citing authors

#	ARTICLE	IF	CITATIONS
1	Relations between aging sensory/sensorimotor and cognitive functions. <i>Neuroscience and Biobehavioral Reviews</i> , 2002, 26, 777-783.	6.1	367
2	Comparing the effects of aging and background noise on short-term memory performance.. <i>Psychology and Aging</i> , 2000, 15, 323-334.	1.6	217
3	Benefits of Cognitive Dual-Task Training on Balance Performance in Healthy Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2010, 65A, 1344-1352.	3.6	156
4	Age-Related Changes in Task-Switching Components: The Role of Task Uncertainty. <i>Brain and Cognition</i> , 2002, 49, 363-381.	1.8	154
5	Cognitive Involvement in Balance, Gait and Dual-Tasking in Aging: A Focused Review From a Neuroscience of Aging Perspective. <i>Frontiers in Neurology</i> , 2018, 9, 913.	2.4	151
6	Consensus on Shared Measures of Mobility and Cognition: From the Canadian Consortium on Neurodegeneration in Aging (CCNA). <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2019, 74, 897-909.	3.6	125
7	Distractibility, circadian arousal, and aging: A boundary condition?. <i>Psychology and Aging</i> , 1998, 13, 574-583.	1.6	86
8	Gait variability across neurodegenerative and cognitive disorders: Results from the Canadian Consortium of Neurodegeneration in Aging (CCNA) and the Gait and Brain Study. <i>Alzheimer's and Dementia</i> , 2021, 17, 1317-1328.	0.8	79
9	Dual-Task Performance Reveals Increased Involvement of Executive Control in Fine Motor Sequencing in Healthy Aging. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2010, 65B, 526-535.	3.9	41
10	An Ecological Approach to Studying Aging and Dual-Task Performance. , 2005, , 190-218.		40
11	Successful adaptation of gait in healthy older adults during dual-task treadmill walking. <i>Aging, Neuropsychology, and Cognition</i> , 2012, 19, 150-167.	1.3	34
12	Longitudinal Associations of Need for Cognition, Cognitive Activity, and Depressive Symptomatology With Cognitive Function in Recent Retirees. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2013, 68, 655-664.	3.9	31
13	A comparison of motor skill learning and retention in younger and older adults. <i>Experimental Brain Research</i> , 2009, 195, 419-427.	1.5	29
14	Effects of Hearing Loss on Dual-Task Performance in an Audiovisual Virtual Reality Simulation of Listening While Walking. <i>Journal of the American Academy of Audiology</i> , 2016, 27, 567-587.	0.7	28
15	The Effects of Age and Hearing Loss on Dual-Task Balance and Listening. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2019, 74, 275-283.	3.9	28
16	Functional neuroimaging of the interference between working memory and the control of periodic ankle movement timing. <i>Neuropsychologia</i> , 2013, 51, 2142-2153.	1.6	26
17	Effects of Balance Status and Age on Muscle Activation While Walking Under Divided Attention. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2007, 62, P171-P178.	3.9	22
18	A comparison of the impact of physical exercise, cognitive training and combined intervention on spontaneous walking speed in older adults. <i>Aging Clinical and Experimental Research</i> , 2018, 30, 921-925.	2.9	21

#	ARTICLE	IF	CITATIONS
19	Effects of Age on Dual-Task Walking While Listening. <i>Journal of Motor Behavior</i> , 2019, 51, 416-427.	0.9	21
20	Synergistic Effects of Cognitive Training and Physical Exercise on Dual-Task Performance in Older Adults. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2021, 76, 1533-1541.	3.9	20
21	Attentional switching in the sequential flanker task: Age, location, and time course effects. <i>Acta Psychologica</i> , 2008, 127, 416-427.	1.5	19
22	Examining prepotent response suppression in aging: A kinematic analysis.. <i>Psychology and Aging</i> , 2009, 24, 450-461.	1.6	17
23	The effect of simultaneously and sequentially delivered cognitive and aerobic training on mobility among older adults with hearing loss. <i>Gait and Posture</i> , 2019, 67, 262-268.	1.4	16
24	Multisensory, Multi-Tasking Performance of Older Adults With and Without Subjective Cognitive Decline. <i>Multisensory Research</i> , 2019, 32, 797-829.	1.1	14
25	Movement Kinematics of Prepotent Response Suppression in Aging During Conflict Adaptation. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2011, 66B, 185-194.	3.9	13
26	The role of age and inhibitory efficiency in working memory processing and storage components. <i>Quarterly Journal of Experimental Psychology</i> , 2011, 64, 1157-1172.	1.1	12
27	Comparing the Transfer Effects of Simultaneously and Sequentially Combined Aerobic Exercise and Cognitive Training in Older Adults. <i>Journal of Cognitive Enhancement: Towards the Integration of Theory and Practice</i> , 2017, 1, 478-490.	1.6	12
28	A comparison of physical exercise and cognitive training interventions to improve determinants of functional mobility in healthy older adults. <i>Experimental Gerontology</i> , 2021, 149, 111331.	2.8	12
29	Effects of age on listening and postural control during realistic multi-tasking conditions. <i>Human Movement Science</i> , 2020, 73, 102664.	1.4	10
30	Are Age-Related Differences Uniform Across Different Inhibitory Functions?. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2016, 71, 641-649.	3.9	8
31	Effects of age and cognitive load on response reprogramming. <i>Experimental Brain Research</i> , 2015, 233, 937-946.	1.5	7
32	Context-updating processes facilitate response reprogramming in younger but not older adults.. <i>Psychology and Aging</i> , 2013, 28, 701-713.	1.6	6
33	Sequential Performance in Young and Older Adults: Evidence of Chunking and Inhibition. <i>Aging, Neuropsychology, and Cognition</i> , 2010, 17, 270-295.	1.3	5
34	A Comparison of the Effect of Physical Activity and Cognitive Training on Dual-Task Performance in Older Adults. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2021, , .	3.9	5
35	Sex-Related Differences in the Associations Between Montreal Cognitive Assessment Scores and Pure-Tone Measures of Hearing. <i>American Journal of Audiology</i> , 2022, 31, 220-227.	1.2	4
36	Cognitive Training and Mobility: Implications for Falls Prevention. , 2020, , 289-308.		1
