#	ARTICLE	IF	CITATIONS
1	Re-examining the effect of motivation on intentional and unintentional task-unrelated thought: accounting for thought constraint produces novel results. <i>Psychological Research</i> , 2022, 86, 87-97.	1.7	2
2	Contrasting Mind-Wandering, (Dark) Flow, and Affect During Multiline and Single-Line Slot Machine Play. <i>Journal of Gambling Studies</i> , 2022, 38, 185-203.	1.6	4
3	Does framing an assignment as involving one or multiple components influence subjective experiences of attentional engagement?. <i>Psychological Research</i> , 2022, , 1.	1.7	0
4	Boredom and Media Multitasking. <i>Frontiers in Psychology</i> , 2022, 13, 807667.	2.1	7
5	Avoidance of mild threat observed in generalized anxiety disorder (GAD) using eye tracking. <i>Journal of Anxiety Disorders</i> , 2022, 88, 102577.	3.2	1
6	Dissociating the freely-moving thought dimension of mind-wandering from the intentionality and task-unrelated thought dimensions. <i>Psychological Research</i> , 2021, 85, 2599-2609.	1.7	12
7	TL;DR: Longer Sections of Text Increase Rates of Unintentional Mind-Wandering. <i>Journal of Experimental Education</i> , 2021, 89, 278-290.	2.6	11
8	The relation between task-unrelated media multitasking and task-related motivation. <i>Psychological Research</i> , 2021, 85, 408-422.	1.7	10
9	The Effects of Mindfulness Meditation on Attention, Executive Control and Working Memory in Healthy Adults: A Meta-analysis of Randomized Controlled Trials. <i>Cognitive Therapy and Research</i> , 2021, 45, 543-560.	1.9	33
10	Performance anticipation diminishes memory: Evidence from a simulated classroom.. <i>Journal of Applied Research in Memory and Cognition</i> , 2021, 10, 479-489.	1.1	0
11	Volitional media multitasking: awareness of performance costs and modulation of media multitasking as a function of task demand. <i>Psychological Research</i> , 2020, 84, 404-423.	1.7	19
12	Does Posture Influence the Stroop Effect?. <i>Psychological Science</i> , 2020, 31, 1452-1460.	3.3	10
13	Restoration of sustained attention following virtual nature exposure: Undeniable or unreliable?. <i>Journal of Environmental Psychology</i> , 2020, 71, 101488.	5.1	13
14	Sustained attention and the experience of flow. <i>Psychological Research</i> , 2020, 85, 2682-2696.	1.7	9
15	It is undeniable that stimulus selection procedures limit conclusions from environmental exposure experiments: A response to Berto (2020). <i>Journal of Environmental Psychology</i> , 2020, 72, 101515.	5.1	1
16	Mind-Wandering Across the Age Gap: Age-Related Differences in Mind-Wandering Are Partially Attributable to Age-Related Differences in Motivation. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 76, 1264-1271.	3.9	15
17	Yearning for distraction: Evidence for a trade-off between media multitasking and mind wandering.. <i>Canadian Journal of Experimental Psychology</i> , 2020, 74, 56-72.	0.8	8
18	Using deliberate mind-wandering to escape negative mood states: Implications for gambling to escape. <i>Journal of Behavioral Addictions</i> , 2020, 9, 723-733.	3.7	9

#	ARTICLE	IF	CITATIONS
19	The Sound of Inattention: Predicting Mind Wandering with Automatically Derived Features of Instructor Speech. Lecture Notes in Computer Science, 2020, , 204-215.	1.3	4
20	Deep, effortless concentration: re-examining the flow concept and exploring relations with inattention, absorption, and personality. Psychological Research, 2019, 83, 1760-1777.	1.7	37
21	Wait for it! performance anticipation reduces recognition memory. Journal of Memory and Language, 2019, 109, 104050.	2.1	5
22	Loading! loading! The influence of download time on information search. PLoS ONE, 2019, 14, e0226112.	2.5	4
23	Disengagement during lectures: Media multitasking and mind wandering in university classrooms. Computers and Education, 2019, 132, 76-89.	8.3	69
24	On the relation between reading difficulty and mind-wandering: a section-length account. Psychological Research, 2019, 83, 485-497.	1.7	22
25	Increasing participant motivation reduces rates of intentional and unintentional mind wandering. Psychological Research, 2019, 83, 1057-1069.	1.7	49
26	Boredom: Under-aroused and restless. Consciousness and Cognition, 2018, 61, 24-37.	1.5	37
27	Validating a visual version of the metronome response task. Behavior Research Methods, 2018, 50, 1503-1514.	4.0	19
28	Mind-Wandering in Educational Settings. , 2018, , .		1
29	On the Clock: Evidence for the Rapid and Strategic Modulation of Mind Wandering. Psychological Science, 2018, 29, 1247-1256.	3.3	37
30	In the eye of the beholder: Evaluative context modulates mind-wandering. Acta Psychologica, 2018, 185, 172-179.	1.5	5
31	Instructor presence effect: Liking does not always lead to learning. Computers and Education, 2018, 122, 205-220.	8.3	65
32	In the lab and in the wild: How distraction and mind wandering affect attention and memory. Cognitive Research: Principles and Implications, 2018, 3, 42.	2.0	20
33	How pervasive is mind wandering, really?.. Consciousness and Cognition, 2018, 66, 74-78.	1.5	67
34	The role of task difficulty in theoretical accounts of mind wandering. Consciousness and Cognition, 2018, 65, 255-262.	1.5	39
35	The Family-Resemblances Framework for Mind-Wandering Remains Well Clad. Trends in Cognitive Sciences, 2018, 22, 959-961.	7.8	40
36	Mind-Wandering as a Natural Kind: A Family-Resemblances View. Trends in Cognitive Sciences, 2018, 22, 479-490.	7.8	233

#	ARTICLE	IF	CITATIONS
37	The relation between smartphone use and everyday inattention.. Psychology of Consciousness: Theory Research, and Practice, 2018, 5, 46-62.	0.4	35
38	The awakening of the attention: Evidence for a link between the monitoring of mind wandering and prospective goals.. Journal of Experimental Psychology: General, 2018, 147, 431-443.	2.1	22
39	Disrupting monotony while increasing demand: benefits of rest and intervening tasks on vigilance. Psychological Research, 2017, 81, 432-444.	1.7	27
40	Intrusive thoughts: linking spontaneous mind wandering and OCD symptomatology. Psychological Research, 2017, 81, 392-398.	1.7	68
41	Individual differences in media multitasking and performance on the n-back. Attention, Perception, and Psychophysics, 2017, 79, 582-592.	1.3	36
42	Intentionality and meta-awareness of mind wandering: Are they one and the same, or distinct dimensions?. Psychonomic Bulletin and Review, 2017, 24, 1808-1818.	2.8	44
43	Cognitive aging and the distinction between intentional and unintentional mind wandering.. Psychology and Aging, 2017, 32, 315-324.	1.6	45
44	Mindfulness and mind wandering: The protective effects of brief meditation in anxious individuals. Consciousness and Cognition, 2017, 51, 157-165.	1.5	61
45	What did you have in mind? Examining the content of intentional and unintentional types of mind wandering. Consciousness and Cognition, 2017, 51, 149-156.	1.5	46
46	Examining the Influence of Lecture Format on Degree of Mind Wandering. Journal of Applied Research in Memory and Cognition, 2017, 6, 174-184.	1.1	32
47	Wandering minds and wavering goals: Examining the relation between mind wandering and grit in everyday life and the classroom.. Canadian Journal of Experimental Psychology, 2017, 71, 120-132.	0.8	23
48	Examining the influence of saliency of peer-induced distractions on direction of gaze and lecture recall. Computers and Education, 2016, 99, 81-93.	8.3	6
49	â€œYouâ€™re on ten, where can you go from there?â€•Tufnel problems in repeated experiential judgments. Consciousness and Cognition, 2016, 42, 311-324.	1.5	0
50	A critical examination of the evidence for sensitivity loss in modern vigilance tasks.. Psychological Review, 2016, 123, 70-83.	3.8	63
51	Mind-Wandering With and Without Intention. Trends in Cognitive Sciences, 2016, 20, 605-617.	7.8	282
52	On the Necessity of Distinguishing Between Unintentional and Intentional Mind Wandering. Psychological Science, 2016, 27, 685-691.	3.3	225
53	Assessing the associations among trait and state levels of deliberate and spontaneous mind wandering. Consciousness and Cognition, 2016, 41, 50-56.	1.5	56
54	Inharmonic music elicits more negative affect and interferes more with a concurrent cognitive task than does harmonic music. Attention, Perception, and Psychophysics, 2016, 78, 946-959.	1.3	8

#	ARTICLE	IF	CITATIONS
55	On the relation between motivation and retention in educational contexts: The role of intentional and unintentional mind wandering. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 1280-1287.	2.8	92
56	Mind wandering during lectures I: Changes in rates across an entire semester.. <i>Scholarship of Teaching and Learning in Psychology</i> , 2016, 2, 13-32.	1.4	35
57	Mind wandering during lectures II: Relation to academic performance.. <i>Scholarship of Teaching and Learning in Psychology</i> , 2016, 2, 33-48.	1.4	87
58	Motivation, intentionality, and mind wandering: Implications for assessments of task-unrelated thought.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2015, 41, 1417-1425.	0.9	108
59	On the relation of mind wandering and ADHD symptomatology. <i>Psychonomic Bulletin and Review</i> , 2015, 22, 629-636.	2.8	169
60	A Resource-Control Account of Sustained Attention. <i>Perspectives on Psychological Science</i> , 2015, 10, 82-96.	9.0	262
61	Can research participants comment authoritatively on the validity of their self-reports of mind wandering and task engagement?. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 703-709.	0.9	34
62	Media multitasking and behavioral measures of sustained attention. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 390-401.	1.3	57
63	Reducing the vigilance decrement: The effects of perceptual variability. <i>Consciousness and Cognition</i> , 2015, 33, 386-397.	1.5	20
64	The more your mind wanders, the smaller your attentional blink: An individual differences study. <i>Quarterly Journal of Experimental Psychology</i> , 2015, 68, 181-191.	1.1	17
65	Distinguishing the roles of trait and state anxiety on the nature of anxiety-related attentional biases to threat using a free viewing eye movement paradigm. <i>Cognition and Emotion</i> , 2015, 29, 504-526.	2.0	45
66	Not all mind wandering is created equal: dissociating deliberate from spontaneous mind wandering. <i>Psychological Research</i> , 2015, 79, 750-758.	1.7	169
67	Restless mind, restless body.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2014, 40, 660-668.	0.9	67
68	Running the figure to the ground: Figure-ground segmentation during visual search. <i>Vision Research</i> , 2014, 97, 65-73.	1.4	3
69	Comparing target detection errors in visual search and manually-assisted search. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 945-958.	1.3	5
70	On the asymmetric effects of mind-wandering on levels of processing at encoding and retrieval. <i>Psychonomic Bulletin and Review</i> , 2014, 21, 728-733.	2.8	33
71	Media multitasking and failures of attention in everyday life. <i>Psychological Research</i> , 2014, 78, 661-669.	1.7	114
72	On the link between mind wandering and task performance over time. <i>Consciousness and Cognition</i> , 2014, 27, 14-26.	1.5	99

#	ARTICLE	IF	CITATIONS
73	A methodological note on evaluating performance in a sustained-attention-to-response task. <i>Behavior Research Methods</i> , 2013, 45, 355-363.	4.0	35
74	Performance reactivity in a continuous-performance task: Implications for understanding post-error behavior. <i>Consciousness and Cognition</i> , 2013, 22, 1468-1476.	1.5	27
75	Wandering in both mind and body: Individual differences in mind wandering and inattention predict fidgeting. <i>Canadian Journal of Experimental Psychology</i> , 2013, 67, 19-31.	0.8	236
76	Changing perspective: Zooming in and out during visual search. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013, 39, 348-364.	0.9	5
77	Wandering minds and wavering rhythms: Linking mind wandering and behavioral variability. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013, 39, 1-5.	0.9	151
78	The Moving Window Technique: A Window Into Developmental Changes in Attention During Facial Emotion Recognition. <i>Child Development</i> , 2013, 84, 1407-1424.	3.0	13
79	The "Cold" and "Hot" Sides of Attention. , 2013, , .		1
80	Age Differences in Attention Lapses Mask Age Differences in Memory Failures: A Methodological Note on Suppression. <i>Frontiers in Psychology</i> , 2013, 4, 99.	2.1	3
81	Enhancing SART Validity by Statistically Controlling Speed-Accuracy Trade-Offs. <i>Frontiers in Psychology</i> , 2013, 4, 265.	2.1	48
82	In pursuit of off-task thought: mind wandering-performance trade-offs while reading aloud and color naming. <i>Frontiers in Psychology</i> , 2013, 4, 360.	2.1	52
83	How few and far between? Examining the effects of probe rate on self-reported mind wandering. <i>Frontiers in Psychology</i> , 2013, 4, 430.	2.1	103
84	Do you see what I hear? Vantage point preference and visual dominance in a time-space synaesthete. <i>Frontiers in Psychology</i> , 2013, 4, 695.	2.1	3
85	The way we encounter reading material influences how frequently we mind wander. <i>Frontiers in Psychology</i> , 2013, 4, 892.	2.1	37
86	In Manually-Assisted Search, Perception Supervises Rather Than Directs Action. <i>Experimental Psychology</i> , 2013, 60, 243-254.	0.7	9
87	Consistency of sustained attention across modalities: Comparing visual and auditory versions of the SART. <i>Canadian Journal of Experimental Psychology</i> , 2012, 66, 44-50.	0.8	41
88	The Unengaged Mind. <i>Perspectives on Psychological Science</i> , 2012, 7, 482-495.	9.0	596
89	Memory benefits during visual search depend on difficulty. <i>Journal of Cognitive Psychology</i> , 2012, 24, 689-702.	0.9	9
90	The effects of trait and state anxiety on attention to emotional images: An eye-tracking study. <i>Cognition and Emotion</i> , 2012, 26, 1390-1411.	2.0	69

#	ARTICLE	IF	CITATIONS
91	Attention failures versus misplaced diligence: Separating attention lapses from speed-accuracy trade-offs. <i>Consciousness and Cognition</i> , 2012, 21, 277-291.	1.5	69
92	Found and missed: Failing to recognize a search target despite moving it. <i>Cognition</i> , 2012, 123, 100-118.	2.2	14
93	The Slip Induction Task: Creating a window into cognitive control failures. <i>Behavior Research Methods</i> , 2012, 44, 558-574.	4.0	5
94	9 is Always on top: Assessing the automaticity of synaesthetic number-forms. <i>Brain and Cognition</i> , 2011, 77, 96-105.	1.8	13
95	The automaticity of vantage point shifts within a synaesthetes' spatial calendar. <i>Journal of Neuropsychology</i> , 2011, 5, 333-352.	1.4	9
96	Memory load affects visual search processes without influencing search efficiency. <i>Vision Research</i> , 2011, 51, 1185-1191.	1.4	26
97	Challenge and error: Critical events and attention-related errors. <i>Cognition</i> , 2011, 121, 437-446.	2.2	36
98	Age trends for failures of sustained attention.. <i>Psychology and Aging</i> , 2010, 25, 569-574.	1.6	99
99	Long-term conceptual implicit memory: A decade of evidence. <i>Memory and Cognition</i> , 2010, 38, 42-46.	1.6	9
100	Failures of sustained attention in life, lab, and brain: Ecological validity of the SART. <i>Neuropsychologia</i> , 2010, 48, 2564-2570.	1.6	140
101	Item-specific location memory in visual search. <i>Vision Research</i> , 2010, 50, 2430-2438.	1.4	15
102	Out of Mind, Out of Sight. <i>Psychological Science</i> , 2010, 21, 786-789.	3.3	206
103	To Group or n o t t o g r o u p. <i>Experimental Psychology</i> , 2010, 57, 275-291.	0.7	10
104	Monitoring eye movements while searching for affective faces. <i>Visual Cognition</i> , 2009, 17, 318-333.	1.6	26
105	Anatomy of an error: A bidirectional state model of task engagement/disengagement and attention-related errors. <i>Cognition</i> , 2009, 111, 98-113.	2.2	268
106	Absent minds and absent agents: Attention-lapse induced alienation of agency. <i>Consciousness and Cognition</i> , 2009, 18, 481-493.	1.5	45
107	Hiding and finding: The relationship between visual concealment and visual search. <i>Attention, Perception, and Psychophysics</i> , 2009, 71, 1793-1806.	1.3	8
108	The eyes fixate the optimal viewing position of task-irrelevant words. <i>Psychonomic Bulletin and Review</i> , 2009, 16, 57-61.	2.8	3

#	ARTICLE	IF	CITATIONS
109	The ups and downs (and lefts and rights) of synaesthetic number forms: Validation from spatial cueing and SNARC-type tasks. <i>Cortex</i> , 2009, 45, 1190-1199.	2.4	46
110	A different outlook on time: Visual and auditory month names elicit different mental vantage points for a time-space synaesthete. <i>Cortex</i> , 2009, 45, 1217-1228.	2.4	48
111	Everyday attention lapses and memory failures: The affective consequences of mindlessness. <i>Consciousness and Cognition</i> , 2008, 17, 835-847.	1.5	234
112	Metacognition and change detection: Do lab and life really converge?. <i>Consciousness and Cognition</i> , 2008, 17, 1056-1061.	1.5	10
113	Cognitive Ethology: A new approach for studying human cognition. <i>British Journal of Psychology</i> , 2008, 99, 317-340.	2.3	218
114	Three responses to Cognitive Ethology. <i>British Journal of Psychology</i> , 2008, 99, 355-359.	2.3	4
115	Visual search is not blind to emotion. <i>Perception &amp; Psychophysics</i> , 2008, 70, 1047-1059.	2.3	42
116	Do emotionally expressive faces automatically capture attention? Evidence from globalâ€“local interference. <i>Visual Cognition</i> , 2008, 16, 248-261.	1.6	9
117	Emotional Valence and Arousal Interact in Attentional Control. <i>Psychological Science</i> , 2008, 19, 290-295.	3.3	188
118	Visual search for faces with emotional expressions.. <i>Psychological Bulletin</i> , 2008, 134, 662-676.	6.1	261
119	Graphemeâ€“Color Synesthesia Influences Overt Visual Attention. <i>Journal of Cognitive Neuroscience</i> , 2008, 21, 246-258.	2.3	10
120	Inhibition of return in response to gaze cues: The roles of time course and fixation cue. <i>Visual Cognition</i> , 2007, 15, 881-895.	1.6	65
121	When â€œis a Jerk and â€œis a King: Personifying Inanimate Objects in Synesthesia. <i>Journal of Cognitive Neuroscience</i> , 2007, 19, 981-992.	2.3	62
122	Grapheme Frequency and Color Luminance in Grapheme-Color Synaesthesia. <i>Psychological Science</i> , 2007, 18, 793-795.	3.3	46
123	Metacognitive errors in change detection: Missing the gap between lab and life. <i>Consciousness and Cognition</i> , 2007, 16, 52-57.	1.5	16
124	Ovals of time: Time-space associations in synaesthesia. <i>Consciousness and Cognition</i> , 2007, 16, 507-519.	1.5	84
125	What influences visual search efficiency? Disentangling contributions of preattentive and postattentive processes. <i>Perception &amp; Psychophysics</i> , 2007, 69, 1105-1116.	2.3	18
126	Collaboration during visual search. <i>Psychonomic Bulletin and Review</i> , 2007, 14, 704-709.	2.8	8
