#	ARTICLE	IF	CITATIONS
1	Comparative Genomics Analysis Demonstrated a Link Between Staphylococci Isolated From Different Sources: A Possible Public Health Risk. <i>Frontiers in Microbiology</i> , 2021, 12, 576696.	3.5	4
2	Surveillance and prevalence of antimicrobial resistant bacteria from public settings within urban built environments: Challenges and opportunities for hygiene and infection control. <i>Environment International</i> , 2021, 157, 106836.	10.0	28
3	Comparative Proteomic Profiling of Methicillin- <i>S</i> usceptible and Resistant <i>Staphylococcus aureus</i> . <i>Proteomics</i> , 2020, 20, e1900221.	2.2	6
4	Antibiotic resistance and molecular characteristics of methicillin-resistant <i>Staphylococcus epidermidis</i> recovered from hospital personnel in China. <i>Journal of Global Antimicrobial Resistance</i> , 2020, 22, 195-201.	2.2	16
5	Whole genome sequencing revealed new molecular characteristics in multidrug resistant staphylococci recovered from high frequency touched surfaces in London. <i>Scientific Reports</i> , 2019, 9, 9637.	3.3	26
6	The prevalence, antibiotic resistance and <i>mecA</i> characterization of coagulase negative staphylococci recovered from non-healthcare settings in London, UK. <i>Antimicrobial Resistance and Infection Control</i> , 2018, 7, 73.	4.1	66
7	Whole Genome Sequence and Comparative Genomics Analysis of Multi-drug Resistant Environmental <i>Staphylococcus epidermidis</i> ST59. <i>G3: Genes, Genomes, Genetics</i> , 2018, 8, 2225-2230.	1.8	21
8	Antibiotic resistance and <i>mecA</i> characterization of coagulase-negative staphylococci isolated from three hotels in London, UK. <i>Frontiers in Microbiology</i> , 2015, 6, 947.	3.5	44
9	Diversity of SCC <i>mec</i> elements in <i>Staphylococci</i> isolated from public washrooms. <i>BMC Microbiology</i> , 2015, 15, 120.	3.3	11
10	Could Public Restrooms Be an Environment for Bacterial Resistomes?. <i>PLoS ONE</i> , 2013, 8, e54223.	2.5	46
