#	ARTICLE	IF	CITATIONS
1	Assessment of systemic physiological perturbations from dental enamel hypoplasias and associated histological structures. <i>American Journal of Physical Anthropology</i> , 1990, 33, 59-110.	2.1	555
2	Biocultural perspectives on stress in prehistoric, historical, and contemporary population research. <i>American Journal of Physical Anthropology</i> , 1988, 31, 169-202.	2.1	234
3	Factors affecting the distribution of enamel hypoplasias within the human permanent dentition. <i>American Journal of Physical Anthropology</i> , 1985, 68, 479-493.	2.1	194
4	Enamel hypoplasia and early mortality: Bioarcheological support for the Barker hypothesis. <i>Evolutionary Anthropology</i> , 2009, 18, 261-271.	3.4	161
5	Nutritional Inference from Paleopathology. , 1982, , 395-474.		153
6	The chronological distribution of enamel hypoplasias from prehistoric dickson mounds populations. <i>American Journal of Physical Anthropology</i> , 1984, 65, 259-266.	2.1	140
7	Prevalence and age at development of enamel hypoplasias in Mexican children. <i>American Journal of Physical Anthropology</i> , 1987, 72, 7-19.	2.1	132
8	Reconstructing Health Profiles from Skeletal Remains. , 2002, , 11-60.		126
9	Application of laser ablation-inductively coupled plasma-mass spectrometry (LA-ICP-MS) to investigate trace metal spatial distributions in human tooth enamel and dentine growth layers and pulp. <i>Analytical and Bioanalytical Chemistry</i> , 2004, 378, 1608-1615.	3.7	123
10	Infant and childhood morbidity and mortality risks in archaeological populations. <i>World Archaeology</i> , 1989, 21, 225-243.	1.1	118
11	Childhood Stress and Decreased Longevity in a Prehistoric Population. <i>American Anthropologist</i> , 1988, 90, 936-944.	1.4	101
12	Bioarcheology has a "health" problem: Conceptualizing "stress" and "health" in bioarcheological research. <i>American Journal of Physical Anthropology</i> , 2014, 155, 186-191.	2.1	92
13	Response of bone and enamel formation to nutritional supplementation and morbidity among malnourished Guatemalan children. <i>American Journal of Physical Anthropology</i> , 1993, 92, 37-51.	2.1	86
14	Variation in elemental intensities among teeth and between pre- and postnatal regions of enamel. <i>American Journal of Physical Anthropology</i> , 2005, 128, 878-888.	2.1	72
15	Bringing Culture into Human Biology and Biology Back into Anthropology. <i>American Anthropologist</i> , 2013, 115, 359-373.	1.4	60
16	Inductively coupled plasma-mass (ICP-MS) and atomic emission spectrometry (ICP-AES): Versatile analytical techniques to identify the archived elemental information in human teeth. <i>Microchemical Journal</i> , 2005, 81, 201-208.	4.5	49
17	Changes in stature, weight, and nutritional status with tourism-based economic development in the Yucatan. <i>Economics and Human Biology</i> , 2010, 8, 153-158.	1.7	33
18	Bioimaging of trace metals in ancient Chilean mummies and contemporary Egyptian teeth by laser ablation-inductively coupled plasma-mass spectrometry (LA-ICP-MS). <i>Microchemical Journal</i> , 2013, 106, 340-346.	4.5	29

#	ARTICLE	IF	CITATIONS
19	Maternal diets, nutritional status, and zinc in contemporary Mexican infants' teeth: Implications for reconstructing paleodiets. <i>American Journal of Physical Anthropology</i> , 2009, 140, 399-409.	2.1	27
20	Tooth Rings: Dental Enamel as a Chronological Biomonitor of Elemental Absorption from Pregnancy to Adolescence. <i>Journal of Children S Health</i> , 2003, 1, 203-214.	0.3	9
21	A Critical Biocultural Perspective on Tourism and the Nutrition Transition in the Yucatan. , 2020, , 97-120.		5
22	Paleoepidemiological inference and neanderthal dental enamel hypoplasias: A reply to neiburger. <i>American Journal of Physical Anthropology</i> , 1991, 85, 461-462.	2.1	4
23	Toward Deeper Biocultural Integration: A Response to James Calcagno. <i>American Anthropologist</i> , 2014, 116, 406-407.	1.4	4
