#	Article	IF	CITATIONS
1	Cerebellar contribution to emotional body language perception: a TMS study. Social Cognitive and Affective Neuroscience, 2022, 17, 81-90.	3.0	29
2	Distinct cerebellar regions for body motion discrimination. Social Cognitive and Affective Neuroscience, 2022, 17, 72-80.	3.0	25
3	Space at home and psychological distress during the Covid-19 lockdown in Italy. Journal of Environmental Psychology, 2022, 79, 101747.	5.1	17
4	The chronometry of symmetry detection in the lateral occipital (LO) cortex. Neuropsychologia, 2022, 167, 108160.	1.6	3
5	Exploring the Effects of Brain Stimulation on Musical Taste: tDCS on the Left Dorso-Lateral Prefrontal Cortex—A Null Result. Brain Sciences, 2022, 12, 467.	2.3	1
6	How Untidiness Moves the Motor System. Perceptual and Motor Skills, 2022, 129, 399-414.	1.3	0
7	Action and emotion perception in Parkinson's disease: A neuroimaging meta-analysis. NeuroImage: Clinical, 2022, 35, 103031.	2.7	2
8	Social cognition in the blind brain: A coordinateâ€based metaâ€analysis. Human Brain Mapping, 2021, 42, 1243-1256.	3.6	11
9	TMS over the posterior cerebellum modulates motor cortical excitability in response to facial emotional expressions. European Journal of Neuroscience, 2021, 53, 1029-1039.	2.6	18
10	How social is the cerebellum? Exploring the effects of cerebellar transcranial direct current stimulation on the prediction of social and physical events. Brain Structure and Function, 2021, 226, 671-684.	2.3	26
11	Nonlinear interaction between stimulation intensity and initial brain state: Evidence for the facilitatory/suppressive range model of online TMS effects. Neuroscience Letters, 2021, 742, 135538.	2.1	9
12	Social Distance during the COVID-19 Pandemic Reflects Perceived Rather Than Actual Risk. International Journal of Environmental Research and Public Health, 2021, 18, 5504.	2.6	29
13	Overlapping and specific neural correlates for empathizing, affective mentalizing, and cognitive mentalizing: A coordinateâ€based metaâ€analytic study. Human Brain Mapping, 2021, 42, 4777-4804.	3.6	45
14	Medial prefrontal cortex involvement in aesthetic appreciation of paintings: a tDCS study. Cognitive Processing, 2020, 21, 65-76.	1.4	8
15	Different neural representations for detection of symmetry in dot-patterns and in faces: A state-dependent TMS study. Neuropsychologia, 2020, 138, 107333.	1.6	2
16	Neural correlates of visual aesthetic appreciation: insights from non-invasive brain stimulation. Experimental Brain Research, 2020, 238, 1-16.	1.5	11
17	The Effect of Blindness on Spatial Asymmetries. Brain Sciences, 2020, 10, 662.	2.3	5
18	Viewing of figurative paintings affects pseudoneglect as measured by line bisection. Attention, Perception, and Psychophysics, 2020, 82, 3795-3803.	1.3	2

#	Article	IF	CITATIONS
19	The Role of Binocular Vision in Driving Pseudoneglect in Visual and Haptic Bisection: Evidence From Strabismic and Monocular Blind Individuals. Multisensory Research, 2020, 33, 549-567.	1.1	3
20	Understanding diaschisis models of attention dysfunction with rTMS. Scientific Reports, 2020, 10, 14890.	3.3	2
21	Modulation of corticospinal excitability during paintings viewing: A TMS study. Neuropsychologia, 2020, 149, 107664.	1.6	6
22	The left posterior cerebellum is involved in orienting attention along the mental number line: An online-TMS study. Neuropsychologia, 2020, 143, 107497.	1.6	10
23	Consensus Paper: Cerebellum and Social Cognition. Cerebellum, 2020, 19, 833-868.	2.5	205
24	Instrumental expertise and musical timbre modulate the spatial representation of pitch. Quarterly Journal of Experimental Psychology, 2020, 73, 1162-1172.	1.1	7
25	A walk on the dark side: TMS over the right inferior frontal gyrus (rIFG) disrupts behavioral responses to infant stimuli. Social Neuroscience, 2019, 14, 697-704.	1.3	5
26	Noninvasive Brain Stimulation: An Overview of Available Approaches for Research in Neuroaesthetics. Empirical Studies of the Arts, 2019, 37, 153-171.	1.7	5
27	Differences in Emotion Recognition From Body and Face Cues Between Deaf and Hearing Individuals. Multisensory Research, 2019, 32, 499-519.	1.1	9
28	The Spatial Musical Association of Response Codes does not depend on a normal visual experience: A study with early blind individuals. Attention, Perception, and Psychophysics, 2018, 80, 813-821.	1.3	2
29	Early blindness is associated with increased volume of the uncinate fasciculus. European Journal of Neuroscience, 2018, 47, 427-432.	2.6	6
30	Spatial biases in deaf, blind, and deafblind individuals as revealed by a haptic line bisection task. Quarterly Journal of Experimental Psychology, 2018, 71, 2325-2333.	1.1	6
31	Hemispheric asymmetry of liking for representational and abstract paintings. Psychonomic Bulletin and Review, 2018, 25, 1934-1942.	2.8	8
32	The role of the cerebellum in explicit and incidental processing of facial emotional expressions: A study with transcranial magnetic stimulation. NeuroImage, 2018, 169, 256-264.	4.2	59
33	On the Mechanisms of Transcranial Magnetic Stimulation (TMS): How Brain State and Baseline Performance Level Determine Behavioral Effects of TMS. Frontiers in Psychology, 2018, 9, 741.	2.1	40
34	TMS over right OFA affects individuation of faces but not of exemplars of objects. Neuropsychologia, 2018, 117, 364-370.	1.6	5
35	The spatial representation of number, time, and serial order following sensory deprivation: A systematic review. Neuroscience and Biobehavioral Reviews, 2018, 90, 371-380.	6.1	13
36	TMS over the superior temporal sulcus affects expressivity evaluation of portraits. Cognitive, Affective and Behavioral Neuroscience, 2018, 18, 1188-1197.	2.0	21

#	Article	IF	CITATIONS
37	The ego-moving metaphor of time relies on visual experience: No representation of time along the sagittal space in the blind Journal of Experimental Psychology: General, 2018, 147, 444-450.	2.1	29
38	A TMS study on the contribution of visual area V5 to the perception of implied motion in art and its appreciation. Cognitive Neuroscience, 2017, 8, 59-68.	1.4	37
39	Dorsomedial prefrontal cortex and cerebellar contribution to inâ€group attitudes: a transcranial magnetic stimulation study. European Journal of Neuroscience, 2017, 45, 932-939.	2.6	32
40	The neural basis of mirror symmetry detection: a review. Journal of Cognitive Psychology, 2017, 29, 259-268.	0.9	30
41	The dorsomedial prefrontal cortex mediates the interaction between moral and aesthetic valuation: a TMS study on the <i>beauty-is-good</i> stereotype. Social Cognitive and Affective Neuroscience, 2017, 12, 707-717.	3.0	38
42	Phonological facilitation in picture naming: When and where? A tDCS study. Neuroscience, 2017, 352, 106-121.	2.3	20
43	Common framework for "virtual lesion―and state-dependent TMS: The facilitatory/suppressive range model of online TMS effects on behavior. Brain and Cognition, 2017, 119, 32-38.	1.8	86
44	Initial activation state, stimulation intensity and timing of stimulation interact in producing behavioral effects of TMS. Neuroscience, 2017, 363, 134-141.	2.3	33
45	Not all visual symmetry is equal: Partially distinct neural bases for vertical and horizontal symmetry. Neuropsychologia, 2017, 104, 126-132.	1.6	11
46	An Exploratory TMS Study on Prefrontal Lateralization in Valence Categorization of Facial Expressions. Experimental Psychology, 2017, 64, 282-289.	0.7	10
47	Emotion processing in early blind and sighted individuals Neuropsychology, 2017, 31, 516-524.	1.3	13
48	Can music be figurative? Exploring the possibility of crossmodal similarities between music and visual arts. Psihologija, 2017, 50, 285-306.	0.6	9
49	Interfering with activity in the dorsomedial prefrontal cortex via TMS affects social impressions updating. Cognitive, Affective and Behavioral Neuroscience, 2016, 16, 626-634.	2.0	23
50	Congenital prosopagnosia is associated with a genetic variation in the oxytocin receptor (OXTR) gene: An exploratory study. Neuroscience, 2016, 339, 162-173.	2.3	24
51	The dorsomedial prefrontal cortex plays a causal role in mediating in-group advantage in emotion recognition: A TMS study. Neuropsychologia, 2016, 93, 312-317.	1.6	25
52	Grasping the sound: Auditory pitch influences size processing in motor planning Journal of Experimental Psychology: Human Perception and Performance, 2016, 42, 11-22.	0.9	9
53	tDCS Effects on Verbal Fluency: A Response to Vannorsdall et al (2016). Cognitive and Behavioral Neurology, 2016, 29, 117-121.	0.9	10
54	Investigating the Causal Role of rOFA in Holistic Detection of Mooney Faces and Objects: An fMRI-guided TMS Study. Brain Stimulation, 2016, 9, 594-600.	1.6	26

#	Article	IF	CITATIONS
55	A TMS investigation on the role of the cerebellum in pitch and timbre discrimination. Cerebellum and Ataxias, 2016, 3, 6.	1.9	13
56	The Dorsomedial Prefrontal Cortex Plays a Causal Role in Integrating Social Impressions from Faces and Verbal Descriptions. Cerebral Cortex, 2016, 26, 156-165.	2.9	81
57	Deaf Individuals Show a Leftward Bias in Numerical Bisection. Perception, 2016, 45, 156-164.	1.2	5
58	The role of the occipital face area in holistic processing involved in face detection and discrimination: A tDCS study Neuropsychology, 2015, 29, 409-416.	1.3	28
59	Mental Imagery: Visual Cognition. , 2015, , 220-227.		4
60	The role of the lateral occipital cortex in aesthetic appreciation of representational and abstract paintings: A TMS study. Brain and Cognition, 2015, 95, 44-53.	1.8	44
61	Guess who? Investigating the proper name processing network by means of tDCS. Neuropsychologia, 2015, 66, 267-278.	1.6	29
62	I find you more attractive … after (prefrontal cortex) stimulation. Neuropsychologia, 2015, 72, 87-93.	1.6	21
63	The Causal Role of the Occipital Face Area (OFA) and Lateral Occipital (LO) Cortex in Symmetry Perception. Journal of Neuroscience, 2015, 35, 731-738.	3.6	59
64	The effect of hand movements on numerical bisection judgments in early blind and sighted individuals. Cortex, 2015, 71, 76-84.	2.4	14
65	Neural correlates associated with superior tactile symmetry perception in the early blind. Cortex, 2015, 63, 104-117.	2.4	40
66	The effect of musical expertise on the representation of space. Frontiers in Human Neuroscience, 2014, 8, 250.	2.0	23
67	The world can look better: enhancing beauty experience with brain stimulation. Social Cognitive and Affective Neuroscience, 2014, 9, 1713-1721.	3.0	41
68	The compensatory dynamic of inter-hemispheric interactions in visuospatial attention revealed using rTMS and fMRI. Frontiers in Human Neuroscience, 2014, 8, 226.	2.0	47
69	Symmetry Detection in Visual Impairment: Behavioral Evidence and Neural Correlates. Symmetry, 2014, 6, 427-443.	2.2	16
70	Visual symmetry perception in early onset monocular blindness. Visual Cognition, 2014, 22, 963-974.	1.6	7
71	Happiness takes you right: The effect of emotional stimuli on line bisection. Cognition and Emotion, 2014, 28, 325-344.	2.0	18
72	Phosphene induction by cerebellar transcranial magnetic stimulation. Clinical Neurophysiology, 2014, 125, 2132-2133.	1.5	15

#	Article	IF	CITATIONS
73	Cerebellar vermis plays a causal role in visual motion discrimination. Cortex, 2014, 58, 272-280.	2.4	47

Hemispheric asymmetry in discriminating faces differing for featural or configural (second-order) Tj ETQq0 0 0 rgBT $\frac{10}{2.8}$ Verlock $\frac{10}{17}$ Tf 50 7

75	The causal role of the lateral occipital complex in visual mirror symmetry detection and grouping: An fMRI-guided TMS study. Cortex, 2014, 51, 46-55.	2.4	75
76	Auditory deprivation affects biases of visuospatial attention as measured by line bisection. Experimental Brain Research, 2014, 232, 2767-2773.	1.5	21
77	The role of prefrontal and parietal cortices in esthetic appreciation of representational and abstract art: A TMS study. NeuroImage, 2014, 99, 443-450.	4.2	45
78	State-Dependent Transcranial Magnetic Stimulation (TMS) Protocols. Neuromethods, 2014, , 153-176.	0.3	7
79	Biases in Spatial Bisection Induced by Viewing Male and Female Faces. Experimental Psychology, 2014, 61, 368-377.	0.7	4
80	Temporary Interference over the Posterior Parietal Cortices Disrupts Thermoregulatory Control in Humans. PLoS ONE, 2014, 9, e88209.	2.5	18
81	Strabismic amblyopia affects relational but not featural and Gestalt processing of faces. Vision Research, 2013, 80, 19-30.	1.4	11
82	Processing of featural and configural aspects of faces is lateralized in dorsolateral prefrontal cortex: A TMS study. Neurolmage, 2013, 74, 45-51.	4.2	69
83	The effect of vertical and horizontal symmetry on memory for tactile patterns in late blind individuals. Attention, Perception, and Psychophysics, 2013, 75, 375-382.	1.3	10
84	Ambiguous idiom processing in Parkinson's disease patients. Cognitive Neuropsychology, 2013, 30, 495-506.	1.1	5
85	The effect of deafness and musical training on perception of space. Multisensory Research, 2013, 26, 71.	1.1	0
86	Metacognition of Visual Short-Term Memory: Dissociation between Objective and Subjective Components of VSTM. Frontiers in Psychology, 2013, 4, 62.	2.1	26
87	Different Effects of Numerical Magnitude on Visual and Proprioceptive Reference Frames. Frontiers in Psychology, 2013, 4, 190.	2.1	10
88	Mental Imagery and Blindness. , 2013, , 115-130.		10
89	Listening to White Noise Counteracts Visual and Haptic Pseudoneglect. Perception, 2012, 41, 1395-1398.	1.2	13
90	Cross-adaptation combined with TMS reveals a functional overlap between vision and imagery in the early visual cortex. NeuroImage, 2012, 59, 3015-3020.	4.2	28

#	Article	IF	CITATIONS
91	Listening to numbers affects visual and haptic bisection in healthy individuals and neglect patients. Neuropsychologia, 2012, 50, 913-925.	1.6	22
92	The role of the prefrontal cortex in controlling gender-stereotypical associations: A TMS investigation. Neurolmage, 2011, 56, 1839-1846.	4.2	56
93	The role of the human extrastriate visual cortex in mirror symmetry discrimination: A TMS-adaptation study. Brain and Cognition, 2011, 77, 120-127.	1.8	44
94	Overlapping representations of numerical magnitude and motion direction in the posterior parietal cortex: A TMS-adaptation study. Neuroscience Letters, 2011, 490, 145-149.	2.1	19
95	Transcranial direct current stimulation over Broca's region improves phonemic and semantic fluency in healthy individuals. Neuroscience, 2011, 183, 64-70.	2.3	176
96	Modulation of Visual Cortical Excitability by Working Memory: Effect of Luminance Contrast of Mental Imagery. Frontiers in Psychology, 2011, 2, 29.	2.1	16
97	Blind individuals show pseudoneglect in bisecting numerical intervals. Attention, Perception, and Psychophysics, 2011, 73, 1021-1028.	1.3	23
98	Tapping effects on numerical bisection. Experimental Brain Research, 2011, 208, 21-28.	1.5	17
99	Spatial biases in peripersonal space in sighted and blind individuals revealed by a haptic line bisection paradigm Journal of Experimental Psychology: Human Perception and Performance, 2011, 37, 1110-1121.	0.9	32
100	Blind Vision. , 2011, , .		83
101	Crossmodal interaction between the mental number line and peripersonal haptic space representation in sighted and blind individuals. Attention, Perception, and Psychophysics, 2010, 72, 885-890.	1.3	33
102	Symmetry perception in the blind. Acta Psychologica, 2010, 134, 398-402.	1.5	27
103	The causal role of category-specific neuronal representations in the left ventral premotor cortex (PMv) in semantic processing. NeuroImage, 2010, 49, 2728-2734.	4.2	66
104	Transcranial magnetic stimulation reveals the content of visual short-term memory in the visual cortex. NeuroImage, 2010, 50, 1683-1689.	4.2	57
105	TMS-Adaptation Reveals Abstract Letter Selectivity in the Left Posterior Parietal Cortex. Cerebral Cortex, 2009, 19, 2321-2325.	2.9	43
106	Contrasting early visual cortical activation states causally involved in visual imagery and shortâ€ŧerm memory. European Journal of Neuroscience, 2009, 30, 1393-1400.	2.6	64
107	The mental number line modulates visual cortical excitability. Neuroscience Letters, 2009, 462, 253-256.	2.1	21
108	The middle range of the number line orients attention to the left side of visual space. Cognitive Neuropsychology, 2009, 26, 235-246.	1.1	3

#	Article	IF	CITATIONS
109	The role of the angular gyrus in the modulation of visuospatial attention by the mental number line. NeuroImage, 2009, 44, 563-568.	4.2	61
110	Dissociable neural representations of grammatical gender in Broca's area investigated by the combination of satiation and TMS. NeuroImage, 2009, 47, 700-704.	4.2	16
111	Imagery and spatial processes in blindness and visual impairment. Neuroscience and Biobehavioral Reviews, 2008, 32, 1346-1360.	6.1	206
112	Using stateâ€dependency of transcranial magnetic stimulation (TMS) to investigate letter selectivity in the left posterior parietal cortex: a comparison of TMSâ€priming and TMSâ€adaptation paradigms. European Journal of Neuroscience, 2008, 28, 1924-1929.	2.6	62
113	The Influence of Reduced Visual Acuity on Age-Related Decline in Spatial Working Memory: An Investigation. Aging, Neuropsychology, and Cognition, 2008, 15, 687-702.	1.3	8
114	Time course of the state-dependent effect of transcranial magnetic stimulation in the TMS-adaptation paradigm. Neuroscience Letters, 2008, 443, 82-85.	2.1	39
115	Effects of complete monocular deprivation in visuo-spatial memory. Brain Research Bulletin, 2008, 77, 112-116.	3.0	3
116	Supramodality effects in visual and haptic spatial processes Journal of Experimental Psychology: Learning Memory and Cognition, 2008, 34, 631-642.	0.9	28
117	Baseline Cortical Excitability Determines Whether TMS Disrupts or Facilitates Behavior. Journal of Neurophysiology, 2008, 99, 2725-2730.	1.8	107
118	Monitoring Eye Movements to Investigate the Picture Superiority Effect in Spatial Memory. Perception, 2008, 37, 34-49.	1.2	4
119	Investigating visual motion perception using the transcranial magnetic stimulation-adaptation paradigm. NeuroReport, 2008, 19, 1423-1427.	1.2	41
120	Comparing the Effects of Congenital and Late Visual Impairments on Visuospatial Mental Abilities. Journal of Visual Impairment and Blindness, 2007, 101, 278-295.	0.7	14
121	Effects of late visual impairment on mental representations activated by visual and tactile stimuli. Brain Research, 2007, 1148, 170-176.	2.2	26
122	Gender differences in memory for object and word locations. Quarterly Journal of Experimental Psychology, 2006, 59, 904-919.	1.1	23
123	Why Cyclops could not compete with Ulysses: monocular vision and mental images. NeuroReport, 2006, 17, 723-726.	1.2	13
