#	ARTICLE	IF	CITATIONS
1	Limits on non-canonical heating and turbulence in the intergalactic medium from the low redshift Lyman $\hat{\pm}$ forest. Monthly Notices of the Royal Astronomical Society, 2022, 513, 864-885.	4.4	9
2	Hydrogen reionization ends by $\langle i \rangle z \langle /i \rangle = 5.3$: Lyman- $\hat{\pm}$ optical depth measured by the XQR-30 sample. Monthly Notices of the Royal Astronomical Society, 2022, 514, 55-76.	4.4	82
3	Prospects for observing the low-density cosmic web in Lyman- $\langle i \rangle \hat{\pm} \langle /i \rangle$ emission. Astronomy and Astrophysics, 2021, 650, A98.	5.1	8
4	A consistent and robust measurement of the thermal state of the IGM at $2 \hat{\%} \langle i \rangle z \langle /i \rangle \hat{\%} 4$ from a large sample of $\hat{\%} \text{Ly} \hat{\%} \langle i \rangle \hat{\pm} \langle /i \rangle$ forest spectra: evidence for late and rapid He $\hat{\%} \langle \text{sc} \rangle \text{ii} \langle /sc \rangle$ reionization. Monthly Notices of the Royal Astronomical Society, 2021, 506, 4389-4412.	4.4	42
5	Implications of the $\langle i \rangle z \langle /i \rangle \hat{\%} 5$ Lyman- $\hat{\pm}$ forest for the 21-cm power spectrum from the epoch of reionization. Monthly Notices of the Royal Astronomical Society, 2021, 507, 4684-4696.	4.4	6
6	Revised estimates of CMB $\langle i \rangle B \langle /i \rangle$ -mode polarization induced by patchy reionization. Journal of Cosmology and Astroparticle Physics, 2021, 2021, 003-003.	5.4	15
7	The effect of inhomogeneous reionization on the Lyman- $\hat{\pm}$ forest power spectrum at redshift $z \hat{\%} 4$: implications for thermal parameter recovery. Monthly Notices of the Royal Astronomical Society, 2021, 509, 6119-6137.	4.4	14
8	Constraining the second half of reionization with the $\text{Ly} \hat{\%} \hat{\pm}^2$ forest. Monthly Notices of the Royal Astronomical Society, 2020, 497, 906-915.	4.4	29
9	Probing the thermal state of the intergalactic medium at $\langle i \rangle z \langle /i \rangle \hat{\%} 5$ with the transmission spikes in high-resolution $\hat{\%} \text{Ly} \hat{\%} \hat{\pm}$ forest spectra. Monthly Notices of the Royal Astronomical Society, 2020, 494, 5091-5109.	4.4	69
10	Long troughs in the Lyman- $\hat{\pm}$ forest below redshift 6 due to islands of neutral hydrogen. Monthly Notices of the Royal Astronomical Society, 2020, 491, 1736-1745.	4.4	101
11	Modelling the observed luminosity function and clustering evolution of $\text{Ly} \hat{\%} \hat{\pm}$ emitters: growing evidence for late reionization. Monthly Notices of the Royal Astronomical Society, 2019, 485, 1350-1366.	4.4	35
12	Predictions and sensitivity forecasts for reionization-era $[\text{C} \hat{\%} \langle \text{sc} \rangle \text{ii} \langle /sc \rangle]$ line intensity mapping. Monthly Notices of the Royal Astronomical Society, 2019, 485, 3486-3498.	4.4	38
13	Large $\text{Ly} \hat{\%} \hat{\pm}$ opacity fluctuations and low CMB $\hat{\pm}$, in models of late reionization with large islands of neutral hydrogen extending to $\langle i \rangle z \langle /i \rangle \hat{\%} 5.5$. Monthly Notices of the Royal Astronomical Society: Letters, 2019, 485, L24-L28.	3.3	158
14	Tracing the sources of reionization in cosmological radiation hydrodynamics simulations. Monthly Notices of the Royal Astronomical Society, 2019, 483, 1029-1041.	4.4	19
15	Consistent modelling of the meta-galactic UV background and the thermal/ionization history of the intergalactic medium. Monthly Notices of the Royal Astronomical Society, 2019, 485, 47-68.	4.4	116
16	Lyman- $\hat{\pm}$ emitters gone missing: the different evolution of the bright and faint populations. Monthly Notices of the Royal Astronomical Society, 2018, 479, 2564-2587.	4.4	36
17	Self-shielding of hydrogen in the IGM during the epoch of reionization. Monthly Notices of the Royal Astronomical Society, 2018, 478, 1065-1076.	4.4	24
18	Spatial fluctuations of the intergalactic temperature $\hat{\%}$ density relation after hydrogen reionization. Monthly Notices of the Royal Astronomical Society, 2018, 477, 5501-5516.	4.4	46

#	ARTICLE	IF	CITATIONS
19	A new measurement of the intergalactic temperature at $z \approx 2.55 \pm 0.295$. Monthly Notices of the Royal Astronomical Society, 2018, 474, 2871-2883.	4.4	37
20	New constraints on the free-streaming of warm dark matter from intermediate and small scale Lyman- α forest data. Physical Review D, 2017, 96, .	4.7	360
21	First Constraints on Fuzzy Dark Matter from Lyman- α Forest Data and Hydrodynamical Simulations. Physical Review Letters, 2017, 119, 031302.	7.8	310
22	The Sherwood simulation suite: overview and data comparisons with the Lyman- α forest at redshifts 2 $\leq z \leq 5$. Monthly Notices of the Royal Astronomical Society, 2017, 464, 897-914.	4.4	119
23	Large 21-cm signals from AGN-dominated reionization. Monthly Notices of the Royal Astronomical Society, 2017, 469, 4283-4291.	4.4	27
24	A deep search for metals near redshift 7: the line of sight towards ULS J1120+0641. Monthly Notices of the Royal Astronomical Society, 2017, 470, 1919-1934.	4.4	33
25	Interpreting ALMA observations of the ISM during the epoch of reionization. Monthly Notices of the Royal Astronomical Society, 2017, 468, 4831-4861.	4.4	90
26	The effect of stellar and AGN feedback on the low-redshift Lyman α forest in the Sherwood simulation suite. Monthly Notices of the Royal Astronomical Society, 2017, 471, 1056-1069.	4.4	17
27	Evolution of the Quasar Luminosity Function: Implications for EoR-21cm. Proceedings of the International Astronomical Union, 2017, 12, 246-249.	0.0	0
28	Large-scale opacity fluctuations in the Ly α forest: evidence for QSOs dominating the ionizing UV background at $z \approx 5.5 \pm 0.6$?. Monthly Notices of the Royal Astronomical Society, 2017, 465, 3429-3445.	4.4	82
29	$z \sim 6$ metal-line absorbers as a probe of galactic feedback models. Proceedings of the International Astronomical Union, 2016, 11, 75-77.	0.0	0
30	Models of the cosmological 21cm signal from the epoch of reionization calibrated with Ly α and CMB data. Monthly Notices of the Royal Astronomical Society, 2016, 463, 2583-2599.	4.4	24
31	Testing the effect of galactic feedback on the IGM at $z \approx 6$ with metal-line absorbers. Monthly Notices of the Royal Astronomical Society, 2016, 461, 606-626.	4.4	43
32	Observational aspects of galactic accretion at redshift 3.3. Monthly Notices of the Royal Astronomical Society, 2016, 455, 3991-3999.	4.4	15
33	Probing the end of reionization with the near zones of $z \approx 6$ QSOs. Monthly Notices of the Royal Astronomical Society, 2015, 454, 681-697.	4.4	38
34	Calibrating cosmological radiative transfer simulations with Ly α forest data: evidence for large spatial UV background fluctuations at $z \approx 5.6 \pm 0.8$ due to rare bright sources. Monthly Notices of the Royal Astronomical Society, 2015, 453, 2944-2965.	4.4	72
35	The photoheating of the intergalactic medium in synthesis models of the UV background. Monthly Notices of the Royal Astronomical Society, 2015, 450, 4081-4097.	4.4	88
36	Star-forming galactic contrails as a source of metal enrichment and ionizing radiation at high redshift $z \sim \dots$. Monthly Notices of the Royal Astronomical Society, 2014, 441, 73-85.	4.4	4

#	ARTICLE	IF	CITATIONS
37	A consistent determination of the temperature of the intergalactic medium at redshift $z = 2.4$. Monthly Notices of the Royal Astronomical Society, 2014, 438, 2499-2507.	4.4	81
38	Numerical resolution effects on simulations of massive black hole seeds. Monthly Notices of the Royal Astronomical Society, 2014, 439, 1160-1175.	4.4	68
39	Neutrino masses and cosmological parameters from a Euclid-like survey: Markov Chain Monte Carlo forecasts including theoretical errors. Journal of Cosmology and Astroparticle Physics, 2013, 2013, 026-026.	5.4	119
40	Extended and filamentary Ly α emission from the formation of a protogalactic halo at $z = 2.63$. Monthly Notices of the Royal Astronomical Society, 2013, 429, 429-443.	4.4	19
41	A $z = 3.045$ Ly α emitting halo hosting a QSO and a possible candidate for AGN-triggered star formation. Monthly Notices of the Royal Astronomical Society: Letters, 2013, 431, L68-L72.	3.3	21
42	On the rapid demise of Ly α emitters at redshift $z \gtrsim 7$ due to the increasing incidence of optically thick absorption systems. Monthly Notices of the Royal Astronomical Society, 2013, 429, 1695-1704.	4.4	96
43	Warm dark matter as a solution to the small scale crisis: New constraints from high redshift Lyman- α forest data. Physical Review D, 2013, 88, .	4.7	572
44	Detection of dark galaxies and circum-galactic filaments fluorescently illuminated by a quasar at $z = 2.4$. Monthly Notices of the Royal Astronomical Society, 2012, 425, 1992-2014.	4.4	109
45	Improved measurements of the intergalactic medium temperature around quasars: possible evidence for the initial stages of He reionization at $z \approx 6$. Monthly Notices of the Royal Astronomical Society, 2012, 419, 2880-2892.	4.4	98
46	Massive neutrinos and the non-linear matter power spectrum. Monthly Notices of the Royal Astronomical Society, 2012, 420, 2551-2561.	4.4	263
47	Faint resonantly scattered Ly α emission from the absorption troughs of damped Ly α systems at $z \approx 3$. Monthly Notices of the Royal Astronomical Society: Letters, 2011, 412, L55-L57.	3.3	16
48	Detection of extended He reionization in the temperature evolution of the intergalactic medium.... Monthly Notices of the Royal Astronomical Society, 2011, 410, 1096-1112.	4.4	267
49	Measurements of the ultraviolet background at $4.6 < z < 6.4$ using the quasar proximity effect.... Monthly Notices of the Royal Astronomical Society, 2011, 412, 2543-2562.	4.4	161
50	Filamentary infall of cold gas and escape of Ly α and hydrogen ionizing radiation from an interacting high-redshift galaxy.... Monthly Notices of the Royal Astronomical Society, 2011, 418, 1115-1126.	4.4	56
51	A first direct measurement of the intergalactic medium temperature around a quasar at $z = 6$. Monthly Notices of the Royal Astronomical Society, 2010, 406, 612-625.	4.4	67
52	The effect of neutrinos on the matter distribution as probed by the intergalactic medium. Journal of Cosmology and Astroparticle Physics, 2010, 2010, 015-015.	5.4	179
53	Inside-out or outside-in: the topology of reionization in the photon-starved regime suggested by Ly α forest data. Monthly Notices of the Royal Astronomical Society, 2009, 394, 960-977.	4.4	154
54	Cosmological and astrophysical constraints from the Lyman α forest flux probability distribution function. Monthly Notices of the Royal Astronomical Society: Letters, 2009, 399, L39-L43.	3.3	78

#	ARTICLE	IF	CITATIONS
55	Growing Supermassive Black Holes in Cosmological Simulations of Structure Formation. Proceedings of the International Astronomical Union, 2009, 5, 445-450.	0.0	0
56	How Cold Is Cold Dark Matter? Small-Scales Constraints from the Flux Power Spectrum of the High-Redshift Lyman- α Forest. Physical Review Letters, 2008, 100, 041304.	7.8	174
57	The observed ionization rate of the intergalactic medium and the ionizing emissivity at $z \gtrsim 5$: evidence for a photon-starved and extended epoch of reionization. Monthly Notices of the Royal Astronomical Society, 2007, 382, 325-341.	4.4	306
58	A closer look at using quasar near-zones as a probe of neutral hydrogen in the intergalactic medium. Monthly Notices of the Royal Astronomical Society: Letters, 2007, 381, L35-L39.	3.3	39
59	Cosmological and astrophysical parameters from the Sloan Digital Sky Survey flux power spectrum and hydrodynamical simulations of the Lyman α forest. Monthly Notices of the Royal Astronomical Society, 2006, 365, 231-244.	4.4	152
60	Testing the accuracy of the hydrodynamic particle-mesh approximation in numerical simulations of the Lyman α forest. Monthly Notices of the Royal Astronomical Society, 2006, 367, 1655-1665.	4.4	28
61	Can Sterile Neutrinos Be Ruled Out as Warm Dark Matter Candidates?. Physical Review Letters, 2006, 97, 071301.	7.8	193
62	The connection between the formation of galaxies and that of their central supermassive black holes. Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences, 2005, 363, 705-713.	3.4	0
63	Expansion and Collapse in the Cosmic Web. Astrophysical Journal, 2005, 632, 58-80.	4.5	33
64	Constraints on the meta-galactic hydrogen ionisation rate from the Lyman- α forest opacity. Proceedings of the International Astronomical Union, 2005, 1, 219-224.	0.0	1
65	The Lyman α forest opacity and the metagalactic hydrogen ionization rate at $z \sim 2-4$. Monthly Notices of the Royal Astronomical Society, 2005, 357, 1178-1188.	4.4	176
66	Constraining warm dark matter candidates including sterile neutrinos and light gravitinos with WMAP and the Lyman- α forest. Physical Review D, 2005, 71, .	4.7	671
67	Pixel correlation searches for O VI in the Lyman α forest and the volume filling factor of metals in the intergalactic medium at $z \sim 2-3.5$. Monthly Notices of the Royal Astronomical Society, 2004, 347, 985-993.	4.4	32
68	Galactic winds and the Ly α forest. Monthly Notices of the Royal Astronomical Society, 2004, 350, 879-892.	4.4	29
69	Constraints on the primordial power spectrum from high-resolution Lyman α forest spectra and WMAP. Monthly Notices of the Royal Astronomical Society, 2004, 355, L23-L28.	4.4	58
70	Inferring the dark matter power spectrum from the Lyman α forest in high-resolution QSO absorption spectra. Monthly Notices of the Royal Astronomical Society, 2004, 354, 684-694.	4.4	254
71	The Asiago-ESO/RASS QSO Survey. III. Clustering Analysis and Theoretical Interpretation. Astronomical Journal, 2004, 127, 592-605.	4.7	39
72	Hierarchical build-up of galactic bulges and the merging rate of supermassive binary black holes. Classical and Quantum Gravity, 2003, 20, S31-S36.	4.0	19
