#	ARTICLE	IF	CITATIONS
1	Short-term prognosis of unstable angina in the era of high-sensitivity cardiac troponin: insights for early rule-out strategies. <i>Coronary Artery Disease</i> , 2020, 31, 687-693.	0.7	0
2	Identification and Predictive Value of Interleukin-6 <sup>+</sup> Interleukin-10 <sup>+</sup> and Interleukin-6 <sup>â</sup> Interleukin-10 <sup>+</sup> Cytokine Patterns in ST-Elevation Acute Myocardial Infarction. <i>Circulation Research</i> , 2012, 111, 1336-1348.	4.5	72
3	Effector Memory T cells Are Associated With Atherosclerosis in Humans and Animal Models. <i>Journal of the American Heart Association</i> , 2012, 1, 27-41.	3.7	114
4	An Intense and Short-Lasting Burst of Neutrophil Activation Differentiates Early Acute Myocardial Infarction from Systemic Inflammatory Syndromes. <i>PLoS ONE</i> , 2012, 7, e39484.	2.5	52
5	Clinical evaluation of the patient with chest pain. , 2012, , 56-68.		0
6	Clinical evaluation of the patient with chest pain. , 2012, , 56-68.		0
7	High-Sensitivity C-Reactive Protein Is Within Normal Levels at the Very Onset of First ST-Segment Elevation Acute Myocardial Infarction in 41% of Cases. <i>Journal of the American College of Cardiology</i> , 2011, 58, 2654-2661.	2.8	61
8	Early and Transient Release of Leukocyte Pentraxin 3 during Acute Myocardial Infarction. <i>Journal of Immunology</i> , 2011, 187, 970-979.	0.8	82
9	Two Different Mechanisms of Myocardial Ischemia Involving 2 Separate Myocardial Segments in a Patient With Normal Coronary Angiography. <i>Circulation</i> , 2010, 121, e1-3.	1.6	95
10	Antigen-Driven Evolution of B Lymphocytes in Coronary Atherosclerotic Plaques. <i>Journal of Immunology</i> , 2009, 183, 2537-2544.	0.8	27
11	Prognostic Value of Heart Rate Turbulence and Its Relation to Inflammation in Patients With Unstable Angina Pectoris. <i>American Journal of Cardiology</i> , 2009, 103, 1066-1072.	1.6	5
12	Combination of Variant and Microvascular Angina. <i>Clinical Cardiology</i> , 2009, 32, E40-5.	1.8	17
13	Anti-inflammatory action of apoptotic cells in patients with acute coronary syndromes. <i>Atherosclerosis</i> , 2009, 205, 391-395.	0.8	12
14	Neutrophils phagocytose activated platelets in vivo: a phosphatidylserine, P-selectin, and Î²2 integrinâ€“dependent cell clearance program. <i>Blood</i> , 2009, 113, 5254-5265.	1.4	129
15	Role of Coronary Vasoconstriction in Ischemic Heart Disease and Search for Novel Therapeutic Targets. <i>Circulation Journal</i> , 2009, 73, 394-403.	1.6	85
16	Expansion of T-Cell Receptor Î“ <sup>dim</sup> Effector T Cells in Acute Coronary Syndromes. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2008, 28, 2305-2311.	2.4	25
17	Multifocal, Persistent Cardiac Uptake of [18-F]-Fluoro-Deoxy-Glucose Detected by Positron Emission Tomography in Patients With Acute Myocardial Infarction. <i>Circulation Journal</i> , 2008, 72, 1821-1828.	1.6	7
18	Mild inflammatory activation of mammary arteries in patients with acute coronary syndromes. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2008, 294, H2831-H2837.	3.2	19

#	ARTICLE	IF	CITATIONS
19	Coronary Heart Disease Syndromes: Pathophysiology and Clinical Recognition. , 2007, , 667-698.		1
20	1059G/C polymorphism within the exon 2 of the C-reactive protein gene: relationship to C-reactive protein levels and prognosis in unstable angina. Coronary Artery Disease, 2007, 18, 533-538.	0.7	12
21	Current clinical features, diagnostic assessment and prognostic determinants of patients with variant angina. International Journal of Cardiology, 2007, 118, 41-47.	1.7	118
22	Persistent Activation of Nuclear Factor Kappa-B Signaling Pathway in Patients With Unstable Angina and Elevated Levels of C-Reactive Protein. Journal of the American College of Cardiology, 2007, 49, 185-194.	2.8	91
23	Unusual CD4+CD28nullT Lymphocytes and Recurrence of Acute Coronary Events. Journal of the American College of Cardiology, 2007, 50, 1450-1458.	2.8	214
24	Differential gene expression profiling in genetic and multifactorial cardiovascular diseases. Journal of Molecular and Cellular Cardiology, 2006, 41, 934-948.	1.9	64
25	Relation of Heart Rate Variability to Serum Levels of C-Reactive Protein in Patients With Unstable Angina Pectoris. American Journal of Cardiology, 2006, 97, 1702-1706.	1.6	88
26	Smooth muscle cells in human atherosclerotic plaques secrete and proliferate in response to high mobility group box 1 protein. FASEB Journal, 2006, 20, 2565-2566.	0.5	157
27	Myocardial Stunning Due to Sudden Emotional Stress. New England Journal of Medicine, 2005, 352, 1923-1925.	27.0	11
28	Abnormal pH-sensing of platelet NA <sup>+</sup> /H <sup>+</sup> exchanger in patients with cardiac syndrome X. International Journal of Cardiology, 2005, 100, 371-376.	1.7	9
29	Persistent systemic inflammation in unstable angina is largely unrelated to the atherothrombotic burden. Journal of the American College of Cardiology, 2005, 45, 238-243.	2.8	34
30	Terminology for high-risk and vulnerable coronary artery plaques. European Heart Journal, 2004, 25, 1077-1082.	2.2	478
31	Inflammation as a Possible Link Between Coronary and Carotid Plaque Instability. Circulation, 2004, 109, 3158-3163.	1.6	193
32	Assessment of systemic inflammation and infective pathogen burden in patients with cardiac syndrome X. American Journal of Cardiology, 2004, 94, 40-44.	1.6	71
33	Combined role of the Lewis antigenic system, Chlamydia pneumoniae, and C-reactive protein in unstable angina. Journal of the American College of Cardiology, 2003, 41, 546-550.	2.8	7
34	Is There a Vulnerable Plaque?. Circulation, 2003, 107, 2068-2071.	1.6	150
35	Antibody Response to Chlamydial Heat Shock Protein 60 Is Strongly Associated With Acute Coronary Syndromes. Circulation, 2003, 107, 3015-3017.	1.6	65
36	Relation Between Platelet Response to Exercise and Coronary Angiographic Findings in Patients With Effort Angina. Circulation, 2003, 107, 1378-1382.	1.6	54

#	ARTICLE	IF	CITATIONS
37	Risk of Myocardial Infarction and Angina in Patients With Severe Peripheral Vascular Disease. <i>Circulation</i> , 2002, 105, 800-803.	1.6	130
38	Widespread Coronary Inflammation in Unstable Angina. <i>New England Journal of Medicine</i> , 2002, 347, 5-12.	27.0	845
39	Inflammation and Atherosclerosis. <i>Circulation</i> , 2002, 105, 1135-1143.	1.6	6,191
40	Prothrombotic response to coronary angioplasty in patients with unstable angina and raised C-reactive protein. <i>Journal of Thrombosis and Thrombolysis</i> , 2002, 14, 131-138.	2.1	8
41	Inflammatory Left Ventricular Microaneurysms as a Cause of Apparently Idiopathic Ventricular Tachyarrhythmias. <i>Circulation</i> , 2001, 104, 168-173.	1.6	81
42	Enhanced Response of Blood Monocytes to In Vitro Lipopolysaccharide-Challenge in Patients With Recurrent Unstable Angina. <i>Circulation</i> , 2001, 103, 2236-2241.	1.6	86
43	Inflammation and Acute Coronary Syndromes. <i>Herz</i> , 2000, 25, 108-112.	1.1	35
44	Myocardial ischemia-reperfusion damage after pacing-induced tachycardia in patients with cardiac syndrome X. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2000, 279, H2627-H2633.	3.2	67
45	The G20210A Prothrombin Mutation and the Physicians' Health Study. <i>Circulation</i> , 2000, 101, E207-8.	1.6	7
46	Myocardial Cell Death in Human Diabetes. <i>Circulation Research</i> , 2000, 87, 1123-1132.	4.5	753
47	Major Racial Differences in Coronary Constrictor Response Between Japanese and Caucasians With Recent Myocardial Infarction. <i>Circulation</i> , 2000, 101, 1102-1108.	1.6	342
48	Evidence for Antigen-Driven T-Cell Response in Unstable Angina. <i>Circulation</i> , 2000, 102, 1114-1119.	1.6	110
49	Cell Death in Acromegalic Cardiomyopathy. <i>Circulation</i> , 1999, 99, 1426-1434.	1.6	111
50	Perturbation of the T-Cell Repertoire in Patients With Unstable Angina. <i>Circulation</i> , 1999, 100, 2135-2139.	1.6	374
51	Increasing Levels of Interleukin (IL)-1Ra and IL-6 During the First 2 Days of Hospitalization in Unstable Angina Are Associated With Increased Risk of In-Hospital Coronary Events. <i>Circulation</i> , 1999, 99, 2079-2084.	1.6	456
52	Global Biventricular Dysfunction in Patients With Asymptomatic Coronary Artery Disease May Be Caused by Myocarditis. <i>Circulation</i> , 1999, 99, 1295-1299.	1.6	24
53	Elevated Levels of C-Reactive Protein at Discharge in Patients With Unstable Angina Predict Recurrent Instability. <i>Circulation</i> , 1999, 99, 855-860.	1.6	520
54	Elevated levels of C-reactive protein before coronary artery bypass grafting predict recurrence of ischemic events. <i>American Journal of Cardiology</i> , 1999, 84, 459-461.	1.6	101

#	ARTICLE	IF	CITATIONS
55	Atenolol versus amlodipine versus isosorbide-5-mononitrate on anginal symptoms in syndrome X. American Journal of Cardiology, 1999, 84, 854-856.	1.6	163
56	Effects of atrial pacing on arterial and coronary sinus endothelin-1 levels in syndrome X. American Journal of Cardiology, 1999, 84, 1187-1191.	1.6	56
57	Preprocedural serum levels of C-reactive protein predict early complications and late restenosis after coronary angioplasty. Journal of the American College of Cardiology, 1999, 34, 1512-1521.	2.8	326
58	Enhanced inflammatory response in patients with preinfarction unstable angina. Journal of the American College of Cardiology, 1999, 34, 1696-1703.	2.8	144
59	Vasospastic Angina. Developments in Cardiovascular Medicine, 1999, , 114-124.	0.1	0
60	The Changing Concept of Syndrome X. Developments in Cardiovascular Medicine, 1999, , 151-158.	0.1	0
61	Platelet and Thrombin Activity Following Cardiac Catheterization Despite Treatment with Aspirin. Journal of Thrombosis and Thrombolysis, 1998, 6, 141-145.	2.1	3
62	The "Warm-Up" Phenomenon Occurs in Patients With Chronic Stable Angina But Not in Patients With Syndrome X. American Journal of Cardiology, 1998, 81, 123-127.	1.6	7
63	Incremental prognostic value of serum levels of troponin T and C-reactive protein on admission in patients with unstable angina pectoris. American Journal of Cardiology, 1998, 82, 715-719.	1.6	156
64	Role of Abnormal Pain Sensitivity and Behavioral Factors in Determining Chest Pain in Syndrome X. Journal of the American College of Cardiology, 1998, 31, 62-66.	2.8	87
65	Immune system activation follows inflammation in unstable angina: pathogenetic implications. Journal of the American College of Cardiology, 1998, 32, 1295-1304.	2.8	97
66	The role of cytokines in unstable angina. Expert Opinion on Investigational Drugs, 1998, 7, 1667-1672.	4.1	12
67	Association of Virulent <i>Helicobacter pylori</i> Strains With Ischemic Heart Disease. Circulation, 1998, 97, 1675-1679.	1.6	299
68	Enhanced Inflammatory Response to Coronary Angioplasty in Patients With Severe Unstable Angina. Circulation, 1998, 98, 2370-2376.	1.6	292
69	Inflammation, Atherosclerosis, and Ischemic Events " Exploring the Hidden Side of the Moon. New England Journal of Medicine, 1997, 336, 1014-1016.	27.0	219
70	Cardiac Autonomic Function and Sensitivity to Pain in Postmenopausal Women With Angina and Normal Coronary Arteries. American Journal of Cardiology, 1997, 79, 1174-1179.	1.6	11
71	Role of Inflammation in the Pathogenesis of Unstable Coronary Artery Disease. American Journal of Cardiology, 1997, 80, 10E-16E.	1.6	42
72	Ischemic-like ST-Segment Changes During Holter Monitoring in Patients With Angina Pectoris and Normal Coronary Arteries But Negative Exercise Testing. American Journal of Cardiology, 1997, 79, 1-6.	1.6	44

#	ARTICLE	IF	CITATIONS
73	The risk and cost-effective individual patient management: The challenge of a new generation of clinical trials. <i>Cardiovascular Drugs and Therapy</i> , 1997, 10, 751-758.	2.6	6
74	Abnormal Cardiac Adrenergic Nerve Function in Patients With Syndrome X Detected By [ <sup>123</sup> I]Metaiodobenzylguanidine Myocardial Scintigraphy. <i>Circulation</i> , 1997, 96, 821-826.	1.6	131
75	Intracellular neutrophil myeloperoxidase is reduced in unstable angina and acute myocardial infarction, but its reduction is not related to ischemia. <i>Journal of the American College of Cardiology</i> , 1996, 27, 611-616.	2.8	150
76	Autonomic changes associated with spontaneous coronary spasm in patients with variant angina. <i>Journal of the American College of Cardiology</i> , 1996, 28, 1249-1256.	2.8	116
77	Episodic activation off the coagulation system in unstable angina does not elicit an acute phase reaction. <i>American Journal of Cardiology</i> , 1996, 77, 85-87.	1.6	33
78	Different effects of lipopolysaccharide on plasminogen activator inhibitor-1 production in aortic media in vivo and in culture. <i>Journal of Thrombosis and Thrombolysis</i> , 1996, 3, 215-223.	2.1	1
79	Preinfarction Angina as a Predictor of More Rapid Coronary Thrombolysis in Patients with Acute Myocardial Infarction. <i>New England Journal of Medicine</i> , 1996, 334, 7-12.	27.0	228
80	Inflammation in ischaemic heart disease. <i>BMJ: British Medical Journal</i> , 1996, 312, 1049-1050.	2.3	57
81	Temporal Relation Between Ischemic Episodes and Activation of the Coagulation System in Unstable Angina. <i>Circulation</i> , 1996, 93, 2121-2127.	1.6	38
82	Plasma Protein Acute-Phase Response in Unstable Angina Is Not Induced by Ischemic Injury. <i>Circulation</i> , 1996, 94, 2373-2380.	1.6	134
83	Noninvasive Quantification of Regional Myocardial Metabolic Rate for Oxygen by Use of <sup>15</sup> O <sub>2</sub> Inhalation and Positron Emission Tomography. <i>Circulation</i> , 1996, 94, 792-807.	1.6	69
84	Elevated Levels of Interleukin-6 in Unstable Angina. <i>Circulation</i> , 1996, 94, 874-877.	1.6	588
85	Introduction. <i>American Journal of Cardiology</i> , 1995, 76, 1B-3B.	1.6	0
86	Circadian variation of ischemic threshold in syndrome X. <i>American Journal of Cardiology</i> , 1995, 75, 683-686.	1.6	15
87	Cardiac syndrome X: Clinical characteristics and left ventricular function. <i>Journal of the American College of Cardiology</i> , 1995, 25, 807-814.	2.8	438
88	973-113 Elevated C-Reactive Protein at Discharge and at Three Months After Waning of Symptoms in Unstable Angina is Associated with Recurrence of Instability During 12 Months Follow-up. <i>Journal of the American College of Cardiology</i> , 1995, 25, 250A-251A.	2.8	6
89	Cytomegalovirus Replication Is Not a Cause of Instability in Unstable Angina. <i>Circulation</i> , 1995, 91, 1910-1913.	1.6	41
90	The Prognostic Value of C-Reactive Protein and Serum Amyloid A Protein in Severe Unstable Angina. <i>New England Journal of Medicine</i> , 1994, 331, 417-424.	27.0	2,159

#	ARTICLE	IF	CITATIONS
91	Reduced Coronary Vasodilator Function in Infarcted and Normal Myocardium after Myocardial Infarction. <i>New England Journal of Medicine</i> , 1994, 331, 222-227.	27.0	370
92	Prearteriolar Coronary Constriction In Pathogenesis Of Syndrome X. Role Of Adenosine. <i>Developments in Cardiovascular Medicine</i> , 1994, , 193-210.	0.1	1
93	Delayed recovery of coronary resistive vessel function after coronary angioplasty. <i>Journal of the American College of Cardiology</i> , 1993, 21, 612-621.	2.8	165
94	Aspirin, but not heparin, suppresses the transient increase in thromboxane biosynthesis associated with cardiac catheterization or coronary angioplasty. <i>Journal of the American College of Cardiology</i> , 1993, 21, 1377-1381.	2.8	29
95	Left ventricular hypercontractility and ST segment depression in patients with syndrome X. <i>Journal of the American College of Cardiology</i> , 1993, 22, 1607-1613.	2.8	35
96	Comparison of regional myocardial blood flow in syndrome X and one-vessel coronary artery disease. <i>American Journal of Cardiology</i> , 1993, 72, 134-139.	1.6	97
97	Myocardial ischemia caused by distal coronary vasoconstriction. <i>American Journal of Cardiology</i> , 1992, 70, 1602-1605.	1.6	48
98	Mechanisms and significance of cardiac ischemic pain. <i>Progress in Cardiovascular Diseases</i> , 1992, 35, 1-18.	3.1	37
99	Collateral Development and Function in Man. , 1992, , 381-402.		4
100	Mechanisms of angina pectoris in syndrome X. <i>Journal of the American College of Cardiology</i> , 1991, 17, 499-506.	2.8	398
101	Heart rate response during exercise testing and ambulatory ECG monitoring in patients with syndrome X. <i>American Heart Journal</i> , 1991, 122, 458-463.	2.7	51
102	Absence of myocardial dysfunction during stress in patients with syndrome X. <i>Journal of the American College of Cardiology</i> , 1991, 18, 1463-1470.	2.8	163
103	Comparison of epicardial coronary artery tone and reactivity in Prinzmetal's variant angina and chronic stable angina pectoris. <i>Journal of the American College of Cardiology</i> , 1991, 17, 1058-1062.	2.8	41
104	The elusive cause of instability in unstable angina. <i>American Journal of Cardiology</i> , 1991, 68, B16-B21.	1.6	12
105	Myocardial Ischemia Caused by Distal Coronary-Artery Constriction in Stable Angina Pectoris. <i>New England Journal of Medicine</i> , 1990, 323, 514-520.	27.0	147
106	Similar time course of ST depression during and after exercise in patients with coronary artery disease and syndrome X. <i>American Heart Journal</i> , 1990, 120, 848-854.	2.7	27
107	Early coronary reperfusion blunts the procoagulant response of plasminogen activator inhibitor-1 and von Willebrand factor in acute myocardial infarction. <i>Journal of the American College of Cardiology</i> , 1990, 16, 1553-1560.	2.8	53
108	Clinical Significance of Coronary Vasomotor Tone in Myocardial Ischemia. , 1990, , 217-229.		2
