Version: 2024-02-01

150 papers	26,312 citations	11651 70 h-index	10445 139 g-index
155 all docs	155 docs citations	155 times ranked	18064 citing authors

#	Article	IF	Citations
1	Inflammation and Atherosclerosis. Circulation, 2002, 105, 1135-1143.	1.6	6,191
2	The Prognostic Value of C-Reactive Protein and Serum Amyloid A Protein in Severe Unstable Angina. New England Journal of Medicine, 1994, 331, 417-424.	27.0	2,159
3	â€œVariantâ€•angina: One aspect of a continuous spectrum of vasospastic myocardial ischemia. American Journal of Cardiology, 1978, 42, 1019-1035.	1.6	993
4	Coronary Vasospasm as a Possible Cause of Myocardial Infarction. New England Journal of Medicine, 1978, 299, 1271-1277.	27.0	863
5	Widespread Coronary Inflammation in Unstable Angina. New England Journal of Medicine, 2002, 347, 5-12.	27.0	845
6	Myocardial Cell Death in Human Diabetes. Circulation Research, 2000, 87, 1123-1132.	4.5	753
7	Elevated Levels of Interleukin-6 in Unstable Angina. Circulation, 1996, 94, 874-877.	1.6	588
8	Elevated Levels of C-Reactive Protein at Discharge in Patients With Unstable Angina Predict Recurrent Instability. Circulation, 1999, 99, 855-860.	1.6	520
9	Terminology for high-risk and vulnerable coronary artery plaques. European Heart Journal, 2004, 25, 1077-1082.	2.2	478
10	Increasing Levels of Interleukin (IL)-1Ra and IL-6 During the First 2 Days of Hospitalization in Unstable Angina Are Associated With Increased Risk of In-Hospital Coronary Events. Circulation, 1999, 99, 2079-2084.	1.6	456
11	Cardiac syndrome X: Clinical characteristics and left ventricular function. Journal of the American College of Cardiology, 1995, 25, 807-814.	2.8	438
12	Mechanisms of angina pectoris in syndrome X. Journal of the American College of Cardiology, 1991, 17, 499-506.	2.8	398
13	Coronary Artery Spasm as a Cause of Acute Myocardial Ischemia in Man. Chest, 1975, 68, 625-633.	0.8	395
14	Spontaneous coronary artery spasm in variant angina is caused by a local hyperreactivity to a generalized constrictor stimulus. Journal of the American College of Cardiology, 1989, 14, 1456-1463.	2.8	380
15	Perturbation of the T-Cell Repertoire in Patients With Unstable Angina. Circulation, 1999, 100, 2135-2139.	1.6	374
16	Reduced Coronary Vasodilator Function in Infarcted and Normal Myocardium after Myocardial Infarction. New England Journal of Medicine, 1994, 331, 222-227.	27.0	370
17	Intermittent Coronary Occlusion in Acute Myocardial Infarction. New England Journal of Medicine, 1987, 317, 1055-1059.	27.0	367
18	Major Racial Differences in Coronary Constrictor Response Between Japanese and Caucasians With Recent Myocardial Infarction. Circulation, 2000, 101, 1102-1108.	1.6	342

#	Article	IF	Citations
19	Preprocedural serum levels of C-reactive protein predict early complications and late restenosis after coronary angioplasty. Journal of the American College of Cardiology, 1999, 34, 1512-1521.	2.8	326
20	Impairment of myocardial perfusion and function during painless myocardial ischemia. Journal of the American College of Cardiology, 1983, 1, 924-930.	2.8	299
21	Association of Virulent Helicobacter pylori Strains With Ischemic Heart Disease. Circulation, 1998, 97, 1675-1679.	1.6	299
22	Enhanced Inflammatory Response to Coronary Angioplasty in Patients With Severe Unstable Angina. Circulation, 1998, 98, 2370-2376.	1.6	292
23	Preinfarction Angina as a Predictor of More Rapid Coronary Thrombolysis in Patients with Acute Myocardial Infarction. New England Journal of Medicine, 1996, 334, 7-12.	27.0	228
24	Inflammation, Atherosclerosis, and Ischemic Events â€" Exploring the Hidden Side of the Moon. New England Journal of Medicine, 1997, 336, 1014-1016.	27.0	219
25	Unusual CD4+CD28nullT Lymphocytes and Recurrence of Acute Coronary Events. Journal of the American College of Cardiology, 2007, 50, 1450-1458.	2.8	214
26	Coronary artery spasm: Demonstration, definition, diagnosis, and consequences. Progress in Cardiovascular Diseases, 1982, 25, 169-192.	3.1	196
27	Inflammation as a Possible Link Between Coronary and Carotid Plaque Instability. Circulation, 2004, 109, 3158-3163.	1.6	193
28	Long-term prognosis of â€œvariantâ€•angina with medical treatment. American Journal of Cardiology, 1980, 46, 226-232.	1.6	169
29	Importance of generalized defective perception of painful stimuli as a cause of silent myocardial ischemia in chronic stable angina pectoris. American Journal of Cardiology, 1986, 58, 667-672.	1.6	169
30	Delayed recovery of coronary resistive vessel function after coronary angioplasty. Journal of the American College of Cardiology, 1993, 21, 612-621.	2.8	165
31	Absence of myocardial dysfunction during stress in patients with syndrome X. Journal of the American College of Cardiology, 1991, 18, 1463-1470.	2.8	163
32	Atenolol versus amlodipine versus isosorbide-5-mononitrate on anginal symptoms in syndrome X. American Journal of Cardiology, 1999, 84, 854-856.	1.6	163
33	Smooth muscle cells in human atherosclerotic plaques secrete and proliferate in response to high mobility group box 1 protein. FASEB Journal, 2006, 20, 2565-2566.	0.5	157
34	Incremental prognostic value of serum levels of troponin T and C-reactive protein on admission in patients with unstable angina pectoris. American Journal of Cardiology, 1998, 82, 715-719.	1.6	156
35	Intracellular neutrophil myeloperoxidase is reduced in unstable angina and acute myocardial infarction, but its reduction is not related to ischemia. Journal of the American College of Cardiology, 1996, 27, 611-616.	2.8	150
36	Is There a Vulnerable Plaque?. Circulation, 2003, 107, 2068-2071.	1.6	150

#	Article	IF	Citations
37	Myocardial Ischemia Caused by Distal Coronary-Artery Constriction in Stable Angina Pectoris. New England Journal of Medicine, 1990, 323, 514-520.	27.0	147
38	Role of coronary artery spasm in symptomatic and silent myocardial ischemia. Journal of the American College of Cardiology, 1987, 9, 249-262.	2.8	146
39	Significance of spasm in the pathogenesis of ischemic heart disease. American Journal of Cardiology, 1979, 44, 788-792.	1.6	145
40	Enhanced inflammatory response in patients with preinfarction unstable angina. Journal of the American College of Cardiology, 1999, 34, 1696-1703.	2.8	144
41	Management of vasospastic angina at rest with continuous infusion of isosorbide dinitrate. American Journal of Cardiology, 1979, 44, 533-539.	1.6	139
42	Plasma Protein Acute-Phase Response in Unstable Angina Is Not Induced by Ischemic Injury. Circulation, 1996, 94, 2373-2380.	1.6	134
43	Abnormal Cardiac Adrenergic Nerve Function in Patients With Syndrome X Detected By [¹²³ I]Metaiodobenzylguanidine Myocardial Scintigraphy. Circulation, 1997, 96, 821-826.	1.6	131
44	Risk of Myocardial Infarction and Angina in Patients With Severe Peripheral Vascular Disease. Circulation, 2002, 105, 800-803.	1.6	130
45	Transient myocardial ischemia during daily life in patients with syndrome X. American Journal of Cardiology, 1986, 58, 1242-1247.	1.6	129
46	Neutrophils phagocytose activated platelets in vivo: a phosphatidylserine, P-selectin, and Î²2 integrinâ€“dependent cell clearance program. Blood, 2009, 113, 5254-5265.	1.4	129
47	Current clinical features, diagnostic assessment and prognostic determinants of patients with variant angina. International Journal of Cardiology, 2007, 118, 41-47.	1.7	118
48	Autonomic changes associated with spontaneous coronary spasm in patients with variant angina. Journal of the American College of Cardiology, 1996, 28, 1249-1256.	2.8	116
49	Effector Memory T cells Are Associated With Atherosclerosis in Humans and Animal Models. Journal of the American Heart Association, 2012, 1, 27-41.	3.7	114
50	Some clinical considerations regarding the relation of coronary vasospasm to coronary atherosclerosis: A hypothetical pathogenesis. American Journal of Cardiology, 1980, 45, 882-886.	1.6	112
51	Cell Death in Acromegalic Cardiomyopathy. Circulation, 1999, 99, 1426-1434.	1.6	111
52	Evidence for Antigen-Driven T-Cell Response in Unstable Angina. Circulation, 2000, 102, 1114-1119.	1.6	110
53	Elevated levels of C-reactive protein before coronary artery bypass grafting predict recurrence of ischemic events. American Journal of Cardiology, 1999, 84, 459-461.	1.6	101
54	Mechanisms of ischemic cardiac pain and silent myocardial ischemia. American Journal of Medicine, 1985, 79, 7-11.	1.5	100

#	Article	IF	Citations
55	Pain threshold and tolerance in women with syndrome X and women with stable angina pectoris. American Journal of Cardiology, 1987, 60, 503-507.	1.6	98
56	Dissociation of Platelet Activation and Spontaneous Myocardial Ischemia in Unstable Angina. Thrombosis and Haemostasis, 1990, 63, 163-168.	3.4	98
57	Comparison of regional myocardial blood flow in syndrome X and one-vessel coronary artery disease. American Journal of Cardiology, 1993, 72, 134-139.	1.6	97
58	Immune system activation follows inflammation in unstable angina: pathogenetic implications. Journal of the American College of Cardiology, 1998, 32, 1295-1304.	2.8	97
59	Mixed angina pectoris. American Journal of Cardiology, 1985, 56, E30-E33.	1.6	96
60	Intracoronary endothelin induces myocardial ischemia by small vessel constriction in the dog. American Journal of Cardiology, 1989, 64, 956-958.	1.6	96
61	Two Different Mechanisms of Myocardial Ischemia Involving 2 Separate Myocardial Segments in a Patient With Normal Coronary Angiography. Circulation, 2010, 121, e1-3.	1.6	95
62	Persistent Activation of Nuclear Factor Kappa-B Signaling Pathway in Patients With Unstable Angina and Elevated Levels of C-Reactive Protein. Journal of the American College of Cardiology, 2007, 49, 185-194.	2.8	91
63	Comparison of verapamil and propranolol therapy for angina pectoris at rest: A randomized, multiple-crossover, controlled trial in the coronary care unit. American Journal of Cardiology, 1986, 57, 899-906.	1.6	88
64	Relation of Heart Rate Variability to Serum Levels of C-Reactive Protein in Patients With Unstable Angina Pectoris. American Journal of Cardiology, 2006, 97, 1702-1706.	1.6	88
65	Role of Abnormal Pain Sensitivity and Behavioral Factors in Determining Chest Pain in Syndrome X. Journal of the American College of Cardiology, 1998, 31, 62-66.	2.8	87
66	Enhanced Response of Blood Monocytes to In Vitro Lipopolysaccharide-Challenge in Patients With Recurrent Unstable Angina. Circulation, 2001, 103, 2236-2241.	1.6	86
67	Role of Coronary Vasoconstriction in Ischemic Heart Disease and Search for Novel Therapeutic Targets. Circulation Journal, 2009, 73, 394-403.	1.6	85
68	Verapamil versus propranolol for angina at rest. American Journal of Cardiology, 1982, 50, 923-928.	1.6	82
69	Early and Transient Release of Leukocyte Pentraxin 3 during Acute Myocardial Infarction. Journal of Immunology, 2011, 187, 970-979.	0.8	82
70	Inflammatory Left Ventricular Microaneurysms as a Cause of Apparently Idiopathic Ventricular Tachyarrhythmias. Circulation, 2001, 104, 168-173.	1.6	81
71	Identification and Predictive Value of Interleukin-6 ⁺ Interleukin-10 ⁺ and Interleukin-6 ^{â^'} Interleukin-10 ⁺ Cytokine Patterns in ST-Elevation Acute Myocardial Infarction. Circulation Research, 2012, 111, 1336-1348.	4.5	72
72	Assessment of systemic inflammation and infective pathogen burden in patients with cardiac syndrome X. American Journal of Cardiology, 2004, 94, 40-44.	1.6	71

#	Article	IF	Citations
73	Noninvasive Quantification of Regional Myocardial Metabolic Rate for Oxygen by Use of ¹⁵ O ₂ Inhalation and Positron Emission Tomography. Circulation, 1996, 94, 792-807.	1.6	69
74	Myocardial ischemia-reperfusion damage after pacing-induced tachycardia in patients with cardiac syndrome X. American Journal of Physiology - Heart and Circulatory Physiology, 2000, 279, H2627-H2633.	3.2	67
75	Antibody Response to Chlamydial Heat Shock Protein 60 Is Strongly Associated With Acute Coronary Syndromes. Circulation, 2003, 107, 3015-3017.	1.6	65
76	Differential gene expression profiling in genetic and multifactorial cardiovascular diseases. Journal of Molecular and Cellular Cardiology, 2006, 41, 934-948.	1.9	64
77	ROLE OF CORONARY ARTERIAL SPASM IN SUDDEN CORONARY ISCHEMIC DEATH. Annals of the New York Academy of Sciences, 1982, 382, 204-217.	3.8	63
78	High-Sensitivity C-Reactive Protein Is Within Normal Levels at the Very Onset of First ST-Segment Elevation Acute Myocardial Infarction in 41% of Cases. Journal of the American College of Cardiology, 2011, 58, 2654-2661.	2.8	61
79	Lack of evidence for alpha-adrenergic receptor-mediated mechanisms in the genesis of ischemia in syndrome X. American Journal of Cardiology, 1989, 64, 264-269.	1.6	60
80	Inflammation in ischaemic heart disease. BMJ: British Medical Journal, 1996, 312, 1049-1050.	2.3	57
81	Effects of atrial pacing on arterial and coronary sinus endothelin-1 levels in syndrome X. American Journal of Cardiology, 1999, 84, 1187-1191.	1.6	56
82	Relation Between Platelet Response to Exercise and Coronary Angiographic Findings in Patients With Effort Angina. Circulation, 2003, 107, 1378-1382.	1.6	54
83	Early coronary reperfusion blunts the procoagulant response of plasminogen activator inhibitor-1 and von Willebrand factor in acute myocardial infarction. Journal of the American College of Cardiology, 1990, 16, 1553-1560.	2.8	53
84	An Intense and Short-Lasting Burst of Neutrophil Activation Differentiates Early Acute Myocardial Infarction from Systemic Inflammatory Syndromes. PLoS ONE, 2012, 7, e39484.	2.5	52
85	Heart rate response during exercise testing and ambulatory ECG monitoring in patients with syndrome X. American Heart Journal, 1991, 122, 458-463.	2.7	51
86	Myocardial ischemia caused by distal coronary vasoconstriction. American Journal of Cardiology, 1992, 70, 1602-1605.	1.6	48
87	Ischemic-like ST-Segment Changes During Holter Monitoring in Patients With Angina Pectoris and Normal Coronary Arteries But Negative Exercise Testing. American Journal of Cardiology, 1997, 79, 1-6.	1.6	44
88	Role of Inflammation in the Pathogenesis of Unstable Coronary Artery Disease. American Journal of Cardiology, 1997, 80, 10E-16E.	1.6	42
89	Comparison of epicardial coronary artery tone and reactivity in Prinzmetal's variant angina and chronic stable angina pectoris. Journal of the American College of Cardiology, 1991, 17, 1058-1062.	2.8	41
90	Cytomegalovirus Replication Is Not a Cause of Instability in Unstable Angina. Circulation, 1995, 91, 1910-1913.	1.6	41

#	Article	IF	Citations
91	Temporal Relation Between Ischemic Episodes and Activation of the Coagulation System in Unstable Angina. Circulation, 1996, 93, 2121-2127.	1.6	38
92	Mechanisms and significance of cardiac ischemic pain. Progress in Cardiovascular Diseases, 1992, 35, 1-18.	3.1	37
93	Abnormalities in myocardial metabolism in patients with unstable angina as assessed by positron emission tomography. Cardiovascular Drugs and Therapy, 1988, 2, 41-46.	2.6	35
94	Left ventricular hypercontractility and ST segment depression in patients with syndrome X. Journal of the American College of Cardiology, 1993, 22, 1607-1613.	2.8	35
95	Inflammation and Acute Coronary Syndromes. Herz, 2000, 25, 108-112.	1.1	35
96	Persistent systemic inflammation in unstable angina is largely unrelated to the atherothrombotic burden. Journal of the American College of Cardiology, 2005, 45, 238-243.	2.8	34
97	Episodic activation off the coagulation system in unstable angina does not elicit an acute phase reaction. American Journal of Cardiology, 1996, 77, 85-87.	1.6	33
98	Aspirin, but not heparin, suppresses the transient increase in thromboxane biosynthesis associated with cardiac catheterization or coronary angioplasty. Journal of the American College of Cardiology, 1993, 21, 1377-1381.	2.8	29
99	Long-term variability of angina pectoris and electrocardiographic signs of ischemia in syndrome X. American Journal of Cardiology, 1989, 64, 139-143.	1.6	27
100	Similar time course of ST depression during and after exercise in patients with coronary artery disease and syndrome X. American Heart Journal, 1990, 120, 848-854.	2.7	27
101	Antigen-Driven Evolution of B Lymphocytes in Coronary Atherosclerotic Plaques. Journal of Immunology, 2009, 183, 2537-2544.	0.8	27
102	Expansion of T-Cell Receptor Î¶^{dim}Effector T Cells in Acute Coronary Syndromes. Arteriosclerosis, Thrombosis, and Vascular Biology, 2008, 28, 2305-2311.	2.4	25
103	A new rationale for the clinical approach to the patient with angina pectoris. American Journal of Medicine, 1981, 71, 639-644.	1.5	24
104	Global Biventricular Dysfunction in Patients With Asymptomatic Coronary Artery Disease May Be Caused by Myocarditis. Circulation, 1999, 99, 1295-1299.	1.6	24
105	Pathogenetic classifications of unstable angina as a guideline to individual patient management and prognosis. American Journal of Medicine, 1986, 80, 48-55.	1.5	23
106	Comparative study of myocardial ischemia during angina at rest and on exertion using thallium-201 scintigraphy. American Journal of Cardiology, 1981, 48, 410-417.	1.6	21
107	Variable susceptibility to dynamic coronary obstruction: An elusive link between coronary atherosclerosis and angina pectoris. American Journal of Cardiology, 1983, 52, 46-51.	1.6	21
108	Mild inflammatory activation of mammary arteries in patients with acute coronary syndromes. American Journal of Physiology - Heart and Circulatory Physiology, 2008, 294, H2831-H2837.	3.2	19

#	Article	IF	Citations
109	Coronary Vasospasm in Ischemic Heart Disease. Chest, 1980, 78, 210-215.	0.8	17
110	Combination of Variant and Microvascular Angina. Clinical Cardiology, 2009, 32, E40-5.	1.8	17
111	Circadian variation of ischemic threshold in syndrome X. American Journal of Cardiology, 1995, 75, 683-686.	1.6	15
112	The elusive cause of instability in unstable angina. American Journal of Cardiology, 1991, 68, B16-B21.	1.6	12
113	The role of cytokines in unstable angina. Expert Opinion on Investigational Drugs, 1998, 7, 1667-1672.	4.1	12
114	1059G/C polymorphism within the exon 2 of the C-reactive protein gene: relationship to C-reactive protein levels and prognosis in unstable angina. Coronary Artery Disease, 2007, 18, 533-538.	0.7	12
115	Anti-inflammatory action of apoptotic cells in patients with acute coronary syndromes. Atherosclerosis, 2009, 205, 391-395.	0.8	12
116	Cardiac Autonomic Function and Sensitivity to Pain in Postmenopausal Women With Angina and Normal Coronary Arteries. American Journal of Cardiology, 1997, 79, 1174-1179.	1.6	11
117	Myocardial Stunning Due to Sudden Emotional Stress. New England Journal of Medicine, 2005, 352, 1923-1925.	27.0	11
118	Coronary Vasospasm in Ischemic Heart Disease. Chest, 1980, 78, 210-215.	0.8	9
119	Abnormal pH-sensing of platelet NA+/H+ exchanger in patients with cardiac syndrome X. International Journal of Cardiology, 2005, 100, 371-376.	1.7	9
120	Prothrombotic response to coronary angioplasty in patients with unstable angina and raised C-reactive protein. Journal of Thrombosis and Thrombolysis, 2002, 14, 131-138.	2.1	8
121	Failure of experimental atherosclerosis to sensitize coronary arteries to spasm in hypercholesterolemic rabbits. American Heart Journal, 1985, 109, 491-497.	2.7	7
122	The â€œWarm-Upâ€•Phenomenon Occurs in Patients With Chronic Stable Angina But Not in Patients With Syndrome X. American Journal of Cardiology, 1998, 81, 123-127.	1.6	7
123	The G20210A Prothrombin Mutation and the Physiciansâ€™ Health Study. Circulation, 2000, 101, E207-8.	1.6	7
124	Combined role of the Lewis antigenic system, Chlamydia pneumoniae, and C-reactive protein in unstable angina. Journal of the American College of Cardiology, 2003, 41, 546-550.	2.8	7
125	Multifocal, Persistent Cardiac Uptake of [18-F]-Fluoro-Deoxy-Glucose Detected by Positron Emission Tomography in Patients With Acute Myocardial Infarction. Circulation Journal, 2008, 72, 1821-1828.	1.6	7
126	973-113 Elevated C-Reactive Protein at Discharge and at Three Months After Waning of Symptoms in Unstable Angina is Associated with Recurrence of Instability During 12 Months Follow-up. Journal of the American College of Cardiology, 1995, 25, 250A-251A.	2.8	6

#	Article	IF	Citations
127	The risk and cost-effective individual patient management: The challenge of a new generation of clinical trials. Cardiovascular Drugs and Therapy, 1997, 10, 751-758.	2.6	6
