#	ARTICLE	IF	CITATIONS
1	Environmental impact of textile reuse and recycling – A review. <i>Journal of Cleaner Production</i> , 2018, 184, 353-365.	9.3	529
2	The environmental price of fast fashion. <i>Nature Reviews Earth & Environment</i> , 2020, 1, 189-200.	29.7	514
3	Life Cycle Assessment for Sustainable Metropolitan Water Systems Planning. <i>Environmental Science & Technology</i> , 2004, 38, 3465-3473.	10.0	291
4	Review of methods addressing freshwater use in life cycle inventory and impact assessment. <i>International Journal of Life Cycle Assessment</i> , 2013, 18, 707-721.	4.7	268
5	Life cycle assessment of food waste management options. <i>Journal of Cleaner Production</i> , 2005, 13, 275-286.	9.3	240
6	Red Meat Production in Australia: Life Cycle Assessment and Comparison with Overseas Studies. <i>Environmental Science & Technology</i> , 2010, 44, 1327-1332.	10.0	182
7	Life cycle assessment of clothing libraries: can collaborative consumption reduce the environmental impact of fast fashion?. <i>Journal of Cleaner Production</i> , 2017, 162, 1368-1375.	9.3	176
8	How City Dwellers Affect Their Resource Hinterland. <i>Journal of Industrial Ecology</i> , 2010, 14, 73-90.	5.5	172
9	Aggregating sustainability indicators: Beyond the weighted sum. <i>Journal of Environmental Management</i> , 2012, 111, 24-33.	7.8	171
10	Review of life-cycle based methods for absolute environmental sustainability assessment and their applications. <i>Environmental Research Letters</i> , 2020, 15, 083001.	5.2	121
11	Properties, performance and associated hazards of state-of-the-art durable water repellent (DWR) chemistry for textile finishing. <i>Environment International</i> , 2016, 91, 251-264.	10.0	100
12	Environmental Comparison of Biosolids Management Systems Using Life Cycle Assessment. <i>Environmental Science & Technology</i> , 2009, 43, 2674-2679.	10.0	98
13	A life cycle assessment (LCA)-based approach to guiding an industry sector towards sustainability: the case of the Swedish apparel sector. <i>Journal of Cleaner Production</i> , 2016, 133, 691-700.	9.3	96
14	Using the planetary boundaries framework for setting impact-reduction targets in LCA contexts. <i>International Journal of Life Cycle Assessment</i> , 2015, 20, 1684-1700.	4.7	94
15	Life cycle assessment of construction materials: the influence of assumptions in end-of-life modelling. <i>International Journal of Life Cycle Assessment</i> , 2014, 19, 723-731.	4.7	88
16	A Carbon Footprint of Textile Recycling: A Case Study in Sweden. <i>Journal of Industrial Ecology</i> , 2015, 19, 676-687.	5.5	86
17	The need to decelerate fast fashion in a hot climate - A global sustainability perspective on the garment industry. <i>Journal of Cleaner Production</i> , 2021, 295, 126390.	9.3	85
18	Chemical contaminants in feedlot wastes: Concentrations, effects and attenuation. <i>Environment International</i> , 2008, 34, 839-859.	10.0	81

#	ARTICLE	IF	CITATIONS
19	Allocation in LCAs of biorefinery products: implications for results and decision-making. <i>Journal of Cleaner Production</i> , 2015, 93, 213-221.	9.3	79
20	Accounting for water use in Australian red meat production. <i>International Journal of Life Cycle Assessment</i> , 2010, 15, 311-320.	4.7	73
21	Selenium in sediments, pore waters and benthic infauna of Lake Macquarie, New South Wales, Australia. <i>Marine Environmental Research</i> , 1999, 47, 491-508.	2.5	66
22	A hybrid life cycle assessment model for comparison with conventional methodologies in Australia. <i>International Journal of Life Cycle Assessment</i> , 2009, 14, 508-516.	4.7	62
23	Including Pathogen Risk in Life Cycle Assessment of Wastewater Management. 1. Estimating the Burden of Disease Associated with Pathogens. <i>Environmental Science & Technology</i> , 2014, 48, 9438-9445.	10.0	59
24	Life cycle assessment of pig slurry treatment technologies for nutrient redistribution in Denmark. <i>Journal of Environmental Management</i> , 2014, 132, 60-70.	7.8	57
25	Ecolabels as drivers of clothing design. <i>Journal of Cleaner Production</i> , 2015, 99, 345-353.	9.3	57
26	Review of Environmental Assessment Case Studies Blending Elements of Risk Assessment and Life Cycle Assessment. <i>Environmental Science & Technology</i> , 2015, 49, 13083-13093.	10.0	56
27	An Outdoor Aging Study to Investigate the Release of Per- And Polyfluoroalkyl Substances (PFAS) from Functional Textiles. <i>Environmental Science & Technology</i> , 2022, 56, 3471-3479.	10.0	51
28	A streamlined sustainability assessment tool for improved decision making in the urban water industry. <i>Integrated Environmental Assessment and Management</i> , 2012, 8, 183-193.	2.9	48
29	Life cycle assessment (LCA) of urban water infrastructure: emerging approaches to balance objectives and inform comprehensive decision-making. <i>Environmental Science: Water Research and Technology</i> , 2017, 3, 1002-1014.	2.4	47
30	Selenium contamination, redistribution and remobilisation in sediments of Lake Macquarie, NSW. <i>Organic Geochemistry</i> , 1999, 30, 1287-1300.	1.8	46
31	Including Pathogen Risk in Life Cycle Assessment of Wastewater Management. 2. Quantitative Comparison of Pathogen Risk to Other Impacts on Human Health. <i>Environmental Science & Technology</i> , 2014, 48, 9446-9453.	10.0	46
32	Hotspot identification in the clothing industry using social life cycle assessment—opportunities and challenges of input-output modelling. <i>International Journal of Life Cycle Assessment</i> , 2018, 23, 536-546.	4.7	45
33	Is Unbleached Cotton Better Than Bleached? Exploring the Limits of Life-Cycle Assessment in the Textile Sector. <i>Clothing and Textiles Research Journal</i> , 2015, 33, 231-247.	3.4	43
34	A hybrid life cycle assessment of water treatment chemicals: an Australian experience. <i>International Journal of Life Cycle Assessment</i> , 2013, 18, 1291-1301.	4.7	42
35	Moving down the cause-effect chain of water and land use impacts: An LCA case study of textile fibres. <i>Resources, Conservation and Recycling</i> , 2013, 73, 104-113.	10.8	42
36	Making the most of LCA in technical inter-organisational R&D projects. <i>Journal of Cleaner Production</i> , 2014, 70, 97-104.	9.3	42

#	ARTICLE	IF	CITATIONS
37	Managing Adaptation of Urban Water Systems in a Changing Climate. <i>Water Resources Management</i> , 2012, 26, 1953-1981.	3.9	41
38	Improved life cycle modelling of benefits from sewage sludge anaerobic digestion and land application. <i>Resources, Conservation and Recycling</i> , 2017, 122, 126-134.	10.8	41
39	Environmental Prospects for Mixed Textile Recycling in Sweden. <i>ACS Sustainable Chemistry and Engineering</i> , 2019, 7, 11682-11690.	6.7	41
40	Methodological issues in life cycle assessment of mixed-culture polyhydroxyalkanoate production utilising waste as feedstock. <i>New Biotechnology</i> , 2014, 31, 383-393.	4.4	39
41	Assessing burden of disease as disability adjusted life years in life cycle assessment. <i>Science of the Total Environment</i> , 2015, 530-531, 120-128.	8.0	38
42	Environmental assessment of air to water machinesâ€™ triangulation to manage scope uncertainty. <i>International Journal of Life Cycle Assessment</i> , 2013, 18, 1149-1157.	4.7	37
43	Municipal gravity sewers: An unrecognised source of nitrous oxide. <i>Science of the Total Environment</i> , 2014, 468-469, 211-218.	8.0	36
44	Life cycle inventory practices for major nitrogen, phosphorus and carbon flows in wastewater and sludge management systems. <i>International Journal of Life Cycle Assessment</i> , 2016, 21, 1197-1212.	4.7	36
45	An (Eco)Toxicity Life Cycle Impact Assessment Framework for Per- And Polyfluoroalkyl Substances. <i>Environmental Science & Technology</i> , 2020, 54, 6224-6234.	10.0	33
46	Quantitative systems analysis as a strategic planning approach for metropolitan water service providers. <i>Water Science and Technology</i> , 2005, 52, 11-20.	2.5	30
47	Streamlining life cycle inventory data generation in agriculture using traceability data and information and communication technologies â€™ part I: concepts and technical basis. <i>Journal of Cleaner Production</i> , 2014, 69, 60-66.	9.3	30
48	Streamlining life cycle inventory data generation in agriculture using traceability data and information and communication technologies â€™ part II: application to viticulture. <i>Journal of Cleaner Production</i> , 2015, 87, 119-129.	9.3	30
49	Towards More Holistic Environmental Impact Assessment: Hybridisation of Life Cycle Assessment and Quantitative Risk Assessment. <i>Procedia CIRP</i> , 2015, 29, 378-383.	1.9	29
50	Global and local health burden trade-off through the hybridisation of quantitative microbial risk assessment and life cycle assessment to aid water management. <i>Water Research</i> , 2015, 79, 26-38.	11.3	27
51	Life-Cycle Assessment of Biosolids Processing Options. <i>Journal of Industrial Ecology</i> , 2001, 5, 103-121.	5.5	26
52	Routledge Handbook of Sustainability and Fashion. , 0, , .		26
53	Including pathogen risk in life cycle assessment: the effect of modelling choices in the context of sewage sludge management. <i>International Journal of Life Cycle Assessment</i> , 2016, 21, 60-69.	4.7	25
54	Greening the Street-Level Procurer: Challenges in the Strongly Decentralized Swedish System. <i>Journal of Consumer Policy</i> , 2016, 39, 467-483.	1.3	23

#	ARTICLE	IF	CITATIONS
55	Estimating human toxicity potential of land application of sewage sludge: the effect of modelling choices. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 731-743.	4.7	23
56	Popularize or publish? Growth in Australia. <i>International Journal of Life Cycle Assessment</i> , 2009, 14, 503-507.	4.7	22
57	Three methods for strategic product toxicity assessment—the case of the cotton T-shirt. <i>International Journal of Life Cycle Assessment</i> , 2015, 20, 903-912.	4.7	22
58	A life cycle perspective of slurry acidification strategies under different nitrogen regulations. <i>Journal of Cleaner Production</i> , 2016, 127, 591-599.	9.3	22
59	Monitoring bacterial indicators and pathogens in cattle feedlot waste by real-time PCR. <i>Water Research</i> , 2010, 44, 1381-1388.	11.3	19
60	Improving odour assessment in LCA—the odour footprint. <i>International Journal of Life Cycle Assessment</i> , 2014, 19, 1891-1900.	4.7	18
61	Dissolved methane in the influent of three Australian wastewater treatment plants fed by gravity sewers. <i>Science of the Total Environment</i> , 2017, 599-600, 85-93.	8.0	18
62	Combining in Silico Tools with Multicriteria Analysis for Alternatives Assessment of Hazardous Chemicals: A Case Study of Decabromodiphenyl Ether Alternatives. <i>Environmental Science & Technology</i> , 2019, 53, 6341-6351.	10.0	17
63	Including Pathogen Risk in Life Cycle Assessment of Wastewater Management. Implications for Selecting the Functional Unit. <i>Environmental Science & Technology</i> , 2015, 49, 14-15.	10.0	16
64	Method for technical, economic and environmental assessment of advanced sludge processing routes. <i>Water Science and Technology</i> , 2014, 69, 2407-2416.	2.5	14
65	Selenium associations in estuarine sediments: Redox effects. <i>Water, Air, and Soil Pollution</i> , 1997, 99, 275-282.	2.4	12
66	Understanding the impacts of allocation approaches during process-based life cycle assessment of water treatment chemicals. <i>Integrated Environmental Assessment and Management</i> , 2014, 10, 87-94.	2.9	12
67	Carbon footprints in the textile industry. , 2015, , 3-30.		12
68	Sharing is caring—the importance of capital goods when assessing environmental impacts from private and shared laundry systems in Sweden. <i>International Journal of Life Cycle Assessment</i> , 2021, 26, 1085-1099.	4.7	11
69	Consequential cradle-to-gate carbon footprint of water treatment chemicals using simple and complex marginal technologies for electricity supply. <i>International Journal of Life Cycle Assessment</i> , 2014, 19, 1974-1984.	4.7	10
70	Life cycle assessment of sludge management with phosphorus utilisation and improved hygienisation in Sweden. <i>Water Science and Technology</i> , 2017, 75, 2013-2024.	2.5	10
71	Using quantitative microbial risk assessment and life cycle assessment to assess management options in urban water and sanitation infrastructures: Opportunities and unresolved issues. <i>Microbial Risk Analysis</i> , 2017, 5, 71-77.	2.3	10
72	Combining <i>In Silico</i> Tools with Multicriteria Analysis for Alternatives Assessment of Hazardous Chemicals: Accounting for the Transformation Products of decaBDE and Its Alternatives. <i>Environmental Science & Technology</i> , 2021, 55, 1088-1098.	10.0	10

#	ARTICLE	IF	CITATIONS
73	Occurrence of ectoparasiticides in Australian beef cattle feedlot wastes. <i>Environmental Pollution</i> , 2013, 174, 265-272.	7.5	9
74	Will Clothing Be Sustainable? Clarifying Sustainable Fashion. <i>Textile Science and Clothing Technology</i> , 2017, , 1-45.	0.5	9
75	Prospective environmental risk screening of seven advanced materials based on production volumes and aquatic ecotoxicity. <i>NanoImpact</i> , 2022, 25, 100393.	4.5	9
76	How information about hazardous fluorinated substances increases willingness-to-pay for alternative outdoor garments: A Swedish survey experiment. <i>Journal of Cleaner Production</i> , 2018, 202, 130-138.	9.3	8
77	Perspectives on quantifying and influencing household metabolism. <i>Journal of Environmental Planning and Management</i> , 2017, 60, 178-203.	4.5	7
78	Integrating Sustainability Considerations into Product Development: A Practical Tool for Prioritising Social Sustainability Indicators and Experiences from Real Case Application. , 2011, , 3-14.		7
79	What difference can drop-in substitution actually make? A life cycle assessment of alternative water repellent chemicals. <i>Journal of Cleaner Production</i> , 2021, 329, 129661.	9.3	7
80	Towards a deeper and broader ecological footprint. <i>Proceedings of the Institution of Civil Engineers: Engineering Sustainability</i> , 2008, 161, 31-37.	0.7	6
81	No stain, no pain – A multidisciplinary review of factors underlying domestic laundering. <i>Energy Research and Social Science</i> , 2022, 84, 102442.	6.4	6
82	An integrated investigation of anthropogenic selenium contamination in Lake Macquarie, NSW. <i>Pure and Applied Chemistry</i> , 1997, 69, 2387-2402.	1.9	5
83	Marine nitrous oxide emissions: An unknown liability for the international water sector. <i>Environmental Science and Policy</i> , 2013, 33, 209-221.	4.9	5
84	LCA of Forest Products – Challenges and Solutions. <i>Springer Briefs in Molecular Science</i> , 2016, , 25-67.	0.1	5
85	Aggregating local, regional and global burden of disease impact assessment: detecting potential problem shifting in air quality policy making. <i>International Journal of Life Cycle Assessment</i> , 2017, 22, 1543-1557.	4.7	3
86	Modelling Environmental Transport and Fate of Pollutants. , 2019, , 65-93.		3
87	Prospective Life-Cycle Modeling of Quantum Dot Nanoparticles for Use in Photon Upconversion Devices. <i>ACS Sustainable Chemistry and Engineering</i> , 2021, 9, 5187-5195.	6.7	3
88	A Swedish comment on –review: the availability of life-cycle studies in Sweden –™. <i>International Journal of Life Cycle Assessment</i> , 2019, 24, 1758-1759.	4.7	2
89	LCA Methodology. <i>Springer Briefs in Molecular Science</i> , 2016, , 15-23.	0.1	1
90	Qualitative and Quantitative Risk Assessment. , 2019, , 118-138.		1

#	ARTICLE	IF	CITATIONS
91	Selenium Associations in Estuarine Sediments: Redox Effects. Water, Air, and Soil Pollution, 1997, 99, 275-282.	2.4	0
92	Future Research Needs. Springer Briefs in Molecular Science, 2016, , 69-72.	0.1	0
93	The Earth System. , 2019, , 19-43.		0
94	Impacts of Chemical Pollution. , 2019, , 44-64.		0
95	Environmental Assessment of Products and Processes. , 2019, , 139-169.		0
96	The Engineer's Role in Environmental Protection. , 2019, , 1-18.		0
97	Introduction to Toxicology. , 2019, , 94-117.		0
98	Regulatory Structures. , 2019, , 170-197.		0
