#	ARTICLE	IF	CITATIONS
1	Handedness, Sex, Familial Sinistrality Effects on Spatial Tasks. <i>Cortex</i> , 1993, 29, 115-134.	2.4	154
2	Development of the infant's hand preference for visually directed reaching: Preliminary report of a longitudinal study. <i>Infant Mental Health Journal</i> , 1985, 6, 158-174.	1.8	142
3	Within-individual variability in neurocognitive performance: Age- and sex-related differences in children and youths from ages 8 to 21.. <i>Neuropsychology</i> , 2014, 28, 506-518.	1.3	82
4	Left-side infant holding: A test of the hemispheric arousal -attentional hypothesis. <i>Brain and Cognition</i> , 2001, 46, 159-165.	1.8	77
5	Is maternal depression related to side of infant holding?. <i>International Journal of Behavioral Development</i> , 2004, 28, 421-427.	2.4	73
6	A longitudinal study of lateral biases in parents' cradling and holding of infants. <i>Infant Mental Health Journal</i> , 1988, 9, 218-234.	1.8	68
7	Sex differences in visual attention toward infant faces. <i>Evolution and Human Behavior</i> , 2013, 34, 280-287.	2.2	62
8	Symmetrical decorations enhance the attractiveness of faces and abstract designs. <i>Evolution and Human Behavior</i> , 2006, 27, 1-18.	2.2	59
9	Cerebral control for speech in right-handers and left-handers: An analysis of the views of Paul Borca, his contemporaries, and his successors. <i>Brain and Language</i> , 1991, 40, 1-50.	1.6	53
10	Lexicon size and its relation to foot preference in the African Grey parrot (<i>Psittacus erithacus</i>). <i>Neuropsychologia</i> , 1997, 35, 919-926.	1.6	49
11	In fencing, what gives left-handers the edge? Views from the present and the distant past. <i>Laterality</i> , 2010, 15, 15-55.	1.0	44
12	Chapter 8 Cultural Influences on Handedness: Historical and Contemporary Theory and Evidence. <i>Advances in Psychology</i> , 1990, 67, 195-258.	0.1	36
13	Side biases for holding and carrying infants: Reports from the past and possible lessons for today. <i>Laterality</i> , 2010, 15, 56-135.	1.0	35
14	Lateral Cradling Preferences in Men and Women: Results from a Photographic Study. <i>Journal of General Psychology</i> , 1985, 112, 185-189.	2.8	33
15	Task effects in the development of hand preference in 9â€”, 13â€”, and 20â€”monthâ€”old infant girls. <i>Developmental Neuropsychology</i> , 1991, 7, 19-34.	1.4	33
16	Do women's preferences for symmetry change across the menstrual cycle?. <i>Evolution and Human Behavior</i> , 2007, 28, 96-105.	2.2	29
17	Mothersâ€™ and fathersâ€™ lateral biases for holding their newborn infants: A study of images from the World Wide Web. <i>Laterality</i> , 2007, 12, 64-86.	1.0	28
18	Probing the human brain with stimulating electrodes: The story of Roberts Bartholowâ€™s (1874) experiment on Mary Rafferty. <i>Brain and Cognition</i> , 2009, 70, 92-115.	1.8	28

#	ARTICLE	IF	CITATIONS
19	The Intracarotid Amobarbital Procedure: An Historical Perspective. <i>Brain and Cognition</i> , 1997, 33, 18-32.	1.8	23
20	Laterality of Function in the Infant: Historical and Contemporary Trends in Theory and Research Some of the historical material in this chapter first appeared, in different form, as part of a general review of early theories of handedness (Harris, 1980a). Brief, selected accounts also have been presented at the 1980 NATO Advanced Study Institute on Neuropsychology and Cognition, Augusta, Georgia (Harris, 1982), and at the 1980 52nd Annual Meetings of the Midwestern Psychological Association (Harris, 1983). The research described in this chapter was reported at the Annual Meetings of the International Neuropsychology Society, New York, February, 1979, and at the Biennial Meetings of the Society for Research in Child Development, San Francisco, California, March, 1979. P. R. H. was supported, during the conduct of this research, by Predoctoral Traineeship No. 14622 from the National Institute of Mental Health. <i>The research</i> , 1983, , 331-348.		23
21	Spontaneous head positions in infants during the first 9 postnatal months. <i>Infant Mental Health Journal</i> , 1985, 6, 117-125.	1.8	22
23	Lateralized sex differences: substrates and significance. <i>Behavioral and Brain Sciences</i> , 1980, 3, 236-237.	0.7	19
24	Hand preference for visually guided reaching in human infants and adults. <i>Behavioral and Brain Sciences</i> , 1988, 11, 726-727.	0.7	19
25	Motor asymmetries in the human infant: Stepping movements. <i>Infant Mental Health Journal</i> , 1985, 6, 145-157.	1.8	18
26	The relationship between cerebral lateralization and cognitive ability: Suggested criteria for empirical tests. <i>Brain and Cognition</i> , 1988, 8, 275-290.	1.8	18
27	Why are infants held on the left? A test of the attention hypothesis with a doll, a book, and a bag. <i>Laterality</i> , 2010, 15, 548-571.	1.0	18
28	Hand Preference for Visually-Guided Reaching in Human Infants and Adults. <i>Recent Research in Psychology</i> , 1993, , 285-305.	0.5	18
29	What to do About Your Child's Handedness? Advice from Five Eighteenth-century Authors, and Some Questions for Today. <i>Laterality</i> , 2003, 8, 099-120.	1.0	16
30	Postural Orientation in Human Infants: Changes from Birth to Three Months Parts of this report were presented at the First Biennial Meetings of the Merrill Palmer Society, Detroit, Michigan, May, 1982.. , 1983, , 285-305.		14
31	Relationships among cognitive complexity, sex, and spatial task performance in college students. <i>British Journal of Psychology</i> , 1981, 72, 249-256.	2.3	13
32	On the state-dependent nature of infant head orientation. <i>Infant Mental Health Journal</i> , 1985, 6, 137-144.	1.8	12
33	Hand preference in gestures and signs in the deaf and hearing: Some notes on early evidence and theory. <i>Brain and Cognition</i> , 1989, 10, 189-219.	1.8	12
34	On the Evolution of Handedness: A Speculative Analysis of Darwin's Views and a Review of Early Studies of Handedness in "the Nearest Allies of Man". <i>Brain and Language</i> , 2000, 73, 132-188.	1.6	10
35	Neurobehavioral reorganization in early infancy: Patterns of head orientation following lateral and midline holds. <i>Infant Mental Health Journal</i> , 1985, 6, 126-136.	1.8	9
36	Adults' preferences for side-of-hold as portrayed in paintings of the Madonna and Child. <i>Laterality</i> , 2009, 14, 590-617.	1.0	8

#	ARTICLE	IF	CITATIONS
37	Are only infants held more often on the left? If so, why? Testing the attention-emotion hypothesis with an infant, a vase, and two chimeric tests, one "emotional," one not. <i>Laterality</i> , 2019, 24, 65-97.	1.0	8
38	Handedness in Apes and Monkeys: Some Views From the Past. <i>Recent Research in Psychology</i> , 1993, , 1-41.	0.5	8
39	Left-Handers' Sensitivity to Hand Usage: Theoretical Note on Saliency in the Self-Concept. <i>Perceptual and Motor Skills</i> , 1978, 47, 833-834.	1.3	7
40	Implications of differences between perceptual systems for the analysis of hemispheric specialization. <i>Behavioral and Brain Sciences</i> , 1981, 4, 71-72.	0.7	6
41	The ambidextral culture society and the "duality of mind". <i>Behavioral and Brain Sciences</i> , 1985, 8, 639-640.	0.7	6
42	Chapter 11 Handedness, Sex, and Spatial Ability. <i>Advances in Psychology</i> , 1990, 67, 319-341.	0.1	6
43	In Fencing, Are Left-Handers Trouble for Right-Handers? What Fencing Masters Said in the Past and What Scientists Say Today. , 2016, , 31-64.		5
44	Louis Pierre Gratiolet, Paul Broca, et al. on the question of a maturational left"right gradient: Some forerunners of current-day models. <i>Behavioral and Brain Sciences</i> , 1984, 7, 730-731.	0.7	4
45	Where in the World am I? Sex and Handedness Differences in Knowledge of Geography. <i>Perceptual and Motor Skills</i> , 1996, 82, 1379-1385.	1.3	3
46	Are spatial abilities poorer in "forced" left-handers? If so, why?. <i>Developmental Neuropsychology</i> , 1990, 6, 57-70.	1.4	2
47	Cerebral Anesthetization for Localization of Speech: The Contribution of W. James Gardner. <i>Brain and Language</i> , 1997, 56, 377-396.	1.6	2
48	Lateral Biases for Holding Infants: Early Opinions, Observations, and Explanations, with Some Possible Lessons for Theory and Research Today. <i>Brain and Cognition</i> , 2002, 48, 392-394.	1.8	2
49	The Discovery of Cerebral Specialization. <i>Frontiers of Neurology and Neuroscience</i> , 2019, 44, 1-14.	2.8	2
50	Does Music Matter? A Look at the Issues and the Evidence. <i>Developmental Neuropsychology</i> , 2019, 44, 104-145.	1.4	2
51	The Human Infant in Studies of Lateralization of Function. , 1991, , 129-154.		2
52	The Organization of Lateralized Behavior during Infancy. , 1991, , 155-184.		2
53	Henry Holland on the hypothesis of duality of mind. <i>Behavioral and Brain Sciences</i> , 1983, 6, 732.	0.7	1
54	Footedness in Peacocks: Is the Dominant Foot the One Raised First in Climbing, and What, in any Case, Does the Emperor's Tale Really Mean?. <i>Laterality</i> , 1998, 3, 291-294.	1.0	1

#	ARTICLE	IF	CITATIONS
55	On teaching infants "the right use of their hands" Advice and reassurance from Mary Palmer Tyler's <i>The Maternal Physician</i> (1811). <i>Laterality</i> , 2010, 15, 4-14.	1.0	1
56	the left-side bias for holding human infants: an everyday directional asymmetry in the natural environment. <i>Behavioral and Brain Sciences</i> , 2005, 28, 600-601.	0.7	0
