#	Article	IF	CITATIONS
1	Distinctive egg-laying patterns in terminal versus non-terminal periods in three fruit fly species. Experimental Gerontology, 2021, 145, 111201.	2.8	1
2	Differential response to larval crowding of a long―and a shortâ€ i ived medfly biotype. Journal of Evolutionary Biology, 2020, 33, 329-341.	1.7	7
3	The failure of success: cyclic recurrences of a globally invasive pest. Ecological Applications, 2019, 29, e01991.	3.8	10
4	Age, sex, adult and larval diet shape starvation resistance in the Mediterranean fruit fly: an ecological and gerontological perspective. Scientific Reports, 2019, 9, 10704.	3.3	5
5	Effects of early-life protein starvation on longevity and sexual performance of male medfly. PLoS ONE, 2019, 14, e0219518.	2.5	10
6	On the Three Properties of Stationary Populations and Knotting with Non-stationary Populations. Bulletin of Mathematical Biology, 2019, 81, 4233-4250.	1.9	6
7	Life table invasion models: spatial progression and speciesâ€specific partitioning. Ecology, 2019, 100, e02682.	3.2	10
8	27 Biodemography. Handbooks of Sociology and Social Research, 2019, , 713-745.	0.1	2
9	Behavior of Stationary Population Identity in Two-Dimensions: Age and Proportion of Population Truncated in Follow-up. Handbook of Statistics, 2019, , 487-500.	0.6	0
10	The Life Table Population Identity: Discovery, Formulations, Proof, Extensions, and Applications. Handbook of Statistics, 2018, 39, 155-186.	0.6	8
11	Quantifying functionals of age distributions in the wild by solving an operator equation. Journal of Mathematical Biology, 2017, 75, 973-984.	1.9	0
12	The 30‥ear Debate on a Multiâ€Billionâ€Dollar Threat: Tephritid Fruit Fly Establishment in California. American Entomologist, 2017, 63, 100-113.	0.2	20
13	Tephritid Pest Populations Oriental Fruit Fly Outbreaks in California: 48 Consecutive Years, 235 Cities, 1,500 Detections—and Counting. American Entomologist, 2017, 63, 232-236.	0.2	5
14	Seasonality of Post-capture Longevity in a Medically-Important Mosquito (Culex pipiens). Frontiers in Ecology and Evolution, 2016, 4, .	2.2	10
15	Generalization of Carey's equality and a theorem on stationary population. Journal of Mathematical Biology, 2015, 71, 583-594.	1.9	17
16	Determinants of Reproductive Performance Among Female Gray-Cheeked Mangabeys (Lophocebus) Tj ETQqO	0 0 rgBT /O	verlock 10 Tf
17	Female access and diet affect insemination success, senescence and the cost of reproduction in the male <scp>M</scp> exican fruit fly <i><scp>A</scp>nastrepha ludens</i> . Physiological Entomology, 2015, 40, 65-71.	1.5	13

18Social and Ecological Correlates of Parasitic Infections in Adult Male Gray-Cheeked Mangabeys
(Lophocebus albigena). International Journal of Primatology, 2015, 36, 967-986.1.9

#	Article	IF	CITATIONS
19	Response to commentary by Gutierrez et al Proceedings of the Royal Society B: Biological Sciences, 2014, 281, 20132989.	2.6	4
20	Population Biology of Aging in the Wild. Annual Review of Ecology, Evolution, and Systematics, 2014, 45, 421-443.	8.3	49
21	Maternal Investment and Infant Survival in Gray-Cheeked Mangabeys (Lophocebus albigena). International Journal of Primatology, 2014, 35, 476-490.	1.9	13
22	Leg impairment magnifies reproductive costs in male <scp>M</scp> editerranean fruit flies, <i><scp>C</scp>eratitis capitata</i> . Entomologia Experimentalis Et Applicata, 2013, 147, 73-81.	1.4	7
23	From trickle to flood: the large-scale, cryptic invasion of California by tropical fruit flies. Proceedings of the Royal Society B: Biological Sciences, 2013, 280, 20131466.	2.6	98
24	Deleterious effect of suboptimal diet on rest-activity cycle in Anastrepha ludens manifests itself with age. Scientific Reports, 2013, 3, 1773.	3.3	6
25	Effects of diet and host access on fecundity andÂlifespan in two fruit fly species with different lifeâ€history patterns. Physiological Entomology, 2013, 38, 81-88.	1.5	23
26	Clear, Present, Significant, & Imminent Danger Questions for the California Light Brown Apple Moth (Epiphyas postvittana) Technical Working Group. American Entomologist, 2013, 59, 240-247.	0.2	7
27	Condition-Dependent Effects of Mating on Longevity and Fecundity of Female Medflies: The Interplay between Nutrition and Age of Mating. PLoS ONE, 2013, 8, e70181.	2.5	30
28	Exceptional Longevity in the Tephritid, Ceratitis rosa, a Close Relative of the Mediterranean Fruit Fly. Journal of Economic Entomology, 2012, 105, 371-373.	1.8	5
29	Estimating changes in mean population age using the death distributions of liveâ€captured medflies. Ecological Entomology, 2012, 37, 359-369.	2.2	13
30	Graphical and demographic synopsis of the captive cohort method for estimating population age structure in the wild. Experimental Gerontology, 2012, 47, 787-791.	2.8	14
31	Prolongevity effects of a botanical with oregano and cranberry extracts in Mexican fruit flies: examining interactions of diet restriction and age. Age, 2012, 34, 269-279.	3.0	19
32	The interplay among dietary fat, sugar, protein and açai (Euterpe oleracea Mart.) pulp in modulating lifespan and reproduction in a Tephritid fruit fly. Experimental Gerontology, 2012, 47, 536-539.	2.8	15
33	An Age-Structured Extension to the Vectorial Capacity Model. PLoS ONE, 2012, 7, e39479.	2.5	31
34	Social factors increase fecal testosterone levels in wild male gray-cheeked mangabeys (Lophocebus) Tj ETQq0 0 (D rgBT /Ov	erlock 10 Tf 5

35	Transplantation of young ovaries restored cardioprotective influence in postreproductive-aged mice. Aging Cell, 2011, 10, 448-456.	6.7	31
36	Seasonal trends in Ceratitis capitata reproductive potential derived from live-caught females in Greece. Entomologia Experimentalis Et Applicata, 2011, 140, 181-188.	1.4	7

#	Article	IF	CITATIONS
37	Ancestral populations perform better in a novel environment: domestication of Mediterranean fruit fly populations from five global regions. Biological Journal of the Linnean Society, 2011, 102, 334-345.	1.6	34
38	Dual reproductive cost of aging in male medflies: Dramatic decrease in mating competitiveness and gradual reduction in mating performance. Journal of Insect Physiology, 2011, 57, 1368-1374.	2.0	27
39	Biodemography of the Mediterranean fruit fly: Aging, longevity and adaptation in the wild. Experimental Gerontology, 2011, 46, 404-411.	2.8	31
40	Dietary effects on sex-specific health dynamics of medfly: Support for the dynamic equilibrium model of aging. Experimental Gerontology, 2011, 46, 1026-1030.	2.8	4
41	Populationâ€specific demography and invasion potential in medfly. Ecology and Evolution, 2011, 1, 479-488.	1.9	43
42	Recording Lifetime Behavior and Movement in an Invertebrate Model. PLoS ONE, 2011, 6, e18151.	2.5	30
43	Cost of reproduction in male medflies: The primacy of sexual courting in extreme longevity reduction. Journal of Insect Physiology, 2010, 56, 283-287.	2.0	57
44	Ovarian status influenced the rate of body-weight change but not the total amount of body-weight gained or lost in female CBA/J mice. Experimental Gerontology, 2010, 45, 435-441.	2.8	14
45	Reproductive aging in tephritid fruit flies. Annals of the New York Academy of Sciences, 2010, 1204, 139-148.	3.8	16
46	Lifespan of a Ceratitis fruit fly increases with higher altitude. Biological Journal of the Linnean Society, 2010, 101, 345-350.	1.6	18
47	Prolongevity Effects of an Oregano and Cranberry Extract are Diet Dependent in the Mexican Fruit Fly (Anastrepha ludens). Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2010, 65A, 41-50.	3.6	23
48	The Mediterranean Fruit Fly (Ceratitis capitata). American Entomologist, 2010, 56, 158-163.	0.2	22
49	Transplantation of Young Ovaries to Old Mice Increased Life Span in Transplant Recipients. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2009, 64A, 1207-1211.	3.6	84
50	Reproduction is adapted to survival characteristics across geographically isolated medfly populations. Proceedings of the Royal Society B: Biological Sciences, 2009, 276, 4409-4416.	2.6	16
51	Nutrients in fruit increase fertility in wild-caught females of large and long-lived Euphaedra species (Lepidoptera, Nymphalidae). Journal of Insect Physiology, 2009, 55, 375-383.	2.0	14
52	The prolongevity effect of resveratrol depends on dietary composition and calorie intake in a tephritid fruit fly. Experimental Gerontology, 2009, 44, 472-476.	2.8	44
53	Leg impairments elicit graded and sex-specific demographic responses in the tephritid fruit fly Anastrepha ludens. Experimental Gerontology, 2009, 44, 541-545.	2.8	7
54	Does dietary restriction reduce life span in male fruit-feeding butterflies?. Experimental Gerontology, 2009, 44, 601-606.	2.8	18

IF # ARTICLE CITATIONS Date of eclosion modulates longevity: Insights across dietary-restriction gradients and female 2.8 reproduction in the mexfly Anastrepha ludens. Experimental Gerontology, 2009, 44, 718-726. Life table assay of fieldâ€caught Mediterranean fruit flies, <i>Ceratitis capitata</i>, reveals age bias. 56 16 1.4 Entomologia Éxperimentalis Et Applicata, 2009, 132, 172-181. Reproductive tactics influence cortisol levels in individual male gray-cheeked mangabeys (Lophocebus) Tj ETQq1 1 Q.784314 rgBT Virgin females compete for mates in the male lekking species <i>Ceratitis capitata</i>. Physiological 58 1.5 38 Entomology, 2009, 34, 238-245. Medfly populations differ in diel and age patterns of sexual signalling. Entomologia Experimentalis Et 1.4 Applicata, 2008, 128, 389-397 Adult diet affects lifespan and reproduction of the fruit \hat{e} feeding butterfly <i>CharaxesÂfulvescens</i>. 60 1.4 22 Entomologia Experimentalis Et Applicata, 2008, 129, 54-65. Longevity–fertility tradeâ€offs in the tephritid fruit fly, <i>Anastrepha ludens</i>, across 108 dietaryâ€restriction gradients. Aging Cell, 2008, 7, 470-477. Age structure changes and extraordinary lifespan in wild medfly populations. Aging Cell, 2008, 7, 62 6.7 45 426-437. Amino acid sources in the adult diet do not affect life span and fecundity in the fruitâ€feeding 2.2 butterfly<i>Bicyclus anynana</i>. Ecological Entomology, 2008, 33, 429-438. A Demographic Analysis of the Fitness Cost of Extended Longevity in Caenorhabditis elegans. Journals 64 3.6 61 of Gerontology - Series A Biological Sciences and Medical Sciences, 2007, 62, 126-135. Comparative approaches to facilitate the discovery of prolongevity interventions: Effects of tocopherols on lifespan of three invertebrate species. Mechanisms of Ageing and Development, 2007, 4.6 128, 222-226. Distinct biological epochs in the reproductive life of female Drosophila melanogaster. Mechanisms of 66 4.6 48 Ageing and Development, 2007, 128, 477-485. Survival and aging in the wild via residual demography. Theoretical Population Biology, 2007, 72, 1.1 513-522. MOSQUITOES DO SENESCE: DEPARTURE FROM THE PARADIGM OF CONSTANT MORTALITY. American Journal 68 1.4 148 of Tropical Medicine and Hygiene, 2007, 76, 111-117. Mosquitoes do senesce: departure from the paradigm of constant mortality. American Journal of 1.4 Tropical Medicine and Hygiene, 2007, 76, 111-7. Age-specific and lifetime behavior patterns in Drosophila melanogaster and the Mediterranean fruit 70 2.8 71 fly, Ceratitis capitata. Experimental Gerontology, 2006, 41, 93-97. Behavioral trajectories as predictors in event history analysis: Male calling behavior forecasts medfly 71 4.6 longevity. Mechanisms of Ageing and Development, 2006, 127, 680-686. Stochastic dietary restriction using a Markov-chain feeding protocol elicits complex, life history 72 6.7 28

JAMES R CAREY

response in medflies. Aging Cell, 2005, 4, 31-39.

ARTICLE IF CITATIONS Biodemography of a long-lived tephritid: Reproduction and longevity in a large cohort of female 2.8 Mexican fruit flies, Experimental Gerontology, 2005, 40, 793-800. The Medfly as a Frailty Model: Implications for Biodemographic Research., 2005, , 1-15. 74 5 Biodemography., 2005, , 625-658. Demographic window to aging in the wild: constructing life tables and estimating survival functions 76 6.7 62 from marked individuals of unknown age. Aging Cell, 2004, 3, 125-131. High sexual signalling rates of young individuals predict extended life span in male Mediterranean fruit flies. Oecologia, 2004, 138, 127-134. 78 From Genes to Societies. Science of Aging Knowledge Environment: SAGE KE, 2004, 2004, 5pe-5. 0.8 22 Reproduction and survival in Mediterranean fruit flies: a "protein and energy" free radical model of 79 aging. Biogerontology, 2003, 4, 387-395. Age of ovary determines remaining life expectancy in old ovariectomized mice. Aging Cell, 2003, 2, 80 6.7 120 185-190. AGING: It's Never Too Late. Science, 2003, 301, 1679-1681. 12.6 101 A FUNCTIONAL MULTIPLICATIVE EFFECTS MODEL FOR LONGITUDINAL DATA. WITH APPLICATION TO 82 0.3 14 REPRODUCTIVE HISTORIES OF FEMALE MEDFLIES. Statistica Sinica, 2003, 13, 1119-1133. Fertility and Life Span: Late Children Enhance Female Longevity. Journals of Gerontology - Series A 83 3.6 109 Biologícal Science's and Medical Sciences, 2002, 57, B202-B206. Supine behaviour predicts the time to death in male Mediterranean fruitflies (Ceratitis capitata). 84 2.6 43 Proceedings of the Royal Society B: Biological Sciences, 2002, 269, 1633-1637. Longevity minimalists: life table studies of two species of northern Michigan adult mayflies. 2.8 Experimental Gerontology, 2002, 37, 567-570. A mortality cost of virginity at older ages in female Mediterranean fruit flies. Experimental 86 2.8 16 Gerontology, 2002, 37, 507-512. Life history response of Mediterranean fruit flies to dietary restriction. Aging Cell, 2002, 1, 140-148. INSECTBIODEMOGRAPHY. Annual Review of Entomology, 2001, 46, 79-110. 88 11.8 258 Life Span Extension in Humans Is Self-Reinforcing: A General Theory of Longevity. Population and 2.1 Development Review, 2001, 27, 411-436.
