#	ARTICLE	IF	CITATIONS
1	Associations between depression and cardiometabolic health: A 27-year longitudinal study. <i>Psychological Medicine</i> , 2022, 52, 3007-3017.	4.5	16
2	MRI-assessed locus coeruleus integrity is heritable and associated with multiple cognitive domains, mild cognitive impairment, and daytime dysfunction. <i>Alzheimer's and Dementia</i> , 2021, 17, 1017-1025.	0.8	41
3	Independent and Synergistic Associations Between TBI Characteristics and PTSD Symptom Clusters on Cognitive Performance and Postconcussive Symptoms in Iraq and Afghanistan Veterans. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , 2021, 33, 98-108.	1.8	10
4	Self-efficacy and coping style in Iraq and Afghanistan-era veterans with and without mild traumatic brain injury and posttraumatic stress disorder. <i>Journal of Clinical Psychology</i> , 2021, 77, 2306-2322.	1.9	1
5	12-year prediction of mild cognitive impairment aided by Alzheimer's brain signatures at mean age 56. <i>Brain Communications</i> , 2021, 3, fcab167.	3.3	7
6	How Well Does Subjective Cognitive Decline Correspond to Objectively Measured Cognitive Decline? Assessment of 10-12 Year Change. <i>Journal of Alzheimer's Disease</i> , 2021, 83, 291-304.	2.6	6
7	Baseline sleep quality moderates symptom improvement in veterans with comorbid PTSD and TBI receiving trauma-focused treatment. <i>Behaviour Research and Therapy</i> , 2021, 143, 103892.	3.1	9
8	White matter integrity, suicidal ideation, and cognitive dysfunction in combat-exposed Iraq and Afghanistan Veterans. <i>Psychiatry Research - Neuroimaging</i> , 2021, 317, 111389.	1.8	7
9	Paradoxical cognitive trajectories in men from earlier to later adulthood. <i>Neurobiology of Aging</i> , 2021, 109, 229-238.	3.1	2
10	Psychological Symptoms and Rates of Performance Validity Improve Following Trauma-Focused Treatment in Veterans with PTSD and History of Mild-to-Moderate TBI. <i>Journal of the International Neuropsychological Society</i> , 2020, 26, 108-118.	1.8	14
11	Aspects of Executive Dysfunction and Racial/Ethnic Minority Status Are Associated With Unemployment Duration in Veterans With a History of Mild-to-Moderate Traumatic Brain Injury. <i>Archives of Physical Medicine and Rehabilitation</i> , 2020, 101, 1383-1388.	0.9	6
12	Post-concussive symptom endorsement and symptom attribution following remote mild traumatic brain injury in combat-exposed Veterans: An exploratory study. <i>Journal of Psychiatric Research</i> , 2020, 130, 224-230.	3.1	10
13	PTSD, but not history of mTBI, is associated with altered myelin in combat-exposed Iraq and Afghanistan Veterans. <i>Clinical Neuropsychologist</i> , 2020, 34, 1070-1087.	2.3	11
14	Association of baseline semantic fluency and progression to mild cognitive impairment in middle-aged men. <i>Neurology</i> , 2020, 95, e973-e983.	1.1	12
15	MCI-to-normal reversion using neuropsychological criteria in the Alzheimer's Disease Neuroimaging Initiative. <i>Alzheimer's and Dementia</i> , 2019, 15, 1322-1332.	0.8	37
16	Mild traumatic brain injury characteristics do not negatively influence cognitive processing therapy attendance or outcomes. <i>Journal of Psychiatric Research</i> , 2019, 116, 7-13.	3.1	7
17	Evaluation of objective and subjective clinical outcomes in combat veterans with and without mild TBI and PTSD: A four-group design. <i>Journal of Clinical and Experimental Neuropsychology</i> , 2019, 41, 665-679.	1.3	25
18	SMART-CPT for veterans with comorbid post-traumatic stress disorder and history of traumatic brain injury: a randomised controlled trial. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2019, 90, 333-341.	1.9	76

#	ARTICLE	IF	CITATIONS
19	Neurocognition, psychiatric symptoms, and lifetime homelessness among veterans with a history of traumatic brain injury. <i>Psychiatry Research</i> , 2019, 271, 167-170.	3.3	6
20	Artificially low mild cognitive impairment to normal reversion rate in the Alzheimer's Disease Neuroimaging Initiative. <i>Alzheimer's and Dementia</i> , 2019, 15, 561-569.	0.8	25
21	Pilot investigation of a novel white matter imaging technique in Veterans with and without history of mild traumatic brain injury. <i>Brain Injury</i> , 2018, 32, 1255-1264.	1.2	14
22	Worse baseline executive functioning is associated with dropout and poorer response to trauma-focused treatment for veterans with PTSD and comorbid traumatic brain injury. <i>Behaviour Research and Therapy</i> , 2018, 108, 68-77.	3.1	37
23	Underdiagnosis of mild cognitive impairment: A consequence of ignoring practice effects. <i>Alzheimer's and Dementia: Diagnosis, Assessment and Disease Monitoring</i> , 2018, 10, 372-381.	2.4	54
24	Compensatory Cognitive Training for Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn Veterans With Mild Traumatic Brain Injury. <i>Journal of Head Trauma Rehabilitation</i> , 2017, 32, 16-24.	1.7	65
25	“Missed” Mild Cognitive Impairment: High False-Negative Error Rate Based on Conventional Diagnostic Criteria. <i>Journal of Alzheimer's Disease</i> , 2016, 52, 685-691.	2.6	63
26	Is bigger always better? The importance of cortical configuration with respect to cognitive ability. <i>NeuroImage</i> , 2016, 129, 356-366.	4.2	36
27	Visuoconstructional Impairment in Subtypes of Mild Cognitive Impairment. <i>Applied Neuropsychology Adult</i> , 2016, 23, 43-52.	1.2	27
28	Does degree of gyrification underlie the phenotypic and genetic associations between cortical surface area and cognitive ability?. <i>NeuroImage</i> , 2015, 106, 154-160.	4.2	32
29	Hippocampal Atrophy Varies by Neuropsychologically Defined MCI Among Men in Their 50s. <i>American Journal of Geriatric Psychiatry</i> , 2015, 23, 456-465.	1.2	20
30	Evaluation of a hybrid treatment for Veterans with comorbid traumatic brain injury and posttraumatic stress disorder: Study protocol for a randomized controlled trial. <i>Contemporary Clinical Trials</i> , 2015, 45, 210-216.	1.8	25
31	Susceptibility of the conventional criteria for mild cognitive impairment to false-positive diagnostic errors. <i>Alzheimer's and Dementia</i> , 2015, 11, 415-424.	0.8	194
32	Cognitive Symptom Management and Rehabilitation Therapy (CogSMART) for Veterans with traumatic brain injury: Pilot randomized controlled trial. <i>Journal of Rehabilitation Research and Development</i> , 2014, 51, 59-70.	1.6	134
33	Neuropsychological Criteria for Mild Cognitive Impairment Improves Diagnostic Precision, Biomarker Associations, and Progression Rates. <i>Journal of Alzheimer's Disease</i> , 2014, 42, 275-289.	2.6	493
34	Increased Hippocampal Blood Flow in Sedentary Older Adults at Genetic Risk for Alzheimer's Disease. <i>Journal of Alzheimer's Disease</i> , 2014, 41, 809-817.	2.6	33
35	Chapter 5 Contributions of Neuropsychology and Neuroimaging to Understanding Clinical Subtypes of Mild Cognitive Impairment. <i>International Review of Neurobiology</i> , 2009, 84, 81-103.	2.0	52
