List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/1412827/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	The potential for animal models to provide insight into mild traumatic brain injury: Translational challenges and strategies. Neuroscience and Biobehavioral Reviews, 2017, 76, 396-414.	6.1	125
2	Executive (dys)function after traumatic brain injury: special considerations for behavioral pharmacology. Behavioural Pharmacology, 2018, 29, 617-637.	1.7	48
3	Continuous nicotinamide administration improves behavioral recovery and reduces lesion size following bilateral frontal controlled cortical impact injury. Behavioural Brain Research, 2011, 224, 311-317.	2.2	37
4	Frontal Traumatic Brain Injury Increases Impulsive Decision Making in Rats: A Potential Role for the Inflammatory Cytokine Interleukin-12. Journal of Neurotrauma, 2017, 34, 2790-2800.	3.4	37
5	Frontal Traumatic Brain Injury in Rats Causes Long-Lasting Impairments in Impulse Control That Are Differentially Sensitive to Pharmacotherapeutics and Associated with Chronic Neuroinflammation. ACS Chemical Neuroscience, 2016, 7, 1531-1542.	3.5	35
6	Executive (dys)function after stroke: special considerations for behavioral pharmacology. Behavioural Pharmacology, 2018, 29, 638-653.	1.7	31
7	Comparison of the Effect of Minocycline and Simvastatin on Functional Recovery and Gene Expression in a Rat Traumatic Brain Injury Model. Journal of Neurotrauma, 2014, 31, 961-975.	3.4	29
8	Prior Exposure to Salient Win-Paired Cues in a Rat Gambling Task Increases Sensitivity to Cocaine Self-Administration and Suppresses Dopamine Efflux in Nucleus Accumbens: Support for the Reward Deficiency Hypothesis of Addiction. Journal of Neuroscience, 2019, 39, 1842-1854.	3.6	29
9	Deficits in Discrimination after Experimental Frontal Brain Injury Are Mediated by Motivation and Can Be Improved by Nicotinamide Administration. Journal of Neurotrauma, 2014, 31, 1711-1720.	3.4	28
10	Deep-Brain Stimulation of the Subthalamic Nucleus Selectively Decreases Risky Choice in Risk-Preferring Rats. ENeuro, 2017, 4, ENEURO.0094-17.2017.	1.9	28
11	A Discrimination Task Used as a Novel Method of Testing Decision-Making Behavior following Traumatic Brain Injury. Journal of Neurotrauma, 2012, 29, 2505-2512.	3.4	25
12	Cocaine selfâ€administration is increased after frontal traumatic brain injury and associated with neuroinflammation. European Journal of Neuroscience, 2019, 50, 2134-2145.	2.6	25
13	Long-term deficits in risky decision-making after traumatic brain injury on a rat analog of the Iowa gambling task. Brain Research, 2019, 1704, 103-113.	2.2	25
14	Repetitive closed-head impact model of engineered rotational acceleration (CHIMERA) injury in rats increases impulsivity, decreases dopaminergic innervation in the olfactory tubercle and generates white matter inflammation, tau phosphorylation and degeneration. Experimental Neurology, 2019, 317, 87-99.	4.1	19
15	The Dig Task: A Simple Scent Discrimination Reveals Deficits Following Frontal Brain Damage. Journal of Visualized Experiments, 2013, , .	0.3	12
16	Effect of Traumatic Brain Injury, Erythropoietin, and Anakinra on Hepatic Metabolizing Enzymes and Transporters in an Experimental Rat Model. AAPS Journal, 2015, 17, 1255-1267.	4.4	12
17	Chronic folic acid administration confers no treatment effects in either a high or low dose following unilateral controlled cortical impact injury in the rat. Restorative Neurology and Neuroscience, 2012, 30, 291-302.	0.7	10
18	Successive bilateral frontal controlled cortical impact injuries show behavioral savings. Behavioural Brain Research, 2013, 240, 153-159.	2.2	10

#	ARTICLE	IF	CITATIONS
19	Minor Functional Deficits in Basic Response Patterns for Reinforcement after Frontal Traumatic Brain Injury in Rats. Journal of Neurotrauma, 2016, 33, 1892-1900.	3.4	10
20	Cathodal Transcranial Direct-Current Stimulation Selectively Decreases Impulsivity after Traumatic Brain Injury in Rats. Journal of Neurotrauma, 2019, 36, 2827-2830.	3.4	9
21	Simple tone discriminations are disrupted following experimental frontal traumatic brain injury in rats. Brain Injury, 2014, 28, 235-243.	1.2	8
22	Unilateral parietal brain injury increases risk-taking on a rat gambling task. Experimental Neurology, 2020, 327, 113217.	4.1	8
23	Lateral Fluid Percussion Injury Causes Sex-Specific Deficits in Anterograde but Not Retrograde Memory. Frontiers in Behavioral Neuroscience, 2022, 16, 806598.	2.0	6
24	Large-N Rat Data Enables Phenotyping of Risky Decision-Making: A Retrospective Analysis of Brain Injury on the Rodent Gambling Task. Frontiers in Behavioral Neuroscience, 2022, 16, 837654.	2.0	5
25	Frontal brain injury chronically impairs timing behavior in rats. Behavioural Brain Research, 2019, 356, 408-414.	2.2	4
26	Challenges and opportunities in animal models of gambling-like behavior. Current Opinion in Behavioral Sciences, 2020, 31, 42-47.	3.9	3
27	Repeat Closed-Head Injury in Male Rats Impairs Attention but Causes Heterogeneous Outcomes in Multiple Measures of Impulsivity and Clial Pathology. Frontiers in Behavioral Neuroscience, 2022, 16, 809249.	2.0	3
28	Choice-based assessments outperform traditional measures for chronic depressive-like behaviors in rats after brain injury. Behavioural Brain Research, 2020, 395, 112879.	2.2	2
29	Traumatic brain injury substantially reduces the conditioned reinforcing effects of environmental cues in rats. Brain Research, 2020, 1748, 147084.	2.2	2
30	Exposure to uncertainty mediates the effects of traumatic brain injury on probabilistic decision-making in rats. Brain Injury, 2020, 34, 140-148.	1.2	1
