| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Ventral tegmental area dopamine revisited: effects of acute and repeated stress. Psychopharmacology, 2016, 233, 163-186.  | 3.1 | 201       |
| 2  | Social Stress and CRF–Dopamine Interactions in the VTA: Role in Long-Term Escalation of Cocaine Self-Administration. Journal of Neuroscience, 2014, 34, 6659-6667.  | 3.6 | 85        |
| 3  | Sex differences in behavioral and neural cross-sensitization and escalated cocaine taking as a result of episodic social defeat stress in rats. Psychopharmacology, 2012, 224, 179-188.                                   | 3.1 | 84        |
| 4  | Blunted accumbal dopamine response to cocaine following chronic social stress in female rats: exploring a link between depression and drug abuse. Psychopharmacology, 2011, 218, 271-279.                                 | 3.1 | 71        |
| 5  | Increased mesocorticolimbic dopamine during acute and repeated social defeat stress: modulation by corticotropin releasing factor receptors in the ventral tegmental area. Psychopharmacology, 2015, 232, 4469-4479.      | 3.1 | 69        |
| 6  | Episodic Social Stress-Escalated Cocaine Self-Administration: Role of Phasic and Tonic Corticotropin Releasing Factor in the Anterior and Posterior Ventral Tegmental Area. Journal of Neuroscience, 2016, 36, 4093-4105. | 3.6 | 65        |
| 7  | Social stress-escalated intermittent alcohol drinking: modulation by CRF-R1 in the ventral tegmental area and accumbal dopamine in mice. Psychopharmacology, 2016, 233, 681-690.  | 3.1 | 54        |
| 8  | Individual differences in anhedonic and accumbal dopamine responses to chronic social stress and their link to cocaine self-administration in female rats. Psychopharmacology, 2015, 232, 825-834.                        | 3.1 | 52        |
| 9  | Striatal Low-Threshold Spiking Interneurons Regulate Goal-Directed Learning. Neuron, 2019, 103, 92-101.e6.  | 8.1 | 50        |
| 10 | Integrated anatomical and physiological mapping of striatal afferent projections. European Journal of Neuroscience, 2019, 49, 623-636.  | 2.6 | 39        |
| 11 | The neurotensin-1 receptor agonist PD149163 inhibits conditioned avoidance responding without producing catalepsy in rats. European Neuropsychopharmacology, 2011, 21, 526-531.   | 0.7 | 15        |
| 12 | Capturing Individual Differences: Challenges in Animal Models of Posttraumatic Stress Disorder and Drug Abuse. Biological Psychiatry, 2015, 78, 816-818.  | 1.3 | 13        |
| 13 | Striatal low-threshold spiking interneurons locally gate dopamine. Current Biology, 2021, 31, 4139-4147.e6.   | 3.9 | 10        |
| 14 | Maladaptive choices by defeated rats: link between rapid approach to social threat and escalated cocaine self-administration. Psychopharmacology, 2016, 233, 3173-3186.   | 3.1 | 7         |
| 15 | Direct CRFR1 antagonism within the VTA prevents the induction and expression of neural crossâ€sensitization to cocaine caused by social defeat stress. FASEB Journal, 2013, 27, 659.9.                                    | 0.5 | O         |
