| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 1 | Infant biases for detecting speech in complex scenes.. <i>Developmental Psychology</i> , 2021, 57, 1411-1422. | 1.6 | 1 |
| 2 | Does an Early Speech Preference Predict Linguistic and Social-Pragmatic Attention in Infants Displaying and Not Displaying Later ASD Symptoms?. <i>Journal of Autism and Developmental Disorders</i> , 2020, 50, 2475-2490. | 2.7 | 0 |
| 3 | Five-month-old infants detect affiliation in colughter. <i>Scientific Reports</i> , 2019, 9, 4158. | 3.3 | 8 |
| 4 | Using Spline Models to Analyze Event-Based Changes in Eye Tracking Data. <i>Journal of Cognition and Development</i> , 2019, 20, 299-313. | 1.3 | 0 |
| 5 | Shifting Preferences for Primate Faces in Neurotypical Infants and Infants Later Diagnosed With ASD. <i>Autism Research</i> , 2019, 12, 249-262. | 3.8 | 5 |
| 6 | Preference for speech in infancy differentially predicts language skills and autism-like behaviors. <i>Journal of Experimental Child Psychology</i> , 2019, 178, 295-316. | 1.4 | 5 |
| 7 | Are linguistic and social-pragmatic abilities separable in neurotypical infants and infants later diagnosed with ASD?. <i>Developmental Psychology</i> , 2019, 55, 920-933. | 1.6 | 3 |
| 8 | Voulez-vous jouer avec moi? Twelve-month-olds understand that foreign languages can communicate. <i>Cognition</i> , 2018, 173, 87-92. | 2.2 | 10 |
| 9 | Is Visual Perceptual Narrowing an Obligatory Developmental Process?. <i>Frontiers in Psychology</i> , 2018, 9, 2326. | 2.1 | 0 |
| 10 | How do infants and adults process communicative events in real time?. <i>Journal of Experimental Child Psychology</i> , 2018, 173, 268-283. | 1.4 | 8 |
| 11 | Who can communicate with whom? Language experience affects infants'™ evaluation of others as monolingual or multilingual. <i>Cognition</i> , 2015, 134, 185-192. | 2.2 | 17 |
| 12 | I See Your Point: Infants Under 12 Months Understand That Pointing Is Communicative. <i>Journal of Cognition and Development</i> , 2014, 15, 527-538. | 1.3 | 29 |
| 13 | Neural specialization for speech in the first months of life. <i>Developmental Science</i> , 2014, 17, 766-774. | 2.4 | 109 |
| 14 | Listen up! Speech is for thinking during infancy. <i>Trends in Cognitive Sciences</i> , 2014, 18, 642-646. | 7.8 | 48 |
| 15 | Do 6-month-olds understand that speech can communicate?. <i>Developmental Science</i> , 2014, 17, 872-879. | 2.4 | 87 |
| 16 | When and how does autism begin?. <i>Trends in Cognitive Sciences</i> , 2014, 18, 272-273. | 7.8 | 3 |
| 17 | Foundational Tuning: How Infants' Attention to Speech Predicts Language Development. <i>Cognitive Science</i> , 2014, 38, 1675-1686. | 1.7 | 51 |
| 18 | Speech Preference is Associated with Autistic-Like Behavior in 18-Months-Olds at Risk for Autism Spectrum Disorder. <i>Journal of Autism and Developmental Disorders</i> , 2013, 43, 2114-2120. | 2.7 | 42 |

| # | ARTICLE | IF | CITATIONS |
|----|--|------|-----------|
| 19 | Infant perception of atypical speech signals.. <i>Developmental Psychology</i> , 2013, 49, 815-824. | 1.6 | 4 |
| 20 | Linking Infant-Directed Speech and Face Preferences to Language Outcomes in Infants at Risk for Autism Spectrum Disorder. <i>Journal of Speech, Language, and Hearing Research</i> , 2013, 56, 567-576. | 1.6 | 26 |
| 21 | Age-related sensitive periods influence visual language discrimination in adults. <i>Frontiers in Systems Neuroscience</i> , 2013, 7, 86. | 2.5 | 15 |
| 22 | The Superior Temporal Sulcus Differentiates Communicative and Noncommunicative Auditory Signals. <i>Journal of Cognitive Neuroscience</i> , 2012, 24, 1224-1232. | 2.3 | 31 |
| 23 | Twelve-month-old infants recognize that speech can communicate unobservable intentions. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012, 109, 12933-12937. | 7.1 | 59 |
| 24 | Are the Products of Statistical Learning Abstract or Stimulus-Specific?. <i>Frontiers in Psychology</i> , 2012, 3, 70. | 2.1 | 5 |
| 25 | Understanding the abstract role of speech in communication at 12months. <i>Cognition</i> , 2012, 123, 50-60. | 2.2 | 85 |
| 26 | Exclusion Constraints Facilitate Statistical Word Learning. <i>Cognitive Science</i> , 2012, 36, 933-947. | 1.7 | 2 |
| 27 | The Tuning of Human Neonates' Preference for Speech. <i>Child Development</i> , 2010, 81, 517-527. | 3.0 | 190 |
| 28 | Three-Month-Olds Prefer Speech to Other Naturally Occurring Signals. <i>Language Learning and Development</i> , 2010, 6, 241-257. | 1.4 | 58 |
| 29 | Five-month-old infants' identification of the sources of vocalizations. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2009, 106, 18867-18872. | 7.1 | 46 |
| 30 | Infants' learning of novel words in a stochastic environment.. <i>Developmental Psychology</i> , 2009, 45, 1611-1617. | 1.6 | 81 |
| 31 | Fine-grained sensitivity to statistical information in adult word learning. <i>Cognition</i> , 2008, 107, 729-742. | 2.2 | 83 |
| 32 | Visual Language Discrimination in Infancy. <i>Science</i> , 2007, 316, 1159-1159. | 12.6 | 312 |
| 33 | Listening to language at birth: evidence for a bias for speech in neonates. <i>Developmental Science</i> , 2007, 10, 159-164. | 2.4 | 504 |
| 34 | Why voice melody alone cannot explain neonates' preference for speech. <i>Developmental Science</i> , 2007, 10, 169-171. | 2.4 | 13 |
| 35 | Discriminating languages by speech-reading. <i>Perception & Psychophysics</i> , 2007, 69, 218-231. | 2.3 | 60 |
| 36 | Do you hear what I hear? Neural correlates of thought disorder during listening to speech in schizophrenia. <i>Schizophrenia Research</i> , 2006, 86, 130-137. | 2.0 | 34 |

| # | ARTICLE | IF | CITATIONS |
|----|---|------|-----------|
| 37 | Tuned to the signal: the privileged status of speech for young infants. <i>Developmental Science</i> , 2004, 7, 270-276. | 2.4 | 220 |
| 38 | Abnormal processing of speech during oddball target detection in schizophrenia. <i>NeuroImage</i> , 2003, 20, 889-897. | 4.2 | 43 |
| 39 | Detection of Sounds in the Auditory Stream: Event-Related fMRI Evidence for Differential Activation to Speech and Nonspeech. <i>Journal of Cognitive Neuroscience</i> , 2001, 13, 994-1005. | 2.3 | 188 |
| 40 | LANGUAGE:Who's Got Rhythm?. <i>Science</i> , 2000, 288, 280-281. | 12.6 | 44 |
