1331 citing authors

#	Article	IF	CITATIONS
1	Adenosine Deaminase in Pleural Fluids. Chest, 1983, 84, 51-53.	0.8	275
2	Value of differential quantitative blood cultures in the diagnosis of catheter-related sepsis. European Journal of Clinical Microbiology and Infectious Diseases, 1992, 11, 403-407.	2.9	197
3	Efficacy of Ampicillin plus Ceftriaxone in Treatment of Experimental Endocarditis Due to <i>Enterococcus faecalis</i> Strains Highly Resistant to Aminoglycosides. Antimicrobial Agents and Chemotherapy, 1999, 43, 639-646.	3.2	114
4	Impact of empirical treatment in extended-spectrum beta-lactamase-producing Escherichia coli and Klebsiella spp. bacteremia. A multicentric cohort study. BMC Infectious Diseases, 2012, 12, 245.	2.9	75
5	Clinical outcome of patients with venous thromboembolism and renal insufficiency. Thrombosis and Haemostasis, 2007, 98, 771-776.	3.4	65
6	Pneumonia treated in the internal medicine department: focus on healthcare-associated pneumonia. Clinical Microbiology and Infection, 2012, 18, 786-794.	6.0	60
7	Lack of antimicrobial activity of sodium heparin for treating experimental catheter-related infection due to Staphylococcus aureus using the antibiotic-lock technique. Clinical Microbiology and Infection, 2001, 7, 206-212.	6.0	58
8	Refractory adult dermatomyositis with pneumatosis cystoides intestinalis treated with infliximab. British Journal of Rheumatology, 2004, 43, 1196-1197.	2.3	51
9	Bacteremia Caused byCapnocytophagaSpecies in Patients with Neutropenia and Cancer: Results of a Multicenter Study. Clinical Infectious Diseases, 2001, 33, e20-e22.	5.8	48
10	Catheter-related infection: An update on diagnosis, treatment, and prevention. International Journal of Infectious Diseases, 1998, 2, 230-236.	3.3	43
11	Rhodococcus equi Pneumonia in Patients Infected with the Human Immunodefficiency Virus. Report of 2 cases and review of the literature. Scandinavian Journal of Infectious Diseases, 1997, 29, 535-541.	1.5	34
12	Efficacy of three different valve systems of needle-free closed connectors in avoiding access of microorganisms to endovascular catheters after incorrect handling*. Critical Care Medicine, 2008, 36, 2558-2561.	0.9	34
13	Sporadic and epidemic community legionellosis: two faces of the same illness. European Respiratory Journal, 2006, 29, 138-142.	6.7	33
14	Microbiological study of patients hospitalized for acute exacerbation of chronic obstructive pulmonary disease (AE-COPD) and the usefulness of analytical and clinical parameters in its identification (VIRAE study). International Journal of COPD, 2012, 7, 327.	2.3	25
15	Nationwide study on the use of intravascular catheters in internal medicine departments. Journal of Hospital Infection, 2015, 90, 135-141.	2.9	23
16	C-reactive protein for discriminating treatment failure from slow responding pneumonia. European Journal of Internal Medicine, 2010, 21, 548-552.	2.2	22
17	Antibiotic-lock technique: Usefulness and controversies. Antimicrobics and Infectious Diseases Newsletter, 1996, 15, 9-13.	0.0	21
18	Pseudomonas vesicularis bacteraemia. Infection, 1992, 20, 367-368.	4.7	20

#	Article	IF	Citations
19	Resistance to the migration of microorganisms of a needle-free disinfectable connector. American Journal of Infection Control, 2003, 31, 462-464.	2.3	20
20	La neumonÃa como comorbilidad en la enfermedad pulmonar obstructiva crónica (EPOC). Diferencias entre la exacerbación aguda de la EPOC y la neumonÃa en los pacientes con EPOC. Archivos De Bronconeumologia, 2014, 50, 514-520.	0.8	20
21	Pleural Fluid Adenosine Deaminase in Rheumatoid Arthritis and Systemic Lupus Erythematosus. Chest, 1984, 86, 273-274.	0.8	15
22	Long-term follow-up of patients with catheter-related bacteremia treated without catheter removal. Clinical Microbiology and Infection, 1998, 4, 472-476.	6.0	10
23	2016 Expert consensus document on prevention, diagnosis and treatment of short-term peripheral venous catheter-related infections in adults. Cirugia Cardiovascular, 2016, 23, 192-198.	0.1	10
24	Catheter-Related Bacteremia in Patients Undergoing Hemodialysis. Annals of Internal Medicine, 1998, 128, 600.	3.9	8
25	Differences in time to positivity can affect the negative predictive value of blood cultures drawn through a central venous catheter. Intensive Care Medicine, 2006, 32, 1442-1443.	8.2	6
26	Fracción gamma del proteinograma y agudizaciones de la enfermedad pulmonar obstructiva crónica. Medicina ClÃnica, 2017, 149, 107-113.	0.6	6
27	Differences in Hypotensive vs. Non-Hypotensive Sepsis Management in the Emergency Department: Door-to-Antibiotic Time Impact on Sepsis Survival. Medical Sciences (Basel, Switzerland), 2018, 6, 91.	2.9	4
28	Incidence and risk factors of recurrent episodes of bacteremia in adults. Archives of Internal Medicine, 1994, 154, 411-415.	3.8	4
29	Positive-pressure needleless connectors did not increase rates of catheter hub colonization respecting the use of neutral-pressure needleless connectors in a prospective randomized trial. Enfermedades Infecciosas Y MicrobiologÃa ClÃnica, 2020, 38, 119-122.	0.5	3
30	Recurrent bacteremia in a university hospital. American Journal of Medicine, 1989, 86, 257-258.	1.5	2
31	How to manage central venous catheter-related sepsis. Clinical Nutrition, 2002, 21, 195-197.	5.0	2
32	Gamma globulin fraction of the proteinogram and chronic obstructive pulmonary disease exacerbations. Medicina ClÃnica (English Edition), 2017, 149, 107-113.	0.2	2
33	Liver alterations in acute pneumonia. Archives of Internal Medicine, 1990, 150, 2206-2206.	3.8	2
34	The management of pneumonia in internal medicine. Revista Clinica Espanola, 2013, 213, 298-305.	0.6	1
35	Respuesta de los autores a la carta: "¿Quién teme al sistema MIR?― Medicina ClÃnica, 2009, 133, 37.	0.6	0
36	Positive-pressure needleless connectors did not increase rates of catheter hub colonization respecting the use of neutral-pressure needleless connectors in a prospective randomized trial. Enfermedades Infecciosas Y Microbiologia Clinica (English Ed), 2020, 38, 119-122.	0.3	0
