#	ARTICLE	IF	CITATIONS
1	Changes in Pain Coping, Catastrophizing, and Coping Efficacy After Cognitive-Behavioral Therapy in Children and Adolescents With Juvenile Fibromyalgia. <i>Journal of Pain</i> , 2013, 14, 492-501.	1.4	97
2	Long-Term Outcomes of Adolescents With Juvenile-Onset Fibromyalgia in Early Adulthood. <i>Pediatrics</i> , 2014, 133, e592-e600.	2.1	97
3	Psychosocial and Functional Outcomes in Youth With Chronic Sickle Cell Pain. <i>Clinical Journal of Pain</i> , 2016, 32, 527-533.	1.9	94
4	Differential changes in functional disability and pain intensity over the course of psychological treatment for children with chronic pain. <i>Pain</i> , 2014, 155, 1955-1961.	4.2	84
5	Videogame Distraction using Virtual Reality Technology for Children Experiencing Cold Pressor Pain: The Role of Cognitive Processing. <i>Journal of Pediatric Psychology</i> , 2010, 36, 84-94.	2.1	71
6	Child Pain Catastrophizing Mediates the Relation Between Parent Responses to Pain and Disability in Youth With Functional Abdominal Pain. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2014, 59, 732-738.	1.8	55
7	Identifying treatment responders and predictors of improvement after cognitive-behavioral therapy for juvenile fibromyalgia. <i>Pain</i> , 2014, 155, 1206-1212.	4.2	54
8	The effects of coping style on virtual reality enhanced videogame distraction in children undergoing cold pressor pain. <i>Journal of Behavioral Medicine</i> , 2014, 37, 156-165.	2.1	45
9	Physical activity monitoring in adolescents with juvenile fibromyalgia: Findings from a clinical trial of cognitive-behavioral therapy. <i>Arthritis Care and Research</i> , 2013, 65, 398-405.	3.4	43
10	A Qualitative Examination of a New Combined Cognitive-Behavioral and Neuromuscular Training Intervention for Juvenile Fibromyalgia. <i>Clinical Journal of Pain</i> , 2016, 32, 70-81.	1.9	42
11	Preliminary Evidence of Altered Biomechanics in Adolescents With Juvenile Fibromyalgia. <i>Arthritis Care and Research</i> , 2015, 67, 102-111.	3.4	35
12	Preliminary Outcomes of a Cross-Site Cognitive-Behavioral and Neuromuscular Integrative Training Intervention for Juvenile Fibromyalgia. <i>Arthritis Care and Research</i> , 2017, 69, 413-420.	3.4	34
13	Stigma and Pain in Adolescents Hospitalized for Sickle Cell Vasoocclusive Pain Episodes. <i>Clinical Journal of Pain</i> , 2018, 34, 438-444.	1.9	34
14	Psychiatric Disorders in Young Adults Diagnosed with Juvenile Fibromyalgia in Adolescence. <i>Journal of Rheumatology</i> , 2015, 42, 2427-2433.	2.0	32
15	Executive Functioning Mediates the Relationship Between Pain Coping and Quality of Life in Youth With Sickle Cell Disease. <i>Journal of Pediatric Psychology</i> , 2018, 43, 1160-1169.	2.1	30
16	Pediatric Sickle Cell Disease and Parent and Child Catastrophizing. <i>Journal of Pain</i> , 2016, 17, 963-971.	1.4	25
17	A pilot study of biomechanical assessment before and after an integrative training program for adolescents with juvenile fibromyalgia. <i>Pediatric Rheumatology</i> , 2016, 14, 43.	2.1	21
18	Influence of Family Environment on Long-Term Psychosocial Functioning of Adolescents With Juvenile Fibromyalgia. <i>Arthritis Care and Research</i> , 2013, 65, 903-909.	3.4	20

#	ARTICLE	IF	CITATIONS
19	Changes in Pain and Psychosocial Functioning and Transition to Chronic Pain in Pediatric Sickle Cell Disease. <i>Clinical Journal of Pain</i> , 2020, 36, 463-471.	1.9	19
20	Parent pain catastrophizing predicts child depressive symptoms in youth with sickle cell disease. <i>Pediatric Blood and Cancer</i> , 2018, 65, e27027.	1.5	17
21	Case Study: Videogame Distraction Reduces Behavioral Distress in a Preschool-Aged Child Undergoing Repeated Burn Dressing Changes: A Single-Subject Design. <i>Journal of Pediatric Psychology</i> , 2013, 38, 330-341.	2.1	16
22	Preliminary evaluation of the clinical implementation of cognitive-behavioral therapy for chronic pain management in pediatric sickle cell disease. <i>Complementary Therapies in Medicine</i> , 2020, 49, 102348.	2.7	16
23	Can Modified Neuromuscular Training Support the Treatment of Chronic Pain in Adolescents?. <i>Strength and Conditioning Journal</i> , 2013, 35, 12-26.	1.4	14
24	Pediatric pain screening identifies youth at risk of chronic pain in sickle cell disease. <i>Pediatric Blood and Cancer</i> , 2019, 66, e27538.	1.5	14
25	Understanding why cognitive-behavioral therapy is an effective treatment for adolescents with juvenile fibromyalgia. <i>International Journal of Clinical Rheumatology</i> , 2013, 8, 213-219.	0.3	13
26	Parental Psychosocial Distress in Pediatric Sickle Cell Disease and Chronic Pain. <i>Journal of Pediatric Psychology</i> , 2021, 46, 557-569.	2.1	12
27	Cross-Sectional Study of Young Adults Diagnosed With Juvenile Fibromyalgia: Social Support and Its Impact on Functioning and Mood. <i>Journal of Adolescent Health</i> , 2015, 57, 482-487.	2.5	10
28	Topical Review: State of the Field of Child Self-Report of Acute Pain. <i>Journal of Pediatric Psychology</i> , 2020, 45, 239-246.	2.1	8
29	Clinical Utility of CAT Administered PROMIS Measures to Track Change for Pediatric Chronic Pain. <i>Journal of Pain</i> , 2022, 23, 55-64.	1.4	8
30	Measuring treatment response in an outpatient pediatric pain program.. <i>Clinical Practice in Pediatric Psychology</i> , 2015, 3, 1-11.	0.3	7
31	The distinct longitudinal impact of pain catastrophizing on pain interference among youth living with sickle cell disease and chronic pain. <i>Journal of Behavioral Medicine</i> , 2022, 45, 622-631.	2.1	6
32	Biopsychosocial Factors Associated with Parenting Stress in Pediatric Sickle Cell Disease. <i>Journal of Clinical Psychology in Medical Settings</i> , 2022, 29, 365-374.	1.4	5
33	The comfort ability program for adolescents with sickle cell pain: Evaluating feasibility and acceptability of an inpatient group-based clinical implementation. <i>Pediatric Blood and Cancer</i> , 2021, 68, e29013.	1.5	4
34	Pain and QOL in Pediatric Sickle Cell Disease: Buffering by Resilience Processes. <i>Journal of Pediatric Psychology</i> , 2021, 46, 1015-1024.	2.1	4
35	Identification of pica behaviors in youth with sickle cell disease: A quality improvement (QI) project.. <i>Clinical Practice in Pediatric Psychology</i> , 2015, 3, 167-174.	0.3	3
36	Enhancing pain assessment in pediatric sickle cell disease by applying quality improvement science.. <i>Clinical Practice in Pediatric Psychology</i> , 2019, 7, 335-346.	0.3	3

#	ARTICLE	IF	CITATIONS
37	Psychosocial risk and health care utilization in pediatric sickle cell disease. <i>Pediatric Blood and Cancer</i> , 2021, 68, e29139.	1.5	2
38	Moving Beyond Patient-Level Drivers of Racial/Ethnic Disparities in Childhood Cancer. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2022, 31, 1154-1158.	2.5	1
39	An Empirical Classification of Chronic Pain Subgroups in Pediatric Sickle Cell Disease: A Cluster-Analytic Approach. <i>Blood</i> , 2021, 138, 491-491.	1.4	0
