#	ARTICLE	IF	CITATIONS
1	INTENSIVE LIFESTYLE CHANGES MAY AFFECT THE PROGRESSION OF PROSTATE CANCER. <i>Journal of Urology</i> , 2005, 174, 1065-1070.	0.4	392
2	Increased telomerase activity and comprehensive lifestyle changes: a pilot study. <i>Lancet Oncology</i> , The, 2008, 9, 1048-1057.	10.7	382
3	Effect of comprehensive lifestyle changes on telomerase activity and telomere length in men with biopsy-proven low-risk prostate cancer: 5-year follow-up of a descriptive pilot study. <i>Lancet Oncology</i> , The, 2013, 14, 1112-1120.	10.7	321
4	Changes in prostate gene expression in men undergoing an intensive nutrition and lifestyle intervention. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2008, 105, 8369-8374.	7.1	262
5	Long-term effects of the Mediterranean lifestyle program: a randomized clinical trial for postmenopausal women with type 2 diabetes. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2007, 4, 1.	4.6	189
6	Improvement in medical risk factors and quality of life in women and men with coronary artery disease in the Multicenter Lifestyle Demonstration Project. <i>American Journal of Cardiology</i> , 2003, 91, 1316-1322.	1.6	144
7	The contribution of changes in diet, exercise, and stress management to changes in coronary risk in women and men in the Multisite Cardiac Lifestyle Intervention Program. <i>Annals of Behavioral Medicine</i> , 2007, 33, 57-68.	2.9	132
8	Clinical Events in Prostate Cancer Lifestyle Trial: Results From Two Years of Follow-Up. <i>Urology</i> , 2008, 72, 1319-1323.	1.0	128
9	Improvements in Hostility and Depression in Relation to Dietary Change and Cholesterol Lowering. <i>Annals of Internal Medicine</i> , 1992, 117, 820-823.	3.9	111
10	Lifestyle and health-related quality of life of men with prostate cancer managed with active surveillance. <i>Urology</i> , 2006, 67, 125-130.	1.0	108
11	Effect of Intensive Lifestyle Changes on Endothelial Function and on Inflammatory Markers of Atherosclerosis. <i>American Journal of Cardiology</i> , 2010, 105, 362-367.	1.6	97
12	Changes in Emerging Cardiac Biomarkers After an Intensive Lifestyle Intervention. <i>American Journal of Cardiology</i> , 2011, 108, 498-507.	1.6	94
13	A Qualitative Analysis of Interviews of Men With Early Stage Prostate Cancer. <i>Cancer Nursing</i> , 2005, 28, 99-107.	1.5	88
14	Lifestyle changes and clinical profile in coronary heart disease patients with an ejection fraction of $\leq 40\%$ or $>40\%$ in the Multicenter Lifestyle Demonstration Project. <i>European Journal of Heart Failure</i> , 2007, 9, 928-934.	7.1	88
15	Title is missing!. <i>Cognitive Therapy and Research</i> , 2000, 24, 297-311.	1.9	87
16	The effects of academic stress on health behaviors in young adults. <i>Anxiety, Stress and Coping</i> , 1996, 9, 123-133.	2.9	82
17	Overall quality of life improves to similar levels after mechanical circulatory support regardless of severity of heart failure before implantation. <i>Journal of Heart and Lung Transplantation</i> , 2014, 33, 412-421.	0.6	68
18	Change in health-related quality of life from before to after destination therapy mechanical circulatory support is similar for older and younger patients: Analyses from INTERMACS. <i>Journal of Heart and Lung Transplantation</i> , 2015, 34, 213-221.	0.6	68

#	ARTICLE	IF	CITATIONS
19	A Very-Low-Fat Vegan Diet Increases Intake of Protective Dietary Factors and Decreases Intake of Pathogenic Dietary Factors. <i>Journal of the American Dietetic Association</i> , 2008, 108, 347-356.	1.1	56
20	Long-term effects of lifestyle changes on well-being and cardiac variables among coronary heart disease patients.. <i>Health Psychology</i> , 2008, 27, 584-592.	1.6	56
21	Socioeconomic Status and Improvements in Lifestyle, Coronary Risk Factors, and Quality of Life: The Multisite Cardiac Lifestyle Intervention Program. <i>American Journal of Public Health</i> , 2009, 99, 1263-1270.	2.7	56
22	Comparison of Coronary Risk Factors and Quality of Life in Coronary Artery Disease Patients With Versus Without Diabetes Mellitus. <i>American Journal of Cardiology</i> , 2006, 97, 1267-1273.	1.6	53
23	Angina Pectoris and Atherosclerotic Risk Factors in the Multisite Cardiac Lifestyle Intervention Program. <i>American Journal of Cardiology</i> , 2008, 101, 911-918.	1.6	47
24	Avoidant coping style and verbal-cardiovascular response dissociation. <i>Psychology and Health</i> , 1996, 11, 371-384.	2.2	43
25	Nutrient Adequacy of a Very Low-Fat Vegan Diet. <i>Journal of the American Dietetic Association</i> , 2005, 105, 1442-1446.	1.1	36
26	Social support group attendance is related to blood pressure, health behaviours, and quality of life in the Multicenter Lifestyle Demonstration Project. <i>Psychology, Health and Medicine</i> , 2008, 13, 423-437.	2.4	34
27	Relation of B-Type Natriuretic Peptide Levels to Body Mass Index After Comprehensive Lifestyle Changes. <i>American Journal of Cardiology</i> , 2010, 105, 1570-1576.	1.6	34
28	The Effects of Task Demand and Decision Latitude on Cardiovascular Reactivity to Stress. <i>Behavioral Medicine</i> , 1993, 18, 181-188.	1.9	33
29	A self-regulation-based intervention to increase physical activity in cancer patients. <i>Psychology, Health and Medicine</i> , 2016, 21, 163-175.	2.4	30
30	Relationship of Dietary Protein and Soy Isoflavones to Serum IGF-1 and IGF Binding Proteins in the Prostate Cancer Lifestyle Trial. <i>Nutrition and Cancer</i> , 2007, 58, 35-42.	2.0	28
31	Sociodemographic diversity and behavioral medicine.. <i>Journal of Consulting and Clinical Psychology</i> , 2002, 70, 463-481.	2.0	27
32	Lifestyle changes are related to reductions in depression in persons with elevated coronary risk factors. <i>Psychology and Health</i> , 2010, 25, 1077-1100.	2.2	22
33	Psychological Characteristics and Social Integration of Patients with Ischemic and Non-Ischemic Heart Failure Newly Listed for Heart Transplantation: The Waiting for a New Heart Study. <i>Applied Psychology: Health and Well-Being</i> , 2009, 1, 188-210.	3.0	19
34	Physical activity and depression predict event-free survival in heart transplant candidates.. <i>Health Psychology</i> , 2014, 33, 1328-1336.	1.6	19
35	Role of Depression and Social Isolation at Time of Waitlisting for Survival 8 Years After Heart Transplantation. <i>Journal of the American Heart Association</i> , 2017, 6, .	3.7	19
36	Effects of Demand and Decision Latitude on Cardiovascular Reactivity among Coronary-Prone Women and Men. <i>Behavioral Medicine</i> , 1993, 19, 122-128.	1.9	18

#	ARTICLE	IF	CITATIONS
37	Health behaviors contribute to quality of life in patients with advanced heart failure independent of psychological and medical patient characteristics. <i>Quality of Life Research</i> , 2013, 22, 1603-1611.	3.1	17
38	Causes and Consequences of Missing Health-Related Quality of Life Assessments in Patients Who Undergo Mechanical Circulatory Support Implantation. <i>Circulation: Cardiovascular Quality and Outcomes</i> , 2017, 10, e003268.	2.2	16
39	Patients' sex and emotional support as predictors of death and clinical deterioration in the Waiting for a New Heart Study: results from the 1-year follow-up. <i>Progress in Transplantation</i> , 2011, 21, 106-114.	0.7	13
40	Smoking Status at Time of Listing for a Heart Transplant Predicts Mortality on the Waiting List. <i>Progress in Transplantation</i> , 2016, 26, 117-121.	0.7	11
41	The role of self-regulation in health and illness. <i>Psychology, Health and Medicine</i> , 2016, 21, 135-137.	2.4	11
42	The effects of dietary cholesterol-lowering on psychological symptoms: A randomised controlled study. <i>Psychology, Health and Medicine</i> , 2009, 14, 255-261.	2.4	10
43	Clinical Events in Coronary Heart Disease Patients With an Ejection Fraction of 40% or Less. <i>Journal of Cardiovascular Nursing</i> , 2010, 25, E8-E15.	1.1	10
44	Emotions and Heart Disease. , 2000, , 789-796.		9
45	Clusters of Behavioral Coronary Risk Factors in Employed Women and Men <sup>1</sup> . <i>Journal of Applied Social Psychology</i> , 1989, 19, 468-480.	2.0	8
46	Sustainability in medicine: a case for the prevention of chronic non-communicable diseases. <i>The Environmentalist</i> , 2012, 32, 353-359.	0.7	4
47	Emotions and Cardiovascular Disease. , 2013, , 991-1002.		3
48	The Role of Lifestyle in Secondary Prevention of Coronary Heart Disease in Patients With Type 2 Diabetes. <i>Canadian Journal of Diabetes</i> , 2006, 30, 1-7.	0.8	2
49	Gender differences in psychosocial and clinical characteristics in the European Registry for Patients with Mechanical Circulatory Support. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2021, 50, 845-852.	1.6	2
50	Psychosocial Risk and Health Behaviors as Predictors of Clinical Events in Patients Wait-Listed for a New Heart: Results from 7 Years of Follow-Up. <i>Life</i> , 2021, 11, 1438.	2.4	1
51	Gender and Physical Health. , 2015, , 704-708.		0
