#	ARTICLE	IF	CITATIONS
1	Science Goals and Mission Concept for a Landed Investigation of Mercury. Planetary Science Journal, 2022, 3, 68.	3.6	2
2	Statistical Analysis of Bifurcating Region 2 Field-Aligned Currents Using AMPERE. Frontiers in Astronomy and Space Sciences, 2022, 9, .	2.8	2
3	Iridium Communications Satellite Constellation Data for Study of Earth's Magnetic Field. Geochemistry, Geophysics, Geosystems, 2021, 22, e2020GC009515.	2.5	9
4	Reconstruction of Extreme Geomagnetic Storms: Breaking the Data Paucity Curse. Space Weather, 2020, 18, e2020SW002561.	3.7	10
5	Statistical Relations Between Auroral Electrical Conductances and Field-Aligned Currents at High Latitudes. Journal of Geophysical Research: Space Physics, 2020, 125, e2020JA028008.	2.4	16
6	Bifurcated Region 2 Field-Aligned Currents Associated With Substorms. Journal of Geophysical Research: Space Physics, 2020, 125, e2019JA027041.	2.4	7
7	Science Data Products for AMPERE. , 2020, , 141-165.		28
8	Storm Time Plasma Pressure Inferred From Multimission Measurements and Its Validation Using Van Allen Probes Particle Data. Space Weather, 2020, 18, e2020SW002583.	3.7	9
9	Global Empirical Picture of Magnetospheric Substorms Inferred From Multimission Magnetometer Data. Journal of Geophysical Research: Space Physics, 2019, 124, 1085-1110.	2.4	41
10	The Space Physics Environment Data Analysis System (SPEDAS). Space Science Reviews, 2019, 215, 9.	8.1	332
11	Empirical Modeling of Extreme Events: Storm-Time Geomagnetic Field, Electric Current, and Pressure Distributions. , 2018, , 259-279.		11
12	Mercury's Internal Magnetic Field. , 2018, , 114-143.		12
13	Structure and Configuration of Mercury's Magnetosphere. , 2018, , 430-460.		7
14	Statistical Study of Mercury's Energetic Electron Events as Observed by the Gamma-Ray and Neutron Spectrometer Instrument Onboard MESSENGER. Journal of Geophysical Research: Space Physics, 2018, 123, 4961-4978.	2.4	4
15	Temporal and Spatial Development of Global Birkeland Currents. Journal of Geophysical Research: Space Physics, 2018, 123, 4785-4808.	2.4	22
16	Magnetosphere dynamics during the 14 November 2012 storm inferred from TWINS, AMPERE, Van Allen Probes, and BATS-R-US's CRCM. Annales Geophysicae, 2018, 36, 107-124.	1.6	8
17	Statistical Relations Between Field-Aligned Currents and Precipitating Electron Energy Flux. Geophysical Research Letters, 2018, 45, 8738-8745.	4.0	9
18	Timescales of Dayside and Nightside Field-Aligned Current Response to Changes in Solar Wind-Magnetosphere Coupling. Journal of Geophysical Research: Space Physics, 2018, 123, 7307-7319.	2.4	16

#	ARTICLE	IF	CITATIONS
19	Overview of Solar Windâ€“Magnetosphereâ€“Ionosphereâ€“Atmosphere Coupling and the Generation of Magnetospheric Currents. Space Sciences Series of ISSI, 2018, , 555-581.	0.0	0
20	A comparison of smallâ€“scale magnetic fluctuations in the Region 1 and 2 fieldâ€“aligned current systems. Journal of Geophysical Research: Space Physics, 2017, 122, 3277-3290.	2.4	5
21	Statistical study of ICME effects on Mercury's magnetospheric boundaries and northern cusp region from MESSENGER. Journal of Geophysical Research: Space Physics, 2017, 122, 4960-4975.	2.4	24
22	Comparison of predictive estimates of highâ€“latitude electrodynamic with observations of globalâ€“scale Birkeland currents. Space Weather, 2017, 15, 352-373.	3.7	35
23	A Dynamic Model of Mercury's Magnetospheric Magnetic Field. Geophysical Research Letters, 2017, 44, 10147-10154.	4.0	30
24	Overview of Solar Windâ€“Magnetosphereâ€“Ionosphereâ€“Atmosphere Coupling and the Generation of Magnetospheric Currents. Space Science Reviews, 2017, 206, 547-573.	8.1	105
25	Filamentary field-aligned currents at the polar cap region during northward interplanetary magnetic field derived with the Swarm constellation. Annales Geophysicae, 2016, 34, 901-915.	1.6	16
26	Intense energetic electron flux enhancements in Mercury's magnetosphere: An integrated view with highâ€“resolution observations from MESSENGER. Journal of Geophysical Research: Space Physics, 2016, 121, 2171-2184.	2.4	31
27	MESSENGER observations of induced magnetic fields in Mercury's core. Geophysical Research Letters, 2016, 43, 2436-2444.	4.0	51
28	Miniature atomic scalar magnetometer for space based on the rubidium isotope ⁸⁷ Rb. Journal of Geophysical Research: Space Physics, 2016, 121, 7870-7880.	2.4	46
29	Seasonal and diurnal variations in AMPERE observations of the Birkeland currents compared to modeled results. Journal of Geophysical Research: Space Physics, 2016, 121, 4027-4040.	2.4	76
30	MESSENGER observations of cusp plasma filaments at Mercury. Journal of Geophysical Research: Space Physics, 2016, 121, 8260-8285.	2.4	29
31	A statistical survey of ultralowâ€“frequency wave power and polarization in the Hermean magnetosphere. Journal of Geophysical Research: Space Physics, 2016, 121, 8755-8772.	2.4	11
32	Electrodynamic context of magnetopause dynamics observed by magnetospheric multiscale. Geophysical Research Letters, 2016, 43, 5988-5996.	4.0	10
33	Dipolarization in the inner magnetosphere during a geomagnetic storm on 7 October 2015. Geophysical Research Letters, 2016, 43, 9397-9405.	4.0	7
34	MESSENGER observations of suprathermal electrons in Mercury's magnetosphere. Geophysical Research Letters, 2016, 43, 550-555.	4.0	35
35	MESSENGER X-ray observations of magnetosphereâ€“surface interaction on the nightside of Mercury. Planetary and Space Science, 2016, 125, 72-79.	1.7	40
36	MESSENGER observations of magnetospheric substorm activity in Mercury's near magnetotail. Geophysical Research Letters, 2015, 42, 3692-3699.	4.0	50

#	ARTICLE	IF	CITATIONS
37	First observations of Mercury's plasma mantle by MESSENGER. Geophysical Research Letters, 2015, 42, 9666-9675.	4.0	29
38	Improving solar wind modeling at Mercury: Incorporating transient solar phenomena into the WSA-ENLIL model with the Cone extension. Journal of Geophysical Research: Space Physics, 2015, 120, 5667-5685.	2.4	16
39	MESSENGER survey of in situ low frequency wave storms between 0.3 and 0.7 AU. Journal of Geophysical Research: Space Physics, 2015, 120, 10,207.	2.4	21
40	MESSENGER observations of solar energetic electrons within Mercury's magnetosphere. Journal of Geophysical Research: Space Physics, 2015, 120, 8559-8571.	2.4	16
41	On the formation and origin of substorm growth phase/onset auroral arcs inferred from conjugate space-ground observations. Journal of Geophysical Research: Space Physics, 2015, 120, 8707-8722.	2.4	21
42	MESSENGER observations of multiscale Kelvin-Helmholtz vortices at Mercury. Journal of Geophysical Research: Space Physics, 2015, 120, 4354-4368.	2.4	40
43	Interpreting ~1 Hz magnetic compressional waves in Mercury's inner magnetosphere in terms of propagating ion Bernstein waves. Journal of Geophysical Research: Space Physics, 2015, 120, 4213-4228.	2.4	21
44	Modular model for Mercury's magnetospheric magnetic field confined within the average observed magnetopause. Journal of Geophysical Research: Space Physics, 2015, 120, 4503-4518.	2.4	59
45	Principal component analysis of Birkeland currents determined by the Active Magnetosphere and Planetary Electrodynamics Response Experiment. Journal of Geophysical Research: Space Physics, 2015, 120, 10,415.	2.4	38
46	Comprehensive survey of energetic electron events in Mercury's magnetosphere with data from the MESSENGER Gamma-Ray and Neutron Spectrometer. Journal of Geophysical Research: Space Physics, 2015, 120, 2851-2876.	2.4	36
47	MESSENGER observations of flux ropes in Mercury's magnetotail. Planetary and Space Science, 2015, 115, 77-89.	1.7	71
48	Low-altitude magnetic field measurements by MESSENGER reveal Mercury's ancient crustal field. Science, 2015, 348, 892-895.	12.6	89
49	Constraints on the secular variation of Mercury's magnetic field from the combined analysis of MESSENGER and Mariner 10 data. Geophysical Research Letters, 2014, 41, 6627-6634.	4.0	23
50	Event study combining magnetospheric and ionospheric perspectives of the substorm current wedge modeling. Journal of Geophysical Research: Space Physics, 2014, 119, 9714-9728.	2.4	15
51	The magnitudes of the regions 1 and 2 Birkeland currents observed by AMPERE and their role in solar wind-magnetosphere-ionosphere coupling. Journal of Geophysical Research: Space Physics, 2014, 119, 9804-9815.	2.4	56
52	Global ionospheric and thermospheric response to the 5 April 2010 geomagnetic storm: An integrated data-model investigation. Journal of Geophysical Research: Space Physics, 2014, 119, 10,358.	2.4	46
53	Observations of upstream ultra-low-frequency waves in the Mercury's foreshock. , 2014, , .		0
54	Development of large-scale Birkeland currents determined from the Active Magnetosphere and Planetary Electrodynamics Response Experiment. Geophysical Research Letters, 2014, 41, 3017-3025.	4.0	156

#	ARTICLE	IF	CITATIONS
55	Statistical relationship between large-scale upward field-aligned currents and electron precipitation. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 6715-6731.	2.4	58
56	Electric currents of a substorm current wedge on 24 February 2010. <i>Geophysical Research Letters</i> , 2014, 41, 4449-4455.	4.0	17
57	Ion kinetic properties in Mercury's pre-midnight plasma sheet. <i>Geophysical Research Letters</i> , 2014, 41, 5740-5747.	4.0	50
58	Structure and dynamics of Mercury's magnetospheric cusp: MESSENGER measurements of protons and planetary ions. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 6587-6602.	2.4	79
59	Steady-state field-aligned currents at Mercury. <i>Geophysical Research Letters</i> , 2014, 41, 7444-7452.	4.0	55
60	MESSENGER observations of large dayside flux transfer events: Do they drive Mercury's substorm cycle?. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 5613-5623.	2.4	54
61	Active current sheets and candidate hot flow anomalies upstream of Mercury's bow shock. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 853-876.	2.4	22
62	Comparison of magnetic perturbation data from LEO satellite constellations: Statistics of DMSP and AMPERE. <i>Space Weather</i> , 2014, 12, 2-23.	3.7	33
63	Plasma distribution in Mercury's magnetosphere derived from MESSENGER Magnetometer and Fast Imaging Plasma Spectrometer observations. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 2917-2932.	2.4	46
64	Mercury's surface magnetic field determined from proton-reflection magnetometry. <i>Geophysical Research Letters</i> , 2014, 41, 4463-4470.	4.0	39
65	MESSENGER observations of Mercury's dayside magnetosphere under extreme solar wind conditions. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 8087-8116.	2.4	125
66	A superposed epoch analysis of the regions 1 and 2 Birkeland currents observed by AMPERE during substorms. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 9834-9846.	2.4	48
67	Global evolution of Birkeland currents on 10 min timescales: MHD simulations and observations. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 4977-4997.	2.4	31
68	Empirical reconstruction of storm time steady magnetospheric convection events. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 6434-6456.	2.4	29
69	Upstream ultra-low frequency waves in Mercury's foreshock region: MESSENGER magnetic field observations. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 2809-2823.	2.4	40
70	Empirical relationship between electron precipitation and far-ultraviolet auroral emissions from DMSP observations. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 1203-1209.	2.4	33
71	Magnetic flux pileup and plasma depletion in Mercury's subsolar magnetosheath. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 7181-7199.	2.4	96
72	Cyclic reformation of a quasi-parallel bow shock at Mercury: MESSENGER observations. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 6457-6464.	2.4	25
