61	Socioeconomic Inequalities in Disability-free Life Expectancy in Older People from England and the United States: A Cross-national Population-Based Study. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2020, 75, 906-913.	3.6	56
62	Respiratory Disease and Lower Pulmonary Function as Risk Factors for Dementia. Chest, 2020, 157, 1538-1558.	0.8	45
63	Change in device-measured physical activity assessed in childhood and adolescence in relation to depressive symptoms: a general population-based cohort study. Journal of Epidemiology and Community Health, 2020, 74, 330-335.	3.7	10
64	Association between socioeconomic status and the development of mental and physical health conditions in adulthood: a multi-cohort study. Lancet Public Health, The, 2020, 5, e140-e149.	10.0	332
65	Association of Healthy Lifestyle With Years Lived Without Major Chronic Diseases. JAMA Internal Medicine, 2020, 180, 760.	5.1	140
66	Lifestyle risk factors, inflammatory mechanisms, and COVID-19 hospitalization: A community-based cohort study of 387,109 adults in UK. Brain, Behavior, and Immunity, 2020, 87, 184-187.	4.1	423
67	Using a knowledge exchange event to assess study participantsâ€™ attitudes to research in a rapidly evolving research context. Wellcome Open Research, 2020, 5, 24.	1.8	3
68	Using a knowledge exchange event to assess study participantsâ€™ attitudes to research in a rapidly evolving research context. Wellcome Open Research, 2020, 5, 24.	1.8	4
69	Assessment of Relative Utility of Underlying vs Contributory Causes of Death. JAMA Network Open, 2019, 2, e198024.	5.9	18
70	Underestimating the true impact of obesity â€“ Authors' reply. Lancet Public Health, The, 2019, 4, e17.	10.0	0
71	Does inflammation provide a link between psychosocial work characteristics and diabetes? Analysis of the role of interleukin-6 and C-reactive protein in the Whitehall II cohort study. Brain, Behavior, and Immunity, 2019, 78, 153-160.	4.1	15
72	Association of change in cognitive function from early adulthood to middle age with risk of cause-specific mortality: the Vietnam Experience Study. Journal of Epidemiology and Community Health, 2019, 73, 712-716.	3.7	2

#	Article	IF	Citations
73	Physical inactivity, cardiometabolic disease, and risk of dementia: an individual-participant meta-analysis. BMJ: British Medical Journal, 2019, 365, l1495.	2.3	168
74	Testing Differential Associations Between Smoking and Chronic Disease Across Socioeconomic Groups. Epidemiology, 2019, 30, 48-51.	2.7	6
75	Cognitive ability and risk of death from lower respiratory tract infection: findings from UK Biobank. Scientific Reports, 2019, 9, 1342.	3.3	10
76	Conditioning on a Collider May or May Not Explain the Relationship Between Lower Neuroticism and Premature Mortality in the Study by Gale et al. (2017): A Reply to Richardson, Davey Smith, and MunafÃ² (2019). Psychological Science, 2019, 30, 633-638.	3.3	5
77	The Authors Respond. Epidemiology, 2019, 30, e39-e39.	2.7	0
78	Semen Quality and Risk Factors for Mortality. Epidemiology, 2019, 30, e19-e21.	2.7	8
79	Psychological distress and infectious disease mortality in the general population. Brain, Behavior, and Immunity, 2019, 76, 280-283.	4.1	28
80	Association of body mass index and waist-to-hip ratio with brain structure. Neurology, 2019, 92, e594-e600.	1.1	130
81	Are subjective memory complaints indicative of objective cognitive decline or depressive symptoms? Findings from the English Longitudinal Study of Ageing. Journal of Psychiatric Research, 2019, 110, 143-151.	3.1	46
82	Five-decade trajectories in body mass index in relation to dementia death: follow-up of 33,083 male Harvard University alumni. International Journal of Obesity, 2019, 43, 1822-1829.	3.4	11
83	Predictors of dementia misclassification when using brief cognitive assessments. Neurology: Clinical Practice, 2019, 9, 109-117.	1.6	43
84	Healthy dietary indices and risk of depressive outcomes: a systematic review and meta-analysis of observational studies. Molecular Psychiatry, 2019, 24, 965-986.	7.9	427
85	Association of 10-Year C-Reactive Protein Trajectories With Markers of Healthy Aging: Findings From the English Longitudinal Study of Aging. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2019, 74, 195-203.	3.6	60
86	Oral health and later coronary heart disease: Cohort study of one million people. European Journal of Preventive Cardiology, 2018, 25, 598-605.	1.8	37
87	Cognitive function trajectories and their determinants in older people: 8 years of follow-up in the English Longitudinal Study of Ageing. Journal of Epidemiology and Community Health, 2018, 72, 685-694.	3.7	184
88	Association between changes in lifestyle and all-cause mortality: the Health and Lifestyle Survey. Journal of Epidemiology and Community Health, 2018, 72, 711-714.	3.7	14
89	Biomarker assessment of tobacco smoking exposure and risk of dementia death: pooling of individual participant data from 14 cohort studies. Journal of Epidemiology and Community Health, 2018, 72, 513-515.	3.7	15
90	Psychosocial characteristics as potential predictors of suicide in adults: an overview of the evidence with new results from prospective cohort studies. Translational Psychiatry, 2018, 8, 22.	4.8	93

#	Article	IF	Citations
91	Association of nursery and early school attendance with later health behaviours, biomedical risk factors, and mortality: evidence from four decades of follow-up of participants in the 1958 birth cohort study. Journal of Epidemiology and Community Health, 2018, 72, 658-663.	3.7	6
92	Systemic inflammation and suicide risk: cohort study of 419 527 Korean men and women. Journal of Epidemiology and Community Health, 2018, 72, 572-574.	3.7	20
93	Changes in Health Behaviors and Longevity. Epidemiology, 2018, 29, e26-e27.	2.7	2
94	Characteristics of Social Networks and Mortality Risk: Evidence From 2 Prospective Cohort Studies. American Journal of Epidemiology, 2018, 187, 746-753.	3.4	20
95	Intelligence and all-cause mortality in the 6-Day Sample of the Scottish Mental Survey 1947 and their siblings: testing the contribution of family background. International Journal of Epidemiology, 2018, 47, 89-96.	1.9	11
96	Body mass index and risk of dementia: Analysis of individualâ€level data from 1.3 million individuals. Alzheimer's and Dementia, 2018, 14, 601-609.	0.8	284
97	Exposure to Passive Smoking and Impairment in Physical Function in Older People. Epidemiology, 2018, 29, e11-e12.	2.7	4
98	Socio-economic trajectories and cardiovascular disease mortality in older people: the English Longitudinal Study of Ageing. International Journal of Epidemiology, 2018, 47, 36-46.	1.9	61
99	Long Working Hours and Risk of Venous Thromboembolism. Epidemiology, 2018, 29, e42-e44.	2.7	7
100	Animal Companionship and Risk of Suicide. Epidemiology, 2018, 29, e25-e26.	2.7	5
101	Personality traits and risk of suicide mortality: findings from a multiâ€cohort study in the general population. World Psychiatry, 2018, 17, 371-372.	10.4	14
102	Obesity and loss of disease-free years owing to major non-communicable diseases: a multicohort study. Lancet Public Health, The, 2018, 3, e490-e497.	10.0	241
103	Stroke and dementia risk: A systematic review and metaâ€analysis. Alzheimer's and Dementia, 2018, 14, 1416-1426.	0.8	210
104	Individual and Area-Based Socioeconomic Factors Associated With Dementia Incidence in England. JAMA Psychiatry, 2018, 75, 723.	11.0	145
105	Association of objectively measured physical activity with brain structure: UK Biobank study. Journal of Internal Medicine, 2018, 284, 439-443.	6.0	49
106	Personality and Type 2 Diabetes. , 2018, , 69-82.		3
107	Caseâ€finding in clinical practice: An appropriate strategy for dementia identification?. Alzheimer's and Dementia: Translational Research and Clinical Interventions, 2018, 4, 288-296.	3.7	14
108	Work stress and risk of death in men and women with and without cardiometabolic disease: a multicohort study. Lancet Diabetes and Endocrinology,the, 2018, 6, 705-713.	11.4	100

#	Article	IF	Citations
109	Long working hours and depressive symptoms: systematic review and meta-analysis of published studies and unpublished individual participant data. Scandinavian Journal of Work, Environment and Health, 2018, 44, 239-250.	3.4	135
110	Differential impact of smoking on cause-specific mortality by socioeconomic position. European Journal of Public Health, 2018, 28, .	0.3	0
111	Job strain as a risk factor for clinical depression: systematic review and meta-analysis with additional individual participant data. Psychological Medicine, 2017, 47, 1342-1356.	4.5	314
112	Intelligence and neuroticism in relation to depression and psychological distress: Evidence from two large population cohorts. European Psychiatry, 2017, 43, 58-65.	0.2	38
113	Coronary heart disease and risk factors as predictors of trajectories of psychological distress from midlife to old age. Heart, 2017, 103, 659-665.	2.9	14
114	Effortâ€"Reward Imbalance at Work and Incident Coronary Heart Disease. Epidemiology, 2017, 28, 619-626.	2.7	224
115	Childhood IQ and survival to 79: Follow-up of 94% of the Scottish Mental Survey 1947. Intelligence, 2017, 63, 45-50.	3.0	33
116	Overweight, obesity, and risk of cardiometabolic multimorbidity: pooled analysis of individual-level data for 120â€ˆ813 adults from 16 cohort studies from the USA and Europe. Lancet Public Health, The, 2017, 2, e277-e285.	10.0	375
117	Validity of Cardiovascular Disease Event Ascertainment Using Linkage to UK Hospital Records. Epidemiology, 2017, 28, 735-739.	2.7	69
118	Childhood Cognitive Ability and Incident Dementia. Epidemiology, 2017, 28, 361-364.	2.7	44
119	Oral health in relation to all-cause mortality: the IPC cohort study. Scientific Reports, 2017, 7, 44604.	3.3	48
120	Vitamin D and cognitive function: A Mendelian randomisation study. Scientific Reports, 2017, 7, 13230.	3.3	50
121	Development and validation of a risk prediction model for work disability: multicohort study. Scientific Reports, 2017, 7, 13578.	3.3	26
122	When Is Higher Neuroticism Protective Against Death? Findings From UK Biobank. Psychological Science, 2017, 28, 1345-1357.	3.3	51
123	History, politics and vulnerability: explaining excess mortality in Scotland and Glasgow. Public Health, 2017, 151, 1-12.	2.9	53
124	Early Life Origins of Hearing Impairment in Older People. Epidemiology, 2017, 28, e34-e35.	2.7	4
125	Insulin-like Growth Factor 1 in relation to future hearing impairment: findings from the English Longitudinal Study of Ageing. Scientific Reports, 2017, 7, 4212.	3.3	29
126	Big data and data repurposing - using existing data to answer new questions in vascular dementia research. BMC Neurology, 2017, 17, 72.	1.8	24

#	Article	IF	Citations
127	Association of inflammation with specific symptoms of depression in a general population of older people: The English Longitudinal Study of Ageing. Brain, Behavior, and Immunity, 2017, 61, 27-30.	4.1	69
128	Association of physical activity as a distinctive feature of clustering of lifestyle behaviours with dementia risk: evidence from the English Longitudinal Study of Ageing. Lancet, The, 2017, 390, S29.	13.7	0
129	Childhood intelligence in relation to major causes of death in 68 year follow-up: prospective population study. BMJ: British Medical Journal, 2017, 357, j2708.	2.3	125
130	Associations of pet ownership with biomarkers of ageing: population based cohort study. BMJ: British Medical Journal, 2017, 359, j5558.	2.3	23
131	Long working hours as a risk factor for atrial fibrillation: a multi-cohort study. European Heart Journal, 2017, 38, 2621-2628.	2.2	76
132	P08â€...Incidence of diagnosed dementia in the english longitudinal study of ageing in england: a 12-year follow-up. , 2017, , .		1
133	OP51â€...Functional and mental health trajectories predicting dementia incidence: latent class analysis in the english longitudinal study of ageing. , 2017, , .		0
134	Psychological distress in relation to site specific cancer mortality: pooling of unpublished data from 16 prospective cohort studies. BMJ: British Medical Journal, 2017, 356, j108.	2.3	245
135	Haplotype-based association analysis of general cognitive ability in Generation Scotland, the English Longitudinal Study of Ageing, and UK Biobank. Wellcome Open Research, 2017, 2, 61.	1.8	4
136	The level of cognitive function and recognition of emotions in older adults. PLoS ONE, 2017, 12, e0185513.	2.5	27
137	Psychosocial epidemiology. , 2017, , 3-20.		0
138	Type 2 Diabetes as a Risk Factor for Dementia in Women Compared With Men: A Pooled Analysis of 2.3 Million People Comprising More Than 100,000 Cases of Dementia. Diabetes Care, 2016, 39, 300-307.	8.6	450
