#	ARTICLE	IF	CITATIONS
1	Mission, Organization, and Future Direction of the Serological Sciences Network for COVID-19 (SeroNet) Epidemiologic Cohort Studies. <i>Open Forum Infectious Diseases</i> , 2022, 9, .	0.9	5
2	Testosterone Associations With Parentsâ€™ Child Abuse Risk and At-Risk Parenting: A Multimethod Longitudinal Examination. <i>Child Maltreatment</i> , 2021, 26, 50-62.	3.3	6
3	Best practice recommendations for the measurement and interpretation of salivary proinflammatory cytokines in biobehavioral research. <i>Brain, Behavior, and Immunity</i> , 2021, 91, 105-116.	4.1	20
4	The case for the repeatability intra-class correlation as a metric of precision for salivary bioscience data: Justification, assessment, application, and implications. <i>Psychoneuroendocrinology</i> , 2021, 128, 105203.	2.7	5
5	Censored data considerations and analytical approaches for salivary bioscience data. <i>Psychoneuroendocrinology</i> , 2021, 129, 105274.	2.7	7
6	Effect of animal assisted interactions on activity and stress response in children in acute care settings. <i>Comprehensive Psychoneuroendocrinology</i> , 2021, 8, 100076.	1.7	6
7	Long-Term Associations Between Prenatal Maternal Cortisol and Child Neuroendocrine-Immune Regulation. <i>International Journal of Behavioral Medicine</i> , 2020, 27, 267-281.	1.7	5
8	The within-person coordination of HPA and ANS activity in stress response: Relation with behavior problems. <i>Psychoneuroendocrinology</i> , 2020, 121, 104805.	2.7	10
9	Prenatal Tobacco and Cannabis Exposure: Associations with Cortisol Reactivity in Early School Age Children. <i>International Journal of Behavioral Medicine</i> , 2020, 27, 343-356.	1.7	18
10	Biobehavioral Dysregulation and its Association with Obesity and Severe Obesity Trajectories from 2 to 15 Years of Age: A Longitudinal Study. <i>Obesity</i> , 2020, 28, 830-839.	3.0	4
11	Reactivity of salivary uric acid in response to social evaluative stress in African Americans. <i>Biological Psychology</i> , 2020, 153, 107882.	2.2	10
12	Correspondence Between Perceived Pubertal Development and Hormone Levels in 9-10 Year-Olds From the Adolescent Brain Cognitive Development Study. <i>Frontiers in Endocrinology</i> , 2020, 11, 549928.	3.5	45
13	Saliva Collection, Handling, Transport, and Storage: Special Considerations and Best Practices for Interdisciplinary Salivary Bioscience Research. , 2020, , 21-47.		15
14	The Role of Stress and Genital Immunity in Sexual Trauma and HIV Susceptibility Among Adolescent Girls and Adult Women (The THRIVE Study): Protocol for a Longitudinal Case-Control Study. <i>JMIR Research Protocols</i> , 2020, 9, e18190.	1.0	5
15	Salivary Biomarkers. , 2020, , 1933-1941.		0
16	A preliminary study of association between adolescent estradiol level and dorsolateral prefrontal cortex activity during emotion regulation. <i>Psychoneuroendocrinology</i> , 2019, 109, 104398.	2.7	15
17	Co-twin relationship quality as a moderator of genetic and environmental factors on urinary cortisol levels among adult twins. <i>Psychoneuroendocrinology</i> , 2019, 108, 118-126.	2.7	2
18	Dehydroepiandrosterone (DHEA) and its ratio to cortisol moderate associations between maltreatment and psychopathology in male juvenile offenders. <i>Psychoneuroendocrinology</i> , 2019, 101, 263-271.	2.7	8

#	ARTICLE	IF	CITATIONS
19	Salivary uric acid: Associations with resting and reactive blood pressure response to social evaluative stress in healthy African Americans. <i>Psychoneuroendocrinology</i> , 2019, 101, 19-26.	2.7	5
20	Anticipatory stress associated with functional magnetic resonance imaging: Implications for psychosocial stress research. <i>International Journal of Psychophysiology</i> , 2018, 125, 35-41.	1.0	31
21	Attachment-Related Regulatory Processes Moderate the Impact of Adverse Childhood Experiences on Stress Reaction in Borderline Personality Disorder. <i>Journal of Personality Disorders</i> , 2018, 32, 93-114.	1.4	38
22	Emotion regulation and positive affect in the context of salivary alpha-amylase response to pain in children with cancer. <i>Pediatric Blood and Cancer</i> , 2018, 65, e26973.	1.5	19
23	Testosterone and Proactive-Reactive Aggression in Youth: the Moderating Role of Harsh Discipline. <i>Journal of Abnormal Child Psychology</i> , 2018, 46, 1599-1612.	3.5	18
24	An exploratory analysis of the joint contribution of HPA axis activation and motivation to early adolescent depressive symptoms. <i>Developmental Psychobiology</i> , 2018, 60, 303-316.	1.6	4
25	The effect of a service dog on salivary cortisol awakening response in a military population with posttraumatic stress disorder (PTSD). <i>Psychoneuroendocrinology</i> , 2018, 98, 202-210.	2.7	55
26	Prenatal and postnatal cigarette and cannabis exposure: Effects on Secretory Immunoglobulin A in early childhood. <i>Neurotoxicology and Teratology</i> , 2018, 67, 31-36.	2.4	14
27	Linking testosterone and antisocial behavior in at-risk transitional aged youth: Contextual effects of parentification. <i>Psychoneuroendocrinology</i> , 2018, 91, 1-10.	2.7	7
28	Long-Term Effects of Prematurity, Cumulative Medical Risk, and Proximal and Distal Social Forces on Individual Differences in Diurnal Cortisol at Young Adulthood. <i>Biological Research for Nursing</i> , 2018, 20, 5-15.	1.9	8
29	Gender-based violence and trauma in marginalized populations of women: Role of biological embedding and toxic stress. <i>Health Care for Women International</i> , 2018, 39, 1038-1055.	1.1	27
30	Household fear of deportation in relation to chronic stressors and salivary proinflammatory cytokines in Mexican-origin families post-SB 1070. <i>SSM - Population Health</i> , 2018, 5, 188-200.	2.7	38
31	Biobehavioral Insights into Adaptive Behavior in Complex and Dynamic Operational Settings: Lessons learned from the Soldier Performance and Effective, Adaptable Response Task. <i>Frontiers in Medicine</i> , 2018, 4, 217.	2.6	2
32	The role of co-rumination and adrenocortical attunement in young women's close friendships. <i>Psychoneuroendocrinology</i> , 2018, 98, 61-66.	2.7	14
33	The validity, stability, and utility of measuring uric acid in saliva. <i>Biomarkers in Medicine</i> , 2018, 12, 583-596.	1.4	52
34	Stress physiology and memory for emotional information: Moderation by individual differences in pubertal hormones.. <i>Developmental Psychology</i> , 2018, 54, 1606-1620.	1.6	9
35	Prestige in a large-scale social group predicts longitudinal changes in testosterone.. <i>Journal of Personality and Social Psychology</i> , 2018, 114, 924-944.	2.8	20
36	Physiology and pillow talk. <i>Journal of Social and Personal Relationships</i> , 2017, 34, 281-308.	2.3	31

#	ARTICLE	IF	CITATIONS
37	Adolescent Conflict Appraisals Moderate the Link Between Marital Conflict and Physiological Stress Reactivity. <i>Journal of Research on Adolescence</i> , 2017, 27, 173-188.	3.7	9
38	A genetic risk factor for major depression and suicidal ideation is mitigated by physical activity. <i>Psychiatry Research</i> , 2017, 249, 304-306.	3.3	11
39	Maternal sensitivity and adrenocortical functioning across infancy and toddlerhood: Physiological adaptation to context?. <i>Development and Psychopathology</i> , 2017, 29, 303-317.	2.3	28
40	Development of an oral fluid immunoassay to assess past and recent hepatitis E virus (HEV) infection. <i>Journal of Immunological Methods</i> , 2017, 448, 1-8.	1.4	18
41	Individual differences in the activity of the hypothalamic pituitary adrenal axis: Relations to age and cumulative risk in early childhood. <i>Psychoneuroendocrinology</i> , 2017, 81, 36-45.	2.7	13
42	Altered stress system reactivity after pediatric injury: Relation with post-traumatic stress symptoms. <i>Psychoneuroendocrinology</i> , 2017, 84, 66-75.	2.7	22
43	Adiponectin: Serum-saliva associations and relations with oral and systemic markers of inflammation. <i>Peptides</i> , 2017, 91, 58-64.	2.4	23
44	Association between body mass index and salivary uric acid among Mexican-origin infants, youth and adults: Gender and developmental differences. <i>Developmental Psychobiology</i> , 2017, 59, 225-234.	1.6	15
45	Prematurity and perinatal adversity effects hypothalamic-pituitary-adrenal axis reactivity to social evaluative threat in adulthood. <i>Developmental Psychobiology</i> , 2017, 59, 976-983.	1.6	10
46	Telomere length and procedural justice predict stress reactivity responses to unfair outcomes in African Americans. <i>Psychoneuroendocrinology</i> , 2017, 86, 104-109.	2.7	9
47	Exposure to intimate partner violence in utero and infant internalizing behaviors: Moderation by salivary cortisol-alpha amylase asymmetry. <i>Early Human Development</i> , 2017, 113, 40-48.	1.8	16
48	Household fear of deportation in Mexican-origin families: Relation to body mass index percentiles and salivary uric acid. <i>American Journal of Human Biology</i> , 2017, 29, e23044.	1.6	23
49	Individual differences in early adolescents' latent trait cortisol: Interaction of early adversity and 5-HTTLPR. <i>Biological Psychology</i> , 2017, 129, 8-15.	2.2	5
50	Perceived Discrimination, Racial Identity, and Multisystem Stress Response to Social Evaluative Threat Among African American Men and Women. <i>Psychosomatic Medicine</i> , 2017, 79, 293-305.	2.0	61
51	Measurement of cortisol in saliva: a comparison of measurement error within and between international academic-research laboratories. <i>BMC Research Notes</i> , 2017, 10, 479.	1.4	27
52	Diurnal salivary alpha-amylase dynamics among dementia family caregivers.. <i>Health Psychology</i> , 2017, 36, 160-168.	1.6	15
53	Prefrontal Cortex Activity Is Associated with Biobehavioral Components of the Stress Response. <i>Frontiers in Human Neuroscience</i> , 2016, 10, 583.	2.0	62
54	Individual differences in early adolescents' latent trait cortisol (LTC): Relation to early adversity. <i>Developmental Psychobiology</i> , 2016, 58, 700-713.	1.6	25

#	ARTICLE	IF	CITATIONS
55	Developmental origins of infant stress reactivity profiles: A multi-system approach. <i>Developmental Psychobiology</i> , 2016, 58, 578-599.	1.6	36
56	The Authors Reply. <i>Psychosomatic Medicine</i> , 2016, 78, 116-117.	2.0	0
57	Hypothalamic pituitary adrenal activity and autonomic nervous system arousal predict developmental trajectories of children's comorbid behavior problems. <i>Developmental Psychobiology</i> , 2016, 58, 393-405.	1.6	8
58	Individual differences in early adolescents' latent trait cortisol (LTC): Relation to recent acute and chronic stress. <i>Psychoneuroendocrinology</i> , 2016, 70, 38-46.	2.7	19
59	Salivary latent trait cortisol (LTC): Relation to lipids, blood pressure, and body composition in middle childhood. <i>Psychoneuroendocrinology</i> , 2016, 71, 110-118.	2.7	9
60	Coordination of cortisol response to social evaluative threat with autonomic and inflammatory responses is moderated by stress appraisals and affect. <i>Biological Psychology</i> , 2016, 118, 17-24.	2.2	28
61	Anabolic hormone profiles in elite military men. <i>Steroids</i> , 2016, 110, 41-48.	1.8	9
62	The hippocampal response to psychosocial stress varies with salivary uric acid level. <i>Neuroscience</i> , 2016, 339, 396-401.	2.3	50
63	Concurrent and prospective associations between HPA axis activity and depression symptoms in newlywed women. <i>Psychoneuroendocrinology</i> , 2016, 73, 125-132.	2.7	4
64	Family Relations, Stress, and Vulnerability: Biobehavioral Implications for Prevention and Practice. <i>Family Relations</i> , 2016, 65, 9-23.	1.9	28
65	Child Care and Cortisol Across Infancy and Toddlerhood: Poverty, Peers, and Developmental Timing. <i>Family Relations</i> , 2016, 65, 51-72.	1.9	18
66	Supportive behaviors in adolescent romantic relationships moderate adrenocortical attunement. <i>Psychoneuroendocrinology</i> , 2016, 74, 189-196.	2.7	17
67	Sympathetic and hypothalamic-pituitary-adrenal asymmetry in generalized anxiety disorder. <i>Psychophysiology</i> , 2016, 53, 951-957.	2.4	36
68	A lack of consistent evidence for cortisol dysregulation in premenstrual syndrome/premenstrual dysphoric disorder. <i>Psychoneuroendocrinology</i> , 2016, 65, 149-164.	2.7	18
69	Prematurity, Birth Weight, and Socioeconomic Status Are Linked to Atypical Diurnal Hypothalamic-Pituitary-Adrenal Axis Activity in Young Adults. <i>Research in Nursing and Health</i> , 2016, 39, 15-29.	1.6	14
70	Maternal distress and child neuroendocrine and immune regulation. <i>Social Science and Medicine</i> , 2016, 151, 206-214.	3.8	42
71	Cortisol and testosterone associations with social network dynamics. <i>Hormones and Behavior</i> , 2016, 80, 92-102.	2.1	26
72	Latent trait testosterone among 18-24 year olds: Methodological considerations and risk associations. <i>Psychoneuroendocrinology</i> , 2016, 67, 1-9.	2.7	9

#	ARTICLE	IF	CITATIONS
73	Sleep problems predict cortisol reactivity to stress in urban adolescents. <i>Physiology and Behavior</i> , 2016, 155, 95-101.	2.1	53
74	Measuring nerve growth factor in saliva by immunoassay: A cautionary note. <i>Psychoneuroendocrinology</i> , 2016, 63, 235-237.	2.7	5
75	Infant adrenocortical reactivity and behavioral functioning: relation to early exposure to maternal intimate partner violence. <i>Stress</i> , 2016, 19, 37-44.	1.8	38
76	Emotional reactivity and parenting sensitivity interact to predict cortisol output in toddlers. <i>Developmental Psychology</i> , 2015, 51, 1271-1277.	1.6	16
77	Salivary cytokines as a minimally invasive measure of immune functioning in young children: Correlates of individual differences and sensitivity to laboratory stress. <i>Developmental Psychobiology</i> , 2015, 57, 153-167.	1.6	52
78	Maternal-child adrenocortical attunement in early childhood: Continuity and change. <i>Developmental Psychobiology</i> , 2015, 57, 83-95.	1.6	54
79	Latent trait cortisol (LTC) during pregnancy: Composition, continuity, change, and concomitants. <i>Psychoneuroendocrinology</i> , 2015, 62, 149-158.	2.7	9
80	Stress and telomere shortening among central Indian conservation refugees. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, E928-36.	7.1	35
81	Alpha-amylase reactivity in relation to psychopathic traits in adults. <i>Psychoneuroendocrinology</i> , 2015, 54, 14-23.	2.7	17
82	Latent trait cortisol (LTC) levels: Reliability, validity, and stability. <i>Psychoneuroendocrinology</i> , 2015, 55, 21-35.	2.7	65
83	Genetic and environmental modulation of neurotrophic and anabolic stress response: Counterbalancing forces. <i>Physiology and Behavior</i> , 2015, 151, 1-8.	2.1	5
84	Common oxytocin receptor gene variant interacts with rejection sensitivity to influence cortisol reactivity during negative evaluation. <i>Hormones and Behavior</i> , 2015, 75, 64-69.	2.1	12
85	Secretory IgA reactivity to social threat in youth: Relations with HPA, ANS, and behavior. <i>Psychoneuroendocrinology</i> , 2015, 59, 81-90.	2.7	22
86	Experimental manipulation of the Trier Social Stress Test-Modified (TSST-M) to vary arousal across development. <i>Psychoneuroendocrinology</i> , 2015, 57, 61-71.	2.7	49
87	The developmental course of salivary alpha-amylase and cortisol from 12 to 36 months: Relations with early poverty and later behavior problems. <i>Psychoneuroendocrinology</i> , 2015, 52, 311-323.	2.7	37
88	Digit ratio (2D:4D) moderates the relationship between cortisol reactivity and self-reported externalizing behavior in young adolescent males. <i>Biological Psychology</i> , 2015, 112, 94-106.	2.2	24
89	The Influence of Divorce and Parents' Communication Skills on Adolescents' and Young Adults' Stress Reactivity and Recovery. <i>Communication Research</i> , 2015, 42, 1009-1042.	5.9	21
90	Maternal intimate partner violence exposure, child cortisol reactivity and child asthma. <i>Child Abuse and Neglect</i> , 2015, 48, 50-57.	2.6	27

#	ARTICLE	IF	CITATIONS
91	Harsh discipline and behavior problems: The moderating effects of cortisol and alpha-amylase. <i>Biological Psychology</i> , 2015, 104, 19-27.	2.2	29
92	Tactics for modeling multiple salivary analyte data in relation to behavior problems: Additive, ratio, and interaction effects. <i>Psychoneuroendocrinology</i> , 2015, 51, 188-200.	2.7	35
93	Interaction of Adrenocortical Activity and Autonomic Arousal on Children's Externalizing and Internalizing Behavior Problems. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 189-202.	3.5	32
94	Parent-child relationship quality moderates the link between marital conflict and adolescents' physiological responses to social evaluative threat.. <i>Journal of Family Psychology</i> , 2014, 28, 538-548.	1.3	26
95	Dispatches from the Interface of Salivary Bioscience and Neonatal Research. <i>Frontiers in Endocrinology</i> , 2014, 5, 25.	3.5	15
96	CORTISOL AWAKENING RESPONSE IN ADOLESCENTS WITH ACUTE SEXUAL ABUSE RELATED POSTTRAUMATIC STRESS DISORDER. <i>Depression and Anxiety</i> , 2014, 31, 107-114.	4.1	43
97	Behavioral reactivity to emotion challenge is associated with cortisol reactivity and regulation at 7, 15, and 24 months of age. <i>Developmental Psychobiology</i> , 2014, 56, 474-488.	1.6	16
98	Effects of Prenatal Alcohol Exposure on Testosterone and Pubertal Development. <i>Alcoholism: Clinical and Experimental Research</i> , 2014, 38, 1671-1679.	2.4	29
99	Prenatal Drug Exposure Moderates the Association between Stress Reactivity and Cognitive Function in Adolescence. <i>Developmental Neuroscience</i> , 2014, 36, 329-337.	2.0	5
100	Salivary nerve growth factor response to intense stress: Effect of sex and body mass index. <i>Psychoneuroendocrinology</i> , 2014, 43, 90-94.	2.7	6
101	Hormones, behavior, and social network analysis: Exploring associations between cortisol, testosterone, and network structure. <i>Hormones and Behavior</i> , 2014, 66, 534-544.	2.1	31
102	Salivary cytokines in healthy adolescent girls: Intercorrelations, stability, and associations with serum cytokines, age, and pubertal stage. <i>Developmental Psychobiology</i> , 2014, 56, 797-811.	1.6	82
103	Salivary nerve growth factor response to stress related to resilience. <i>Physiology and Behavior</i> , 2014, 129, 130-134.	2.1	10
104	Individual differences in the cortisol and salivary $\alpha$ -amylase awakening responses in early childhood: Relations to age, sex, and sleep. <i>Developmental Psychobiology</i> , 2014, 56, 1300-1315.	1.6	22
105	Neuroprotective neurotrophic effect of endogenous dehydroepiandrosterone sulfate during intense stress exposure. <i>Steroids</i> , 2014, 87, 54-58.	1.8	13
106	Early childcare, executive functioning, and the moderating role of early stress physiology.. <i>Developmental Psychology</i> , 2014, 50, 1250-1261.	1.6	23
107	Relationship of Salivary Alpha Amylase and Cortisol to Social Anxiety in Healthy Children Undergoing Laboratory Pain Tasks. <i>Journal of Child and Adolescent Behavior</i> , 2014, 02, .	0.2	15
108	Salivary $\alpha$ -amylase during pregnancy: Diurnal course and associations with obstetric history, maternal demographics, and mood. <i>Developmental Psychobiology</i> , 2013, 55, 156-167.	1.6	24

#	ARTICLE	IF	CITATIONS
109	Sample Collection, Including Participant Preparation and Sample Handling. , 2013, , 427-440.		10
110	Friendship network position and salivary cortisol levels. <i>Social Neuroscience</i> , 2013, 8, 385-396.	1.3	37
111	Nature, correlates, and consequences of stress-related biological reactivity and regulation in Army nurses during combat casualty simulation. <i>Psychoneuroendocrinology</i> , 2013, 38, 135-144.	2.7	34
112	Disentangling sources of individual differences in diurnal salivary $\alpha$ -amylase: Reliability, stability and sensitivity to context. <i>Psychoneuroendocrinology</i> , 2013, 38, 367-375.	2.7	56
113	Refining the multisystem view of the stress response: Coordination among cortisol, alpha-amylase, and subjective stress in response to relationship conflict. <i>Physiology and Behavior</i> , 2013, 119, 52-60.	2.1	49
114	Sex-specific effects of mindfulness on romantic partners' cortisol responses to conflict and relations with psychological adjustment. <i>Psychoneuroendocrinology</i> , 2013, 38, 2905-2913.	2.7	35
115	The Science of Early Life Toxic Stress for Pediatric Practice and Advocacy. <i>Pediatrics</i> , 2013, 131, 319-327.	2.1	362
116	Sociodemographic risk, parenting, and effortful control: Relations to salivary alpha-amylase and cortisol in early childhood. <i>Developmental Psychobiology</i> , 2013, 55, 869-880.	1.6	35
117	Cortisol, alpha amylase, and daily stressors in spouses of persons with mild cognitive impairment.. <i>Psychology and Aging</i> , 2013, 28, 666-679.	1.6	28
118	Collecting Saliva and Measuring Salivary Cortisol and Alpha-amylase in Frail Community Residing Older Adults via Family Caregivers. <i>Journal of Visualized Experiments</i> , 2013, , e50815.	0.3	11
119	Maternal Disrupted Communication During Face-to-Face Interaction at 4 Months: Relation to Maternal and Infant Cortisol Among at-Risk Families. <i>Infancy</i> , 2013, 18, 1111-1134.	1.6	43
120	Biobehavioral reactivity to social evaluative stress in women with borderline personality disorder.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2013, 4, 91-100.	1.3	42
121	The father-daughter dance: The relationship between father-daughter relationship quality and daughters' stress response.. <i>Journal of Family Psychology</i> , 2012, 26, 87-94.	1.3	50
122	The relationship between cortisol, salivary alpha-amylase, and cognitive bias in young women.. <i>Behavioral Neuroscience</i> , 2012, 126, 157-166.	1.2	14
123	Incorporating Salivary Biomarkers Into Nursing Research. <i>Biological Research for Nursing</i> , 2012, 14, 347-356.	1.9	83
124	Daytime Secretion of Salivary Cortisol and Alpha-Amylase in Preschool-Aged Children with Autism and Typically Developing Children. <i>Journal of Autism and Developmental Disorders</i> , 2012, 42, 2648-2658.	2.7	37
125	Salivary alpha-amylase and cortisol in infancy and toddlerhood: Direct and indirect relations with executive functioning and academic ability in childhood. <i>Psychoneuroendocrinology</i> , 2012, 37, 1700-1711.	2.7	48
126	Assessing salivary C-reactive protein: Longitudinal associations with systemic inflammation and cardiovascular disease risk in women exposed to intimate partner violence. <i>Brain, Behavior, and Immunity</i> , 2012, 26, 543-551.	4.1	106

#	ARTICLE	IF	CITATIONS
127	Focus on Methodology: Salivary bioscience and research on adolescence: An integrated perspective. <i>Journal of Adolescence</i> , 2012, 35, 1081-1095.	2.4	154
128	Do infants show a cortisol awakening response?. <i>Developmental Psychobiology</i> , 2012, 54, 736-743.	1.6	32
129	Interparental aggression and infant patterns of adrenocortical and behavioral stress responses. <i>Developmental Psychobiology</i> , 2012, 54, 685-699.	1.6	29
130	Asynchrony of motherâ€™infant hypothalamicâ€™pituitaryâ€™adrenal axis activity following extinction of infant crying responses induced during the transition to sleep. <i>Early Human Development</i> , 2012, 88, 227-232.	1.8	83
131	Downregulation of the immune system in low-quality child care: The case of Secretory Immunoglobulin A (SIgA) in toddlers. <i>Physiology and Behavior</i> , 2012, 105, 161-167.	2.1	21
132	Interactions between salivary cortisol and alpha-amylase as predictors of children's cognitive functioning and academic performance. <i>Physiology and Behavior</i> , 2012, 105, 987-995.	2.1	31
133	Increased testosterone-to-cortisol ratio in psychopathy.. <i>Journal of Abnormal Psychology</i> , 2011, 120, 389-399.	1.9	121
