#	ARTICLE	IF	CITATIONS
1	A unified approach to Schrödinger evolution of superoscillations and supershifts. Journal of Evolution Equations, 2022, 22, 26.	1.1	6
2	Complex-Valued Classical Behavior from the Correspondence Limit of Quantum Mechanics with Two Boundary Conditions. Foundations of Physics, 2022, 52, .	1.3	2
3	Green's function for the Schrödinger equation with a generalized point interaction and stability of superoscillations. Journal of Differential Equations, 2021, 277, 153-190.	2.2	13
4	Failed attempt to escape from the quantum pigeon conundrum. Physics Letters, Section A: General, Atomic and Solid State Physics, 2021, 399, 127287.	2.1	1
5	A new method to generate superoscillating functions and supershifts. Proceedings of the Royal Society A: Mathematical, Physical and Engineering Sciences, 2021, 477, 20210020.	2.1	11
6	A dynamical quantum Cheshire Cat effect and implications for counterfactual communication. Nature Communications, 2021, 12, 4770.	12.8	16
7	On conservation laws in quantum mechanics. Proceedings of the National Academy of Sciences of the United States of America, 2021, 118, .	7.1	23
8	Diffraction-based interaction-free measurements. Quantum Studies: Mathematics and Foundations, 2020, 7, 145-153.	0.9	1
9	Schrödinger evolution of superoscillations with δ - and δ' -potentials. Quantum Studies: Mathematics and Foundations, 2020, 7, 293-305.	0.9	17
10	What Is Nonlocal in Counterfactual Quantum Communication?. Physical Review Letters, 2020, 125, 260401.	7.8	10
11	Why physical understanding should precede the mathematical formalism—Conditional quantum probabilities as a case-study. American Journal of Physics, 2019, 87, 668-673.	0.7	0
12	Modification of counterfactual communication protocols that eliminates weak particle traces. Physical Review A, 2019, 99, .	2.5	33
13	Interaction-Free Effects Between Distant Atoms. Foundations of Physics, 2018, 48, 1-16.	1.3	14
14	Locality and nonlocality in the interaction-free measurement. EPJ Web of Conferences, 2018, 182, 02105.	0.3	1
15	The Weak Reality That Makes Quantum Phenomena More Natural: Novel Insights and Experiments. Entropy, 2018, 20, 854.	2.2	17
16	Completely top-down hierarchical structure in quantum mechanics. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, 11730-11735.	7.1	15
17	Extraordinary interactions between light and matter determined by anomalous weak values. Proceedings of the Royal Society A: Mathematical, Physical and Engineering Sciences, 2018, 474, 20180030.	2.1	13
18	The Case of the Disappearing (and Re-Appearing) Particle. Scientific Reports, 2017, 7, 531.	3.3	37

#	ARTICLE	IF	CITATIONS
19	Finally making sense of the double-slit experiment. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 6480-6485.	7.1	45
20	Quantum to Classical Transitions via Weak Measurements and Post-Selection. , 2017, , 401-425.		7
21	The Two-Time Interpretation and Macroscopic Time-Reversibility. Entropy, 2017, 19, 111.	2.2	33
22	Beyond Wavefunctions: A Time-Symmetric Nonlocal Ontology for Quantum Mechanics. Boston Studies in the Philosophy and History of Science, 2017, , 235-239.	0.9	0
23	Reply to Svensson: Quantum violations of the pigeonhole principle. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, E3053-E3053.	7.1	2
24	Weak values are quantum: you can bet on it. Quantum Studies: Mathematics and Foundations, 2016, 3, 1-4.	0.9	11
25	Quantum violation of the pigeonhole principle and the nature of quantum correlations. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 532-535.	7.1	56
26	Can a future choice affect a past measurement's outcome?. Annals of Physics, 2015, 355, 258-268.	2.8	49
27	Heisenberg scaling with weak measurement: a quantum state discrimination point of view. Quantum Studies: Mathematics and Foundations, 2015, 2, 5-15.	0.9	25
28	Preface to Volume 2, Issue 1 of Quantum Studies: Mathematics and Foundations. Quantum Studies: Mathematics and Foundations, 2015, 2, 1-3.	0.9	0
29	Measurement and collapse within the two-state vector formalism. Quantum Studies: Mathematics and Foundations, 2014, 1, 133-146.	0.9	44
30	Quantum non-barking dogs. New Journal of Physics, 2014, 16, 063026.	2.9	4
31	Weak values and modular variables from a quantum phase-space perspective. Quantum Studies: Mathematics and Foundations, 2014, 1, 97-132.	0.9	4
32	Foundations and applications of weak quantum measurements. Physical Review A, 2014, 89, .	2.5	66
33	On the Aharonov-Bohm Effect and Why Heisenberg Captures Nonlocality Better Than Schrödinger. , 2014, , 50-61.		2
34	Each Instant of Time a New Universe. , 2014, , 21-36.		12
35	Quantum Cheshire Cats. New Journal of Physics, 2013, 15, 113015.	2.9	130
36	The classical limit of quantum optics: not what it seems at first sight. New Journal of Physics, 2013, 15, 093006.	2.9	12

#	ARTICLE	IF	CITATIONS
37	Peculiar features of entangled states with postselection. Physical Review A, 2013, 87, .	2.5	11
38	Can Weak Measurement Lend Empirical Support to Quantum Retrocausality?. EPJ Web of Conferences, 2013, 58, 01015.	0.3	8
39	A time-symmetric formulation of quantum mechanics. Physics Today, 2010, 63, 27-32.	0.3	191
40	Quantum interference experiments, modular variables and weak measurements. New Journal of Physics, 2010, 12, 013023.	2.9	57
41	Multiple-time states and multiple-time measurements in quantum mechanics. Physical Review A, 2009, 79, .	2.5	72
42	The deterministic set of operators, quantum interference phenomena, and quantum reality. Journal of Physics: Conference Series, 2009, 196, 012006.	0.4	3
43	The Two-State Vector Formalism: An Updated Review. , 2008, , 399-447.		99
44	Combined electric and magnetic Aharonov-Bohm effects. American Journal of Physics, 2007, 75, 1141-1146.	0.7	2
45	New Insight into Quantum Entanglement Using Weak Values. The Frontiers Collection, 2005, , 283-297.	0.2	2
46	Time and the Quantum: Erasing the Past and Impacting the Future. Science, 2005, 307, 875-879.	12.6	80
47	Quantum averages of weak values. Physical Review A, 2005, 72, .	2.5	95
48	Time and Ensemble Averages in Bohmian Mechanics. Physica Scripta, 2004, 69, 81-83.	2.5	11
49	Model for entangled states with spin-spin interaction. Physical Review A, 2004, 70, .	2.5	4
50	Correcting quantum errors with the Zeno effect. Physical Review A, 2004, 69, .	2.5	15
51	Classical Analog to Topological Nonlocal Quantum Interference Effects. Physical Review Letters, 2004, 92, 020401.	7.8	4
52	Superluminal tunnelling times as weak values. Journal of Modern Optics, 2003, 50, 1139-1149.	1.3	23
53	How macroscopic properties dictate microscopic probabilities. Physical Review A, 2002, 65, .	2.5	19
54	Cherenkov radiation of superluminal particles. Physical Review A, 2002, 66, .	2.5	49

#	ARTICLE	IF	CITATIONS
55	Remote operations and interactions for systems of arbitrary-dimensional Hilbert space: State-operator approach. Physical Review A, 2002, 65, .	2.5	51
56	Superoscillations and tunneling times. Physical Review A, 2002, 65, .	2.5	68
57	The Two-State Vector Formalism of Quantum Mechanics. , 2002, , 369-412.		38
58	Sharpening accepted thermodynamic wisdom via quantum control: or cooling to an internal temperature of zero by external coherent control fields without spontaneous emission. Journal of Modern Optics, 2002, 49, 2297-2307.	1.3	3
59	Revisiting Hardy's paradox: counterfactual statements, real measurements, entanglement and weak values. Physics Letters, Section A: General, Atomic and Solid State Physics, 2002, 301, 130-138.	2.1	241
60	The Mean King's Problem: Spin. Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences, 2001, 56, 16-19.	1.5	41
61	Complementarity between Local and Nonlocal Topological Effects. Physical Review Letters, 2000, 84, 4790-4793.	7.8	11
62	“Weighing” a Closed System and the Time-Energy Uncertainty Principle. Physical Review Letters, 2000, 84, 1368-1370.	7.8	39
63	Protective measurements and Bohm trajectories. Physics Letters, Section A: General, Atomic and Solid State Physics, 1999, 263, 137-146.	2.1	71
64	Quantum Limitations on Superluminal Propagation. Physical Review Letters, 1998, 81, 2190-2193.	7.8	44
65	Protective Measurements of Two-State Vectors. Boston Studies in the Philosophy and History of Science, 1997, , 1-8.	0.9	9
66	The meaning of protective measurements. Foundations of Physics, 1996, 26, 117-126.	1.3	44
67	Comment on “Time asymmetry in quantum mechanics: a retrodiction paradox”. Physics Letters, Section A: General, Atomic and Solid State Physics, 1995, 203, 148-149.	2.1	3
68	Protective Measurementsa. Annals of the New York Academy of Sciences, 1995, 755, 361-373.	3.8	11
69	Negative Kinetic Energy between Past and Future State Vectorsa. Annals of the New York Academy of Sciences, 1995, 755, 394-399.	3.8	6
70	Interplay of Aharonov-Bohm and Berry Phases for a Quantum Cloud of Chargea. Annals of the New York Academy of Sciences, 1995, 755, 882-887.	3.8	0
71	Aharonov-Bohm and Berry Phases for a Quantum Cloud of Charge. Physical Review Letters, 1994, 73, 918-921.	7.8	36
72	Measurement of the Schrödinger wave of a single particle. Physics Letters, Section A: General, Atomic and Solid State Physics, 1993, 178, 38-42.	2.1	123

#	ARTICLE	IF	CITATIONS
73	ALGEBRAIC APPROACH TO THE BORN-OPPENHEIMER APPROXIMATION. Modern Physics Letters A, 1993, 08, 3691-3700.	1.2	1
74	Measurements, errors, and negative kinetic energy. Physical Review A, 1993, 48, 4084-4090.	2.5	74
75	Dephasing of Interference by a Back Reacting Environment. , 1991, , .		1
76	QUANTUM TIME MACHINE. , 1991, , .		0
77	Superpositions of time evolutions of a quantum system and a quantum time-translation machine. Physical Review Letters, 1990, 64, 2965-2968.	7.8	198
78	Phase uncertainty and loss of interference: A general picture. Physical Review A, 1990, 41, 3436-3448.	2.5	376
79	Properties of a quantum system during the time interval between two measurements. Physical Review A, 1990, 41, 11-20.	2.5	900
80	How the result of a measurement of a component of the spin of a spin-1/2 particle can turn out to be 100. Physical Review Letters, 1988, 60, 1351-1354.	7.8	1,952
81	How to ascertain the values of σ_x , σ_y , and σ_z of a spin-1/2 particle. Physical Review Letters, 1987, 58, 1385-1387.	7.8	110
82	Surprising quantum effects. Physics Letters, Section A: General, Atomic and Solid State Physics, 1987, 124, 199-203.	2.1	74
83	The Predictability of the Results of Measurements of Noncommuting Variables. Annals of the New York Academy of Sciences, 1986, 480, 620-621.	3.8	1
84	Measurement process in relativistic quantum theory. Physical Review D, 1986, 34, 1805-1813.	4.7	56
85	Multiple-time properties of quantum-mechanical systems. Physical Review D, 1985, 32, 1975-1984.	4.7	19
86	Curious New Statistical Prediction of Quantum Mechanics. Physical Review Letters, 1985, 54, 5-7.	7.8	59
87	Is the usual notion of time evolution adequate for quantum-mechanical systems? I. Physical Review D, 1984, 29, 223-227.	4.7	44
88	Is the usual notion of time evolution adequate for quantum-mechanical systems? II. Relativistic considerations. Physical Review D, 1984, 29, 228-234.	4.7	78
89	Can we make sense out of the measurement process in relativistic quantum mechanics?. Physical Review D, 1981, 24, 359-370.	4.7	147
90	States and observables in relativistic quantum field theories. Physical Review D, 1980, 21, 3316-3324.	4.7	80

#	ARTICLE	IF	CITATIONS
91	Nonlinear vector product to describe rotations. American Journal of Physics, 1977, 45, 451-454.	0.7	14
92	Time Symmetry in the Quantum Process of Measurement. Physical Review, 1964, 134, B1410-B1416.	2.7	694
93	Protective measurement, postselection and the Heisenberg representation. , 0, , 28-38.		0
94	Superselection Rules. , 0, , 149-159.		1
95	Charges and Fluxons. , 0, , 177-191.		1
96	Weak Values. , 0, , 225-248.		0
97	Weak Values and Entanglement. , 0, , 249-263.		0
