#	ARTICLE	IF	CITATIONS
1	Refined instrumental variable methods for identification of LPV Box-Jenkins models. Automatica, 2010, 46, 959-967.	5.0	141
2	Instrumental variable methods for closed-loop system identification. Automatica, 2005, 41, 241-249.	5.0	114
3	An optimal IV technique for identifying continuous-time transfer function model of multiple input systems. Control Engineering Practice, 2007, 15, 471-486.	5.5	84
4	Robust identification of continuous-time models with arbitrary time-delay from irregularly sampled data. Journal of Process Control, 2015, 25, 19-27.	3.3	65
5	Optimal instrumental variable method for closed-loop identification. IET Control Theory and Applications, 2011, 5, 1147-1154.	2.1	58
6	Instrumental variable scheme for closed-loop LPV model identification. Automatica, 2012, 48, 2314-2320.	5.0	48
7	On the relation between a bias-eliminated least-squares (BELS) and an IV estimator in closed-loop identification. Automatica, 2001, 37, 1593-1600.	5.0	46
8	A bias-eliminated least-squares method for continuous-time model identification of closed-loop systems. International Journal of Control, 2000, 73, 38-48.	1.9	45
9	Third-order cumulants based methods for continuous-time errors-in-variables model identification. Automatica, 2008, 44, 647-658.	5.0	37
10	Refined instrumental variable method for Hammerstein-Wiener continuous-time model identification. IET Control Theory and Applications, 2013, 7, 1276-1286.	2.1	35
11	Refined Instrumental Variable Identification of Continuous-time Hybrid Box-Jenkins Models. , 2008, , 91-131.		33
12	Direct identification of continuous-time linear parameter-varying input/output models. IET Control Theory and Applications, 2011, 5, 878-888.	2.1	29
13	LATEST DEVELOPMENTS FOR THE MATLAB CONTSID TOOLBOX. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 714-719.	0.4	25
14	Issues in separable identification of continuous-time models with time-delay. Automatica, 2018, 94, 258-273.	5.0	24
15	Developments for the matlab contsid toolbox. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2003, 36, 969-974.	0.4	23
16	On instrumental variable-based methods for errors-in-variables model identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 426-431.	0.4	23
17	AN OPTIMAL INSTRUMENTAL VARIABLE APPROACH FOR IDENTIFYING HYBRID CONTINUOUS-TIME BOX-JENKINS MODELS. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 225-230.	0.4	22
18	EM-based identification of continuous-time ARMA Models from irregularly sampled data. Automatica, 2017, 77, 293-301.	5.0	22

#	ARTICLE	IF	CITATIONS
19	The CONTSID Toolbox: A Software Support for Data-based Continuous-time Modelling. <i>Advances in Industrial Control</i> , 2008, , 249-290.	0.5	20
20	CONTSID: a Matlab toolbox for standard and advanced identification of black-box continuous-time models. <i>IFAC-PapersOnLine</i> , 2018, 51, 688-693.	0.9	20
21	Refined instrumental variable methods for identification of Hammerstein continuous-time Box-Jenkins models. , 2008, , .		19
22	A REFINED IV METHOD FOR CLOSED-LOOP SYSTEM IDENTIFICATION. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006, 39, 903-908.	0.4	16
23	Robust time-domain output error method for identifying continuous-time systems with time delay. <i>Systems and Control Letters</i> , 2017, 102, 81-92.	2.3	16
24	Instrumental Variable Methods for Closed-loop Continuous-time Model Identification. <i>Advances in Industrial Control</i> , 2008, , 133-160.	0.5	16
25	Subspace based methods for continuous-time model identification of MIMO systems from filtered sampled data. , 2007, , .		15
26	Instrumental variable methods for identifying partial differential equation models. <i>International Journal of Control</i> , 2013, 86, 2325-2335.	1.9	14
27	Survey of analytical IV estimates for errors-in-variables model identification. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2011, 44, 13098-13103.	0.4	13
28	Recursive IV Identification of Continuous-Time Models With Time Delay From Sampled Data. <i>IEEE Transactions on Control Systems Technology</i> , 2020, 28, 1074-1082.	5.2	12
29	Refined instrumental variable methods for identifying hammerstein models operating in closed loop. , 2009, , .		10
30	A Frequency Localizing Basis Function-Based IV Method for Wideband System Identification. <i>IEEE Transactions on Control Systems Technology</i> , 2018, 26, 329-335.	5.2	10
31	Frequency domain identification of continuous-time output-error models with time-delay from relay feedback tests. <i>Automatica</i> , 2018, 98, 180-189.	5.0	10
32	Continuous-time model identification from noisy input/output measurements using fourth-order cumulants. , 2007, , .		9
33	Refined Instrumental Variable methods for closed-loop system identification. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2009, 42, 284-289.	0.4	8
34	Instrumental variable methods for continuous-time model identification in closed-loop. , 2004, , .		7
35	SUBSPACE-BASED OPTIMAL IV METHOD FOR CLOSED-LOOP SYSTEM IDENTIFICATION. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006, 39, 1068-1073.	0.4	7
36	Unifying some higher-order statistic-based methods for errors-in-variables model identification. <i>Automatica</i> , 2009, 45, 1937-1942.	5.0	7

#	ARTICLE	IF	CITATIONS
37	IV methods for closed-loop system identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2003, 36, 513-518.	0.4	6
38	Statistical Analysis of a Third-Order Cumulants Based Algorithm for Discrete-Time Errors-in-Variables Identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 420-425.	0.4	6
39	On the closed loop identification of LPV models using instrumental variables. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2011, 44, 7773-7778.	0.4	6
40	Refined instrumental variable parameter estimation of continuous-time Box-Jenkins models from irregularly sampled data. IET Control Theory and Applications, 2017, 11, 291-300.	2.1	6
41	A Refined Instrumental Variable Method for Hammerstein-Wiener Continuous-Time Model Identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2012, 45, 1061-1066.	0.4	5
42	Frequency-domain instrumental variable based method for wide band system identification. , 2013, , .		5
43	Version 7.0 of the CONTSID toolbox. IFAC-PapersOnLine, 2015, 48, 757-762.	0.9	4
44	An RKHS approach to systematic kernel selection in nonlinear system identification. , 2016, , .		4
45	The impact of smoothness on model class selection in nonlinear system identification: An application of derivatives in the RKHS. , 2016, , .		4
46	Global Sensitivity Analysis for Modeling the Free-Flight Behavior of an Artillery Projectile. AIAA Journal, 2020, 58, 3139-3148.	2.6	4
47	Continuous-time model identification of systems operating in closed-loop. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2003, 36, 405-410.	0.4	3
48	Closed-loop identification of continuous-time systems from non-uniformly sampled data. , 2014, , .		3
49	A live network AS-level traffic characterization. , 2017, , .		3
50	A BAYESIAN APPROACH TO CLOSED-LOOP SYSTEM IDENTIFICATION. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2005, 38, 644-649.	0.4	2
51	Identification of LPV partial differential equation models. , 2013, , .		2
52	Parameter and time-delay identification of continuous-time models from non-uniformly sampled data. , 2014, , .		2
53	In-Orbit Data Driven Identification of Satellite Inertia Matrix. IFAC-PapersOnLine, 2018, 51, 467-472.	0.9	2
54	Parameter estimation of a gyroless micro-satellite from telemetry data. Control Engineering Practice, 2022, 123, 105134.	5.5	2

#	ARTICLE	IF	CITATIONS
55	Refined IV-based method for LPV partial differential equation model identification. , 2014, , .		1
56	An as-level approach to network traffic analysis and modelling. , 2017, , .		1
57	How We Spend Our Time Online: Predicting Network Traffic Using System Identification. IFAC-PapersOnLine, 2017, 50, 14125-14130.	0.9	1
58	The Analysis of Vehicleâ€™s In-Flight Behaviour Using Quasi-LPV and Nonlinear Models. , 2019, , .		1
59	How Statistical Learning Can Help to Estimate the Number of Modes in Switched System Identification?. IFAC-PapersOnLine, 2021, 54, 637-642.	0.9	1
60	Refined Instrumental Variable Methods for Hammerstein Box-Jenkins Models. , 2012, , 27-47.		1
61	Design of Satellite Maneuvers for Inertia Parameter Estimation. IFAC-PapersOnLine, 2020, 53, 14894-14899.	0.9	1
62	Identifying dynamical models of nitrate propagation in agricultural drinking water: how can we help agronomists?. IFAC-PapersOnLine, 2015, 48, 350-355.	0.9	0
63	An RKHS Approach to Controlling Smoothness in Nonparametric LPV-IO Identification. IFAC-PapersOnLine, 2017, 50, 11397-11402.	0.9	0
64	Quasi-LPV modelling of a projectileâ€™s behaviour in flight. IFAC-PapersOnLine, 2018, 51, 1080-1085.	0.9	0
65	Closed-loop system identification via a tailor-made IV method. , 0, , .		0
