#	ARTICLE	IF	CITATIONS
1	Functional Near Infrared Spectroscopy (fNIRS): An Emerging Neuroimaging Technology with Important Applications for the Study of Brain Disorders. <i>Clinical Neuropsychologist</i> , 2007, 21, 9-37.	2.3	349
2	The neuropsychology of borderline personality disorder: A meta-analysis and review. <i>Psychiatry Research</i> , 2005, 137, 191-202.	3.3	217
3	Neural Correlates of Negative Emotionality in Borderline Personality Disorder: An Activation-Likelihood-Estimation Meta-Analysis. <i>Biological Psychiatry</i> , 2013, 73, 153-160.	1.3	185
4	Amygdala and hippocampal volume reductions as candidate endophenotypes for borderline personality disorder: A meta-analysis of magnetic resonance imaging studies. <i>Psychiatry Research - Neuroimaging</i> , 2012, 201, 245-252.	1.8	128
5	Executive Functioning in Overweight Individuals with and without Loss of Control Eating. <i>European Eating Disorders Review</i> , 2014, 22, 373-377.	4.1	96
6	Reduced Levels of Vasopressin and Reduced Behavioral Modulation of Oxytocin in Psychotic Disorders. <i>Schizophrenia Bulletin</i> , 2014, 40, 1374-1384.	4.3	82
7	Six Years of Research on the National Institute of Mental Health's Research Domain Criteria (RDoC) Initiative: A Systematic Review. <i>Frontiers in Cellular Neuroscience</i> , 2017, 11, 46.	3.7	82
8	Do executive functioning deficits underpin binge eating disorder? A comparison of overweight women with and without binge eating pathology. <i>International Journal of Eating Disorders</i> , 2015, 48, 677-683.	4.0	80
9	Medial prefrontal cortex hyperactivation during social exclusion in borderline personality disorder. <i>Psychiatry Research - Neuroimaging</i> , 2010, 181, 233-236.	1.8	77
10	Emotion recognition deficits in schizophrenia-spectrum disorders and psychotic bipolar disorder: Findings from the Bipolar-Schizophrenia Network on Intermediate Phenotypes (B-SNIP) study. <i>Schizophrenia Research</i> , 2014, 158, 105-112.	2.0	77
11	A Neurobiological Model of Borderline Personality Disorder: Systematic and Integrative Review. <i>Harvard Review of Psychiatry</i> , 2016, 24, 311-329.	2.1	72
12	Facial emotion recognition in first-episode schizophrenia and bipolar disorder with psychosis. <i>Schizophrenia Research</i> , 2014, 153, 32-37.	2.0	58
13	Slowing down and taking a second look: Inhibitory deficits associated with binge eating are not food-specific. <i>Appetite</i> , 2016, 96, 555-559.	3.7	57
14	Differentiating functions of the lateral and medial prefrontal cortex in motor response inhibition. <i>NeuroImage</i> , 2014, 85, 423-431.	4.2	55
15	Perceptual biases in facial emotion recognition in borderline personality disorder.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2014, 5, 79-87.	1.3	49
16	Abnormal prefrontal cortical response during affective processing in borderline personality disorder. <i>Psychiatry Research - Neuroimaging</i> , 2010, 182, 117-122.	1.8	46
17	Delineating the contributions of sustained attention and working memory to individual differences in mindfulness. <i>Personality and Individual Differences</i> , 2013, 54, 226-230.	2.9	45
18	Sex and Diagnosis-Specific Associations Between DNA Methylation of the Oxytocin Receptor Gene With Emotion Processing and Temporal-Limbic and Prefrontal Brain Volumes in Psychotic Disorders. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2016, 1, 141-151.	1.5	45

#	ARTICLE	IF	CITATIONS
19	The independent and interacting effects of hedonic hunger and executive function on binge eating. <i>Appetite</i> , 2015, 89, 16-21.	3.7	44
20	A problem-solving task specialized for functional neuroimaging: validation of the Scarborough adaptation of the Tower of London (S-TOL) using near-infrared spectroscopy. <i>Frontiers in Human Neuroscience</i> , 2014, 8, 185.	2.0	41
21	Decision-making conflict and the neural efficiency hypothesis of intelligence: A functional near-infrared spectroscopy investigation. <i>NeuroImage</i> , 2015, 109, 307-317.	4.2	39
22	Response inhibition deficits in unaffected first-degree relatives of patients with borderline personality disorder.. <i>Neuropsychology</i> , 2012, 26, 473-482.	1.3	32
23	Executive functions and social cognition in highly lethal self-injuring patients with borderline personality disorder.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2015, 6, 107-116.	1.3	31
24	In search of integrative processes: Basic psychological need satisfaction predicts medial prefrontal activation during decisional conflict.. <i>Journal of Experimental Psychology: General</i> , 2013, 142, 967-978.	2.1	28
25	Neurocognitive Deficits in Borderline Personality Disorder: Associations With Childhood Trauma and Dimensions of Personality Psychopathology. <i>Journal of Personality Disorders</i> , 2017, 31, 503-521.	1.4	28
26	Subjective Cognitive Complaints and Functional Disability in Patients with Borderline Personality Disorder and Their Nonaffected First-Degree Relatives. <i>Canadian Journal of Psychiatry</i> , 2014, 59, 335-344.	1.9	27
27	Reevaluating the distinction between Axis I and Axis II disorders: The case of borderline personality disorder. <i>Journal of Clinical Psychology</i> , 2005, 61, 1509-1523.	1.9	26
28	Cognitive Emotion Regulation Strategies in Borderline Personality Disorder: Diagnostic Comparisons and Associations with Potentially Harmful Behaviors. <i>Psychopathology</i> , 2018, 51, 83-95.	1.5	26
29	Predicting Treatment Outcomes from Prefrontal Cortex Activation for Self-Harming Patients with Borderline Personality Disorder: A Preliminary Study. <i>Frontiers in Human Neuroscience</i> , 2016, 10, 220.	2.0	20
30	Linking trait-based phenotypes to prefrontal cortex activation during inhibitory control. <i>Social Cognitive and Affective Neuroscience</i> , 2016, 11, 55-65.	3.0	19
31	The NIMH Research Domain Criteria (RDoC) Initiative and Its Implications for Research on Personality Disorder. <i>Current Psychiatry Reports</i> , 2019, 21, 37.	4.5	19
32	Borderline Personality Disorder: Refinements in Phenotypic and Cognitive Profiling. <i>Current Behavioral Neuroscience Reports</i> , 2018, 5, 102-112.	1.3	16
33	Personality Disorder Symptomatology and Neuropsychological Functioning in Closed Head Injury. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , 2007, 19, 27-35.	1.8	14
34	A systematic review on the reliability and validity of semistructured diagnostic interviews for borderline personality disorder.. <i>Canadian Psychology</i> , 2015, 56, 208-226.	2.1	14
35	Clinical, personality, and neurodevelopmental phenotypes in borderline personality disorder: a family study. <i>Psychological Medicine</i> , 2019, 49, 2069-2080.	4.5	14
36	Assessing personality and psychopathology after traumatic brain injury with the Millon Clinical Multiaxial Inventory-III. <i>Brain Injury</i> , 2007, 21, 1233-1244.	1.2	13

#	ARTICLE	IF	CITATIONS
37	Indices of orbitofrontal and prefrontal function in Cluster B and Cluster C personality disorders. <i>Psychiatry Research</i> , 2009, 170, 282-285.	3.3	13
38	Cognitive Reappraisal of Negative Emotional Images in Borderline Personality Disorder: Content Analysis, Perceived Effectiveness, and Diagnostic Specificity. <i>Journal of Personality Disorders</i> , 2020, 34, 199-215.	1.4	11
39	Material-specific discrepancies in verbal and visual episodic memory in borderline personality disorder. <i>Psychiatry Research</i> , 2014, 220, 694-697.	3.3	10
40	Disrupted Relationship between Hippocampal Activation and Subsequent Memory Performance in Borderline Personality Disorder. <i>Journal of Affective Disorders</i> , 2020, 274, 1041-1048.	4.1	10
41	Familial aggregation of candidate phenotypes for borderline personality disorder.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2015, 6, 75-80.	1.3	9
42	Changes in Neurocognitive Functioning After 6 Months of Mentalization-Based Treatment for Borderline Personality Disorder. <i>Journal of Personality Disorders</i> , 2017, 31, 306-324.	1.4	9
43	Disrupted emotional neural circuitry in adolescents with borderline personality traits. <i>Neuroscience Letters</i> , 2019, 701, 112-118.	2.1	7
44	Facial Emotion Perception in Borderline Personality Disorder: Differential Neural Activation to Ambiguous and Threatening Expressions and Links to Impairments in Self and Interpersonal Functioning. <i>Journal of Affective Disorders</i> , 2021, 284, 126-135.	4.1	6
45	Tryptophan hydroxylase 1 gene polymorphisms alter prefrontal cortex activation during response inhibition.. <i>Neuropsychology</i> , 2016, 30, 18-27.	1.3	4
46	Neurophysiological biomarkers of response inhibition and the familial risk for borderline personality disorder. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2021, 111, 110115.	4.8	4
47	A neurocognitive model of the comorbidity of substance use and personality disorders. , 2020, , 79-89.		3
48	Facial Emotion Perception in Families Affected With Borderline Personality Disorder. <i>Journal of Personality Disorders</i> , 2021, 35, 132-148.	1.4	3
49	Executive functioning in adults with borderline personality disorder and first-degree biological relatives. <i>World Journal of Biological Psychiatry</i> , 2022, 23, 387-400.	2.6	3
50	When borderline personality disorder meets traumatic brain injury: A commentary on "Head trauma, dissociation and possible development of multiple personalities"™. <i>Personality and Mental Health</i> , 2009, 3, 313-316.	1.2	2
51	Dimensional personality impairment is associated with disruptions in intrinsic intralimbic functional connectivity. <i>Psychological Medicine</i> , 2021, , 1-11.	4.5	1
52	Interpersonal traits and the neural representations of cognitive control in the prefrontal cortex. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2022, , 1.	2.0	1
53	Psychopathological conditions in adults. , 2010, , 455-468.		0
