#	ARTICLE	IF	CITATIONS
1	Electric field suppressed turbulence and reduced viscosity of asphaltene base crude oil sample. Fuel, 2018, 220, 358-362.	6.4	19
2	Bunker diesel viscosity is dramatically reduced by electrorheological treatment. International Journal of Modern Physics B, 2018, 32, 1850012.	2.0	4
3	Application of Electrorheology to Improve Crude Oil Flowing Properties Through Pipeline. , 2016, , .		0
4	Suppressing turbulence and enhancing liquid suspension flow in pipelines with electrorheology. Physical Review E, 2015, 91, 012304.	2.1	13
5	Can we eliminate major tornadoes in Tornado Alley? " Response to the Comments. International Journal of Modern Physics B, 2014, 28, 1475005.	2.0	0
6	Reducing viscosity of paraffin base crude oil with electric field for oil production and transportation. Fuel, 2014, 118, 69-72.	6.4	59
7	Eliminating the major tornado threat in Tornado Alley. International Journal of Modern Physics B, 2014, 28, 1450175.	2.0	2
8	Neutron scattering studies of crude oil viscosity reduction with electric field. Fuel, 2014, 134, 493-498.	6.4	36
9	Comment on "Spherical agglomeration of superconducting and normal microparticles with and without applied electric field". Physical Review B, 2013, 87, .	3.2	1
10	Electrorheology for Efficient Energy Production and Conservation. Journal of Intelligent Material Systems and Structures, 2011, 22, 1667-1671.	2.5	16
11	Reducing blood viscosity with magnetic fields. Physical Review E, 2011, 84, 011905.	2.1	66
12	ELECTRORHEOLOGY FOR EFFICIENT ENERGY PRODUCTION AND CONSERVATION. , 2011, , .		0
13	Reducing the Viscosity of Diesel Fuel with Electrorheological Effect. Journal of Intelligent Material Systems and Structures, 2011, 22, 1713-1716.	2.5	8
14	Electrorheology Improves Transportation of Crude Oil. Journal of Intelligent Material Systems and Structures, 2011, 22, 1673-1676.	2.5	23
15	Electrorheology Improves E85 Engine Efficiency and Performance. Journal of Intelligent Material Systems and Structures, 2011, 22, 1707-1711.	2.5	6
16	ELECTRORHEOLOGY IMPROVES TRANSPORTATION OF CRUDE OIL. , 2011, , .		0
17	REDUCING THE VISCOSITY OF DIESEL FUEL WITH ELECTRORHEOLOGICAL EFFECT. , 2011, , .		1
18	ELECTRORHEOLOGY IMPROVES E85-ENGINE PERFORMANCE AND EFFICIENCY. , 2011, , .		0

#	ARTICLE	IF	CITATIONS
19	Response to the Comments: Fuel Efficiency of Internal Combustion Engines. Energy & Fuels, 2009, 23, 3339-3342.	5.1	10
20	Electrorheology improves engine efficiency. Journal of Physics: Conference Series, 2009, 149, 012030.	0.4	1
21	Electrorheology Leads to Efficient Combustion. Energy & Fuels, 2008, 22, 3785-3788.	5.1	41
22	Structure of Polydisperse Inverse Ferrofluids: A Theory and Computer Simulation. Journal of Physical Chemistry B, 2008, 112, 715-721.	2.6	10
23	THE PHYSICAL MECHANISM TO REDUCE VISCOSITY OF LIQUID SUSPENSIONS. International Journal of Modern Physics B, 2007, 21, 4767-4773.	2.0	21
24	The Physical Mechanism to Reduce Viscosity of Liquid Suspensions. , 2007, , .		2
25	Reducing the Viscosity of Crude Oil by Pulsed Electric or Magnetic Field. Energy & Fuels, 2006, 20, 2046-2051.	5.1	160
26	Structure and dynamics of dipolar fluids under strong shear. Chemical Engineering Science, 2006, 61, 2186-2190.	3.8	10
27	Electrostatic separation of superconducting particles from a mixture. Applied Physics Letters, 2006, 88, 082503.	3.3	2
28	INTERACTIONS BETWEEN TWO ROTATING POLARIZED SPHERES. , 2005, , .		0
29	Interactions between a rotating polarized sphere and a stationary one in an electric field. Physical Review E, 2005, 72, 041508.	2.1	13
30	INTERACTIONS BETWEEN TWO ROTATING POLARIZED SPHERES. International Journal of Modern Physics B, 2005, 19, 1215-1221.	2.0	0
31	VISCOSITY REDUCTION IN LIQUID SUSPENSIONS BY ELECTRIC OR MAGNETIC FIELDS. International Journal of Modern Physics B, 2005, 19, 1283-1289.	2.0	9
32	VISCOSITY REDUCTION IN LIQUID SUSPENSIONS BY ELECTRIC OR MAGNETIC FIELDS. , 2005, , .		0
33	MgB2 superconducting particles in a strong electric field. Physica C: Superconductivity and Its Applications, 2003, 398, 78-84.	1.2	10
34	High temperature superconducting ball formation in low frequency ac fields. Physical Review B, 2003, 68, .	3.2	9
35	Structure and Dynamics of Dipolar Fluids Under Strong Shear. International Journal of Modern Physics B, 2003, 17, 3057-3063.	2.0	4
36	Three-dimensional dielectric photonic crystals of body-centered-tetragonal lattice structure. Applied Physics Letters, 2002, 80, 4702-4704.	3.3	19

#	ARTICLE	IF	CITATIONS
37	STRUCTURE-ENHANCED YIELD SHEAR STRESS IN ELECTORRHEOLOGICAL FLUIDS. International Journal of Modern Physics B, 2002, 16, 2622-2628.	2.0	7
38	Electric-Field Induced Formation of Superconducting Granular Balls. International Journal of Modern Physics B, 2002, 16, 2529-2535.	2.0	3
39	STRUCTURE-ENHANCED YIELD SHEAR STRESS IN ELECTORRHEOLOGICAL FLUIDS. , 2002, , .		1
40	Electric-Field Induced Formation of Superconducting Granular Balls. , 2002, , .		0
41	Electric-field induced low temperature superconducting granular balls. Physica C: Superconductivity and Its Applications, 2002, 377, 357-361.	1.2	20
42	Path-Integral Approach to the Statistical Physics of One-Dimensional Random Systems. Journal of Statistical Physics, 2001, 103, 575-588.	1.2	2
43	Super-strong magnetorheological fluids. Journal of Physics Condensed Matter, 2001, 13, R979-R999.	1.8	147
44	Structures of a Magnetorheological Fluid. International Journal of Modern Physics B, 2001, 15, 851-858.	2.0	28
45	Enhance the Yield Shear Stress of Magnetorheological Fluids. International Journal of Modern Physics B, 2001, 15, 549-556.	2.0	23
46	ELECTORRHEOLOGICAL FLUIDS UNDER SHEAR. International Journal of Modern Physics B, 2001, 15, 918-929.	2.0	12
47	High temperature superconducting granular balls. Physica C: Superconductivity and Its Applications, 2000, 341-348, 1575-1578.	1.2	3
48	Flexible Fixturing with Phase-Change Materials. Part 1. Experimental Study on Magnetorheological Fluids. International Journal of Advanced Manufacturing Technology, 2000, 16, 822-829.	3.0	43
49	Structure-enhanced yield stress of magnetorheological fluids. Journal of Applied Physics, 2000, 87, 2634-2638.	2.5	190
50	Electrorheological Effect at Cryogenic Temperature. International Journal of Modern Physics B, 1999, 13, 1697-1704.	2.0	6
51	Formation of High Temperature Superconducting Balls. Physical Review Letters, 1999, 83, 5575-5578.	7.8	41
52	Apply the Electrorheological Effect to Produce Three-Dimensional Photonic Crystals for Laser Applications. International Journal of Modern Physics B, 1999, 13, 2189-2196.	2.0	8
53	Flexible Fixture Device with Magneto-Rheological Fluids. Journal of Intelligent Material Systems and Structures, 1999, 10, 690-694.	2.5	25
54	Constitutive equations for electrorheological fluids based on molecular dynamics. Rheology Series, 1999, , 659-676.	0.1	1

#	ARTICLE	IF	CITATIONS
55	Structural transitions of an electrorheological and magnetorheological fluid. <i>Physical Review E</i> , 1998, 57, 5761-5765.	2.1	35
56	Structures of an electrorheological fluid. <i>Physical Review E</i> , 1997, 56, 4328-4336.	2.1	58
57	Shear flow of one-component polarizable fluid in a strong electric field. <i>Physical Review E</i> , 1996, 53, 3732-3737.	2.1	16
58	Finite Element Analysis of Electrorheological Fluids. <i>International Journal of Modern Physics B</i> , 1996, 10, 2877-2884.	2.0	1
59	Effective Viscosity of an Electrorheological Fluid. <i>Journal of Intelligent Material Systems and Structures</i> , 1996, 7, 555-559.	2.5	0
60	Finite-element analysis of electrostatic interactions in electrorheological fluids. <i>Physical Review E</i> , 1995, 52, 2727-2735.	2.1	54
61	Viscosity of a one-component polarizable fluid. <i>Physical Review E</i> , 1995, 52, 813-818.	2.1	16
62	SIMULATION OF SOLID STRUCTURE FORMATION IN AN ELECTORRHEOLOGICAL FLUID. <i>International Journal of Modern Physics B</i> , 1994, 08, 2721-2730.	2.0	2
63	FLUID FLOW AND FALLING BALL EXPERIMENTS IN ER FLUIDS. <i>International Journal of Modern Physics B</i> , 1994, 08, 2823-2833.	2.0	2
64	Falling ball experiments in a dilute electrorheological fluid. <i>Journal of Applied Physics</i> , 1994, 75, 193-196.	2.5	0
65	Simulation of structure formation in an electrorheological fluid. <i>Physical Review Letters</i> , 1994, 73, 205-208.	7.8	147
66	Electric-field-induced phase transition in electrorheological fluids. <i>Physical Review E</i> , 1993, 47, 423-426.	2.1	53
67	Static shear stress of electrorheological fluids. <i>Physical Review E</i> , 1993, 48, 2744-2751.	2.1	35
68	Deformation of an electrorheological chain under flow. <i>Journal of Applied Physics</i> , 1993, 74, 942-944.	2.5	6
69	ORDER PARAMETERS AND PHASE TRANSITIONS IN ELECTORRHEOLOGICAL FLUIDS. <i>International Journal of Modern Physics B</i> , 1992, 06, 2635-2649.	2.0	3
70	Laser diffraction determination of the crystalline structure of an electrorheological fluid. <i>Physical Review Letters</i> , 1992, 68, 2555-2558.	7.8	183
71	Three-dimensional structure of induced electrorheological solid. <i>Physical Review Letters</i> , 1991, 67, 398-401.	7.8	462
72	Ground state of electrorheological fluids from Monte Carlo simulations. <i>Physical Review A</i> , 1991, 44, R6181-R6184.	2.5	77

#	ARTICLE	IF	CITATIONS
73	Electric Field Induced Solidification Theory of Electro-Rheology Fluids. , 1991, , 155-160.		1
74	Symmetry Breaking and Fractional Quantization of Quantum Systems. , 1991, , 519-525.		0
75	THERMODYNAMIC STABILITY OF THE TWO-DIMENSIONAL JELLIUM MODEL IN A STRONG MAGNETIC FIELD. International Journal of Modern Physics B, 1989, 03, 129-134.	2.0	0
76	Electric field induced solidification. Applied Physics Letters, 1989, 55, 1844-1846.	3.3	64
77	Integral and fractional quantization of a class of quantum systems. Physical Review B, 1987, 35, 9853-9855.	3.2	2
78	Dynamic current oscillations in the quantum hall effect. Physics Letters, Section A: General, Atomic and Solid State Physics, 1986, 117, 481-484.	2.1	3
79	Theory of the fractional quantum Hall effect. Journal of Physics C: Solid State Physics, 1986, 19, 173-180.	1.5	3
80	Impurity effect, degeneracy, and topological invariant in the quantum Hall effect. Physical Review B, 1986, 33, 3844-3850.	3.2	68
81	Fractional statistics and fractional quantized Hall effect. Physical Review B, 1985, 31, 6859-6860.	3.2	33
82	Ground state energy of the fractional quantised Hall system. Journal of Physics C: Solid State Physics, 1984, 17, L419-L423.	1.5	5
83	Comment on Laughlin's wavefunction for the quantised Hall effect. Journal of Physics C: Solid State Physics, 1984, 17, L53-L58.	1.5	11
84	Response to the comment by N d'Ambrumenil. Journal of Physics C: Solid State Physics, 1984, 17, L977-L978.	1.5	1
85	Fractional quantization of Hall conductance. II. Physical Review B, 1984, 29, 636-644.	3.2	36
86	Gauge invariance and fractional quantum Hall effect. Physical Review B, 1984, 30, 1097-1098.	3.2	101
87	Fractional quantization of Hall conductance. Physical Review B, 1983, 28, 1142-1144.	3.2	151
