| # | ARTICLE                                                                                                                                                                          | IF  | CITATIONS |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | High-resolution 3D shallow crustal structure in Long Beach, California: Application of ambient noise tomography on a dense seismic array. <i>Geophysics</i> , 2013, 78, Q45-Q56. | 2.6 | 333       |
| 2 | Basic data features and results from a spatially dense seismic array on the San Jacinto fault zone. <i>Geophysical Journal International</i> , 2015, 202, 370-380.               | 2.4 | 115       |
| 3 | High-resolution seismic event detection using local similarity for Large-N arrays. <i>Scientific Reports</i> , 2018, 8, 1646.                                                    | 3.3 | 56        |
| 4 | Noise-based ballistic wave passive seismic monitoring “ Part 2: surface waves. <i>Geophysical Journal International</i> , 2020, 221, 692-705.                                    | 2.4 | 23        |
| 5 | Use of ambient-noise surface-wave tomography in mineral resource exploration and evaluation. , 2018, , .                                                                         |     | 12        |
