#	ARTICLE	IF	CITATIONS
1	High heart rate amplifies the risk of cardiovascular mortality associated with elevated uric acid. European Journal of Preventive Cardiology, 2022, 29, 1501-1509.	1.8	9
2	Association of uric acid with kidney function and albuminuria: the Uric Acid Right for heArt Health (URRAH) Project. Journal of Nephrology, 2022, 35, 211-221.	2.0	34
3	Identification of a plausible serum uric acid cut-off value as prognostic marker of stroke: the Uric Acid Right for Heart Health (URRAH) study. Journal of Human Hypertension, 2022, 36, 976-982.	2.2	20
4	Reduction of High Cholesterol Levels by a Preferably Fixed-Combination Strategy as the First Step in the Treatment of Hypertensive Patients with Hypercholesterolemia and High/Very High Cardiovascular Risk: A Consensus Document by the Italian Society of Hypertension. High Blood Pressure and Cardiovascular Prevention, 2022, 29, 105-113.	2.2	3
5	Serum uric acid levels threshold for mortality in diabetic individuals: The URic acid Right for heArt Health (URRAH) project. Nutrition, Metabolism and Cardiovascular Diseases, 2022, 32, 1245-1252.	2.6	15
6	The association of uric acid with mortality modifies at old age: data from the uric acid right for heart health (URRAH) study. Journal of Hypertension, 2022, 40, 704-711.	0.5	12
7	World Hypertension Day 2021 in Italy: Results of a Nationwide Survey. High Blood Pressure and Cardiovascular Prevention, 2022, 29, 353-359.	2.2	9
8	Chronic kidney disease and cardiovascular mortality in patients with atrial fibrillation. Medicine (United States), 2021, 100, e23975.	1.0	4
9	Left atrial volume indexed for height <sup>2</sup> is a new sensitive marker for subclinical cardiac organ damage in female hypertensive patients. Hypertension Research, 2021, 44, 692-699.	2.7	8
10	Diagnostic and Therapeutic Approach to Sleep Disorders, High Blood Pressure and Cardiovascular Diseases: A Consensus Document by the Italian Society of Hypertension (SIIA). High Blood Pressure and Cardiovascular Prevention, 2021, 28, 85-102.	2.2	15
11	The importance of including uric acid in the definition of metabolic syndrome when assessing the mortality risk. Clinical Research in Cardiology, 2021, 110, 1073-1082.	3.3	31
12	The UrgeRe (Urgenze Ipertensive: Un Progetto Educazionale Fondato Sulla Vita Reale, Hypertensive) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5 2021, 28, 151-157.	2.2	1
13	Microvascular Structural Alterations in Cancer Patients Treated With Antiangiogenic Drugs. Frontiers in Cardiovascular Medicine, 2021, 8, 651594.	2.4	4
14	Co-infection of chlamydia pneumoniae and mycoplasma pneumoniae with SARS-CoV-2 is associated with more severe features. Journal of Infection, 2021, 82, e4-e7.	3.3	23
15	The Vobarno Study. Panminerva Medica, 2021, 63, .	0.8	2
16	Preexisting Oral Anticoagulant Therapy Ameliorates Prognosis in Hospitalized COVID-19 Patients. Frontiers in Cardiovascular Medicine, 2021, 8, 633878.	2.4	10
17	May Measurement Month 2019: an analysis of blood pressure screening results from Italy. European Heart Journal Supplements, 2021, 23, B77-B81.	0.1	4
18	Factors associated with survival in older patients affected by COVID-19: A retrospective cohort study. Archives of Gerontology and Geriatrics, 2021, 94, 104349.	3.0	7

#	ARTICLE	IF	CITATIONS
19	Cardiovascular prognosis in patients admitted to an emergency department with hypertensive emergencies and urgencies. <i>Journal of Hypertension</i> , 2021, 39, 2514-2520.	0.5	15
20	Serum Uric Acid and Kidney Disease Measures Independently Predict Cardiovascular and Total Mortality: The Uric Acid Right for Heart Health (URRAH) Project. <i>Frontiers in Cardiovascular Medicine</i> , 2021, 8, 713652.	2.4	18
21	Serum uric acid, predicts heart failure in a large Italian cohort: search for a cut-off value the URic acid Right for heArt Health study. <i>Journal of Hypertension</i> , 2021, 39, 62-69.	0.5	49
22	Relationships between diuretic-related hyperuricemia and cardiovascular events: data from the URic acid Right for heArt Health study. <i>Journal of Hypertension</i> , 2021, 39, 333-340.	0.5	46
23	Myocardial mechano-energetic efficiency in primary aldosteronism. <i>Journal of Hypertension</i> , 2021, 39, 318-324.	0.5	5
24	Determinants of healing among patients with coronavirus disease 2019: the results of the SARS-RAS study of the Italian Society of Hypertension. <i>Journal of Hypertension</i> , 2021, 39, 376-380.	0.5	20
25	Effect of direct renin inhibition on vascular function after long-term treatment with aliskiren in hypertensive and diabetic patients. <i>Journal of Hypertension</i> , 2021, 39, 169-180.	0.5	2
26	Graves' disease treated by complementary medicine leading to thyroid storm: A case report. <i>Caspian Journal of Internal Medicine</i> , 2021, 12, S371-S375.	0.2	2
27	National trends in total cholesterol obscure heterogeneous changes in HDL and non-HDL cholesterol and total-to-HDL cholesterol ratio: a pooled analysis of 458 population-based studies in Asian and Western countries. <i>International Journal of Epidemiology</i> , 2020, 49, 173-192.	1.9	44
28	Antihypertensive drugs and outcome in aortic stenosis. <i>International Journal of Cardiology</i> , 2020, 298, 126-127.	1.7	0
29	Sudden cardiac death in a girl with familiar left-dominant arrhythmogenic cardiomyopathy: a multidisciplinary approach. <i>Journal of Cardiovascular Medicine</i> , 2020, 21, 391-392.	1.5	5
30	Correction of QRS voltage for body mass index does not improve the prediction of fatal and nonfatal cardiovascular events. The Moli-sani study. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2020, 30, 426-433.	2.6	1
31	Cardiovascular target organ damage in premenopausal systemic lupus erythematosus patients and in controls: Are there any differences?. <i>European Journal of Internal Medicine</i> , 2020, 73, 76-82.	2.2	8
32	Identification of the Uric Acid Thresholds Predicting an Increased Total and Cardiovascular Mortality Over 20 Years. <i>Hypertension</i> , 2020, 75, 302-308.	2.7	177
33	Relationship between arterial stiffness and unattended or attended blood pressure values. <i>Journal of Hypertension</i> , 2020, 38, 243-248.	0.5	8
34	Serum uric acid and fatal myocardial infarction: detection of prognostic cut-off values: The URRAH (Uric Acid Right for Heart Health) study. <i>Journal of Hypertension</i> , 2020, 38, 412-419.	0.5	70
35	Hypertensive emergencies and urgencies. <i>Journal of Hypertension</i> , 2020, 38, 52-58.	0.5	31
36	Gender differences in predictors of intensive care units admission among COVID-19 patients: The results of the SARS-RAS study of the Italian Society of Hypertension. <i>PLoS ONE</i> , 2020, 15, e0237297.	2.5	51

#	ARTICLE	IF	CITATIONS
37	Tocilizumab for patients with COVID-19 pneumonia. The single-arm TOCOVID-19 prospective trial. <i>Journal of Translational Medicine</i> , 2020, 18, 405.	4.4	98
38	Clinical characteristics and risk factors for mortality in hematologic patients affected by COVID-19. <i>Cancer</i> , 2020, 126, 5069-5076.	4.1	69
39	May Measurement Month 2018: an analysis of blood pressure screening results from Italy. <i>European Heart Journal Supplements</i> , 2020, 22, H70-H73.	0.1	4
40	Anti-Phospholipid Antibodies in COVID-19 Are Different From Those Detectable in the Anti-Phospholipid Syndrome. <i>Frontiers in Immunology</i> , 2020, 11, 584241.	4.8	137
41	Height and body-mass index trajectories of school-aged children and adolescents from 1985 to 2019 in 200 countries and territories: a pooled analysis of 2181 population-based studies with 65 million participants. <i>Lancet, The</i> , 2020, 396, 1511-1524.	13.7	219
42	Evaluation of Cardiovascular Risk in Patient with Primary Non-alcoholic Fatty Liver Disease. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2020, 27, 321-330.	2.2	5
43	Repositioning of the global epicentre of non-optimal cholesterol. <i>Nature</i> , 2020, 582, 73-77.	27.8	138
44	Tocilizumab for the treatment of severe COVID-19 pneumonia with hyperinflammatory syndrome and acute respiratory failure: A single center study of 100 patients in Brescia, Italy. <i>Autoimmunity Reviews</i> , 2020, 19, 102568.	5.8	637
45	Age and Multimorbidity Predict Death Among COVID-19 Patients. <i>Hypertension</i> , 2020, 76, 366-372.	2.7	330
46	Laboratory considerations amidst the coronavirus disease 2019 outbreak: the Spedali Civili in Brescia experience. <i>Bioanalysis</i> , 2020, 12, 1223-1230.	1.5	8
47	Hyperuricemia and Risk of Cardiovascular Outcomes: The Experience of the URRAH (Uric Acid Right for) Tj ETQq1 1,0784314,rgBT /Over	2.2	95
48	Reply. <i>Journal of Hypertension</i> , 2020, 38, 557-558.	0.5	0
49	Noninvasive evaluation of the retinal microvasculature: is all that glitters gold?. <i>Journal of Hypertension</i> , 2020, 38, 203-205.	0.5	2
50	Hypertension Urgencies and Emergencies: The GEAR Project. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2020, 27, 129-132.	2.2	3
51	Renin-Angiotensin System Inhibition in Cardiovascular Patients at the Time of COVID19: Much Ado for Nothing? A Statement of Activity from the Directors of the Board and the Scientific Directors of the Italian Society of Hypertension. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2020, 27, 105-108.	2.2	37
52	Unattended versus attended blood pressure measurement: Mean values and determinants of the difference. <i>International Journal of Cardiology</i> , 2019, 274, 305-310.	1.7	26
53	Response to Letter to the Editor Regarding Article "Unattended Versus Attended Blood Pressure Measurement: Relationship With Preclinical Organ Damage". <i>Hypertension</i> , 2019, 73, e86.	2.7	0
54	Unattended Versus Attended Blood Pressure Measurement. <i>Hypertension</i> , 2019, 73, 736-742.	2.7	33

#	ARTICLE	IF	CITATIONS
55	Prevalence of proximal ascending aorta and target organ damage in hypertensive patients. <i>Journal of Hypertension</i> , 2019, 37, 57-64.	0.5	18
56	Vascular Aging and Disease of the Small Vessels. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2019, 26, 183-189.	2.2	42
57	Rising rural body-mass index is the main driver of the global obesity epidemic in adults. <i>Nature</i> , 2019, 569, 260-264.	27.8	469
58	Hypertension and Target Organ Damage. , 2019, , 406-414.		0
59	Acute blood pressure elevation associated with biological therapies for cancer: a focus on VEGF signaling pathway inhibitors. <i>Expert Opinion on Biological Therapy</i> , 2019, 19, 433-442.	3.1	6
60	Chronic kidney disease in low-middle income populations: a call to action for screening and prevention. <i>Internal and Emergency Medicine</i> , 2019, 14, 199-202.	2.0	3
61	Regression Under Treatment of Left Ventricular Hypertrophy and Other Structural Alterations. <i>Updates in Hypertension and Cardiovascular Protection</i> , 2019, , 299-310.	0.1	0
62	Relationship between vascular damage and left ventricular concentric geometry in patients undergoing coronary angiography. <i>Journal of Hypertension</i> , 2019, 37, 1183-1190.	0.5	7
63	The smoothness index. <i>Journal of Hypertension</i> , 2019, 37, 2341-2344.	0.5	1
64	Reclassification of Hypertensive Outpatients According to New US Guidelines on High Blood Pressure. <i>American Journal of Hypertension</i> , 2019, 32, 77-87.	2.0	14
65	Acute blood pressure elevation: Therapeutic approach. <i>Pharmacological Research</i> , 2018, 130, 180-190.	7.1	16
66	Arterial hypertension: Unmasking the real risk. <i>Journal of Clinical Hypertension</i> , 2018, 20, 306-307.	2.0	1
67	Exploration into Uric and Cardiovascular Disease: Uric Acid Right for heArt Health (URRAH) Project, A Study Protocol for a Retrospective Observational Study. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2018, 25, 197-202.	2.2	35
68	Cardiac Rupture in a Young Male Cocaine User. <i>American Journal of Medicine</i> , 2018, 131, e195-e196.	1.5	1
69	Contributions of mean and shape of blood pressure distribution to worldwide trends and variations in raised blood pressure: a pooled analysis of 1018 population-based measurement studies with 88.6 million participants. <i>International Journal of Epidemiology</i> , 2018, 47, 872-883i.	1.9	65
70	Major adverse cardiovascular events in non-valvular atrial fibrillation with chronic obstructive pulmonary disease: the ARAPACIS study. <i>Internal and Emergency Medicine</i> , 2018, 13, 651-660.	2.0	29
71	Carotid stiffness is significantly correlated with wall-to-lumen ratio of retinal arterioles. <i>Journal of Hypertension</i> , 2018, 36, 580-586.	0.5	11
72	Changes in left ventricular geometry during antihypertensive treatment. <i>Pharmacological Research</i> , 2018, 134, 193-199.	7.1	28

#	ARTICLE	IF	CITATIONS
73	Hypertension and Organ Damage in Women. High Blood Pressure and Cardiovascular Prevention, 2018, 25, 245-252.	2.2	24
74	Management of VEGF-Targeted Therapy-Induced Hypertension. Current Hypertension Reports, 2018, 20, 68.	3.5	25
75	Therapeutic Approach to Hypertensive Emergencies: Hemorrhagic Stroke. High Blood Pressure and Cardiovascular Prevention, 2018, 25, 191-195.	2.2	11
76	Definitions and Epidemiological Aspects of Hypertensive Urgencies and Emergencies. High Blood Pressure and Cardiovascular Prevention, 2018, 25, 241-244.	2.2	17
77	Carotid plaque detection improves the predictive value of CHA2DS2-VASc score in patients with non-valvular atrial fibrillation: The ARAPACIS Study. International Journal of Cardiology, 2017, 231, 143-149.	1.7	22
78	Ocular fundus photography with a smartphone device in acute hypertension. Journal of Hypertension, 2017, 35, 1660-1665.	0.5	49
79	Obesity and ECG left ventricular hypertrophy. Journal of Hypertension, 2017, 35, 162-169.	0.5	24
80	Current Pharmacological Therapies in Heart Failure Patients. High Blood Pressure and Cardiovascular Prevention, 2017, 24, 107-114.	2.2	21
81	Worldwide trends in body-mass index, underweight, overweight, and obesity from 1975 to 2016: a pooled analysis of 2416 population-based measurement studies in 128.9 million children, adolescents, and adults. Lancet, The, 2017, 390, 2627-2642.	13.7	5,010
82	Relationship Between 24-Hour Ambulatory Central Systolic Blood Pressure and Left Ventricular Mass. Hypertension, 2017, 70, 1157-1164.	2.7	52
83	Attitudes and preferences for the clinical management of hypertension and hypertension-related cerebrovascular disease in the general practice: results of the Italian hypertension and brain survey. Clinical Hypertension, 2017, 23, 10.	2.0	5
84	Worldwide trends in blood pressure from 1975 to 2015: a pooled analysis of 1479 population-based measurement studies with 19.1 million participants. Lancet, The, 2017, 389, 37-55.	13.7	1,667
85	Comparison of lercanidipine plus hydrochlorothiazide vs. lercanidipine plus enalapril on micro and macrocirculation in patients with mild essential hypertension. Internal and Emergency Medicine, 2017, 12, 963-974.	2.0	12
86	Uric Acid and Cardiovascular Disease: An Update. European Cardiology Review, 2016, 11, 54.	2.2	82
87	Changes in albuminuria and cardiovascular risk under antihypertensive treatment. Journal of Hypertension, 2016, 34, 1689-1697.	0.5	26
88	Worldwide trends in diabetes since 1980: a pooled analysis of 751 population-based studies with 4.4 million participants. Lancet, The, 2016, 387, 1513-1530.	13.7	2,842
89	Trends in adult body-mass index in 200 countries from 1975 to 2014: a pooled analysis of 1698 population-based measurement studies with 19.2 million participants. Lancet, The, 2016, 387, 1377-1396.	13.7	3,941
90	Gender Differences in Antihypertensive Treatment: Myths or Legends?. High Blood Pressure and Cardiovascular Prevention, 2016, 23, 105-113.	2.2	35

#	ARTICLE	IF	CITATIONS
91	Resistant Hypertension. Practical Case Studies in Hypertension Management, 2016, , .	0.0	0
92	Management of Hypercholesterolemia, Appropriateness of Therapeutic Approaches and New Drugs in Patients with High Cardiovascular Risk. High Blood Pressure and Cardiovascular Prevention, 2016, 23, 217-230.	2.2	31
93	Adult Patient with True Resistant Hypertension. Practical Case Studies in Hypertension Management, 2016, , 1-17.	0.0	0
94	Differential incremental value of ultrasound carotid intima-media thickness, carotid plaque, and cardiac calcium to predict angiographic coronary artery disease across Framingham risk score strata in the APRES multicentre study. European Heart Journal Cardiovascular Imaging, 2016, 17, 991-1000.	1.2	25
95	Bridging the Gap between Knowledge Representation and Electronic Health Records. , 2016, , .		1
96	Adult Patient with Resistant Hypertension Secondary to Comorbidities. Practical Case Studies in Hypertension Management, 2016, , 91-110.	0.0	0
97	Vascular alterations in apolipoprotein A-I amyloidosis (Leu75Pro). A case-control study. Amyloid: the International Journal of Experimental and Clinical Investigation: the Official Journal of the International Society of Amyloidosis, 2015, 22, 187-193.	3.0	4
98	Multiparametric carotid and cardiac ultrasound compared with clinical risk scores for the prediction of angiographic coronary artery disease. Journal of Hypertension, 2015, 33, 1291-1300.	0.5	19
99	Attitudes and preferences for the clinical management of patients with hypertension and hypertension with chronic obstructive pulmonary disease in Italy: main results of a survey questionnaire. Internal and Emergency Medicine, 2015, 10, 943-954.	2.0	7
100	An update on hypertensive emergencies and urgencies. Journal of Cardiovascular Medicine, 2015, 16, 372-382.	1.5	60
101	Ethnic-Specific Normative Reference Values for Echocardiographic LA and LV Size, LV Mass, and Systolic Function. JACC: Cardiovascular Imaging, 2015, 8, 656-665.	5.3	182
102	Advantages of renin inhibition in a patient with reninoma. International Journal of Cardiology, 2015, 187, 240-242.	1.7	14
103	Attitudes and preferences for the clinical management of hypertension and hypertension-related cardiac disease in general practice: results of the Italian Hypertension and Heart Survey. Journal of Human Hypertension, 2015, 29, 409-416.	2.2	6
104	Effects of diabetes definition on global surveillance of diabetes prevalence and diagnosis: a pooled analysis of 96 population-based studies with 331 288 participants. Lancet Diabetes and Endocrinology, 2015, 3, 624-637.	11.4	139
105	Interactions Between Macro- and Micro-Circulation: Are They Relevant?. High Blood Pressure and Cardiovascular Prevention, 2015, 22, 119-128.	2.2	14
