#	ARTICLE	IF	CITATIONS
1	The dust-continuum size of TNG50 galaxies at $z=1$: a comparison with the distribution of stellar light, stars, dust, and H ₂ . Monthly Notices of the Royal Astronomical Society, 2022, 510, 3321-3334.	1.6	37
2	High-redshift predictions from IllustrisTNG III. Infrared luminosity functions, obscured star formation, and dust temperature of high-redshift galaxies. Monthly Notices of the Royal Astronomical Society, 2022, 510, 5560-5578.	1.6	26
3	Mass of the dynamically hot inner stellar halo predicts the ancient accreted stellar mass. Astronomy and Astrophysics, 2022, 660, A20.	2.1	15
4	First Results from SMAUG: Insights into Star Formation Conditions from Spatially Resolved ISM Properties in TNG50. Astrophysical Journal, 2022, 926, 139.	1.6	3
5	The column densities of molecular gas across cosmic time: bridging observations and simulations. Monthly Notices of the Royal Astronomical Society, 2022, 512, 4736-4751.	1.6	6
6	The evolution of the barred galaxy population in the TNG50 simulation. Monthly Notices of the Royal Astronomical Society, 2022, 512, 5339-5357.	1.6	26
7	Galactic angular momentum in the IllustrisTNG simulation I. Connection to morphology, halo spin, and black hole mass. Monthly Notices of the Royal Astronomical Society, 2022, 512, 5978-5994.	1.6	21
8	High and low S ₄₅₀ index bulges in Milky Way- and M31-like galaxies: origin and connection to the bar with TNG50. Monthly Notices of the Royal Astronomical Society, 2022, 512, 2537-2555.	1.6	9
9	Cooling flows around cold clouds in the circumgalactic medium: steady-state models and comparison with TNG50. Monthly Notices of the Royal Astronomical Society, 2022, 510, 3561-3574.	1.6	8
10	Cool circumgalactic gas in galaxy clusters: connecting the DESI legacy imaging survey and SDSS DR16 Mg absorbers. Monthly Notices of the Royal Astronomical Society, 2022, 513, 3210-3227.	1.6	9
11	Exploring the effect of baryons on the radial distribution of satellite galaxies with GAMA and IllustrisTNG. Monthly Notices of the Royal Astronomical Society, 2022, 514, 4676-4695.	1.6	2
12	Morphological decomposition of TNG50 galaxies: methodology and catalogue. Monthly Notices of the Royal Astronomical Society, 2022, 515, 1524-1543.	1.6	12
13	On the formation of massive quiescent galaxies with diverse morphologies in the TNG50 simulation. Monthly Notices of the Royal Astronomical Society, 2022, 515, 213-228.	1.6	16
14	SDSS-IV MaNGA: Cannibalism Caught in the Act On the Frequency of Occurrence of Multiple Cores in Brightest Cluster Galaxies. Astrophysical Journal, 2022, 933, 61.	1.6	2
15	The TNG50 Simulation: Highly-Resolved Galaxies in a Large Cosmological Volume to the Present Day. , 2021, , 5-22.		0
16	Submillimetre galaxies in cosmological hydrodynamical simulations an opportunity for constraining feedback models. Monthly Notices of the Royal Astronomical Society, 2021, 502, 2922-2933.	1.6	20
17	Supermassive black holes in cosmological simulations I: $M_{BH} \sim M_{\star}$ relation and black hole mass function. Monthly Notices of the Royal Astronomical Society, 2021, 503, 1940-1975.	1.6	63
18	The stellar halos of ETGs in the IllustrisTNG simulations. Astronomy and Astrophysics, 2021, 647, A95.	2.1	34

#	ARTICLE	IF	CITATIONS
19	Characterizing the abundance, properties, and kinematics of the cool circumgalactic medium of galaxies in absorption with SDSS DR16. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 504, 65-88.	1.6	17
20	Properties of the ionized CGM and IGM: tests for galaxy formation models from the Sunyaev-Zel'dovich effect. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 504, 5131-5143.	1.6	20
21	Voyage through the hidden physics of the cosmic web. <i>Experimental Astronomy</i> , 2021, 51, 1043-1079.	1.6	9
22	Galaxy formation with L-GALAXIES: modelling the environmental dependency of galaxy evolution and comparing with observations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 505, 492-514.	1.6	27
23	Anisotropic satellite galaxy quenching modulated by black hole activity. <i>Nature</i> , 2021, 594, 187-190.	13.7	27
24	Magnetization of the intergalactic medium in the IllustrisTNG simulations: the importance of extended, outflow-driven bubbles. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 505, 5038-5057.	1.6	22
25	Gas-phase metallicity gradients of TNG50 star-forming galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 506, 3024-3048.	1.6	40
26	The physical origins and dominant emission mechanisms of Lyman alpha haloes: results from the TNG50 simulation in comparison to MUSE observations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 506, 5129-5152.	1.6	38
27	The CAMELS Project: Cosmology and Astrophysics with Machine-learning Simulations. <i>Astrophysical Journal</i> , 2021, 915, 71.	1.6	113
28	Quenched fractions in the IllustrisTNG simulations: comparison with observations and other theoretical models. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 506, 4760-4780.	1.6	66
29	The cold circumgalactic medium in emission: Mg II haloes in TNG50. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 507, 4445-4463.	1.6	29
30	Spatially resolved star formation and inside-out quenching in the TNG50 simulation and 3D-HST observations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 508, 219-235.	1.6	56
31	The abundance of satellites around Milky Way- and M31-like galaxies with the TNG50 simulation: a matter of diversity. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 507, 4211-4240.	1.6	41
32	Impact of gas-based seeding on supermassive black hole populations at $z \approx 7$. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 507, 2012-2036.	1.6	5
33	Predictions for anisotropic X-ray signatures in the circumgalactic medium: imprints of supermassive black hole driven outflows. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 508, 1563-1581.	1.6	21
34	The cumulative star formation histories of dwarf galaxies with TNG50. I: environment-driven diversity and connection to quenching. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 508, 1652-1674.	1.6	32
35	Quiescent ultra-diffuse galaxies in the field originating from backsplash orbits. <i>Nature Astronomy</i> , 2021, 5, 1255-1260.	4.2	32
36	Cosmic metal density evolution in neutral gas: insights from observations and cosmological simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021, 508, 3535-3550.	1.6	16

#	ARTICLE	IF	CITATIONS
37	Comparing galaxy formation in the L-GALAXIES semi-analytical model and the IllustrisTNG simulations. Monthly Notices of the Royal Astronomical Society, 2021, 502, 1051-1069.	1.6	22
38	Molecular hydrogen in IllustrisTNG galaxies: carefully comparing signatures of environment with local CO and SFR data. Monthly Notices of the Royal Astronomical Society, 2021, 502, 3158-3178.	1.6	25
39	A deep learning approach to test the small-scale galaxy morphology and its relationship with star formation activity in hydrodynamical simulations. Monthly Notices of the Royal Astronomical Society, 2021, 501, 4359-4382.	1.6	38
40	Bringing faint active galactic nuclei (AGNs) to light: a view from large-scale cosmological simulations. Monthly Notices of the Royal Astronomical Society, 2021, 508, 4816-4843.	1.6	8
41	X-ray bubbles in the circumgalactic medium of TNG50 Milky Way- and M31-like galaxies: signposts of supermassive black hole activity. Monthly Notices of the Royal Astronomical Society, 2021, 508, 4667-4695.	1.6	36
42	Ultrahigh energy cosmic ray deflection by the intergalactic magnetic field. Physical Review D, 2021, 104, .	1.6	9
43	The Evolutionary Pathways of Disk-, Bulge-, and Halo-dominated Galaxies. Astrophysical Journal, 2021, 919, 135.	1.6	15
44	Toward Precise Galaxy Evolution: A Comparison between Spectral Indices of $z \sim 1$ Galaxies in the IllustrisTNG Simulation and the LEGA-C Survey. Astronomical Journal, 2021, 162, 201.	1.9	9
45	Supermassive black holes in cosmological simulations – II: the AGN population and predictions for upcoming X-ray missions. Monthly Notices of the Royal Astronomical Society, 2021, 509, 3015-3042.	1.6	27
46	Impact of gas spin and Lyman- α flux on black hole seed formation in cosmological simulations: implications for direct collapse. Monthly Notices of the Royal Astronomical Society, 2021, 510, 177-196.	1.6	3
47	DIISC-I: The Discovery of Kinematically Anomalous H I Clouds in M 100. Astrophysical Journal, 2021, 922, 69.	1.6	4
48	A Comparison of Circumgalactic Mg II Absorption between the TNG50 Simulation and the MEGAFLOW Survey. Astrophysical Journal, 2021, 923, 56.	1.6	12
49	Resolving small-scale cold circumgalactic gas in TNG50. Monthly Notices of the Royal Astronomical Society, 2020, 498, 2391-2414.	1.6	100
50	Kinematic Decomposition of IllustrisTNG Disk Galaxies: Morphology and Relation with Morphological Structures. Astrophysical Journal, 2020, 895, 139.	1.6	22
51	Stellar property statistics of massive haloes from cosmological hydrodynamics simulations: common kernel shapes. Monthly Notices of the Royal Astronomical Society, 2020, 495, 686-704.	1.6	26
52	Predictions for the angular dependence of gas mass flow rate and metallicity in the circumgalactic medium. Monthly Notices of the Royal Astronomical Society, 2020, 499, 2462-2473.	1.6	58
53	The fate of disc galaxies in IllustrisTNG clusters. Monthly Notices of the Royal Astronomical Society, 2020, 496, 2673-2703.	1.6	53
54	A redshift-dependent IR τ_{dust} dust attenuation relation for TNG50 galaxies. Monthly Notices of the Royal Astronomical Society, 2020, 497, 4773-4794.	1.6	21

#	ARTICLE	IF	CITATIONS
55	Ejective and preventative: the IllustrisTNG black hole feedback and its effects on the thermodynamics of the gas within and around galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 499, 768-792.	1.6	100
56	Joint galaxy-galaxy lensing and clustering constraints on galaxy formation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 498, 5804-5833.	1.6	11
57	High-redshift JWST predictions from IllustrisTNG: II. Galaxy line and continuum spectral indices and dust attenuation curves. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 495, 4747-4768.	1.6	31
58	Disentangling the formation history of galaxies via population-orbit superposition: method validation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 496, 1579-1597.	1.6	24
59	X-ray signatures of black hole feedback: hot galactic atmospheres in IllustrisTNG and X-ray observations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 494, 549-570.	1.6	44
60	A missing outskirts problem? Comparisons between stellar haloes in the Dragonfly Nearby Galaxies Survey and the TNG100 simulation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 495, 4570-4604.	1.6	31
61	High-redshift JWST predictions from IllustrisTNG: dust modelling and galaxy luminosity functions. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 492, 5167-5201.	1.6	99
62	Baryon-CDM isocurvature galaxy bias with IllustrisTNG. <i>Journal of Cosmology and Astroparticle Physics</i> , 2020, 2020, 005-005.	1.9	22
63	The relationship between black hole mass and galaxy properties: examining the black hole feedback model in IllustrisTNG. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 493, 1888-1906.	1.6	127
64	The Formation History of Subhalos and the Evolution of Satellite Galaxies. <i>Astrophysical Journal</i> , 2020, 893, 139.	1.6	14
65	The stellar halos of ETGs in the IllustrisTNG simulations: The photometric and kinematic diversity of galaxies at large radii. <i>Astronomy and Astrophysics</i> , 2020, 641, A60.	2.1	33
66	Galaxy bias and primordial non-Gaussianity: insights from galaxy formation simulations with IllustrisTNG. <i>Journal of Cosmology and Astroparticle Physics</i> , 2020, 2020, 013-013.	1.9	32
67	Quenched fractions in the IllustrisTNG simulations: the roles of AGN feedback, environment, and pre-processing. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 500, 4004-4024.	1.6	86
68	The kinematics and dark matter fractions of TNG50 galaxies at $z = 2$ from an observational perspective. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 500, 4597-4619.	1.6	17
69	The distinct stellar-to-halo mass relations of satellite and central galaxies: insights from the IllustrisTNG simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 500, 3957-3975.	1.6	32
70	Evolution of the grain size distribution in Milky Way-like galaxies in post-processed IllustrisTNG simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020, 501, 1336-1351.	1.6	9
71	The Angular Momentum of the Circumgalactic Medium in the TNG100 Simulation. <i>Astrophysical Journal</i> , 2020, 895, 17.	1.6	26
72	Correlations between Black Holes and Host Galaxies in the Illustris and IllustrisTNG Simulations. <i>Astrophysical Journal</i> , 2020, 895, 102.	1.6	24

#	ARTICLE	IF	CITATIONS
73	Teaching Neural Networks to Generate Fast Sunyaev-Zel'dovich Maps. <i>Astrophysical Journal</i> , 2020, 902, 129.	1.6	14
74	The IllustrisTNG simulations: public data release. <i>Computational Astrophysics and Cosmology</i> , 2019, 6, .	22.7	698
75	Morphology and star formation in IllustrisTNG: the build-up of spheroids and discs. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 5416-5440.	1.6	109
76	Separate Universe simulations with IllustrisTNG: baryonic effects on power spectrum responses and higher-order statistics. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 488, 2079-2092.	1.6	39
77	A new method to quantify environment and model ram-pressure stripping in N-body simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 4313-4331.	1.6	22
78	First results from the TNG50 simulation: the evolution of stellar and gaseous discs across cosmic time. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 3196-3233.	1.6	453
79	Origin of the galaxy H α mass relation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 96-113.	1.6	31
80	Revealing the galaxy halo connection in IllustrisTNG. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 5693-5711.	1.6	59
81	Identifying Kinematic Structures in Simulated Galaxies Using Unsupervised Machine Learning. <i>Astrophysical Journal</i> , 2019, 884, 129.	1.6	21
82	The Hubble Sequence at $z \sim 0$ in the IllustrisTNG simulation with deep learning. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 489, 1859-1879.	1.6	51
83	First results from the TNG50 simulation: galactic outflows driven by supernovae and black hole feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 3234-3261.	1.6	510
84	ALMACAL VI. Molecular gas mass density across cosmic time via a blind search for intervening molecular absorbers. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 490, 1220-1230.	1.6	23
85	A study of stellar orbit fractions: simulated IllustrisTNG galaxies compared to CALIFA observations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 489, 842-854.	1.6	19
86	Enhancing AGN efficiency and cool-core formation with anisotropic thermal conduction. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 488, 3003-3013.	1.6	22
87	A Quantification of the Butterfly Effect in Cosmological Simulations and Implications for Galaxy Scaling Relations. <i>Astrophysical Journal</i> , 2019, 871, 21.	1.6	65
88	The TNG50 Simulation of the IllustrisTNG Project: Bridging the Gap Between Large Cosmological Volumes and Resolved Galaxies. , 2019, , 5-20.		0
89	Atomic and molecular gas in IllustrisTNG galaxies at low redshift. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019, 487, 1529-1550.	1.6	67
90	A Deep Learning Approach to Galaxy Cluster X-Ray Masses. <i>Astrophysical Journal</i> , 2019, 876, 82.	1.6	55

#	ARTICLE	IF	CITATIONS
91	The morphology and kinematics of the gaseous circumgalactic medium of Milky Way mass galaxies â€“ II. Comparison of IllustrisTNG and Illustris simulation results. Monthly Notices of the Royal Astronomical Society, 2019, 486, 4686-4700.	1.6	20
92	Baryons in the Cosmic Web of IllustrisTNG â€“ I: gas in knots, filaments, sheets, and voids. Monthly Notices of the Royal Astronomical Society, 2019, 486, 3766-3787.	1.6	120
93	The star formation activity of IllustrisTNG galaxies: main sequence, UVJ diagram, quenched fractions, and systematics. Monthly Notices of the Royal Astronomical Society, 2019, 485, 4817-4840.	1.6	176
94	Jellyfish galaxies with the IllustrisTNG simulations â€“ I. Gas-stripping phenomena in the full cosmological context. Monthly Notices of the Royal Astronomical Society, 2019, 483, 1042-1066.	1.6	102
95	Atomic hydrogen in IllustrisTNG galaxies: the impact of environment paralleled with local 21-cm surveys. Monthly Notices of the Royal Astronomical Society, 2019, 483, 5334-5354.	1.6	75
96	Linking galaxy structural properties and star formation activity to black hole activity with IllustrisTNG. Monthly Notices of the Royal Astronomical Society, 2019, 484, 4413-4443.	1.6	59
97	Zooming in on accretion â€“ II. Cold circumgalactic gas simulated with a super-Lagrangian refinement scheme. Monthly Notices of the Royal Astronomical Society, 2019, 483, 4040-4059.	1.6	78
98	The optical morphologies of galaxies in the IllustrisTNG simulation: a comparison to Pan-STARRS observations. Monthly Notices of the Royal Astronomical Society, 2019, 483, 4140-4159.	1.6	236
99	The ALMA Spectroscopic Survey in the HUDF: the Molecular Gas Content of Galaxies and Tensions with IllustrisTNG and the Santa Cruz SAM. Astrophysical Journal, 2019, 882, 137.	1.6	65
100	The abundance, distribution, and physical nature of highly ionized oxygen Oâ€“vi, Oâ€“vii, and Oâ€“viii in IllustrisTNG. Monthly Notices of the Royal Astronomical Society, 2018, 477, 450-479.	1.6	133
101	First results from the IllustrisTNG simulations: the galaxy colour bimodality. Monthly Notices of the Royal Astronomical Society, 2018, 475, 624-647.	1.6	894
102	First results from the IllustrisTNG simulations: the stellar mass content of groups and clusters of galaxies. Monthly Notices of the Royal Astronomical Society, 2018, 475, 648-675.	1.6	983
103	First results from the IllustrisTNG simulations: matter and galaxy clustering. Monthly Notices of the Royal Astronomical Society, 2018, 475, 676-698.	1.6	1,035
104	Simulating galaxy formation with the IllustrisTNG model. Monthly Notices of the Royal Astronomical Society, 2018, 473, 4077-4106.	1.6	1,144
105	The uniformity and time-invariance of the intra-cluster metal distribution in galaxy clusters from the IllustrisTNG simulations. Monthly Notices of the Royal Astronomical Society, 2018, 474, 2073-2093.	1.6	71
106	The size evolution of star-forming and quenched galaxies in the IllustrisTNG simulation. Monthly Notices of the Royal Astronomical Society, 2018, 474, 3976-3996.	1.6	195
107	First results from the IllustrisTNG simulations: a tale of two elements â€“ chemical evolution of magnesium and europium. Monthly Notices of the Royal Astronomical Society, 2018, 477, 1206-1224.	1.6	746
108	The fraction of dark matter within galaxies from the IllustrisTNG simulations. Monthly Notices of the Royal Astronomical Society, 2018, 481, 1950-1975.	1.6	97

#	ARTICLE	IF	CITATIONS
109	Supermassive black holes and their feedback effects in the IllustrisTNG simulation. Monthly Notices of the Royal Astronomical Society, 2018, 479, 4056-4072.	1.6	270
110	A census of cool-core galaxy clusters in IllustrisTNG. Monthly Notices of the Royal Astronomical Society, 2018, 481, 1809-1831.	1.6	68
111	Ingredients for 21 cm Intensity Mapping. Astrophysical Journal, 2018, 866, 135.	1.6	139
112	Modeling the Atomic-to-molecular Transition in Cosmological Simulations of Galaxy Formation. Astrophysical Journal, Supplement Series, 2018, 238, 33.	3.0	71
113	Similar star formation rate and metallicity variability time-scales drive the fundamental metallicity relation. Monthly Notices of the Royal Astronomical Society: Letters, 2018, 477, L16-L20.	1.2	75
114	Chemical pre-processing of cluster galaxies over the past 10 billion years in the IllustrisTNG simulations. Monthly Notices of the Royal Astronomical Society: Letters, 2018, 477, L35-L39.	1.2	21
115	Formation of a Malin 1 analogue in IllustrisTNG by stimulated accretion. Monthly Notices of the Royal Astronomical Society: Letters, 2018, 480, L18-L22.	1.2	27
116	Simulating galaxy formation with black hole driven thermal and kinetic feedback. Monthly Notices of the Royal Astronomical Society, 2017, 465, 3291-3308.	1.6	725
117	The role of mergers and halo spin in shaping galaxy morphology. Monthly Notices of the Royal Astronomical Society, 2017, 467, 3083-3098.	1.6	134
118	Clustering of Mg ⁱⁱ absorption line systems around massive galaxies: an important constraint on feedback processes in galaxy formation. Monthly Notices of the Royal Astronomical Society, 2017, 468, 3737-3745.	1.6	9
119	The inner structure of early-type galaxies in the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2017, 469, 1824-1848.	1.6	62
120	The stellar mass assembly of galaxies in the Illustris simulation: growth by mergers and the spatial distribution of accreted stars. Monthly Notices of the Royal Astronomical Society, 2016, 458, 2371-2390.	1.6	319
121	Shock finding on a moving-mesh â€” II. Hydrodynamic shocks in the Illustris universe. Monthly Notices of the Royal Astronomical Society, 2016, 461, 4441-4465.	1.6	24
122	The morphology and kinematics of neutral hydrogen in the vicinity of $z=0$ galaxies with Milky Way masses â€” a study with the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2016, 462, 3751-3764.	1.6	12
123	Zooming in on accretion â€” I. The structure of halo gas. Monthly Notices of the Royal Astronomical Society, 2016, 460, 2881-2904.	1.6	80
124	On the assembly of dwarf galaxies in clusters and their efficient formation of globular clusters. Monthly Notices of the Royal Astronomical Society, 2016, 455, 2323-2336.	1.6	67
125	The diverse evolutionary paths of simulated high- z massive, compact galaxies to $z=0$. Monthly Notices of the Royal Astronomical Society, 2016, 456, 1030-1048.	1.6	96
126	Lens galaxies in the Illustris simulation: power-law models and the bias of the Hubble constant from time delays. Monthly Notices of the Royal Astronomical Society, 2016, 456, 739-755.	1.6	71

#	ARTICLE	IF	CITATIONS
127	Modelling galactic conformity with the colour-halo age relation in the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2016, 455, 185-198.	1.6	38
128	Recoiling black holes: prospects for detection and implications of spin alignment. Monthly Notices of the Royal Astronomical Society, 2016, 456, 961-989.	1.6	90
129	Galaxy morphology and star formation in the Illustris Simulation at $z=0$. Monthly Notices of the Royal Astronomical Society, 2015, 454, 1886-1908.	1.6	155
130	Hydrogen reionization in the Illustris universe. Monthly Notices of the Royal Astronomical Society, 2015, 453, 3594-3611.	1.6	44
131	An analysis of the evolving comoving number density of galaxies in hydrodynamical simulations. Monthly Notices of the Royal Astronomical Society, 2015, 454, 2770-2786.	1.6	67
132	The merger rate of galaxies in the Illustris simulation: a comparison with observations and semi-empirical models. Monthly Notices of the Royal Astronomical Society, 2015, 449, 49-64.	1.6	472
133	The formation of massive, compact galaxies at $z=2$ in the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2015, 449, 361-372.	1.6	187
134	The Illustris simulation: the evolving population of black holes across cosmic time. Monthly Notices of the Royal Astronomical Society, 2015, 452, 575-596.	1.6	452
135	Modeling the Observability of Recoiling Black Holes as Offset Quasars. Proceedings of the International Astronomical Union, 2015, 11, 317-318.	0.0	0
136	Synthetic galaxy images and spectra from the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2015, 447, 2753-2771.	1.6	106
137	The impact of feedback on cosmological gas accretion. Monthly Notices of the Royal Astronomical Society, 2015, 448, 59-74.	1.6	120
138	The colours of satellite galaxies in the Illustris simulation. Monthly Notices of the Royal Astronomical Society: Letters, 2015, 447, L6-L10.	1.2	59
139	The star formation main sequence and stellar mass assembly of galaxies in the Illustris simulation. Monthly Notices of the Royal Astronomical Society, 2015, 447, 3548-3563.	1.6	201
140	The illustris simulation: Public data release. Astronomy and Computing, 2015, 13, 12-37.	0.8	412
141	Halo mass and assembly history exposed in the faint outskirts: the stellar and dark matter haloes of Illustris galaxies. Monthly Notices of the Royal Astronomical Society, 2014, 444, 237-249.	1.6	117
142	Introducing the Illustris Project: simulating the coevolution of dark and visible matter in the Universe. Monthly Notices of the Royal Astronomical Society, 2014, 444, 1518-1547.	1.6	1,694
143	Introducing the Illustris project: the evolution of galaxy populations across cosmic time. Monthly Notices of the Royal Astronomical Society, 2014, 445, 175-200.	1.6	805
144	Properties of galaxies reproduced by a hydrodynamic simulation. Nature, 2014, 509, 177-182.	13.7	979
