#	ARTICLE	IF	CITATIONS
1	Arbuscular mycorrhizal fungus-mediated interspecific nutritional competition of a pasture legume and grass under drought-stress. <i>Rhizosphere</i> , 2021, 18, 100349.	1.4	7
2	Co-application of a biosolids product and biochar to two coarse-textured pasture soils influenced microbial N cycling genes and potential for N leaching. <i>Scientific Reports</i> , 2021, 11, 955.	1.6	10
3	Polymer-coated rock mineral fertilizer has potential to substitute soluble fertilizer for increasing growth, nutrient uptake, and yield of wheat. <i>Biology and Fertility of Soils</i> , 2020, 56, 381-394.	2.3	17
4	Foliar application of nano-Zn and mycorrhizal inoculation enhanced Zn in grain and yield of two barley (<i>Hordeum vulgare</i>) cultivars under field conditions. <i>Australian Journal of Crop Science</i> , 2020, , 475-484.	0.1	1
5	Nutrient recovery from anaerobic digestion of food waste: impacts of digestate on plant growth and rhizosphere bacterial community composition and potential function in ryegrass. <i>Biology and Fertility of Soils</i> , 2020, 56, 973-989.	2.3	34
6	Plant-Dependent Soil Bacterial Responses Following Amendment With a Multispecies Microbial Biostimulant Compared to Rock Mineral and Chemical Fertilizers. <i>Frontiers in Plant Science</i> , 2020, 11, 550169.	1.7	10
7	Sequential defoliation impacts on colonisation of roots of <i>Lolium rigidum</i> by arbuscular mycorrhizal fungi were primarily determined by root responses. <i>Biology and Fertility of Soils</i> , 2019, 55, 789-800.	2.3	9
8	Reconciling disparate responses to grazing in the arbuscular mycorrhizal symbiosis. <i>Rhizosphere</i> , 2019, 11, 100167.	1.4	21
9	Dairy soil bacterial responses to nitrogen application in simulated Italian ryegrass and white clover pasture. <i>Journal of Dairy Science</i> , 2019, 102, 9495-9504.	1.4	2
10	Fungal Communities Resist Recovery in Sand Mine Restoration. <i>Frontiers in Forests and Global Change</i> , 2019, 2, .	1.0	11
11	Effect of zinc foliar application and mycorrhizal inoculation on morpho-physiological traits and yield parameters of two barley cultivars. <i>Italian Journal of Agronomy</i> , 2019, 14, 67-77.	0.4	5
12	Biochar phosphorus concentration dictates mycorrhizal colonisation, plant growth and soil phosphorus cycling. <i>Scientific Reports</i> , 2019, 9, 5062.	1.6	53
13	Soil disturbance and water stress interact to influence arbuscular mycorrhizal fungi, rhizosphere bacteria and potential for N and C cycling in an agricultural soil. <i>Biology and Fertility of Soils</i> , 2019, 55, 53-66.	2.3	54
14	Potential roles of biological amendments for profitable grain production – A review. <i>Agriculture, Ecosystems and Environment</i> , 2018, 256, 34-50.	2.5	107
15	Fungal inoculants in the field: Is the reward greater than the risk?. <i>Functional Ecology</i> , 2018, 32, 126-135.	1.7	173
16	Application of compost and clay under water-stressed conditions influences functional diversity of rhizosphere bacteria. <i>Biology and Fertility of Soils</i> , 2018, 54, 55-70.	2.3	53
17	The provision of pest and disease information using Information Communication Tools (ICT); an Australian example. <i>Crop Protection</i> , 2018, 103, 20-29.	1.0	20
18	Response of Wheat to a Multiple Species Microbial Inoculant Compared to Fertilizer Application. <i>Frontiers in Plant Science</i> , 2018, 9, 1601.	1.7	33

#	ARTICLE	IF	CITATIONS
19	Amending Poultry Broiler Litter to Prevent the Development of Stable Fly, <i>Stomoxys calcitrans</i> (Diptera: Muscidae) and Other Nuisance Flies. <i>Journal of Economic Entomology</i> , 2018, 111, 2966-2973.	0.8	3
20	A farmerâ€“scientist investigation of soil carbon sequestration potential in a chronosequence of perennial pastures. <i>Land Degradation and Development</i> , 2018, 29, 4301-4312.	1.8	3
21	Nitrogen Additions Promote Decomposition of Soil Organic Carbon in a Tibetan Alpine Meadow. <i>Soil Science Society of America Journal</i> , 2018, 82, 614-621.	1.2	12
22	Arbuscular mycorrhizal fungus responses to disturbance are context-dependent. <i>Mycorrhiza</i> , 2017, 27, 431-440.	1.3	85
23	Biological Indicators for Soil Health: Potential for Development and Use of On-Farm Tests. , 2017, , 123-134.		5
24	Unknown risks to soil biodiversity from commercial fungal inoculants. <i>Nature Ecology and Evolution</i> , 2017, 1, 115.	3.4	41
25	Molecular divergence of fungal communities in soil, roots and hyphae highlight the importance of sampling strategies. <i>Rhizosphere</i> , 2017, 4, 104-111.	1.4	14
26	Farmers’ knowledge and use of soil fauna in agriculture: a worldwide review. <i>Ecology and Society</i> , 2016, 21, .	1.0	40
27	Interactions between biochar and mycorrhizal fungi in a water-stressed agricultural soil. <i>Mycorrhiza</i> , 2016, 26, 565-574.	1.3	72
28	Microbial phylogenetic and functional responses within acidified wastewater communities exhibiting enhanced phosphate uptake. <i>Bioresource Technology</i> , 2016, 220, 55-61.	4.8	17
29	Forage yield, soil water depletion, shoot nitrogen and phosphorus uptake and concentration, of young and old stands of alfalfa in response to nitrogen and phosphorus fertilisation in a semiarid environment. <i>Field Crops Research</i> , 2016, 198, 247-257.	2.3	52
30	Coastal Mycology and Invasive Species: Boundary Conditions for Arbuscular Mycorrhizal (AM) Fungi in Incipient Sand Dunes. <i>Journal of Coastal Research</i> , 2016, 75, 283-287.	0.1	3
31	Predicting infectivity of Arbuscular Mycorrhizal fungi from soil variables using Generalized Additive Models and Generalized Linear Models. <i>Biodiversitas</i> , 2016, 11, .	0.2	2
32	Soil Health and Related Ecosystem Services in Organic Agriculture. <i>Sustainable Agriculture Research</i> , 2015, 4, 116.	0.2	29
33	Potential for Recycling Nutrients from Biosolids Amended with Clay and Lime in Coarse-Textured Water Repellence, Acidic Soils of Western Australia. <i>Applied and Environmental Soil Science</i> , 2015, 1-11.	0.8	3
34	Residual Effects of Lime- and Clay-Amended Biosolids Applied to Coarse-Textured Pasture Soil. <i>Applied and Environmental Soil Science</i> , 2015, 2015, 1-9.	0.8	2
35	Biochar-Soil Interactions in Four Agricultural Soils. <i>Pedosphere</i> , 2015, 25, 729-736.	2.1	30
36	Soil Microbial Responses to Biochars Varying in Particle Size, Surface and Pore Properties. <i>Pedosphere</i> , 2015, 25, 770-780.	2.1	95

#	ARTICLE	IF	CITATIONS
37	Microscopy Observations of Habitable Space in Biochar for Colonization by Fungal Hyphae From Soil. <i>Journal of Integrative Agriculture</i> , 2014, 13, 483-490.	1.7	122
38	Clay addition to lime-amended biosolids overcomes water repellence and provides nitrogen supply in an acid sandy soil. <i>Biology and Fertility of Soils</i> , 2014, 50, 1047-1059.	2.3	18
39	The knowns, known unknowns and unknowns of sequestration of soil organic carbon. <i>Agriculture, Ecosystems and Environment</i> , 2013, 164, 80-99.	2.5	1,143
40	Soil Security: Solving the Global Soil Crisis. <i>Global Policy</i> , 2013, 4, 434-441.	1.0	219
41	Comparison of morphological and molecular genetic quantification of relative abundance of arbuscular mycorrhizal fungi within roots. <i>Mycorrhiza</i> , 2012, 22, 501-513.	1.3	17
42	Synergistic impacts of clay and organic matter on structural and biological properties of a sandy soil. <i>Geoderma</i> , 2012, 183-184, 19-24.	2.3	14
43	Biochars influence seed germination and early growth of seedlings. <i>Plant and Soil</i> , 2012, 353, 273-287.	1.8	201
44	Soil Science teaching principles. <i>Geoderma</i> , 2011, 167-168, 9-14.	2.3	59
45	Relationships between soil organic matter and the soil microbial biomass (size, functional diversity,) Tj ETQq1 1 0.784314 rgBT /Overl 49, 582.	0.6	67
46	Soil-plant-microbe interactions from microscopy to field practice. <i>Plant and Soil</i> , 2011, 348, 1-5.	1.8	7
47	Determination and Prediction of Some Soil Properties using Partial Least Square (PLS) Calibration and Mid-Infra Red (MIR) Spectroscopy Analysis. <i>Jurnal Tanah Tropika</i> , 2011, 16, 93-98.	0.2	3
48	Direct and residual effect of biochar application on mycorrhizal root colonisation, growth and nutrition of wheat. <i>Soil Research</i> , 2010, 48, 546.	0.6	181
49	Association between Burkholderia species and arbuscular mycorrhizal fungus spores in soil. <i>Soil Biology and Biochemistry</i> , 2009, 41, 1757-1759.	4.2	14
50	Influence of arbuscular mycorrhizal fungi, inoculum level and phosphorus placement on growth and phosphorus uptake of <i>Phyllanthus calycinus</i> under jarrah forest soil. <i>Biology and Fertility of Soils</i> , 2008, 44, 815-821.	2.3	12
51	Tolerance and induction of tolerance to Ni of arbuscular mycorrhizal fungi from New Caledonian ultramafic soils. <i>Mycorrhiza</i> , 2008, 19, 1-6.	1.3	30
52	Functional Diversity of Arbuscular Mycorrhizal Fungi on Root Surfaces. , 2008, , 331-349.		1
53	What is Soil Biological Fertility?. , 2007, , 1-15.		19
54	Arbuscular mycorrhizal fungi from three genera induce two-phase plant growth responses on a high P-fixing soil. <i>Plant and Soil</i> , 2007, 292, 181-192.	1.8	20

#	ARTICLE	IF	CITATIONS
55	The promise and the potential consequences of the global transport of mycorrhizal fungal inoculum. <i>Ecology Letters</i> , 2006, 9, 501-515.	3.0	285
56	Soil salinity delays germination and limits growth of hyphae from propagules of arbuscular mycorrhizal fungi. <i>Mycorrhiza</i> , 2006, 16, 371-379.	1.3	228
57	Correlation between mite community structure and gross N fluxes. <i>Soil Biology and Biochemistry</i> , 2004, 36, 191-194.	4.2	13
58	Structure and diversity among rhizobial strains, populations and communities? a review. <i>Soil Biology and Biochemistry</i> , 2004, 36, 1295-1308.	4.2	64
59	Indigenous and introduced arbuscular mycorrhizal fungi contribute to plant growth in two agricultural soils from south-western Australia. <i>Mycorrhiza</i> , 2004, 14, 355-362.	1.3	31
60	A change in the concentration of NaCl in soil alters the rate of hyphal extension of some arbuscular mycorrhizal fungi. <i>Canadian Journal of Botany</i> , 2004, 82, 1235-1242.	1.2	9
61	Limited evidence for short-term succession of microarthropods during early phases of surface litter decomposition. <i>Pedobiologia</i> , 2004, 48, 37-49.	0.5	16
62	Phosphorus uptake by a community of arbuscular mycorrhizal fungi in jarrah forest. <i>Plant and Soil</i> , 2003, 248, 313-320.	1.8	11
63	Invasion of Spores of the Arbuscular Mycorrhizal Fungus <i>Gigaspora decipiens</i> by <i>Burkholderia</i> spp. <i>Applied and Environmental Microbiology</i> , 2003, 69, 6250-6256.	1.4	80
64	Field inoculation with arbuscular mycorrhizal fungi in rehabilitation of mine sites with native vegetation, including <i>Acacia</i> spp.. <i>Australian Systematic Botany</i> , 2003, 16, 131.	0.3	20
65	Diversity and symbiotic effectiveness of <i>Rhizobium leguminosarum</i> bv. <i>trifolii</i> isolates from pasture soils in south-western Australia. <i>Soil Research</i> , 2002, 40, 1319.	0.6	15
66	Effect of low root-zone temperature on nodule initiation in narrow-leafed lupin (<i>Lupinus</i>) Tj ETQqO 0 0 rgBT /Overlock 10 Tf 50,302 Td (a	1.5	12
67	Influence of liming, inoculum level and inoculum placement on root colonization of subterranean clover. <i>Mycorrhiza</i> , 2002, 12, 285-290.	1.3	13
68	Phosphate transport by communities of arbuscular mycorrhizal fungi in intact soil cores. <i>New Phytologist</i> , 2001, 149, 95-103.	3.5	99
69	Changes in free living soil nematode and micro-arthropod communities under a canola - wheat - lupin rotation in Western Australia. <i>Soil Research</i> , 2000, 38, 47.	0.6	15
70	Soil biota and crop residue decomposition during summer and autumn in south-western Australia. <i>Applied Soil Ecology</i> , 2000, 14, 111-124.	2.1	30
71	Glomalean mycorrhizal fungi from tropical Australia. <i>Mycorrhiza</i> , 1999, 8, 305-314.	1.3	101
72	Morphology and infectivity of fine endophyte in a mediterranean environment. <i>Mycological Research</i> , 1999, 103, 1369-1379.	2.5	51

#	ARTICLE	IF	CITATIONS
73	Inhibition of hyphal growth of a vesicular-arbuscular mycorrhizal fungus in soil containing sodium chloride limits the spread of infection from spores. <i>Soil Biology and Biochemistry</i> , 1998, 30, 1639-1646.	4.2	126
74	Increasing the length of hyphae in a sandy soil increases the amount of water-stable aggregates. <i>Applied Soil Ecology</i> , 1996, 3, 149-159.	2.1	112
75	Mycorrhizal fungus propagules in the jarrah forest. <i>New Phytologist</i> , 1995, 131, 461-469.	3.5	71
76	Managing Soils to Enhance Mycorrhizal Benefits in Mediterranean Agriculture. <i>Critical Reviews in Biotechnology</i> , 1995, 15, 213-228.	5.1	21
77	An ecological view of the formation of VA mycorrhizas. <i>Plant and Soil</i> , 1994, 159, 69.	1.8	78
78	Mycorrhizal fungus propagules in the jarrah forest. <i>New Phytologist</i> , 1994, 127, 539-546.	3.5	89
79	Phosphorus, soluble carbohydrates and the competition between two arbuscular mycorrhizal fungi colonizing subterranean clover. <i>New Phytologist</i> , 1994, 127, 101-106.	3.5	57
80	The effect of rain in the dry season on the formation of vesicular-arbuscular mycorrhizas in the growing season of annual clover-based pastures. <i>New Phytologist</i> , 1994, 127, 107-114.	3.5	25
81	The contribution from hyphae, roots and organic carbon constituents to the aggregation of a sandy loam under long-term clover-based and grass pastures. <i>European Journal of Soil Science</i> , 1994, 45, 459-468.	1.8	69
82	Effects of phosphate and nitrogen application on death of the root cortex in spring wheat. <i>New Phytologist</i> , 1993, 123, 375-382.	3.5	13
83	The survival of infective hyphae of vesicular-arbuscular mycorrhizal fungi in dry soil: an interaction with sporulation. <i>New Phytologist</i> , 1993, 124, 473-479.	3.5	65
84	Vesicular-arbuscular mycorrhizas and soil salinity. <i>Mycorrhiza</i> , 1993, 4, 45-57.	1.3	241
85	VA mycorrhizal spores from three species of <i>Acaulospora</i> : germination, longevity and hyphal growth. <i>Mycological Research</i> , 1993, 97, 785-790.	2.5	31
86	Mediation of competition between two colonizing VA mycorrhizal fungi by the host plant. <i>New Phytologist</i> , 1993, 123, 93-98.	3.5	81
87	1 Selection of Inoculant Vesicular-arbuscular Mycorrhizal Fungi. <i>Methods in Microbiology</i> , 1992, 24, 1-21.	0.4	27
88	The effect of long-term applications of phosphorus fertilizer on populations of vesicular-arbuscular mycorrhizal fungi in pastures. <i>Australian Journal of Agricultural Research</i> , 1992, 43, 1131.	1.5	44
89	Calcium modifies pH effects on the growth of acid-tolerant and acid-sensitive <i>Rhizobium meliloti</i> . <i>Australian Journal of Agricultural Research</i> , 1992, 43, 765.	1.5	51
90	The rate of development of mycorrhizas affects the onset of sporulation and production of external hyphae by two species of <i>Acaulospora</i> . <i>Mycological Research</i> , 1992, 96, 643-650.	2.5	97

#	ARTICLE	IF	CITATIONS
91	The involvement of mycorrhizas in assessment of genetically dependent efficiency of nutrient uptake and use. <i>Plant and Soil</i> , 1992, 146, 169-179.	1.8	90
92	External hyphae of vesicular-arbuscular mycorrhizal fungi associated with <i>Trifolium subterraneum</i> L.. 1. Spread of hyphae and phosphorus inflow into roots. <i>New Phytologist</i> , 1992, 120, 371-380.	3.5	836
93	External hyphae of vesicular-arbuscular mycorrhizal fungi associated with <i>Trifolium subterraneum</i> L.. 2. Hyphal transport of ³² P over defined distances. <i>New Phytologist</i> , 1992, 120, 509-516.	3.5	313
94	Roots of Jarrah Forest Plants .I. Mycorrhizal Associations of Shrubs and Herbaceous Plants. <i>Australian Journal of Botany</i> , 1991, 39, 445.	0.3	121
95	Factors influencing the occurrence of vesicular-arbuscular mycorrhizas. <i>Agriculture, Ecosystems and Environment</i> , 1991, 35, 121-150.	2.5	277
96	Soil mediated effects of phosphorus supply on the formation of mycorrhizas by <i>Scutellispora calospora</i> (Nicol. & Gerd.) Walker & Sanders on subterranean clover. <i>New Phytologist</i> , 1991, 118, 463-469.	3.5	53
97	The effect of soil disturbance on vesicular-arbuscular mycorrhizal fungi in soils from different vegetation types. <i>New Phytologist</i> , 1991, 118, 471-476.	3.5	207
98	Mycorrhizas formed by <i>Gigaspora calospora</i> and <i>Glomus fasciculatum</i> on subterranean clover in relation to soluble carbohydrate concentrations in roots. <i>New Phytologist</i> , 1990, 114, 217-225.	3.5	79
99	Acacias respond to additions of phosphorus and to inoculation with VA mycorrhizal fungi in soils stockpiled during mineral sand mining. <i>Plant and Soil</i> , 1989, 115, 99-108.	1.8	58
100	Soil disturbance reduces the infectivity of external hyphae of vesicular-arbuscular mycorrhizal fungi. <i>New Phytologist</i> , 1989, 112, 93-99.	3.5	230
101	Hyphae of a vesicular-arbuscular mycorrhizal fungus maintain infectivity in dry soil, except when the soil is disturbed. <i>New Phytologist</i> , 1989, 112, 101-107.	3.5	151
102	The Loss of Va Mycorrhizal Infectivity During Bauxite Mining May Limit the Growth of <i>Acacia pulchella</i> R.Br.. <i>Australian Journal of Botany</i> , 1989, 37, 33.	0.3	45
103	Revegetation in an iron ore mine - Nutrient requirements for plant growth and the potential role of vesicular arbuscular (VA) mycorrhizal fungi. <i>Soil Research</i> , 1988, 26, 497.	0.6	42
104	The Effect of Surface Mining on the Infectivity of Vesicular-Arbuscular Mycorrhizal Fungi. <i>Australian Journal of Botany</i> , 1987, 35, 641.	0.3	78
105	Seasonal variation in the infectivity of VA mycorrhizal fungi in annual pastures in a Mediterranean environment. <i>Australian Journal of Agricultural Research</i> , 1987, 38, 707.	1.5	33
106	THE SPREAD OF MYCORRHIZAL INFECTION BY <i>GIGASPORA CALOSPORA</i> FROM A LOCALIZED INOCULUM. <i>New Phytologist</i> , 1987, 106, 727-734.	3.5	16
107	EFFECTS OF PHOSPHATE SUPPLY AND INOCULATION WITH A VESICULAR-ARBUSCULAR MYCORRHIZAL FUNGUS ON THE DEATH OF THE ROOT CORTEX OF WHEAT, RAPE AND SUBTERRANEAN CLOVER. <i>New Phytologist</i> , 1986, 103, 349-357.	3.5	20
108	EFFECTS OF PHOSPHORUS ON THE FORMATION OF MYCORRHIZAS BY <i>GIGASPORA CALOSPORA</i> AND <i>GLOMUS FASCICULATUM</i> IN RELATION TO ROOT CARBOHYDRATES. <i>New Phytologist</i> , 1986, 103, 751-765.	3.5	197

#	ARTICLE	IF	CITATIONS
109	Variation in the size and shape of Darwin's finches. <i>Biological Journal of the Linnean Society</i> , 1985, 25, 1-39.	0.7	87
110	THE SPREAD OF GLOMUS FASCICULATUM THROUGH ROOTS OF TRIFOLIUM SUBTERRANEUM AND LOLIUM RIGIDUM. <i>New Phytologist</i> , 1985, 100, 105-114.	3.5	18
111	FORMATION OF EXTERNAL HYPHAE IN SOIL BY FOUR SPECIES OF VESICULAR-ARBUSCULAR MYCORRHIZAL FUNGI. <i>New Phytologist</i> , 1985, 99, 245-255.	3.5	163
112	The effect of soil pH on the formation of VA mycorrhizas by two species of <i>Glomus</i> . <i>Soil Research</i> , 1985, 23, 253.	0.6	66
113	Sulfur supply and the formation of vesicular-arbuscular mycorrhizas by <i>Glomus fasciculatum</i> on subterranean clover. <i>Soil Biology and Biochemistry</i> , 1985, 17, 877-879.	4.2	6
114	COLONIZATION OF THE ROOT SYSTEM OF SUBTERRANEAN CLOVER BY THREE SPECIES OF VESICULAR-ARBUSCULAR MYCORRHIZAL FUNGI. <i>New Phytologist</i> , 1984, 96, 275-281.	3.5	56
115	THE EFFECT OF PHOSPHORUS ON THE FORMATION OF HYPHAE IN SOIL BY THE VESICULAR-ARBUSCULAR MYCORRHIZAL FUNGUS, <i>GLOMUS FASCICULATUM</i> . <i>New Phytologist</i> , 1984, 97, 437-446.	3.5	264
116	THE EFFECT OF ROOT DENSITY, INOCULUM PLACEMENT AND INFECTIVITY OF INOCULUM ON THE DEVELOPMENT OF VESICULAR-ARBUSCULAR MYCORRHIZAS. <i>New Phytologist</i> , 1984, 97, 285-299.	3.5	43
117	Phosphorus, soluble carbohydrates and endomycorrhizal infection. <i>Soil Biology and Biochemistry</i> , 1983, 15, 593-597.	4.2	93
118	Seasonal variation in infectivity of vesicular-arbuscular mycorrhizal fungi in relation to plant response to applied phosphorus. <i>Soil Research</i> , 1983, 21, 207.	0.6	12
119	Introduction of vesicular arbuscular mycorrhizal fungi into agricultural soils. <i>Australian Journal of Agricultural Research</i> , 1983, 34, 741.	1.5	35
120	Infectivity of vesicular arbuscular mycorrhizal fungi in agricultural soils. <i>Australian Journal of Agricultural Research</i> , 1982, 33, 1049.	1.5	71
121	Comparative Anatomy of Vesicular-Arbuscular Mycorrhizas Formed on Subterranean Clover. <i>Australian Journal of Botany</i> , 1982, 30, 485.	0.3	204
122	The role of vesicular arbuscular mycorrhizal fungi in agriculture and the selection of fungi for inoculation. <i>Australian Journal of Agricultural Research</i> , 1982, 33, 389.	1.5	187
123	Infectivity and effectiveness of vesicular arbuscular mycorrhizal fungi: effect of inoculum type. <i>Australian Journal of Agricultural Research</i> , 1981, 32, 631.	1.5	106
124	Prolonged survival and viability of VA mycorrhizal hyphae after root death. <i>Soil Biology and Biochemistry</i> , 1981, 13, 431-433.	4.2	120
125	Infectivity and effectiveness of five endomycorrhizal fungi: competition with indigenous fungi in field soils. <i>Australian Journal of Agricultural Research</i> , 1981, 32, 621.	1.5	117
126	THE EFFECTIVENESS OF VESICULAR-ARBUSCULAR MYCORRHIZAS IN INCREASING GROWTH AND PHOSPHORUS UPTAKE OF SUBTERRANEAN CLOVER FROM PHOSPHORUS SOURCES OF DIFFERENT SOLUBILITIES. <i>New Phytologist</i> , 1980, 84, 327-338.	3.5	84

#	ARTICLE	IF	CITATIONS
127	A Quantitative Study of the Spores and Anatomy of Mycorrhizas Formed by a Species of <i>Glomus</i> , With Reference to Its Taxonomy. <i>Australian Journal of Botany</i> , 1979, 27, 363.	0.3	85
128	Phosphorus and the formation of vesicular-arbuscular mycorrhizas. <i>Soil Biology and Biochemistry</i> , 1979, 11, 501-505.	4.2	177
129	GROWTH OF SUBTERRANEAN CLOVER IN RELATION TO THE FORMATION OF ENDOMYCORRHIZAS BY INTRODUCED AND INDIGENOUS FUNGI IN A FIELD SOIL. <i>New Phytologist</i> , 1978, 81, 575-585.	3.5	133
130	Effect of rate of application of superphosphate on populations of vesicular arbuscular endophytes. <i>Australian Journal of Experimental Agriculture</i> , 1978, 18, 573.	1.0	38
