#	ARTICLE	IF	CITATIONS
1	Effectiveness of a smartphone application to promote physical activity in primary care: the SMART MOVE randomised controlled trial. <i>British Journal of General Practice</i> , 2014, 64, e384-e391.	1.4	250
2	Medication adherence among patients with apparent treatment-resistant hypertension. <i>Journal of Hypertension</i> , 2017, 35, 2346-2357.	0.5	129
3	Patients' experiences of using a smartphone application to increase physical activity: the SMART MOVE qualitative study in primary care. <i>British Journal of General Practice</i> , 2014, 64, e500-e508.	1.4	58
4	Smartphone apps for improving medication adherence in hypertension: patients' perspectives. <i>Patient Preference and Adherence</i> , 2018, Volume 12, 813-822.	1.8	53
5	SMART MOVE - a smartphone-based intervention to promote physical activity in primary care: study protocol for a randomized controlled trial. <i>Trials</i> , 2013, 14, 157.	1.6	50
6	Concurrent validation of an index to estimate fall risk in community dwelling seniors through a wireless sensor insole system: A pilot study. <i>Gait and Posture</i> , 2017, 55, 6-11.	1.4	43
7	Implementing transnational telemedicine solutions: A connected health project in rural and remote areas of six Northern Periphery countries. <i>European Journal of General Practice</i> , 2013, 19, 52-58.	2.0	39
8	Medication adherence for resistant hypertension: Assessing theoretical predictors of adherence using direct and indirect adherence measures. <i>British Journal of Health Psychology</i> , 2018, 23, 949-966.	3.5	33
9	Platelet-rich plasma (PRP) therapy for knee arthritis: a feasibility study in primary care. <i>Pilot and Feasibility Studies</i> , 2018, 4, 93.	1.2	30
10	Patients' views and experiences of technology based self-management tools for the treatment of hypertension in the community: A qualitative study. <i>BMC Family Practice</i> , 2015, 16, 119.	2.9	26
11	New self-management technologies for the treatment of hypertension: general practitioners' perspectives. <i>Family Practice</i> , 2018, 35, 318-322.	1.9	22
12	Prevalence of treatment-resistant hypertension after considering pseudo-resistance and morbidity: a cross-sectional study in Irish primary care. <i>British Journal of General Practice</i> , 2018, 68, e394-e400.	1.4	19
13	The University of Limerick Education and Research Network for General Practice (ULEARN-GP): practice characteristics and general practitioner perspectives. <i>BMC Family Practice</i> , 2020, 21, 25.	2.9	19
14	A feasibility study of an exercise intervention to educate and promote health and well-being among medical students: the 'MED-WELL' programme. <i>BMC Medical Education</i> , 2020, 20, 183.	2.4	16
15	Does culture affect usability? A trans-European usability and user experience assessment of a falls-risk connected health system following a user-centred design methodology carried out in a single European country. <i>Maturitas</i> , 2018, 114, 22-26.	2.4	14
16	Implementation of the SMART MOVE intervention in primary care: a qualitative study using normalisation process theory. <i>BMC Family Practice</i> , 2018, 19, 48.	2.9	13
17	Communication between primary and secondary care: deficits and danger. <i>Family Practice</i> , 2020, 37, 63-68.	1.9	13
18	How to improve recruitment, sustainability and scalability in physical activity programmes for adults aged 50 years and older: A qualitative study of key stakeholder perspectives. <i>PLoS ONE</i> , 2020, 15, e0240974.	2.5	12

#	ARTICLE	IF	CITATIONS
19	Measuring adherence to therapy in apparent treatment-resistant hypertension: a feasibility study in Irish primary care. <i>British Journal of General Practice</i> , 2019, 69, e621-e628.	1.4	9
20	Career destinations of graduates from a medical school with an 18-week longitudinal integrated clerkship in general practice: a survey of alumni 6 to 8 years after graduation. <i>Irish Journal of Medical Science</i> , 2021, 190, 185-191.	1.5	7
21	An evaluation of an intervention designed to help inactive adults become more active with a peer mentoring component: a protocol for a cluster randomised feasibility trial of the Move for Life programme. <i>Pilot and Feasibility Studies</i> , 2019, 5, 88.	1.2	5
22	A qualitative comparison of high and low adherers with apparent treatment-resistant hypertension. <i>Psychology, Health and Medicine</i> , 2020, 25, 64-77.	2.4	4
23	SARS-CoV-2 infection in general practice in Ireland: a seroprevalence study. <i>BJGP Open</i> , 2021, 5, BJGPO.2021.0038.	1.8	3
24	Prognosis of patients with apparent treatment-resistant hypertension—a feasibility study. <i>Pilot and Feasibility Studies</i> , 2018, 4, 43.	1.2	1
25	Juggling with theory, evidence, practice, and real-world circumstances: Development of a complex community intervention to increase physical activity in inactive adults aged 50 years and older “The Move for Life Study. <i>Evaluation and Program Planning</i> , 2021, 89, 101983.	1.6	1
26	Identifying the gaps in Irish cancer care: Patient, public and providers’ perspectives. <i>Health Policy</i> , 2021, 125, 1482-1488.	3.0	1
27	Lessons learned from a pandemic: implications for a combined exercise and educational programme for medical students. <i>BMC Medical Education</i> , 2022, 22, 255.	2.4	1
