#	ARTICLE	IF	CITATIONS
1	Analysis of the intra- and intertumoral heterogeneity of hypoxia in pancreatic cancer patients receiving the nitroimidazole tracer pimonidazole. <i>British Journal of Cancer</i> , 2015, 113, 864-871.	6.4	63
2	Hypoxia Signaling and the Metastatic Phenotype. <i>Current Molecular Medicine</i> , 2014, 14, 565-579.	1.3	30
3	Mitigation of Radiation-Induced Lung Injury with EUK-207 and Genistein: Effects in Adolescent Rats. <i>Radiation Research</i> , 2012, 179, 125.	1.5	34
4	Mitigation of Lung Injury after Accidental Exposure to Radiation. <i>Radiation Research</i> , 2011, 176, 770.	1.5	31
5	Characterization of image quality and image guidance performance of a preclinical microirradiator. <i>Medical Physics</i> , 2011, 38, 845-856.	3.0	158
6	Carnitine palmitoyltransferase 1C promotes cell survival and tumor growth under conditions of metabolic stress. <i>Genes and Development</i> , 2011, 25, 1041-1051.	5.9	386
7	Dynamics of Micronuclei in Rat Skin Fibroblasts after X Irradiation. <i>Radiation Research</i> , 2009, 172, 106-113.	1.5	11
8	pH, Hypoxia and Metastasis. <i>Novartis Foundation Symposium</i> , 2008, 240, 154-168.	1.1	34
9	"Destemming" Cancer Stem Cells. <i>Journal of the National Cancer Institute</i> , 2007, 99, 1435-1440.	6.3	140
10	Enhanced metastatic dissemination to multiple organs by melanoma and lymphoma cells in <i>timp-3</i> mice. <i>Oncogene</i> , 2006, 25, 6489-6496.	5.9	49
11	Radiation effects on the respiratory system. <i>British Journal of Radiology</i> , 2005, Supplement_27, 75-81.	2.2	74
12	Effects of tumour acidification with glucose+MIBG on the spontaneous metastatic potential of two murine cell lines. <i>British Journal of Cancer</i> , 2004, 90, 1842-1849.	6.4	28
13	Is there a relationship between repopulation and hypoxia/reoxygenation? Results from human carcinoma of the cervix. <i>International Journal of Radiation Biology</i> , 2003, 79, 487-494.	1.8	14
14	Molecular Mechanisms of Tumor Invasion and Metastasis: An Integrated View. <i>Current Molecular Medicine</i> , 2003, 3, 659-671.	1.3	237
15	Tumor Hypoxia Has Independent Predictor Impact Only in Patients With Node-Negative Cervix Cancer. <i>Journal of Clinical Oncology</i> , 2002, 20, 680-687.	1.6	348
16	Normal tissue radiobiology: from the laboratory to the clinic. <i>International Journal of Radiation Oncology Biology Physics</i> , 2001, 49, 353-365.	0.8	81
17	Relationship of hypoxia to metastatic ability in rodent tumours. <i>British Journal of Cancer</i> , 2001, 84, 1280-1285.	6.4	82
18	Acute (cyclic) hypoxia enhances spontaneous metastasis of KHT murine tumors. <i>Cancer Research</i> , 2001, 61, 8903-8.	0.9	235

#	ARTICLE	IF	CITATIONS
19	In-field and out-of-field effects in partial volume lung irradiation in rodents: Possible correlation between early dna damage and functional endpoints. International Journal of Radiation Oncology Biology Physics, 2000, 48, 1539-1548.	0.8	44
20	Anemia, hypoxia and transfusion in patients with cervix cancer: a review. Radiotherapy and Oncology, 2000, 57, 13-19.	0.6	125
21	The relationship between elevated interstitial fluid pressure and blood flow in tumors: a bioengineering analysis. International Journal of Radiation Oncology Biology Physics, 1999, 43, 1111-1123.	0.8	119
22	A comparison in individual murine tumors of techniques for measuring oxygen levels. International Journal of Radiation Oncology Biology Physics, 1999, 44, 1137-1146.	0.8	50
23	A quantitative analysis of the reduction in oxygen levels required to induce up-regulation of vascular endothelial growth factor (VEGF) mRNA in cervical cancer cell lines. British Journal of Cancer, 1999, 80, 1518-1524.	6.4	46
24	Gene expression in individual cells: analysis using global single cell reverse transcription polymerase chain reaction (GSC RT-PCR). Mutation Research - Mutation Research Genomics, 1999, 406, 45-54.	1.1	29
25	Intradermal Injection of Autologous Dermal Fibroblasts Improves Wound Healing in Irradiated Skin. Journal of Surgical Research, 1999, 85, 331-338.	1.6	38
26	Analysis of Genomic Integrity and p53-Dependent G ₁ Checkpoint in Telomerase-Induced Extended-Life-Span Human Fibroblasts. Molecular and Cellular Biology, 1999, 19, 2373-2379.	2.3	100
27	Interstitial fluid pressure in cervical carcinoma. , 1998, 82, 2418-2426.		84
28	Partial volume rat lung irradiation: An evaluation of early DNA damage. International Journal of Radiation Oncology Biology Physics, 1998, 40, 467-476.	0.8	149
29	Cervix cancer oxygenation measured following external radiation therapy. International Journal of Radiation Oncology Biology Physics, 1998, 42, 751-753.	0.8	53
30	Heterogeneity of tumor oxygenation: relationship to tumor necrosis, tumor size, and metastasis. International Journal of Radiation Oncology Biology Physics, 1998, 42, 717-721.	0.8	54
31	Oxygenation predicts radiation response and survival in patients with cervix cancer. Radiotherapy and Oncology, 1998, 48, 149-156.	0.6	568
32	Effect of simultaneous pulsed hyperthermia and pulsed radiation treatment on survival of SiHa cells. International Journal of Hyperthermia, 1998, 14, 573-581.	2.5	4
33	The effects of artery occlusion on temperature homogeneity during hyperthermia in rabbit kidneys in vivo. International Journal of Hyperthermia, 1997, 13, 21-37.	2.5	12
34	An examination of the effects of hypoxia, acidosis, and glucose starvation on the expression of metastasis-associated genes in murine tumor cells. Clinical and Experimental Metastasis, 1997, 15, 469-483.	3.3	58
35	Heterogeneity of polarographic oxygen tension measurements in cervix cancer: An evaluation of within and between tumor variability, probe position, and track depth. International Journal of Radiation Oncology Biology Physics, 1997, 39, 405-412.	0.8	69
36	The relationship between thermosensitivity and intracellular pH in cells deficient in antiport function. Radiotherapy and Oncology, 1996, 40, 75-83.	0.6	12

#	ARTICLE	IF	CITATIONS
37	The p53 gene as a modifier of intrinsic radiosensitivity: implications for radiotherapy. <i>Radiotherapy and Oncology</i> , 1996, 40, 197-223.	0.6	185
38	The Relationship between Intracellular pH and Heat Sensitivity in a Thermoresistant Cell Line. <i>Radiation Research</i> , 1996, 145, 144.	1.5	9
39	The potential role of HSP70 as an indicator of response to radiation and hyperthermia treatments for recurrent breast cancer. <i>International Journal of Hyperthermia</i> , 1996, 12, 197-208.	2.5	39
40	Exposure to hypoxia, glucose starvation and acidosis: effect on invasive capacity of murine tumor cells and correlation with cathepsin (L + B) secretion. <i>Clinical and Experimental Metastasis</i> , 1996, 15, 19-25.	3.3	136
41	P53-mediated radioresistance does not correlate with metastatic potential in tumorigenic rat embryo cell lines following oncogene transfection. <i>International Journal of Radiation Oncology Biology Physics</i> , 1996, 34, 341-355.	0.8	11
42	The effect of heat on antiport function and survival in mammalian cells. <i>International Journal of Radiation Oncology Biology Physics</i> , 1996, 34, 623-634.	0.8	11
43	Comparing techniques of measuring tumor hypoxia in different murine tumors: Eppendorf pO ₂ Histogram, [³ H]misonidazole binding and paired survival assay. <i>Radiation Research</i> , 1996, 145, 491-500.	1.5	15
44	The p53-mediated G ₁ checkpoint is retained in tumorigenic rat embryo fibroblast clones transformed by the human papillomavirus type 16 E7 gene and EJ-ras. <i>Molecular and Cellular Biology</i> , 1995, 15, 1446-1454.	2.3	29
45	The effects of clamping and reoxygenation on repopulation during fractionated irradiation. <i>International Journal of Radiation Oncology Biology Physics</i> , 1995, 31, 857-863.	0.8	18
46	Clonal heterogeneity in plasminogen activator activity produced by two murine tumor cell lines. <i>Clinical and Experimental Metastasis</i> , 1995, 13, 439-452.	3.3	2
47	Repopulation kinetics during fractionated irradiation and the relationship to the potential doubling time, TPOT. <i>International Journal of Radiation Oncology Biology Physics</i> , 1995, 31, 847-856.	0.8	28
48	Response of rat spinal cord to very small doses per fraction: lack of enhanced radiosensitivity. <i>Radiotherapy and Oncology</i> , 1995, 36, 44-49.	0.6	9
49	Effect of vascular occlusion on tumour temperatures during superficial hyperthermia. <i>International Journal of Hyperthermia</i> , 1994, 10, 495-505.	2.5	10
50	Radiation-induced lung damage in rats: The influence of fraction spacing on effect per fraction. <i>International Journal of Radiation Oncology Biology Physics</i> , 1994, 28, 633-640.	0.8	10
51	Combining bioreductive drugs (SR 4233 or SN 23862) with the vasoactive agents flavone acetic acid or 5,6-dimethylxanthone acetic acid. <i>International Journal of Radiation Oncology Biology Physics</i> , 1994, 29, 373-377.	0.8	63
52	The role of magnetic resonance for assessing radiation-induced lung damage. <i>International Journal of Radiation Oncology Biology Physics</i> , 1994, 30, 125-132.	0.8	5
53	Mutant p53 increases radioresistance in rat embryo fibroblasts simultaneously transfected with HPV16-E7 and/or activated H-ras. <i>Oncogene</i> , 1994, 9, 1527-36.	5.9	63
54	Ultrasonic measurements of breathing rate in rats and computer assisted analysis. <i>International Journal of Radiation Oncology Biology Physics</i> , 1993, 27, 651-657.	0.8	6

#	ARTICLE	IF	CITATIONS
55	Effect of small doses per fraction in rat spinal cord: influence of initial vs. final top-up doses. <i>Radiotherapy and Oncology</i> , 1993, 28, 52-56.	0.6	11
56	Evaluation of isoeffect formulae for predicting radiation-induced lung damage. <i>Radiotherapy and Oncology</i> , 1993, 26, 51-63.	0.6	48
57	Re-irradiation tolerance of rat spinal cord to fractionated X-ray doses. <i>Radiotherapy and Oncology</i> , 1993, 28, 197-202.	0.6	26
58	Re-irradiation tolerance in the rat spinal cord: influence of level of initial damage. <i>Radiotherapy and Oncology</i> , 1993, 26, 132-138.	0.6	40
59	Radiofrequency capacitive heaters: the effect of coupling medium resistivity on power absorption along a mouse leg. <i>Physics in Medicine and Biology</i> , 1993, 38, 1-12.	3.0	13
60	Myelopathy and Hyperfractionated Accelerated Radiotherapy: A Radiobiological Interpretation. <i>Recent Results in Cancer Research</i> , 1993, 130, 189-197.	1.8	4
61	Differential thermal sensitivity of tumour and normal tissue microvascular response during hyperthermia. <i>International Journal of Hyperthermia</i> , 1992, 8, 501-514.	2.5	71
62	Observations of thermal gradients in perfused tissues during water bath heating. <i>International Journal of Hyperthermia</i> , 1992, 8, 275-287.	2.5	15
63	Linear-quadratic model underestimates sparing effect of small doses per fraction in rat spinal cord. <i>Radiotherapy and Oncology</i> , 1992, 23, 176-184.	0.6	54
64	Glucose starvation and acidosis: effect on experimental metastatic potential, DNA content and MTX resistance of murine tumour cells. <i>British Journal of Cancer</i> , 1991, 64, 663-670.	6.4	152
65	Drug sensitivity and metastatic ability in B16 melanoma cells. <i>Clinical and Experimental Metastasis</i> , 1991, 9, 393-402.	3.3	6
66	Genetic aspects of metastasis. <i>Current Opinion in Oncology</i> , 1990, 2, 157-162.	2.4	3
67	Tumor progression: Potential role of unstable genomic changes. <i>Cancer and Metastasis Reviews</i> , 1990, 9, 137-147.	5.9	64
68	Comparison between in vitro radiosensitivity and in vivo radioresponse in murine tumor cell lines II: in vivo radioresponse following fractionated treatment and in vitro/in vivo correlations. <i>International Journal of Radiation Oncology Biology Physics</i> , 1990, 18, 331-345.	0.8	78
69	Comparison between in vitro radiosensitivity and in vivo radioresponse of murine tumor cell lines I: parameters of in vitro radiosensitivity and endogenous cellular glutathione levels. <i>International Journal of Radiation Oncology Biology Physics</i> , 1990, 18, 133-145.	0.8	51
70	Effects of Reoxygenation on Cells From Hypoxic Regions of Solid Tumors: Anticancer Drug Sensitivity and Metastatic Potential. <i>Journal of the National Cancer Institute</i> , 1990, 82, 371-380.	6.3	120
71	Effects of reoxygenation on cells from hypoxic regions of solid tumors: analysis of transplanted murine tumors for evidence of DNA overreplication. <i>Cancer Research</i> , 1990, 50, 5031-8.	0.9	18
72	Dynamic heterogeneity: experimental metastasis studies with RIF-1 fibrosarcoma. <i>Clinical and Experimental Metastasis</i> , 1989, 7, 107-116.	3.3	5

#	ARTICLE	IF	CITATIONS
73	Drug resistance in kht fibrosarcoma cell lines with different metastatic ability. International Journal of Cancer, 1989, 43, 107-111.	5.1	12
74	The proportion of stem cells in murine tumors. International Journal of Radiation Oncology Biology Physics, 1989, 16, 513-518.	0.8	113
75	Toxicity of :RSU-1069 for KHT cells treated in vivo or in vitro: Evidence for a diffusible toxic product. International Journal of Radiation Oncology Biology Physics, 1989, 16, 1111-1114.	0.8	8
76	Radiation sensitivity of tumour cells stained in vitro or in vivo with the bisbenzimidazole fluorochrome Hoechst 33342. British Journal of Cancer, 1989, 60, 715-721.	6.4	35
77	A comparison of the rate of clearance of xenon (^{133}Xe) and pertechnetate ion ($^{99\text{m}}\text{TcO}_4^-$) in murine tumors and normal leg muscles. International Journal of Radiation Applications and Instrumentation Part B, Nuclear Medicine and Biology, 1988, 15, 381-390.	0.3	7
78	Hypoxia induces DNA overreplication and enhances metastatic potential of murine tumor cells.. Proceedings of the National Academy of Sciences of the United States of America, 1988, 85, 9533-9537.	7.1	354
79	Tumor Biology. American Journal of Clinical Oncology: Cancer Clinical Trials, 1988, 11, 253-274.	1.3	29
80	Generation of drug-resistant variants in metastatic B16 mouse melanoma cell lines. Cancer Research, 1987, 47, 2604-8.	0.9	60
81	Dynamic heterogeneity: characterization of two cell lines derived from experimental lung metastases of mouse KHT fibrosarcoma. Invasion & Metastasis, 1987, 7, 217-29.	0.5	13
82	Biophysical basis of hypoxic radioprotection by deoxygenated dextran-hemoglobin. International Journal of Radiation Oncology Biology Physics, 1986, 12, 1303-1306.	0.8	4
83	Sensitizers and radiation dose fractionation: Results and interpretations. International Journal of Radiation Oncology Biology Physics, 1986, 12, 1049-1054.	0.8	60
84	Dynamic heterogeneity: isolation of murine tumor cell populations enriched for metastatic variants and quantification of the unstable expression of the phenotype. Clinical and Experimental Metastasis, 1986, 4, 153-176.	3.3	34
85	Studies of the in vivo and in vitro cytotoxicity of the drug RSU-1069. British Journal of Cancer, 1986, 53, 743-751.	6.4	41
86	Quantitative genetic analysis of tumor progression. Cancer and Metastasis Reviews, 1985, 4, 173-192.	5.9	81
87	Dynamic heterogeneity: rapid generation of metastatic variants in mouse B16 melanoma cells. Science, 1984, 224, 998-1001.	12.6	134
88	Initial studies of hypoxic radioprotection by deoxygenated dextran-hemoglobin. International Journal of Radiation Oncology Biology Physics, 1984, 10, 369-373.	0.8	5
89	Dynamic heterogeneity and metastasis. Journal of Cellular Physiology, 1984, 121, 99-103.	4.1	41
90	Rapid phenotype variation in cells derived from lung metastases of KHT fibrosarcoma. Invasion & Metastasis, 1984, 4, 225-37.	0.5	27

#	ARTICLE	IF	CITATIONS
91	Post-irradiation lung density changes measured by computerized tomography. International Journal of Radiation Oncology Biology Physics, 1983, 9, 847-852.	0.8	47
92	Effect of tumor blood flow manipulations on radiation response. International Journal of Radiation Oncology Biology Physics, 1983, 9, 1321-1325.	0.8	29
93	Response of mouse lung to irradiation at different dose-rates. International Journal of Radiation Oncology Biology Physics, 1983, 9, 1043-1047.	0.8	27
94	Hypoxia and the Radiation Response of Tumors. Advances in Experimental Medicine and Biology, 1983, 159, 17-35.	1.6	6
95	The development of improved ultrasound heaters suitable for superficial tissue heating. Medical Physics, 1982, 9, 888-897.	3.0	21
96	Metastatic variants are generated spontaneously at a high rate in mouse KHT tumor.. Proceedings of the National Academy of Sciences of the United States of America, 1982, 79, 5547-5551.	7.1	114
97	Radiation dose fractionation studies with hypoxic cell radiosensitizers using a murine tumor. International Journal of Radiation Oncology Biology Physics, 1982, 8, 483-485.	0.8	5
98	Radiobiological Studies of Cells in Multicellular Spheroids Using a Sequential Trypsinization Technique. Radiation Research, 1981, 86, 368.	1.5	20
99	Tumor heterogeneity and stability of the metastatic phenotype of mouse KHT sarcoma cells. Cancer Research, 1981, 41, 1368-72.	0.9	65
100	Radiation-Induced Changes in the in Vivo Growth Rate of KHT Sarcoma Cells: Implications for the Comparison of Growth Delay and Cell Survival. Radiation Research, 1980, 83, 99.	1.5	13
101	An appraisal of in vivo assays of excised tumours. The British Journal of Cancer Supplement, 1980, 4, 230-9.	0.1	12
102	Radiation-induced changes in the in vivo growth rate of KHT sarcoma cells: implications for the comparison of growth delay and cell survival. Radiation Research, 1980, 83, 99-108.	1.5	4
103	The in vivo radiation response of an experimental tumor: The effect of exposing tumor-bearing mice to a reduced oxygen environment prior to but not during irradiation. International Journal of Radiation Oncology Biology Physics, 1979, 5, 61-68.	0.8	38
104	Relationship of tumor blood flow with radiation and drug response. International Journal of Radiation Oncology Biology Physics, 1979, 5, 1767-1772.	0.8	6
105	Combined nitrogen mustard-radiation studies with a mouse tumor. International Journal of Radiation Oncology Biology Physics, 1979, 5, 1611-1616.	0.8	7
106	Animal age: A factor influencing the time of death following local thoracic irradiation. International Journal of Radiation Oncology Biology Physics, 1979, 5, 2069-2072.	0.8	9
107	The Effect of Intercellular Contact on the Radiation Sensitivity of KHT Sarcoma Cells. Radiation Research, 1979, 77, 182.	1.5	41
108	Anaesthesia and efficacy of hyperbaric oxygen in radiation therapy. British Journal of Radiology, 1979, 52, 1006-1006.	2.2	3

#	ARTICLE	IF	CITATIONS
109	Cell cycle distribution of chronically hypoxic cells and determination of the clonogenic potential of cells accumulated in G2 + M phases after irradiation of a solid tumor in vivo. <i>Cancer Research</i> , 1979, 39, 1891-7.	0.9	70
110	The effect of intercellular contact on the radiation sensitivity of KHT sarcoma cells. <i>Radiation Research</i> , 1979, 77, 182-92.	1.5	14
111	Combined radiotherapy-chemotherapy of lewis lung carcinoma. <i>International Journal of Radiation Oncology Biology Physics</i> , 1978, 4, 49-52.	0.8	49
112	Smoking: The influence of carboxyhemoglobin (HbCO) on tumor oxygenation and response to radiation. <i>International Journal of Radiation Oncology Biology Physics</i> , 1978, 4, 657-662.	0.8	47
113	The effect of chronic reductions in the arterial partial pressure of oxygen on the radiation response of an experimental tumour. <i>British Journal of Radiology</i> , 1978, 51, 992-996.	2.2	6
114	The effect of misonidazole in combination with radiation dose fractionation. <i>The British Journal of Cancer Supplement</i> , 1978, 3, 255-8.	0.1	4
