#	Article	IF	CITATIONS
1	Equilibrium unfolding of dimeric and engineered monomeric forms of λ Cro (F58W) repressor and the effect of added salts: evidence for the formation of folded monomer induced by sodium perchlorate. Archives of Biochemistry and Biophysics, 2005, 434, 93-107.	3.0	11
2	Perchlorate-induced conformational transition of Staphylococcal nuclease: evidence for an equilibrium unfolding intermediate. Archives of Biochemistry and Biophysics, 2004, 431, 119-123.	3.0	12
3	Intrinsic Fluorescence of Proteins. , 2002, , 1-15.		31
4	Fluorescence Quenching: Theory and Applications. , 2002, , 53-126.		81
5	Use of fluorescence spectroscopy as thermodynamics tool. Methods in Enzymology, 2000, 323, 459-473.	1.0	28
6	Incorporation of Tryptophan Analogues into Staphylococcal Nuclease, Its V66W Mutant, and Δ137â^149 Fragment: Spectroscopic Studiesâ€. Biochemistry, 1998, 37, 8938-8946.	2.5	43
7	Incorporation of Tryptophan Analogues into Staphylococcal Nuclease:Â Stability toward Thermal and Guanidine-HCl Induced Unfoldingâ€. Biochemistry, 1998, 37, 8947-8953.	2.5	34
8	Activation of Horse Liver Alcohol Dehydrogenase upon Substitution of Tryptophan 314 at the Dimer Interface. Archives of Biochemistry and Biophysics, 1998, 358, 369-376.	3.0	11
9	Stereoselective Synthesis of <i>cis</i> -2 and <i>trans</i> -2-(Indol-3-yl) Cyclopropyl Amines, Carboxylic Acids, and Esters. Synthetic Communications, 1998, 28, 3787-3794.	2.1	5
10	[11] Fluorescence methods for studying equilibrium macromolecule-ligand interactions. Methods in Enzymology, 1997, 278, 221-257.	1.0	214
11	[12] Fluorescence methods for studying kinetics of protein-folding reactions. Methods in Enzymology, 1997, 278, 258-286.	1.0	63
12	Global Analysis of the Acid-Induced and Urea-Induced Unfolding of Staphylococcal Nuclease and Two of Its Variantsâ€. Biochemistry, 1997, 36, 1129-1140.	2.5	51
13	Biosynthetic incorporation of tryptophan analogues into staphylococcal nuclease: Effect of 5-hydroxytryptophan and 7-azatryptophan on structure and stability. Protein Science, 1997, 6, 689-697.	7.6	49
14	Thermodynamics of protein unfolding: questions pertinent to testing the validity of the two-state model. Biophysical Chemistry, 1997, 64, 175-197.	2.8	35
15	Characterization of the role of side-chain interactions in the binding of ligands to apo trp repressor: pH dependence studies. Biophysical Chemistry, 1997, 66, 43-55.	2.8	7
16	Studies of the unfolding of an unstable mutant of staphylococcal nuclease: Evidence for low temperature unfolding and compactness of the high temperature unfolded state. Proteins: Structure, Function and Bioinformatics, 1997, 28, 227-240.	2.6	6
17	Thermodynamics of the Unfolding and Spectroscopic Properties of the V66W Mutant of Staphylococcal Nuclease and Its 1â°136 Fragment. Biochemistry, 1996, 35, 8084-8094.	2.5	51
18	Time-resolved fluorescence studies of ribonuclease T1 in reversed micelles. Journal of Fluorescence, 1996, 6, 169-175.	2.5	0

MAURICE R EFTINK

#	Article	IF	CITATIONS
19	Synthesis of E and Z Diastereoisomers of Benzyl Methyl-2-[3-(N-Substituted)indolyl] Cyclopropane-1,1-dicarboxylates and Their Stereoselective Reductive Cleavage. Synthetic Communications, 1996, 26, 3503-3509.	2.1	4
20	[22] Use of multiple spectroscopic methods to monitor equilibrium unfolding of proteins. Methods in Enzymology, 1995, 259, 487-512.	1.0	64
21	Fluorescence Studies with Tryptophan Analogs: Excited State Interactions Involving the Side Chain Amino Group. The Journal of Physical Chemistry, 1995, 99, 5713-5723.	2.9	110
22	[27] Analysis of multidimensional spectroscopic data to monitor unfolding of proteins. Methods in Enzymology, 1994, 240, 615-645.	1.0	53
23	Evidence for dual La and Lb emission in 5-methylindole. Journal of Fluorescence, 1994, 4, 165-168.	2.5	5
24	Oxygen fluorescence quenching studies with single tryptophan-containing proteins. Journal of Fluorescence, 1994, 4, 187-193.	2.5	2
25	The Unfolding of trp Aporepressor as a Function of pH: Evidence for an Unfolding Intermediate. Biochemistry, 1994, 33, 10220-10228.	2.5	32
26	Thermodynamic studies of the interaction of trp aporepressor with trytophan analogs. Biophysical Chemistry, 1994, 49, 233-239.	2.8	21
27	<title>Comparison of fluorescence properties of wild type and the W15F mutant of horse liver alcohol dehydrogenase</title> . , 1994, , .		1
28	Local anesthetic-phospholipid interactions. Effects of ionic strength, temperature, and phospholipid mixtures on the binding of dibucaine to phospholipids. Biophysical Chemistry, 1993, 46, 1-11.	2.8	31
29	Fluorescence studies of a local anesthetic-phospholipid interaction. Biophysical Chemistry, 1993, 46, 13-19.	2.8	13
30	FLUORESCENCE STUDIES WITH HUMAN EPIDERMAL GROWTH FACTOR. Photochemistry and Photobiology, 1992, 55, 29-34.	2.5	4
31	Fluorescence and conformational stability studies of Staphylococcus nuclease and its mutants, including the less stable nuclease-concanavalin A hybrids. Biochemistry, 1991, 30, 1193-1199.	2.5	47
32	Effects of temperature on the fluorescence intensity and anisotropy decays of Staphylococcal nuclease and the less stable nuclease-conA-SG28 mutant. Biochemistry, 1991, 30, 8945-8953.	2.5	43
33	Fluorescence Quenching Reactions. , 1991, , 1-41.		64
34	Fluorescence Techniques for Studying Protein Structure. Methods of Biochemical Analysis, 1991, 35, 127-205.	0.2	350
35	Transient effects in the solute quenching of tryptophan residues in proteins. , 1990, 1204, 406.		6
36	Photophysics of indole derivatives: experimental resolution of La and Lb transitions and comparison with theory. The Journal of Physical Chemistry, 1990, 94, 3469-3479.	2.9	147

MAURICE R EFTINK

#	Article	IF	CITATIONS
37	Fluorescence studies with potato carboxypeptidase inhibitor. BBA - Proteins and Proteomics, 1990, 1041, 311-316.	2.1	2
38	Fluorescence studies with malate dehydrogenase from Bradyrhizobium japonicum 3I1B-143 bacteroids: A two-tryptophan containing protein. Archives of Biochemistry and Biophysics, 1990, 283, 102-106.	3.0	1
39	RAPID EQUILIBRATION OF OXYGEN IN FLUORESCENCE QUENCHING REACTIONS. Photochemistry and Photobiology, 1989, 50, 425-427.	2.5	3
40	INTRAMOLECULAR FLUORESCENCE QUENCHING IN COVALENT ACRYLAMIDE-INDOLE ADDUCTS. Photochemistry and Photobiology, 1989, 49, 725-729.	2.5	15
41	Fluorescence lifetime and solute quenching studies with the single tryptophan containing protein parvalbumin from codfish. Biochemistry, 1989, 28, 382-391.	2.5	32
42	Effect of micelle diameter on tryptophan dynamics in an amphipathic helical peptide in phosphatidylcholine. Biochemistry, 1989, 28, 8403-8410.	2.5	13
43	Pressure dependence of fluorescence quenching reactions in proteins. Biophysical Chemistry, 1988, 32, 121-130.	2.8	10
44	Fluorescence studies of phosphoribulokinase, a light-regulated, chloroplastic enzyme. Archives of Biochemistry and Biophysics, 1988, 260, 267-272.	3.0	8
45	Fluorescence Quenching And Multiple-Frequency Phase Fluorometry In Peptide-Lipid Micelles. , 1988, 0909, 442.		0
46	Effect Of Hydrostatic Pressure On Fluorescence Reactions In Proteins. Proceedings of SPIE, 1988, 0909, 389.	0.8	0
47	Phase-resolved spectral measurements with several two tryptophan containing proteins. Biochemistry, 1987, 26, 8338-8346.	2.5	41
48	Frequency-domain fluorescence studies of an extracellular metalloproteinase of Staphylococcus aureus. BBA - Proteins and Proteomics, 1987, 915, 331-341.	2.1	8
49	Does the fluorescence quencher acrylamide bind to proteins?. BBA - Proteins and Proteomics, 1987, 916, 343-349.	2.1	55
50	A fluorescence and NMR relaxation study of thermally-induced conformational changes in liver alcohol dehydrogenase. BBA - Proteins and Proteomics, 1987, 913, 210-218.	2.1	4
51	Frequency domain fluorescence studies of yeast phosphoglycerate kinase and its ternary complex. FEBS Journal, 1987, 167, 513-518.	0.2	12
52	STUDIES OF THE EFFICIENCY and MECHANISM OF FLUORESCENCE QUENCHING REACTIONS USING ACRYLAMIDE and SUCCINIMIDE AS QUENCHERS. Photochemistry and Photobiology, 1987, 46, 23-30.	2.5	38
53	Fluorescence lifetime and anisotropy studies with liver alcohol dehydrogenase and its complexes. Biochemistry, 1986, 25, 6631-6637.	2.5	29
54	Quenching of the intrinsic fluorescence of liver alcohol dehydrogenase by the alkaline transition and by coenzyme binding. Biochemistry, 1986, 25, 6620-6624.	2.5	9

MAURICE R EFTINK

#	Article	IF	CITATIONS
55	Spectral displacement techniques for studying the binding of spectroscopically transparent ligands to cyclodextrins. Analytical Biochemistry, 1986, 154, 400-408.	2.4	44
56	Viscosity dependence of the solute quenching of the tryptophanyl fluorescence of proteins. Biophysical Chemistry, 1986, 25, 277-282.	2.8	38
57	Fluorescence quenching of the buried tryphtophan residue of cod parvalbumin. Biophysical Chemistry, 1985, 22, 173-180.	2.8	35
58	Cyclodextrin-adamantanecarboxylate inclusion complexes: studies of the variation in cavity size. The Journal of Physical Chemistry, 1985, 89, 326-332.	2.9	263
59	Local anesthetic-phospholipid interactions. The pH dependence of the binding of dibucaine to dimyristoylphosphatidylcholine vesicles. Biochimica Et Biophysica Acta - Biomembranes, 1985, 813, 137-140.	2.6	32
60	Fluorescence quenching of Trp-314 of liver alcohol dehydrogenase by oxygen. Biophysical Chemistry, 1984, 20, 201-207.	2.8	21
61	Indole fluorescence quenching studies on proteins and model systems: use of the inefficient quencher succinimide. Biochemistry, 1984, 23, 3891-3899.	2.5	141
62	Cyclodextrin-adamantanecarboxylate inclusion complexes: A model system for the hydrophobic effect. Biopolymers, 1982, 21, 1153-1166.	2.4	109
63	Fluorescence quenching studies with proteins. Analytical Biochemistry, 1981, 114, 199-227.	2.4	1,718
64	Deviations from Michaelis-Menten kinetics in continuous flow assays: Consideration of unireactant cases. Analytical Biochemistry, 1981, 111, 291-304.	2.4	6
65	A Hydrophobic Quencher of Protein Fluorescence: 2,2,2-Trichloroethanol. Biochimica Et Biophysica Acta (BBA) - Protein Structure, 1977, 491, 473-481	1.7	83
