Helen J Chenery

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/11992934/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Language disorders in dementia of the Alzheimer type. Brain and Language, 1987, 31, 122-137.	1.6	188
2	Language impairment in Parkinson's disease. Aphasiology, 1998, 12, 193-206.	2.2	179
3	Brain activity during automatic semantic priming revealed by event-related functional magnetic resonance imaging. Neurolmage, 2003, 20, 302-310.	4.2	112
4	Perceptual speech characteristics of dysarthric speakers following severe closed head injury. Brain Injury, 1994, 8, 101-124.	1.2	109
5	Multiple Sclerosis: Associated Speech and Language Disorders. Australian Journal of Human Communication Disorders, 1987, 15, 15-35.	0.2	94
6	Semantic abilities in dementia of the Alzheimer type. Brain and Language, 1989, 36, 314-324.	1.6	80
7	Complex language functions and subcortical mechanisms: Evidence from Huntington's disease and patients with nonâ€thalamic subcortical lesions. International Journal of Language and Communication Disorders, 2002, 37, 459-474.	1.5	66
8	Semantic and affective priming as a function of stimulation of the subthalamic nucleus in Parkinson's disease. Brain, 2007, 130, 1395-1407.	7.6	64
9	Memory and communication support in dementia: research-based strategies for caregivers. International Psychogeriatrics, 2011, 23, 256-263.	1.0	59
10	Memory and communication support strategies in dementia: Effect of a training program for informal caregivers. International Psychogeriatrics, 2012, 24, 1927-1942.	1.0	58
11	Semantic Priming in Parkinsons Disease: Evidence for Delayed Spreading Activation. Journal of Clinical and Experimental Neuropsychology, 2001, 23, 502-519.	1.3	57
12	Respiratory Function in Parkinson's Subjects Exhibiting a Perceptible Speech Deficit. The Journal of Speech and Hearing Disorders, 1989, 54, 610-626.	1.3	54
13	Evaluation of a caregiver education program to support memory and communication in dementia: A controlled pretest–posttest study with nursing home staff. International Journal of Nursing Studies, 2011, 48, 1436-1444.	5.6	52
14	Summation of semantic priming and complex sentence comprehension in Parkinson's disease. Cognitive Brain Research, 2005, 25, 78-89.	3.0	50
15	Dopamine and semantic activation: An investigation of masked direct and indirect priming. Journal of the International Neuropsychological Society, 2004, 10, 15-25.	1.8	48
16	Hemispheric Contributions to Lexical Ambiguity Resolution: Evidence from Individuals with Complex Language Impairment Following Left-Hemisphere Lesions. Brain and Language, 2002, 81, 131-143.	1.6	44
17	Understanding Ambiguous Words in Biased Sentences: Evidence of Transient Contextual Effects in Individuals with Nonthalamic Subcortical Lesions and Parkinson's Disease* *A portion of the preliminary data from this manuscript was presented at the Academy of Aphasia, 37th Annual Meeting, Venice. Italy. October 25, 1999 Cortex. 2000. 36. 601-622.	2.4	43
18	A comparison of picture description abilities in individuals with vascular subcortical lesions and Huntington's Disease. Journal of Communication Disorders, 2006, 39, 62-77.	1.5	42

HELEN J CHENERY

#	Article	IF	CITATIONS
19	Lexical-semantic inhibitory mechanisms in Parkinson's disease as a function of subthalamic stimulation. Neuropsychologia, 2007, 45, 3167-3177.	1.6	40
20	Semantic activation in Parkinson's disease patients on and off levodopa. Cortex, 2009, 45, 950-959.	2.4	40
21	Evaluating the MESSAGE Communication Strategies in Dementia training for use with communityâ€based aged care staff working with people with dementia: a controlled pretest–postâ€ŧest study. Journal of Clinical Nursing, 2016, 25, 1145-1155.	3.0	40
22	Discourse Priming of Homophones in Individuals With Dominant Nonthalamic Subcortical Lesions, Cortical Lesions and Parkinsons Disease. Journal of Clinical and Experimental Neuropsychology, 2001, 23, 538-556.	1.3	39
23	Impaired semantic inhibition during lexical ambiguity repetition in Parkinson's disease. Cortex, 2009, 45, 943-949.	2.4	39
24	Processing lexical ambiguities in word triplets: Evidence of lexical–semantic deficits following dominant nonthalamic subcortical lesions Neuropsychology, 2000, 14, 379-390.	1.3	37
25	Maintaining and updating semantic context in schizophrenia: an investigation of the effects of multiple remote primes. Psychiatry Research, 2004, 126, 241-252.	3.3	35
26	Semantic Priming in Alzheimer's Dementia: Evidence for Dissociation of Automatic and Attentional Processes. Brain and Language, 2001, 76, 130-144.	1.6	34
27	The speed of lexical activation is altered in Parkinson's disease. Journal of Clinical and Experimental Neuropsychology, 2007, 29, 73-85.	1.3	34
28	An investigation of confrontation naming performance in Alzheimer's dementia as a function of disease severity. Aphasiology, 1996, 10, 423-441.	2.2	33
29	The influence of dopamine on semantic activation in Parkinson's disease: Evidence from a multipriming task Neuropsychology, 2006, 20, 299-306.	1.3	31
30	Dexamphetamine boosts naming treatment effects in chronic aphasia. Journal of the International Neuropsychological Society, 2007, 13, 972-979.	1.8	30
31	The basal ganglia circuits, dopamine, and ambiguous word processing: A neurobiological account of priming studies in Parkinson's disease. Journal of the International Neuropsychological Society, 2008, 14, 351-364.	1.8	29
32	Visualising conversations between care home staff and residents with dementia. Ageing and Society, 2015, 35, 270-297.	1.7	29
33	Self-paced reading and sentence comprehension in Parkinson's disease. Journal of Neurolinguistics, 2006, 19, 239-252.	1.1	27
34	Studies in Parkinson's Disease: I. Perceptual Speech Analyses. Australian Journal of Human Communication Disorders, 1988, 16, 17-29.	0.2	23
35	Perceptual Analysis of the Speech in Ataxic Dysarthria. Australian Journal of Human Communication Disorders, 1990, 18, 19-28.	0.2	20
36	Semantic priming in Alzheimer's dementia. Aphasiology, 1996, 10, 1-20.	2.2	20

HELEN J CHENERY

#	Article	IF	CITATIONS
37	The explicit learning of new names for known objects is improved by dexamphetamine. Brain and Language, 2008, 104, 254-261.	1.6	20
38	Respiratory Kinematics in Speakers with Cerebellar Disease. Journal of Speech, Language, and Hearing Research, 1991, 34, 768-780.	1.6	18
39	Acute nicotine enhances strategy-based semantic processing in Parkinson's disease. International Journal of Neuropsychopharmacology, 2011, 14, 877-885.	2.1	18
40	Alzheimer's disease is associated with distinctive semantic feature loss. Neuropsychologia, 2013, 51, 2016-2025.	1.6	18
41	Lexical-semantic representation in bilingual aphasia: Findings from semantic priming and cognate repetition priming. Aphasiology, 2013, 27, 1302-1321.	2.2	15
42	The Perceptual Speech Characteristics of Persons with Pseudobulbar Palsy. Australian Journal of Human Communication Disorders, 1992, 20, 21-30.	0.2	14
43	Decreased semantic competitive inhibition in Parkinson's disease: Evidence from an investigation of word search performance. International Journal of Speech-Language Pathology, 2010, 12, 437-445.	1.2	14
44	The Influence of Dopamine on Automatic and Controlled Semantic Activation in Parkinson's Disease. Parkinson's Disease, 2011, 2011, 1-9.	1.1	12
45	An Automated Approach to Examining Conversational Dynamics between People with Dementia and Their Carers. PLoS ONE, 2015, 10, e0144327.	2.5	12
46	Disturbed Respiratory and Prosodic Function in Parkinson's Disease: A Perceptual and Instrumental Analysis. Australian Journal of Human Communication Disorders, 1990, 18, 83-97.	0.2	10
47	Abnormal patterns of speech breathing in dysarthric speakers following severe closed head injury. Brain Injury, 1993, 7, 295-308.	1.2	10
48	Transdermal nicotine modulates strategy-based attentional semantic processing in non-smokers. International Journal of Neuropsychopharmacology, 2008, 11, 389-99.	2.1	10
49	Bilingualism and aging: Reversal of the cognate advantage in older bilingual adults. Applied Psycholinguistics, 2009, 30, 531-554.	1.1	9
50	Hemispheric contributions to semantic activation: A divided visual field and event-related potential investigation of time-course. Brain Research, 2009, 1284, 125-144.	2.2	7
51	Strategy-based semantic priming in Alzheimer's dementia. Aphasiology, 2000, 14, 949-965.	2.2	6
52	Morphosyntactic and syntactic priming: an investigation of underlying processing mechanisms and the effects of Parkinson's disease. Journal of Neurolinguistics, 2005, 18, 1-28.	1.1	6
53	Subthalamic stimulation affects homophone meaning generation in Parkinson's disease. Journal of the International Neuropsychological Society, 2008, 14, 890-894.	1.8	6
54	Toward the Development of SMART Communication Technology: Automating the Analysis of Communicative Trouble and Repair in Dementia. Innovation in Aging, 2018, 2, igy034.	0.1	6

HELEN J CHENERY

#	Article	IF	CITATIONS
55	A Spirometric and Kinematic Analysis of Respiratory Function in Pseudobulbar Palsy. Australian Journal of Human Communication Disorders, 1989, 17, 21-35.	0.2	5
56	A dual task priming investigation of right hemisphere inhibition for people with left hemisphere lesions. Behavioral and Brain Functions, 2012, 8, 14.	3.3	5
57	Nicotine effects on general semantic priming in Parkinson's disease Experimental and Clinical Psychopharmacology, 2011, 19, 215-223.	1.8	4
58	Lexical Decision in Parkinson's Disease: A Comment on Spicer, Brown, and Gorell (1994), and McDonald, Brown, and Gorell (1996). Journal of Clinical and Experimental Neuropsychology, 1999, 21, 289-300.	1.3	3
59	Semantic Feature Disturbance in Alzheimer Disease: Evidence from an Object Decision Task. Cognitive and Behavioral Neurology, 2017, 30, 159-171.	0.9	3
60	Functional Communicative Abilities in Dementia of the Alzheimer Type. Australian Journal of Human Communication Disorders, 1988, 16, 11-21.	0.2	1
61	The Progressive Decline of Language Abilities in Dementia of the Alzheimer's Type: A Description of Three Cases. Australian Journal of Human Communication Disorders, 1990, 18, 99-107.	0.2	1
62	Interdisciplinary Themes in Language and Speech. Journal of Psycholinguistic Research, 2006, 35, 1-3.	1.3	1
63	Nicotine does not enhance basic semantic priming. Psychopharmacology, 2010, 211, 259-265.	3.1	1

64 The Assessment of Speech and Language Disorders. , 1997, , 211-223.
