#	Article	IF	CITATIONS
1	Stressful Military Training: Endocrine Reactivity, Performance, and Psychological Impact. Aviation, Space, and Environmental Medicine, 2007, 78, 1143-1149.	0.5	53
2	Physical Fitness Influences Stress Reactions to Extreme Military Training. Military Medicine, 2008, 173, 738-742.	0.8	51
3	Relationships of hardiness to physical and mental health status in military men: a test of mediated effects. Journal of Behavioral Medicine, 2013, 36, 1-9.	2.1	36
4	Effect of Psychological Skills Training During Military Survival School: A Randomized, Controlled Field Study. Military Medicine, 2011, 176, 1362-1368.	0.8	31
5	Effects of dehydroepiandrosterone supplementation during stressful military training: A randomized, controlled, double-blind field study. Stress, 2012, 15, 85-96.	1.8	31
6	Delayed memory effects after intense stress in Special Forces candidates: Exploring path processes between cortisol secretion and memory recall. Stress, 2013, 16, 311-320.	1.8	24
7	Sex differences in coping strategies in military survival school. Journal of Anxiety Disorders, 2015, 29, 7-13.	3.2	22
8	Dehydroepiandrosterone and Dehydroepiandrosterone Sulfate: Anabolic, Neuroprotective, and Neuroexcitatory Properties in Military Men. Military Medicine, 2013, 178, 100-106.	0.8	20
9	Trait Anxiety and Salivary Cortisol During Free Living and Military Stress. Aviation, Space, and Environmental Medicine, 2008, 79, 129-135.	0.5	19
10	Behavioral predictors of acute stress symptoms during intense military training. Journal of Traumatic Stress, 2009, 22, 212-217.	1.8	19
11	Genetic variants in serotonin and corticosteroid systems modulate neuroendocrine and cardiovascular responses to intense stress. Behavioural Brain Research, 2014, 270, 1-7.	2.2	16
12	Initial Validation of the Military Operational Risk Taking Scale (MORTS). Military Psychology, 2010, 22, 128-142.	1.1	15
13	Sex differences in cardiovascular and subjective stress reactions: prospective evidence in a realistic military setting. Stress, 2014, 17, 70-78.	1.8	15
14	Saliva Collection, Handling, Transport, and Storage: Special Considerations and Best Practices for Interdisciplinary Salivary Bioscience Research., 2020,, 21-47.		15
15	Assessment of Sleep Disruption and Sleep Quality in Naval Special Warfare Operators. Military Medicine, 2015, 180, 803-808.	0.8	14
16	Neuroprotective–neurotrophic effect of endogenous dehydroepiandrosterone sulfate during intense stress exposure. Steroids, 2014, 87, 54-58.	1.8	13
17	Morning Cortisol Is Associated With Stress and Sleep in Elite Military Men: A Brief Report. Military Medicine, 2018, 183, e255-e259.	0.8	12
18	A genetic risk factor for major depression and suicidal ideation is mitigated by physical activity. Psychiatry Research, 2017, 249, 304-306.	3.3	11

#	Article	IF	Citations
19	Anabolic hormone profiles in elite military men. Steroids, 2016, 110, 41-48.	1.8	9
20	Healthy People 2010 Physical Activity Guidelines and Psychological Symptoms: Evidence From a Large Nationwide Database. Journal of Physical Activity and Health, 2004, 1, 114-130.	2.0	8
21	Spontaneous and Deliberate Dissociative States in Military Personnel: Are Such States Helpful?. Journal of Traumatic Stress, 2013, 26, 492-497.	1.8	8
22	Spontaneous and Deliberate Dissociative States in Military Personnel: Relationships to Objective Performance Under Stress. Military Medicine, 2014, 179, 955-958.	0.8	7
23	Neurophysiologic methods to measure stress during survival, evasion, resistance, and escape training. Aviation, Space, and Environmental Medicine, 2007, 78, B224-30.	0.5	7
24	Anger Expression and Stress Responses in Military Men. Aviation, Space, and Environmental Medicine, 2009, 80, 962-967.	0.5	6
25	Salivary nerve growth factor response to intense stress: Effect of sex and body mass index. Psychoneuroendocrinology, 2014, 43, 90-94.	2.7	6
26	Trauma Exposure and Functional Movement Characteristics of Male Tactical Athletes. Journal of Athletic Training, 2020, 55, 384-389.	1.8	6
27	Genetic and environmental modulation of neurotrophic and anabolic stress response: Counterbalancing forces. Physiology and Behavior, 2015, 151, 1-8.	2.1	5
28	Cortisol Awakening Response in Elite Military Men: Summary Parameters, Stability Measurement, and Effect of Compliance. Military Medicine, 2016, 181, e1600-e1607.	0.8	5
29	Blast exposure interacts with genetic variant 5HTTLPR to predict posttraumatic stress symptoms in military explosives personnel. Psychiatry Research, 2019, 280, 112519.	3.3	5
30	Factors Influencing Physical Risk Taking in Rock Climbing. Human Performance in Extreme Environments, 2006, 9, .	0.3	5
31	Anabolic hormone profiles in elite military men: Robust associations with age, stress, and fatigue. Steroids, 2017, 124, 18-22.	1.8	3
32	The "yin and yang―of the adrenal and gonadal systems in elite military men. Stress, 2017, 20, 258-264.	1.8	3
33	Genetic, Physiologic, and Behavioral Predictors of Cardiorespiratory Fitness in Specialized Military Men. Military Medicine, 2019, 184, e474-e481.	0.8	2
34	Greater Fitness is Associated with Reduced Injury Risk in Specialized Military Men. Medicine and Science in Sports and Exercise, 2018, 50, 730.	0.4	1
35	Combat and blast exposure blunt sympathetic response to acute exercise stress in specialised military men. Stress and Health, 2021, , .	2.6	1
36	Post-awakening Cortisol in Explosive Ordnance Disposal Technicians: A Replication Study in a Novel Population. Military Medicine, 2021, 186, 6-12.	0.8	0

#	Article	lF	CITATIONS
37	Military Exposures Predict Mental Health Symptoms in Explosives Personnel but Not Always as Expected. Military Medicine, 2023, 188, e646-e652.	0.8	0
