CHEDVI & FDVE

#	Article	IF	CITATIONS
1	Pregnant women with more seizures have lower allopregnanolone concentrations. Epilepsy Research, 2021, 177, 106778.	1.6	3
2	Central Actions of 3α,5α-THP Involving NMDA and GABAA Receptors Regulate Affective and Sexual Behavior of Female Rats. Frontiers in Behavioral Neuroscience, 2020, 14, 11.	2.0	3
3	Mating Enhances Expression of Hormonal and Trophic Factors in the Midbrain of Female Rats. Frontiers in Behavioral Neuroscience, 2020, 14, 21.	2.0	1
4	Learning and the Lifespan: What's Sex Got to Do With It?. Frontiers in Neuroscience, 2020, 14, 216.	2.8	2
5	Progesterone's Effects on Cognitive Performance of Male Mice Are Independent of Progestin Receptors but Relate to Increases in GABAA Activity in the Hippocampus and Cortex. Frontiers in Endocrinology, 2020, 11, 552805.	3.5	6
6	Prenatal resident-intruder stress decreases levels of allopregnanolone in the cortex, hypothalamus, and midbrain of males, and increases levels in the hippocampus and cerebellum of female, juvenile rat offspring. Neurobiology of Stress, 2020, 12, 100214.	4.0	3
7	Advances in Knowledge of Androgens: How Intentional and Accidental Neurosteroid Changes Inform Us of Their Action and Role. Current Sexual Health Reports, 2020, 12, 209-220.	0.8	0
8	The Steroidogenesis Inhibitor Finasteride Reduces the Response to Both Stressful and Rewarding Stimuli. Biomolecules, 2019, 9, 749.	4.0	28
9	Effects of non-contingent cocaine on 3 alpha-androstanediol. II. Disruption of lordosis of proestrous rats. Physiology and Behavior, 2019, 203, 113-119.	2.1	4
10	Effects of non-contingent cocaine on 3alpha-androstanediol. I. Disruption of male sexual behavior. Physiology and Behavior, 2019, 203, 120-127.	2.1	5
11	Research Brief: Self-Reports of a Constellation of Persistent Antiandrogenic, Estrogenic, Physical, and Psychological Effects of Finasteride Usage Among Men. American Journal of Men's Health, 2018, 12, 900-906.	1.6	13
12	Progestogens' effects and mechanisms for object recognition memory across the lifespan. Behavioural Brain Research, 2015, 294, 50-61.	2.2	9
13	Novel receptor targets for production and action of allopregnanolone in the central nervous system: a focus on pregnane xenobiotic receptor. Frontiers in Cellular Neuroscience, 2014, 8, 106.	3.7	38
14	The pregnane xenobiotic receptor, a prominent liver factor, has actions in the midbrain for neurosteroid synthesis and behavioral/neural plasticity of female rats. Frontiers in Systems Neuroscience, 2014, 8, 60.	2.5	14
15	Allopregnanolone levels and seizure frequency in progesterone-treated women with epilepsy. Neurology, 2014, 83, 345-348.	1.1	40
16	Neurochemical and behavioral effects of chronic unpredictable stress. Behavioural Pharmacology, 2014, 25, 557-566.	1.7	13
17	Endocrine-Disrupting Chemicals. Vitamins and Hormones, 2014, 94, 41-98.	1.7	12
18	Progesterone-facilitated lordosis of estradiol-primed mice is attenuated by knocking down expression of membrane progestin receptors in the midbrain. Steroids, 2014, 81, 17-25.	1.8	31

#	Article	IF	CITATIONS
19	Female mice with deletion of Type One 5α-reductase have reduced reproductive responding during proestrus and after hormone-priming. Pharmacology Biochemistry and Behavior, 2014, 122, 20-29.	2.9	12
20	Membrane progestin receptors in the midbrain ventral tegmental area are required for progesterone-facilitated lordosis of rats. Hormones and Behavior, 2013, 64, 539-545.	2.1	22
21	Progesterone facilitates exploration, affective and social behaviors among wildtype, but not 5α-reductase Type 1 mutant, mice. Behavioural Brain Research, 2013, 253, 232-239.	2.2	19
22	Progesterone, compared to medroxyprogesterone acetate, to C57BL/6, but not 5α-reductase mutant, mice enhances object recognition and placement memory and is associated with higher BDNF levels in the hippocampus and cortex. Neuroscience Letters, 2013, 551, 53-57.	2.1	29
23	Type 1 5α-reductase may be required for estrous cycle changes in affective behaviors of female mice. Behavioural Brain Research, 2012, 226, 376-380.	2.2	36
24	Dissociating Behavioral, Autonomic, and Neuroendocrine Effects of Androgen Steroids in Animal Models. Methods in Molecular Biology, 2012, 829, 397-431.	0.9	6
25	Gestational or acute restraint in adulthood reduces levels of 5α-reduced testosterone metabolites in the hippocampus and produces behavioral inhibition of adult male rats. Frontiers in Cellular Neuroscience, 2012, 6, 40.	3.7	22
26	Juvenile offspring of rats exposed to restraint stress in late gestation have impaired cognitive performance and dysregulated progestogen formation. Stress, 2011, 14, 23-32.	1.8	42
27	Prenatal Stress Alters Progestogens to Mediate Susceptibility to Sex-Typical, Stress-Sensitive Disorders, such as Drug Abuse: A Review. Frontiers in Psychiatry, 2011, 2, 52.	2.6	12
28	Progesterone attenuates depressive behavior of younger and older adult C57/BL6, wildtype, and progesterone receptor knockout mice. Pharmacology Biochemistry and Behavior, 2011, 99, 525-531.	2.9	26
29	II. Cognitive performance of middle-aged female rats is influenced by capacity to metabolize progesterone in the prefrontal cortex and hippocampus. Brain Research, 2011, 1379, 149-163.	2.2	32
30	I. Levels of 5α-reduced progesterone metabolite in the midbrain account for variability in reproductive behavior of middle-aged female rats. Brain Research, 2011, 1379, 137-148.	2.2	11
31	Divergent mechanisms for trophic actions of estrogens in the brain and peripheral tissues. Brain Research, 2011, 1379, 119-136.	2.2	22
32	Effects of neurosteroid actions at N-methyl-d-aspartate and GABAA receptors in the midbrain ventral tegmental area for anxiety-like and mating behavior of female rats. Psychopharmacology, 2011, 213, 93-103.	3.1	12
33	Progesterone, administered before kainic acid, prevents decrements in cognitive performance in the Morris Water Maze. Developmental Neurobiology, 2011, 71, 142-152.	3.0	17
34	Gestational Exposure to Variable Stressors Produces Decrements in Cognitive and Neural Development of Juvenile Male and Female Rats. Current Topics in Medicinal Chemistry, 2011, 11, 1706-1713.	2.1	23
35	Progesterone reduces depressive behavior of young ovariectomized, aged progestin receptor knockout, and aged wild type mice in the tail suspension test. Journal of Psychopharmacology, 2011, 25, 421-428.	4.0	15
36	Neurosteroids for a successful pregnancy. Stress, 2011, 14, 1-5.	1.8	14

#	Article	IF	CITATIONS
37	Immune stress in late pregnant rats decreases length of gestation and fecundity, and alters later cognitive and affective behaviour of surviving pre-adolescent offspring. Stress, 2011, 14, 652-664.	1.8	51
38	Effects and Mechanisms of 3α,5α,-THP on Emotion, Motivation, and Reward Functions Involving Pregnane Xenobiotic Receptor. Frontiers in Neuroscience, 2011, 5, 136.	2.8	35
39	The Vogel Punished Drinking Task as a Bioassay of Anxiety-Like Behavior of Mice. Neuromethods, 2011, , 143-158.	0.3	2
40	The Role of 3α-Hydroxy-5α-Pregnan-20-One in Mediating the Development and/or Expression of Schizophrenia Spectrum Disorders: Findings in Rodents Models and Clinical Populations. , 2011, , 367-404.		0
41	Conjugated equine estrogen, with medroxyprogesterone acetate, enhances formation of 5α-reduced progestogens and reduces anxiety-like behavior of middle-aged rats. Behavioural Pharmacology, 2010, 21, 530-539.	1.7	13
42	Mnemonic effects of progesterone to mice require formation of 3α,5α-THP. NeuroReport, 2010, 21, 590-595.	1.2	18
43	Fluoxetine-Induced Decrements in Sexual Responses of Female Rats and Hamsters Are Reversed by 31±,51±-THP. Journal of Sexual Medicine, 2010, 7, 2670-2680.	0.6	11
44	Effects and mechanisms of progestogens and androgens in ictal activity. Epilepsia, 2010, 51, 135-140.	5.1	32
45	3α-androstanediol, but not testosterone, attenuates age-related decrements in cognitive, anxiety, and depressive behavior of male rats. Frontiers in Aging Neuroscience, 2010, 2, 15.	3.4	55
46	Corticosteroid and neurosteroid dysregulation in an animal model of autism, BTBR mice. Physiology and Behavior, 2010, 100, 264-267.	2.1	45
47	Progesterone enhances learning and memory of aged wildtype and progestin receptor knockout mice. Neuroscience Letters, 2010, 472, 38-42.	2.1	29
48	Infusions of anti-sense oligonucleotides for DARPP-32 to the ventral tegmental area reduce effects of progesterone- and a dopamine type 1-like receptor agonist to facilitate lordosis. Behavioural Brain Research, 2010, 206, 286-292.	2.2	13
49	Progesterone reduces hyperactivity of female and male dopamine transporter knockout mice. Behavioural Brain Research, 2010, 209, 59-65.	2.2	17
50	Estrogen action: A historic perspective on the implications of considering alternative approaches. Physiology and Behavior, 2010, 99, 151-162.	2.1	111
51	6-Hydroxydopamine lesions enhance progesterone-facilitated lordosis of rats and hamsters, independent of effects on motor behavior. Physiology and Behavior, 2010, 99, 218-224.	2.1	5
52	Estradiol reduces anxiety- and depression-like behavior of aged female mice. Physiology and Behavior, 2010, 99, 169-174.	2.1	97
53	Oxytocin and/or steroid hormone binding globulin infused into the ventral tegmental area modulates progestogen-mediated lordosis. Neuropharmacology, 2010, 58, 44-49.	4.1	6
54	Sex differences in salivary cortisol in response to acute stressors among healthy participants, in recreational or pathological gamblers, and in those with posttraumatic stress disorder. Hormones and Behavior, 2010, 57, 35-45.	2.1	81

#	Article	IF	CITATIONS
55	Low doses of cocaine decrease, and high doses increase, anxiety-like behavior and brain progestogen levels among intact rats. Hormones and Behavior, 2010, 57, 474-480.	2.1	22
56	Increasing 3α,5α-THP following inhibition of neurosteroid biosynthesis in the ventral tegmental area reinstates anti-anxiety, social, and sexual behavior of naturally receptive rats. Reproduction, 2009, 137, 119-128.	2.6	28
57	Progestogens and estrogen influence impulsive burying and avoidant freezing behavior of naturally cycling and ovariectomized rats. Pharmacology Biochemistry and Behavior, 2009, 93, 337-342.	2.9	65
58	Infusions of bicuculline to the ventral tegmental area attenuates sexual, exploratory, and anti-anxiety behavior of proestrous rats. Pharmacology Biochemistry and Behavior, 2009, 93, 474-481.	2.9	16
59	Chronic estradiol replacement to aged female rats reduces anxiety-like and depression-like behavior and enhances cognitive performance. Psychoneuroendocrinology, 2009, 34, 909-916.	2.7	97
60	Neurosteroids' effects and mechanisms for social, cognitive, emotional, and physical functions. Psychoneuroendocrinology, 2009, 34, S143-S161.	2.7	77
61	Progesterone can enhance consolidation and/or performance in spatial, object and working memory tasks in Long–Evans rats. Animal Behaviour, 2009, 78, 279-286.	1.9	20
62	Estradiol enhances sociosexual behavior and can have proliferative effects in ovariectomized rats. Age, 2009, 31, 221-229.	3.0	9
63	Chronic administration of androgens with actions at estrogen receptor beta have anti-anxiety and cognitive-enhancing effects in male rats. Age, 2009, 31, 119-126.	3.0	11
64	Progesterone reduces depression-like behavior in a murine model of Alzheimer's Disease. Age, 2009, 31, 143-153.	3.0	21
65	Chronic administration of androgens with actions at estrogen receptor beta have anti-anxiety and cognitive-enhancing effects in male rats. Age, 2009, 31, 191-198.	3.0	47
66	Proestrous compared to diestrous wildtype, but not estrogen receptor beta knockout, mice have better performance in the spontaneous alternation and object recognition tasks and reduced anxiety-like behavior in the elevated plus and mirror maze. Behavioural Brain Research, 2009, 196, 254-260.	2.2	136
67	Estrogen increases latencies to seizures and levels of 5α-pregnan-3α-ol-20-one in hippocampus of wild-type, but not 5α-reductase knockout, mice. Epilepsy and Behavior, 2009, 16, 411-414.	1.7	13
68	Antiseizure effects of 3α-androstanediol and/or 17β-estradiol may involve actions at estrogen receptor β. Epilepsy and Behavior, 2009, 16, 418-422.	1.7	15
69	Depression-like behavior of aged male and female mice is ameliorated with administration of testosterone or its metabolites. Physiology and Behavior, 2009, 97, 266-269.	2.1	84
70	Progestogens influence cognitive processes in aging. Future Medicinal Chemistry, 2009, 1, 1215-1231.	2.3	5
71	Effects of two estradiol regimens on anxiety and depressive behaviors and trophic effects in peripheral tissues in a rodent model. Gender Medicine, 2009, 6, 300-311.	1.4	44
72	Nociceptive and anxiety-like behavior in reproductively competent and reproductively senescent middle-aged rats. Gender Medicine, 2009, 6, 235-246.	1.4	13

#	Article	IF	CITATIONS
73	Trilostane exerts antidepressive effects among wild-type, but not estrogen receptor β knockout mice. NeuroReport, 2009, 20, 1047-1050.	1.2	4
74	Using the Elevated Plus Maze as a Bioassay to Assess the Effects of Naturally Occurring and Exogenously Administered Compounds to Influence Anxiety-Related Behaviors of Mice. Neuromethods, 2009, , 225-246.	0.3	5
75	Effects of manipulating progesterone and NMDA receptors in the ventral tegmental area for lordosis of hamsters and rats. Psychopharmacology, 2008, 200, 71-80.	3.1	5
76	Finasteride Blocks the Reduction in Ictal Activity Produced by Exogenous Estrous Cyclicity. Journal of Neuroendocrinology, 2008, 10, 291-296.	2.6	62
77	In the ventral tegmental area, progestogens' membrane-mediated actions for lordosis of rats involve the second-messenger phospholipase C. Brain Research, 2008, 1230, 218-223.	2.2	5
78	Progesterone enhances performance of aged mice in cortical or hippocampal tasks. Neuroscience Letters, 2008, 437, 116-120.	2.1	45
79	Effects of progesterone administration and APPswe+PSEN1Δe9 mutation for cognitive performance of mid-aged mice. Neurobiology of Learning and Memory, 2008, 89, 17-26.	1.9	66
80	Estradiol or diarylpropionitrile administration to wild type, but not estrogen receptor beta knockout, mice enhances performance in the object recognition and object placement tasks. Neurobiology of Learning and Memory, 2008, 89, 513-521.	1.9	110
81	Progesterone to ovariectomized mice enhances cognitive performance in the spontaneous alternation, object recognition, but not placement, water maze, and contextual and cued conditioned fear tasks. Neurobiology of Learning and Memory, 2008, 90, 171-177.	1.9	60
82	Parity and estrogen-administration alter affective behavior of ovariectomized rats. Physiology and Behavior, 2008, 93, 351-356.	2.1	30
83	Antiseizure effects of 5α-androstane-3α,7β-diol may be independent of actions at estrogen receptor β. Epilepsy and Behavior, 2008, 13, 32-35.	1.7	2
84	Androgens with activity at estrogen receptor beta have anxiolytic and cognitive-enhancing effects in male rats and mice. Hormones and Behavior, 2008, 54, 726-734.	2.1	105
85	Membrane actions of progestins at dopamine type 1-like and GABAA receptors involve downstream signal transduction pathways. Steroids, 2008, 73, 906-913.	1.8	30
86	Rapid and estrogen receptor beta mediated actions in the hippocampus mediate some functional effects of estrogen. Steroids, 2008, 73, 997-1007.	1.8	63
87	Activity of protein kinase C is important for 3α,5α-THP's actions at dopamine type 1-like and/or GABAA receptors in the ventral tegmental area for lordosis of rats. Brain Research Bulletin, 2008, 77, 91-97.	3.0	10
88	Infusions of 3α,5α-THP to the VTA enhance exploratory, anti-anxiety, social, and sexual behavior and increase levels of 3α,5α-THP in midbrain, hippocampus, diencephalon, and cortex of female rats. Behavioural Brain Research, 2008, 187, 88-99.	2.2	31
89	Exploratory, anti-anxiety, social, and sexual behaviors of rats in behavioral estrus is attenuated with inhibition of 31±,51±-THP formation in the midbrain ventral tegmental area. Behavioural Brain Research, 2008, 193, 269-276.	2.2	25
90	Androgen Administration to Aged Male Mice Increases Anti-Anxiety Behavior and Enhances Cognitive Performance. Neuropsychopharmacology, 2008, 33, 1049-1061.	5.4	115

#	Article	IF	CITATIONS
91	Antisense Oligodeoxynucleotides for Estrogen Receptor-β and α Attenuate Estradiol's Modulation of Affective and Sexual Behavior, Respectively. Neuropsychopharmacology, 2008, 33, 431-440.	5.4	54
92	Estrous cycle, pregnancy, and parity enhance performance of rats in object recognition or object placement tasks. Reproduction, 2008, 136, 105-115.	2.6	112
93	Chapter 3 Hormonal Influences on Seizures. International Review of Neurobiology, 2008, 83, 27-77.	2.0	51
94	Estradiol or diarylpropionitrile decrease anxiety-like behavior of wildtype, but not estrogen receptor beta knockout, mice Behavioral Neuroscience, 2008, 122, 974-981.	1.2	106
95	Oestrogen Effects in Olivo-Cerebellar and Hippocampal Circuits. Novartis Foundation Symposium, 2008, 230, 155-172.	1.1	10
96	Conjugated equine estrogen enhances rats' cognitive, anxiety, and social behavior. NeuroReport, 2008, 19, 789-792.	1.2	32
97	The Role of Midbrain 3α,5α-THP in Mediating Exploration, Anxiety, Social, and Reproductive Behavior. , 2008, , 449-482.		3
98	Estradiol-Induced Conditioned Place Preference may Require Actions at Estrogen Receptors in the Nucleus Accumbens. Neuropsychopharmacology, 2007, 32, 522-530.	5.4	32
99	Estradiol decreases anxiety behavior and enhances inhibitory avoidance and gestational stress produces opposite effects. Stress, 2007, 10, 251-260.	1.8	64
100	Engaging in paced mating, but neither exploratory, anti-anxiety, nor social behavior, increases 5α-reduced progestin concentrations in midbrain, hippocampus, striatum, and cortex. Reproduction, 2007, 133, 663-674.	2.6	58
101	Sexual experience of male rats influences anxiety-like behavior and androgen levels. Physiology and Behavior, 2007, 92, 443-453.	2.1	69
102	Androgens' effects to enhance learning may be mediated in part through actions at estrogen receptor-β in the hippocampus. Neurobiology of Learning and Memory, 2007, 87, 78-85.	1.9	77
103	Androgens' performance-enhancing effects in the inhibitory avoidance and water maze tasks may involve actions at intracellular androgen receptors in the dorsal hippocampus. Neurobiology of Learning and Memory, 2007, 87, 201-208.	1.9	33
104	Estrogens and progestins enhance spatial learning of intact and ovariectomized rats in the object placement task. Neurobiology of Learning and Memory, 2007, 88, 208-216.	1.9	218
105	The use of the elevated plus maze as an assay of anxiety-related behavior in rodents. Nature Protocols, 2007, 2, 322-328.	12.0	2,116
106	Self-administration of 3α-androstanediol increases locomotion and analgesia and decreases aggressive behavior of male hamsters. Pharmacology Biochemistry and Behavior, 2007, 86, 415-421.	2.9	17
107	Administration of estrogen receptor beta-specific selective estrogen receptor modulators to the hippocampus decrease anxiety and depressive behavior of ovariectomized rats. Pharmacology Biochemistry and Behavior, 2007, 86, 407-414.	2.9	145
108	Progestins influence motivation, reward, conditioning, stress, and/or response to drugs of abuse. Pharmacology Biochemistry and Behavior, 2007, 86, 209-219.	2.9	88

#	Article	IF	CITATIONS
109	Some rewarding effects of androgens may be mediated by actions of its 5α-reduced metabolite 3α-androstanediol. Pharmacology Biochemistry and Behavior, 2007, 86, 354-367.	2.9	64
110	MK-801 infusions to the ventral tegmental area and ventromedial hypothalamus produce opposite effects on lordosis of hormone-primed rats. Pharmacology Biochemistry and Behavior, 2007, 86, 377-385.	2.9	19
111	Differential Effects of Antiepileptic Drugs on Neuroactive Steroids in Men with Epilepsy. Epilepsia, 2006, 47, 1945-1948.	5.1	36
112	A Review and Update of Mechanisms of Estrogen in the Hippocampus and Amygdala for Anxiety and Depression Behavior. Neuropsychopharmacology, 2006, 31, 1097-1111.	5.4	416
113	Progestins' effects on sexual behaviour of female rats and hamsters involving D1 and GABAA receptors in the ventral tegmental area may be G-protein-dependent. Behavioural Brain Research, 2006, 172, 286-293.	2.2	16
114	Intrahippocampal administration of an androgen receptor antagonist, flutamide, can increase anxiety-like behavior in intact and DHT-replaced male rats. Hormones and Behavior, 2006, 50, 216-222.	2.1	72
115	Progestin facilitation of lordosis in rodents involves adenylyl cyclase activity in the ventral tegmental area. Hormones and Behavior, 2006, 50, 237-244.	2.1	13
116	In the ventral tegmental area, progestins have actions at D1 receptors for lordosis of hamsters and rats that involve GABAA receptors. Hormones and Behavior, 2006, 50, 332-337.	2.1	22
117	ERÎ ² -selective SERMs produce mnemonic-enhancing effects in the inhibitory avoidance and water maze tasks. Neurobiology of Learning and Memory, 2006, 85, 183-191.	1.9	102
118	Ovarian steroids enhance object recognition in naturally cycling and ovariectomized, hormone-primed rats. Neurobiology of Learning and Memory, 2006, 86, 35-46.	1.9	216
119	Inhibiting 5α-reductase in the amygdala attenuates antianxiety and antidepressive behavior of naturally receptive and hormone-primed ovariectomized rats. Psychopharmacology, 2006, 186, 302-311.	3.1	64
120	3α,5α-THP: a potential plasma neurosteroid biomarker in Alzheimer's disease and perhaps non-Alzheimer's dementia. Psychopharmacology, 2006, 186, 481-485.	3.1	42
121	Early postnatal stimulation alters pregnane neurosteroids in the hippocampus. Psychopharmacology, 2006, 186, 343-350.	3.1	21
122	In the ventral tegmental area, G-proteins mediate progesterone's actions at dopamine type 1 receptors for lordosis of rats and hamsters. Psychopharmacology, 2006, 186, 133-142.	3.1	12
123	Administration of estrogen to ovariectomized rats promotes conditioned place preference and produces moderate levels of estrogen in the nucleus accumbens. Brain Research, 2006, 1067, 209-215.	2.2	29
124	Region-, age-, and sex-specific effects of fetal diazepam exposure on the postnatal development of neurosteroids. Brain Research, 2006, 1067, 115-125.	2.2	9
125	Reduced metabolites mediate neuroprotective effects of progesterone in the adult rat hippocampus. The synthetic progestin medroxyprogesterone acetate (Provera) is not neuroprotective. Journal of Neurobiology, 2006, 66, 916-928.	3.6	121
126	Progestin Concentrations Are Increased following Paced Mating in Midbrain, Hippocampus, Diencephalon, and Cortex of Rats in Behavioral Estrus, but Only in Midbrain of Diestrous Rats. Neuroendocrinology, 2006, 83, 336-347.	2.5	36

#	Article	IF	CITATIONS
127	In the Ventral Tegmental Area, Progestins' Membrane-Mediated Actions for Lordosis of Hamsters and Rats Involve Protein Kinase A. Neuroendocrinology, 2006, 84, 405-414.	2.5	10
128	Role of androgens in epilepsy. Expert Review of Neurotherapeutics, 2006, 6, 1061-1075.	2.8	23
