#	ARTICLE	IF	CITATIONS
1	Imaging the developing brain: what have we learned about cognitive development?. Trends in Cognitive Sciences, 2005, 9, 104-110.	7.8	1,224
2	A shift from diffuse to focal cortical activity with development. Developmental Science, 2006, 9, 1-8.	2.4	598
3	Subcortical brain volume differences in participants with attention deficit hyperactivity disorder in children and adults: a cross-sectional mega-analysis. Lancet Psychiatry, 2017, 4, 310-319.	7.4	565
4	Differential patterns of striatal activation in young children with and without ADHD. Biological Psychiatry, 2003, 53, 871-878.	1.3	563
5	A neural basis for the development of inhibitory control. Developmental Science, 2002, 5, F9.	2.4	547
6	Converging Evidence for a Fronto-Basal-Ganglia Network for Inhibitory Control of Action and Cognition: Figure 1.. Journal of Neuroscience, 2007, 27, 11860-11864.	3.6	461
7	Unique developmental trajectories of cortical thickness and surface area. NeuroImage, 2014, 87, 120-126.	4.2	458
8	Anatomical MRI of the Developing Human Brain: What Have We Learned?. Journal of the American Academy of Child and Adolescent Psychiatry, 2001, 40, 1012-1020.	0.5	383
9	Cortical and Subcortical Brain Morphometry Differences Between Patients With Autism Spectrum Disorder and Healthy Individuals Across the Lifespan: Results From the ENIGMA ASD Working Group. American Journal of Psychiatry, 2018, 175, 359-369.	7.2	356
10	A review of the biological bases of ADHD: What have we learned from imaging studies?. Mental Retardation and Developmental Disabilities Research Reviews, 2003, 9, 184-195.	3.6	335
11	Magnetic Resonance Imaging of Boys With Attention-Deficit/Hyperactivity Disorder and Their Unaffected Siblings. Journal of the American Academy of Child and Adolescent Psychiatry, 2004, 43, 332-340.	0.5	306
12	Mapping cortical brain asymmetry in 17,141 healthy individuals worldwide via the ENIGMA Consortium. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, E5154-E5163.	7.1	299
13	Changes in Thickness and Surface Area of the Human Cortex and Their Relationship with Intelligence. Cerebral Cortex, 2015, 25, 1608-1617.	2.9	290
14	Brain Imaging of the Cortex in ADHD: A Coordinated Analysis of Large-Scale Clinical and Population-Based Samples. American Journal of Psychiatry, 2019, 176, 531-542.	7.2	261
15	What have we learned about cognitive development from neuroimaging?. Neuropsychologia, 2006, 44, 2149-2157.	1.6	253
16	Typical development of basal ganglia, hippocampus, amygdala and cerebellum from age 7 to 24. NeuroImage, 2014, 96, 67-72.	4.2	235
17	Changes in the Developmental Trajectories of Striatum in Autism. Biological Psychiatry, 2009, 66, 327-333.	1.3	225
18	The neurobiology of repetitive behavior: women and men. Neuroscience and Biobehavioral Reviews, 2011, 35, 356-365.	6.1	218

#	ARTICLE	IF	CITATIONS
19	Differentiating Frontostriatal and Fronto-Cerebellar Circuits in Attention-Deficit/Hyperactivity Disorder. <i>Biological Psychiatry</i> , 2011, 69, 1178-1184.	1.3	211
20	Evidence of Developmental Differences in Implicit Sequence Learning: An fMRI Study of Children and Adults. <i>Journal of Cognitive Neuroscience</i> , 2004, 16, 1339-1351.	2.3	208
21	Fronto-striatal circuitry and inhibitory control in autism: Findings from diffusion tensor imaging tractography. <i>Cortex</i> , 2012, 48, 183-193.	2.4	208
22	Changes in the Development of Striatum Are Involved in Repetitive Behavior in Autism. <i>Biological Psychiatry</i> , 2014, 76, 405-411.	1.3	194
23	Volumes of Brain Structures in Twins Discordant for Schizophrenia. <i>Archives of General Psychiatry</i> , 2001, 58, 33.	12.3	187
24	The EU-AIMS Longitudinal European Autism Project (LEAP): design and methodologies to identify and validate stratification biomarkers for autism spectrum disorders. <i>Molecular Autism</i> , 2017, 8, 24.	4.9	183
25	Caudate Nucleus Is Enlarged in High-Functioning Medication-Naive Subjects with Autism. <i>Biological Psychiatry</i> , 2007, 62, 262-266.	1.3	181
26	Activation in Ventral Prefrontal Cortex is Sensitive to Genetic Vulnerability for Attention-Deficit Hyperactivity Disorder. <i>Biological Psychiatry</i> , 2006, 60, 1062-1070.	1.3	174
27	The neurobiology of repetitive behavior: Of mice–. <i>Neuroscience and Biobehavioral Reviews</i> , 2011, 35, 345-355.	6.1	167
28	Altered structural brain asymmetry in autism spectrum disorder in a study of 54 datasets. <i>Nature Communications</i> , 2019, 10, 4958.	12.8	167
29	Progressive Structural Brain Changes During Development of Psychosis. <i>Schizophrenia Bulletin</i> , 2012, 38, 519-530.	4.3	142
30	Evidence for a mechanistic model of cognitive control. <i>Clinical Neuroscience Research</i> , 2001, 1, 267-282.	0.8	138
31	Increased gray-matter volume in medication-naive high-functioning children with autism spectrum disorder. <i>Psychological Medicine</i> , 2005, 35, 561-570.	4.5	137
32	The EU-AIMS Longitudinal European Autism Project (LEAP): clinical characterisation. <i>Molecular Autism</i> , 2017, 8, 27.	4.9	126
33	Subcortical Brain Volume, Regional Cortical Thickness, and Cortical Surface Area Across Disorders: Findings From the ENIGMA ADHD, ASD, and OCD Working Groups. <i>American Journal of Psychiatry</i> , 2020, 177, 834-843.	7.2	120
34	Identification and validation of biomarkers for autism spectrum disorders. <i>Nature Reviews Drug Discovery</i> , 2016, 15, 70-70.	46.4	117
35	Basic Impairments in Regulating the Speed-Accuracy Tradeoff Predict Symptoms of Attention-Deficit/Hyperactivity Disorder. <i>Biological Psychiatry</i> , 2010, 68, 1114-1119.	1.3	113
36	Common and unique neural networks for proactive and reactive response inhibition revealed by independent component analysis of functional MRI data. <i>NeuroImage</i> , 2014, 103, 65-74.	4.2	103

#	ARTICLE	IF	CITATIONS
37	Dopamine Transporter Genotype Conveys Familial Risk of Attention-Deficit/Hyperactivity Disorder Through Striatal Activation. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2008, 47, 61-67.	0.5	97
38	Dissecting the Heterogeneous Cortical Anatomy of Autism Spectrum Disorder Using Normative Models. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2019, 4, 567-578.	1.5	97
39	Neural and behavioral correlates of expectancy violations in attention-deficit hyperactivity disorder. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2007, 48, 881-889.	5.2	88
40	Investigating the factors underlying adaptive functioning in autism in the EU-AIMS Longitudinal European Autism Project. <i>Autism Research</i> , 2019, 12, 645-657.	3.8	87
41	New potential leads in the biology and treatment of attention deficit-hyperactivity disorder. <i>Current Opinion in Neurology</i> , 2007, 20, 119-124.	3.6	86
42	Altered Connectivity Between Cerebellum, Visual, and Sensory-Motor Networks in Autism Spectrum Disorder: Results from the EU-AIMS Longitudinal European Autism Project. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2019, 4, 260-270.	1.5	82
43	Reduced Symptoms of Inattention after Dietary Omega-3 Fatty Acid Supplementation in Boys with and without Attention Deficit/Hyperactivity Disorder. <i>Neuropsychopharmacology</i> , 2015, 40, 2298-2306.	5.4	80
44	MR imaging of the effects of methylphenidate on brain structure and function in Attention-Deficit/Hyperactivity Disorder. <i>European Neuropsychopharmacology</i> , 2013, 23, 1151-1164.	0.7	76
45	Imaging genetics in ADHD: A focus on cognitive control. <i>Neuroscience and Biobehavioral Reviews</i> , 2009, 33, 674-689.	6.1	75
46	Shared vulnerability for connectome alterations across psychiatric and neurological brain disorders. <i>Nature Human Behaviour</i> , 2019, 3, 988-998.	12.0	75
47	Familial Vulnerability to ADHD Affects Activity in the Cerebellum in Addition to the Prefrontal Systems. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2008, 47, 68-75.	0.5	72
48	From Behavior to Cognition to the Brain and Back: What Have We Learned From Functional Imaging Studies of Attention Deficit Hyperactivity Disorder?. <i>American Journal of Psychiatry</i> , 2006, 163, 957-960.	7.2	71
49	Neurocognitive and Clinical Predictors of Long-Term Outcome in Adolescents at Ultra-High Risk for Psychosis: A 6-Year Follow-Up. <i>PLoS ONE</i> , 2014, 9, e93994.	2.5	70
50	Imaging genetics in ADHD. <i>NeuroImage</i> , 2010, 53, 832-838.	4.2	68
51	Decreased frontostriatal microstructural organization in attention deficit/hyperactivity disorder. <i>Human Brain Mapping</i> , 2012, 33, 1941-1951.	3.6	65
52	Effects of omega-3 polyunsaturated fatty acids on human brain morphology and function: What is the evidence?. <i>European Neuropsychopharmacology</i> , 2016, 26, 546-561.	0.7	63
53	Structural and functional connectivity in children and adolescents with and without attention deficit/hyperactivity disorder. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2017, 58, 810-818.	5.2	62
54	Consortium neuroscience of attention deficit/hyperactivity disorder and autism spectrum disorder: The ENIGMA adventure. <i>Human Brain Mapping</i> , 2022, 43, 37-55.	3.6	61

#	ARTICLE	IF	CITATIONS
55	Development of cortical thickness and surface area in autism spectrum disorder. <i>NeuroImage: Clinical</i> , 2017, 13, 215-222.	2.7	59
56	Functional MRI and Response Inhibition in Children Exposed to Cocaine in utero. <i>Developmental Neuroscience</i> , 2009, 31, 159-166.	2.0	58
57	The development of brain network architecture. <i>Human Brain Mapping</i> , 2016, 37, 717-729.	3.6	58
58	Individual prediction of long-term outcome in adolescents at ultra-high risk for psychosis: Applying machine learning techniques to brain imaging data. <i>Human Brain Mapping</i> , 2017, 38, 704-714.	3.6	56
59	Differential Brain Development with Low and High IQ in Attention-Deficit/Hyperactivity Disorder. <i>PLoS ONE</i> , 2012, 7, e35770.	2.5	55
60	Deficits in Cognitive Control, Timing and Reward Sensitivity Appear to be Dissociable in ADHD. <i>PLoS ONE</i> , 2012, 7, e51416.	2.5	53
61	No evidence for preferential involvement of medial temporal lobe structures in high-functioning autism. <i>Psychological Medicine</i> , 2006, 36, 827-834.	4.5	50
62	Auditory processing in autism spectrum disorder: Mismatch negativity deficits. <i>Autism Research</i> , 2017, 10, 1857-1865.	3.8	49
63	Brain development in adolescents at ultra-high risk for psychosis: Longitudinal changes related to resilience. <i>NeuroImage: Clinical</i> , 2016, 12, 542-549.	2.7	43
64	Radiological findings in autistic and developmentally delayed children. <i>Brain and Development</i> , 2006, 28, 495-499.	1.1	42
65	Developmental differences in higher-order resting-state networks in Autism Spectrum Disorder. <i>NeuroImage: Clinical</i> , 2014, 4, 820-827.	2.7	42
66	What can Cortical Development in Attention-Deficit/Hyperactivity Disorder Teach us About the Early Developmental Mechanisms Involved?. <i>Cerebral Cortex</i> , 2017, 27, 4624-4634.	2.9	42
67	Adolescents let sufficient evidence accumulate before making a decision when large incentives are at stake. <i>Developmental Science</i> , 2014, 17, 59-70.	2.4	41
68	Childhood trauma and clinical outcome in patients at ultra-high risk of transition to psychosis. <i>Schizophrenia Research</i> , 2015, 169, 193-198.	2.0	40
69	Social brain activation during mentalizing in a large autism cohort: the Longitudinal European Autism Project. <i>Molecular Autism</i> , 2020, 11, 17.	4.9	40
70	Towards robust and replicable sex differences in the intrinsic brain function of autism. <i>Molecular Autism</i> , 2021, 12, 19.	4.9	40
71	Analysis of structural brain asymmetries in attention-deficit/hyperactivity disorder in 39 datasets. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 1202-1219.	5.2	40
72	Capturing the dynamics of response variability in the brain in ADHD. <i>NeuroImage: Clinical</i> , 2015, 7, 132-141.	2.7	39

#	ARTICLE	IF	CITATIONS
73	Fronto-Striatal Glutamate in Autism Spectrum Disorder and Obsessive Compulsive Disorder. <i>Neuropsychopharmacology</i> , 2017, 42, 2456-2465.	5.4	39
74	Magnetic Resonance Simulation is Effective in Reducing Anxiety Related to Magnetic Resonance Scanning in Children. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2009, 48, 206-207.	0.5	37
75	Reduced Gyrfication Is Related to Reduced Interhemispheric Connectivity in Autism Spectrum Disorders. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2015, 54, 668-676.	0.5	37
76	Children with ADHD symptoms show deficits in reactive but not proactive inhibition, irrespective of their formal diagnosis. <i>Psychological Medicine</i> , 2018, 48, 2515-2521.	4.5	37
77	Children with <scp>ADHD</scp> symptoms show decreased activity in ventral striatum during the anticipation of reward, irrespective of <scp>ADHD</scp> diagnosis. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2017, 58, 206-214.	5.2	36
78	Atypical Brain Asymmetry in Autismâ€”A Candidate for Clinically Meaningful Stratification. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 802-812.	1.5	36
79	Integrating genetic, psychopharmacological and neuroimaging studies: A converging methods approach to understanding the neurobiology of ADHD. <i>Developmental Review</i> , 2007, 27, 374-395.	4.7	35
80	A multicohort, longitudinal study of cerebellar development in attention deficit hyperactivity disorder. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 1114-1123.	5.2	34
81	Converging methods in studying attention-deficit/hyperactivity disorder: What can we learn from neuroimaging and genetics?. <i>Development and Psychopathology</i> , 2008, 20, 1133-1143.	2.3	33
82	No evidence for structural brain changes in young adolescents at ultra high risk for psychosis. <i>Schizophrenia Research</i> , 2009, 112, 1-6.	2.0	33
83	A shift from diffuse to focal cortical activity with development: the authors' reply. <i>Developmental Science</i> , 2006, 9, 18-20.	2.4	29
84	Individualized Prediction of Transition to Psychosis in 1,676 Individuals at Clinical High Risk: Development and Validation of a Multivariable Prediction Model Based on Individual Patient Data Meta-Analysis. <i>Frontiers in Psychiatry</i> , 2019, 10, 345.	2.6	29
85	Interindividual Differences in Cortical Thickness and Their Genomic Underpinnings in Autism Spectrum Disorder. <i>American Journal of Psychiatry</i> , 2022, 179, 242-254.	7.2	28
86	No differences in MR-based volumetry between 2- and 7-year-old children with autism spectrum disorder and developmental delay. <i>Brain and Development</i> , 2009, 31, 725-730.	1.1	27
87	<i>DRD3</i> gene and striatum in autism spectrum disorder. <i>British Journal of Psychiatry</i> , 2015, 206, 431-432.	2.8	27
88	A multisample study of longitudinal changes in brain network architecture in 4â€“13â€“yearâ€“old children. <i>Human Brain Mapping</i> , 2018, 39, 157-170.	3.6	26
89	Towards an integrated account of the development of self-regulation from a neurocognitive perspective: A framework for current and future longitudinal multi-modal investigations. <i>Developmental Cognitive Neuroscience</i> , 2020, 45, 100829.	4.0	26
90	Gray matter covariations and core symptoms of autism: the EU-AIMS Longitudinal European Autism Project. <i>Molecular Autism</i> , 2020, 11, 86.	4.9	25

#	ARTICLE	IF	CITATIONS
91	Subtly altered topological asymmetry of brain structural covariance networks in autism spectrum disorder across 43 datasets from the ENIGMA consortium. <i>Molecular Psychiatry</i> , 2022, 27, 2114-2125.	7.9	25
92	Developmental differences in intra-individual variability in children with <scp>ADHD</scp> and <scp>ASD</scp>. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2015, 56, 1316-1326.	5.2	22
93	Temporal Profiles of Social Attention Are Different Across Development in Autistic and Neurotypical People. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 813-824.	1.5	21
94	Frontostriatal functional connectivity correlates with repetitive behaviour across autism spectrum disorder and obsessive-compulsive disorder. <i>Psychological Medicine</i> , 2019, 49, 2247-2255.	4.5	20
95	Resting state EEG power spectrum and functional connectivity in autism: a cross-sectional analysis. <i>Molecular Autism</i> , 2022, 13, 22.	4.9	20
96	Cerebellar Atypicalities in Autism?. <i>Biological Psychiatry</i> , 2022, 92, 674-682.	1.3	20
97	Striatal structure and its association with N-Acetylaspartate and glutamate in autism spectrum disorder and obsessive compulsive disorder. <i>European Neuropsychopharmacology</i> , 2018, 28, 118-129.	0.7	18
98	Can we use neuroimaging data to differentiate between subgroups of children with ADHD symptoms: A proof of concept study using latent class analysis of brain activity. <i>NeuroImage: Clinical</i> , 2019, 21, 101601.	2.7	17
99	Imbalanced social-communicative and restricted repetitive behavior subtypes of autism spectrum disorder exhibit different neural circuitry. <i>Communications Biology</i> , 2021, 4, 574.	4.4	17
100	Challenges and methods in developmental neuroimaging. <i>Human Brain Mapping</i> , 2010, 31, 835-837.	3.6	16
101	No evidence of differences in cognitive control in children with autism spectrum disorder or obsessive-compulsive disorder: An fMRI study. <i>Developmental Cognitive Neuroscience</i> , 2019, 36, 100602.	4.0	16
102	Reproducibility in the absence of selective reporting: An illustration from large-scale brain asymmetry research. <i>Human Brain Mapping</i> , 2022, 43, 244-254.	3.6	16
103	Glutamatergic Agents in the Treatment of Compulsivity and Impulsivity in Child and Adolescent Psychiatry: a Systematic Review of the Literature. <i>Zeitschrift F�r Kinder- Und Jugendpsychiatrie Und Psychotherapie</i> , 2018, 46, 246-263.	0.7	16
104	10Kin1day: A Bottom-Up Neuroimaging Initiative. <i>Frontiers in Neurology</i> , 2019, 10, 425.	2.4	15
105	Alcohol and Brain Development in Adolescents and Young Adults: A Systematic Review of the Literature and Advisory Report of the Health Council of the Netherlands. <i>Advances in Nutrition</i> , 2021, 12, 1379-1410.	6.4	15
106	Neurobiological Correlates of Change in Adaptive Behavior in Autism. <i>American Journal of Psychiatry</i> , 2022, 179, 336-349.	7.2	15
107	Characterizing neuroanatomic heterogeneity in people with and without ADHD based on subcortical brain volumes. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 1140-1149.	5.2	14
108	Functional connectivity between cognitive control regions is sensitive to familial risk for ADHD. <i>Human Brain Mapping</i> , 2011, 32, 1511-1518.	3.6	13

#	ARTICLE	IF	CITATIONS
109	COMPULS: design of a multicenter phenotypic, cognitive, genetic, and magnetic resonance imaging study in children with compulsive syndromes. <i>BMC Psychiatry</i> , 2016, 16, 361.	2.6	13
110	Developmental changes in fronto-striatal glutamate and their association with functioning during inhibitory control in autism spectrum disorder and obsessive compulsive disorder. <i>NeuroImage: Clinical</i> , 2021, 30, 102622.	2.7	12
111	Imaging gene and environmental effects on cerebellum in Attention-Deficit/Hyperactivity Disorder and typical development. <i>NeuroImage: Clinical</i> , 2013, 2, 103-110.	2.7	11
112	Bumetanide As a Candidate Treatment for Behavioral Problems in Tuberous Sclerosis Complex. <i>Frontiers in Neurology</i> , 2017, 8, 469.	2.4	11
