1	Binaural Hearing with Temporally Complex Signals. Springer Handbook of Auditory Research, 2021, , 145-180.	0.7	3
2	A crew of listeners with no more than â€œslightâ€• hearing loss who exhibit binaural deficits also exhibit reduced amounts of binaural interference. Journal of the Acoustical Society of America, 2021, 150, 2977-2984.	1.1	3
3	A crew of listeners with no more than â€œslightâ€• hearing loss who exhibit binaural deficits also exhibit higher levels of stimulus-independent internal noise. Journal of the Acoustical Society of America, 2020, 147, 3188-3196.	1.1	1
4	Binaural detection as a joint function of masker bandwidth, masker interaural correlation, and interaural time delay: Empirical data and modeling. Journal of the Acoustical Society of America, 2020, 148, 3481-3488.	1.1	6
5	The fMRI Data of Thompson et al. (2006) Do Not Constrain How the Human Midbrain Represents Interaural Time Delay. JARO - Journal of the Association for Research in Otolaryngology, 2019, 20, 305-311.	1.8	3
6	No more than â€œslightâ€• hearing loss and degradations in binaural processing. Journal of the Acoustical Society of America, 2019, 145, 2094-2102.	1.1	14
7	Effects of interaural delay, center frequency, and no more than â€œslightâ€• hearing loss on precision of binaural processing: Empirical data and quantitative modeling. Journal of the Acoustical Society of America, 2018, 144, 292-307.	1.1	24
8	An interaural-correlation-based approach that accounts for a wide variety of binaural detection data. Journal of the Acoustical Society of America, 2017, 141, 1150-1160.	1.1	21
9	Behavioral manifestations of audiometrically-defined â€œslightâ€• or â€œhiddenâ€• hearing loss revealed by measures of binaural detection. Journal of the Acoustical Society of America, 2016, 140, 3540-3548.	1.1	37
10	Converging measures of binaural detection yield estimates of precision of coding of interaural temporal disparities. Journal of the Acoustical Society of America, 2015, 138, EL474-EL479.	1.1	11
11	Binaural interference: Effects of temporal interferer fringe and interstimulus interval. Journal of the Acoustical Society of America, 2014, 135, 789-795.	1.1	2
12	Accounting for binaural detection as a function of masker interaural correlation: Effects of center frequency and bandwidth. Journal of the Acoustical Society of America, 2014, 136, 3211-3220.	1.1	7
13	Sensitivity to envelope-based interaural delays at high frequencies: Center frequency affects the envelope rate-limitation. Journal of the Acoustical Society of America, 2014, 135, 808-816.	1.1	20
14	Advances in the Understanding of Binaural Information Processing: Consideration of the Stimulus as Processed. Springer Handbook of Auditory Research, 2014, , 585-600.	0.7	0
15	When and How Envelope â€œRate-Limitationsâ€• Affect Processing of Interaural Temporal Disparities Conveyed by High-Frequency Stimuli. Advances in Experimental Medicine and Biology, 2013, 787, 263-271.	1.6	0
16	The effect of overall level on sensitivity to interaural differences of time and level at high frequencies. Journal of the Acoustical Society of America, 2013, 134, 494-502.	1.1	36
17	Lateralization produced by interaural temporal and intensitive disparities of high-frequency, raised-sine stimuli: Data and modeling. Journal of the Acoustical Society of America, 2012, 131, 409-415.	1.1	25
18	Lateralization produced by interaural intensitive disparities appears to be larger for high- vs low-frequency stimuli. Journal of the Acoustical Society of America, 2011, 129, EL15-EL20.	1.1	14

#	Article	IF	Citations
19	Lateralization produced by envelope-based interaural temporal disparities of high-frequency, raised-sine stimuli: Empirical data and modeling. Journal of the Acoustical Society of America, 2011, 129, 1501-1508.	1.1	17
20	Accounting quantitatively for sensitivity to envelope-based interaural temporal disparities at high frequencies. Journal of the Acoustical Society of America, 2010, 128, 1224.	1.1	22
21	How sensitivity to ongoing interaural temporal disparities is affected by manipulations of temporal features of the envelopes of high-frequency stimuli. Journal of the Acoustical Society of America, 2009, 125, 3234.	1.1	57
22	Listenersâ€™ sensitivity to â€œonset/offsetâ€•and â€œongoingâ€•interaural delays in high-frequency, sinusoidally amplitude-modulated tones. Journal of the Acoustical Society of America, 2008, 123, 279-294.	1.1	12
23	Binaural signal detection, overall masking level, and masker interaural correlation: Revisiting the internal noise hypothesis. Journal of the Acoustical Society of America, 2008, 124, 3850-3860.	1.1	17
24	Discrimination of interaural temporal disparities conveyed by high-frequency sinusoidally amplitude-modulated tones and high-frequency transposed tones: Effects of spectrally flanking noises. Journal of the Acoustical Society of America, 2008, 124, 3088-3094.	1.1	11
25	Why do transposed stimuli enhance binaural processing?: Interaural envelope correlation vs envelope normalized fourth moment. Journal of the Acoustical Society of America, 2007, 121, EL23-EL28.	1.1	13
26	Binaural detection of 500-Hz tones in broadband and in narrowband masking noise: Effects of signal/masker duration and forward masking fringes. Journal of the Acoustical Society of America, 2006, 119, 2981-2993.	1.1	10
27	Neural Sensitivity to Interaural Envelope Delays in the Inferior Colliculus of the Guinea Pig. Journal of Neurophysiology, 2005, 93, 3463-3478.	1.8	63
28	Processing of interaural temporal disparities with both â€œtransposedâ€•and conventional stimuli. , 2005, , 376-388.		1
29	Measures of extents of laterality for high-frequency â€œtransposedâ€•stimuli under conditions of binaural interference. Journal of the Acoustical Society of America, 2005, 118, 1626-1635.	1.1	15
30	Interaural Correlation as the Basis of a Working Model of Binaural Processing: An Introduction. , 2005, , 238-271.		19
31	Sensitivity to interaural intensitive disparities: Listenersâ€™ use of potential cues. Journal of the Acoustical Society of America, 2004, 115, 3156-3160.	1.1	23
32	The apparent immunity of high-frequency â€œtransposedâ€•stimuli to low-frequency binaural interference. Journal of the Acoustical Society of America, 2004, 116, 3062-3069.	1.1	27
33	Enhancing interaural-delay-based extents of laterality at high frequencies by using â€œtransposed stimuliâ€. Journal of the Acoustical Society of America, 2003, 113, 3335.	1.1	55
34	Enhancing sensitivity to interaural delays at high frequencies by using â€œtransposed stimuliâ€. Journal of the Acoustical Society of America, 2002, 112, 1026-1036.	1.1	246
35	Auditory processing of interaural timing information: New insights. Journal of Neuroscience Research, 2001, 66, 1035-1046.	2.9	69
36	A consideration of the normalization that is typically included in correlation-based models of binaural detection. Journal of the Acoustical Society of America, 2001, 109, 830-833.	1.1	22

#	Article	IF	Citations
37	Sensitivity to brief changes of interaural time and interaural intensity. Journal of the Acoustical Society of America, 2001, 109, 1604-1615.	1.1	63
38	Manipulating the â€œstraightnessâ€• and â€œcurvatureâ€• of patterns of interaural cross correlation affects listenersâ€™ sensitivity to changes in interaural delay. Journal of the Acoustical Society of America, 2001, 109, 321-330.	1.1	28
39	The variation across time of sensitivity to interaural disparities: Behavioral measurements and quantitative analyses. Journal of the Acoustical Society of America, 2001, 110, 2516-2526.	1.1	48
40	The normalized interaural correlation: Accounting for NoSÏ€ thresholds obtained with Gaussian and â€œlow-noiseâ€• masking noise. Journal of the Acoustical Society of America, 1999, 106, 870-876.	1.1	56
41	The effects of signal duration on NoSo and NoSÏ€ thresholds at 500 Hz and 4 kHz. Journal of the Acoustical Society of America, 1999, 105, 1776-1783.	1.1	17
42	Inter-individual differences in binaural detection of low-frequency or high-frequency tonal signals masked by narrow-band or broadband noise. Journal of the Acoustical Society of America, 1998, 103, 2069-2078.	1.1	35
43	The effects of randomizing values of interaural disparities on binaural detection and on discrimination of interaural correlation. Journal of the Acoustical Society of America, 1997, 102, 1113-1120.	1.1	28
44	Binaural beats at high frequencies: Listenersâ€™ use of envelopeâ€based interaural temporal and intensitive disparities. Journal of the Acoustical Society of America, 1996, 99, 1670-1679.	1.1	15
45	The normalized correlation: Accounting for binaural detection across center frequency. Journal of the Acoustical Society of America, 1996, 100, 3774-3784.	1.1	89
46	On the use of the normalized correlation as an index of interaural envelope correlation. Journal of the Acoustical Society of America, 1996, 100, 1754-1763.	1.1	55
47	Binaural interference effects measured with maskingâ€level difference and with ITDâ€• and IIDâ€discrimination paradigms. Journal of the Acoustical Society of America, 1995, 98, 155-163.	1.1	34
48	Detection of interaural delay in highâ€frequency sinusoidally amplitudeâ€modulated tones, twoâ€tone complexes, and bands of noise. Journal of the Acoustical Society of America, 1994, 95, 3561-3567.	1.1	96
49	The effect of nonsimultaneous onâ€frequency and offâ€frequency cues on the detection of a tonal signal masked by narrowâ€band noise. Journal of the Acoustical Society of America, 1994, 95, 920-930.	1.1	4
50	Comments on â€˜â€˜The envelope following response (EFR) in the Mongolian gerbil to sinusoidally amplitudeâ€modulated signals in the presence of simultaneously gated pure tonesâ€™â€™ [J. Acoust. Soc. Am. 94, 3215â€"3226 (1993)]. Journal of the Acoustical Society of America, 1994, 96, 1189-1190.	1.1	5
51	Lateralization of bands of noise as a function of combinations of interaural intensitive differences, interaural temporal differences, and bandwidth. Journal of the Acoustical Society of America, 1994, 95, 1482-1489.	1.1	15
52	Journal of the Acoustical Society of America, 1993, 94, 735-742.	1.1	14
53	Discrimination of interaural envelope correlation and its relation to binaural unmasking at high frequencies. Journal of the Acoustical Society of America, 1992, 91, 306-316.	1.1	55
54	Detection of antiphasic sinusoids added to the envelopes of high-frequency bands of noise. Hearing Research, 1992, 62, 157-165.	2.0	11

#	Article	IF	Citations
55	Measurement and specification of the envelope correlation between two narrow bands of noise. Hearing Research, 1991, 52, 189-194.	2.0	4
56	Spectral interference in a binaural detection task. Journal of the Acoustical Society of America, 1991, 89, 1306-1313.	1.1	13
57	Lateralization of lowâ€frequency tones: Relative potency of gating and ongoing interaural delays. Journal of the Acoustical Society of America, 1991, 90, 3077-3085.	1.1	45
58	On the use of adaptive procedures in binaural experiments. Journal of the Acoustical Society of America, 1990, 87, 1359-1361.	1.1	19
59	Detectability of interaural delays over select spectral regions: Effects of flanking noise. Journal of the Acoustical Society of America, 1990, 87, 810-813.	1.1	53
60	Detection of changes in spectral shape: Uniform vs. non-uniform background spectra. Hearing Research, 1988, 34, 157-165.	2.0	15
61	Detection of simple and complex changes of spectral shape. Journal of the Acoustical Society of America, 1987, 82, 1587-1592.	1.1	41
62	The profileâ€analysis bandwidth. Journal of the Acoustical Society of America, 1987, 81, 1888-1895.	1.1	51
63	Some physical and psychological effects produced by selective delays of the envelope of narrow bands of noise. Hearing Research, 1987, 29, 147-161.	2.0	11
64	Lateralization of lowâ€frequency tones and narrow bands of noise. Journal of the Acoustical Society of America, 1986, 79, 1563-1570.	1.1	37
65	Lateralization of bands of noise and sinusoidally amplitude-modulated tones: Effects of spectral locus and bandwidth. Journal of the Acoustical Society of America, 1986, 79, 1950-1957.	1.1	54
66	Lateralization of sinusoidally amplitudeâ€modulated tones: Effects of spectral locus and temporal variation. Journal of the Acoustical Society of America, 1985, 78, 514-523.	1.1	61
67	Lateralization of lowâ€frequency, complex waveforms: The use of envelopeâ€based temporal disparities. Journal of the Acoustical Society of America, 1985, 77, 1868-1880.	1.1	74
68	Detection of interaural delay in highâ€frequency noise. Journal of the Acoustical Society of America, 1982, 71, 147-152.	1.1	53
