#	Article	IF	CITATIONS
1	Gaze fixation and the neural circuitry of face processing in autism. Nature Neuroscience, 2005, 8, 519-526.	14.8	1,274
2	Amygdala and Ventromedial Prefrontal Cortex Are Inversely Coupled during Regulation of Negative Affect and Predict the Diurnal Pattern of Cortisol Secretion among Older Adults. Journal of Neuroscience, 2006, 26, 4415-4425.	3.6	938
3	Failure to Regulate: Counterproductive Recruitment of Top-Down Prefrontal-Subcortical Circuitry in Major Depression. Journal of Neuroscience, 2007, 27, 8877-8884.	3.6	878
4	Human Amygdala Responsivity to Masked Fearful Eye Whites. Science, 2004, 306, 2061-2061.	12.6	636
5	Regulation of the Neural Circuitry of Emotion by Compassion Meditation: Effects of Meditative Expertise. PLoS ONE, 2008, 3, e1897.	2.5	636
6	Variability in the analysis of a single neuroimaging dataset by many teams. Nature, 2020, 582, 84-88.	27.8	634
7	Reduced capacity to sustain positive emotion in major depression reflects diminished maintenance of fronto-striatal brain activation. Proceedings of the National Academy of Sciences of the United States of America, 2009, 106, 22445-22450.	7.1	383
8	Contextual Modulation of Amygdala Responsivity to Surprised Faces. Journal of Cognitive Neuroscience, 2004, 16, 1730-1745.	2.3	355
9	Inverse amygdala and medial prefrontal cortex responses to surprised faces. NeuroReport, 2003, 14, 2317-2322.	1.2	321
10	Anticipatory Activation in the Amygdala and Anterior Cingulate in Generalized Anxiety Disorder and Prediction of Treatment Response. American Journal of Psychiatry, 2009, 166, 302-310.	7.2	317
11	Motion correction and the use of motion covariates in multiple-subject fMRI analysis. Human Brain Mapping, 2006, 27, 779-788.	3.6	305
12	Amygdala Volume and Nonverbal Social Impairment in Adolescent and Adult Males With Autism. Archives of General Psychiatry, 2006, 63, 1417-28.	12.3	259
13	Human amygdala responses during presentation of happy and neutral faces: correlations with state anxiety. Biological Psychiatry, 2004, 55, 897-903.	1.3	238
14	Integrating VBM into the General Linear Model with voxelwise anatomical covariates. NeuroImage, 2007, 34, 500-508.	4.2	238
15	Gaze fixations predict brain activation during the voluntary regulation of picture-induced negative affect. NeuroImage, 2007, 36, 1041-1055.	4.2	235
16	Perceived Controllability Modulates the Neural Response to Pain. Journal of Neuroscience, 2004, 24, 7199-7203.	3.6	212
17	Individual Differences in the Effects of Perceived Controllability on Pain Perception: Critical Role of the Prefrontal Cortex. Journal of Cognitive Neuroscience, 2007, 19, 993-1003.	2.3	200
18	Neural circuitry underlying the interaction between emotion and asthma symptom exacerbation. Proceedings of the National Academy of Sciences of the United States of America, 2005, 102, 13319-13324.	7.1	192

TOM JOHNSTONE

#	Article	IF	CITATIONS
19	A Functional Magnetic Resonance Imaging Predictor of Treatment Response to Venlafaxine in Generalized Anxiety Disorder. Biological Psychiatry, 2008, 63, 858-863.	1.3	191
20	Comparison of fMRI motion correction software tools. NeuroImage, 2005, 28, 529-543.	4.2	163
21	Individual Differences in Amygdala and Ventromedial Prefrontal Cortex Activity are Associated with Evaluation Speed and Psychological Well-being. Journal of Cognitive Neuroscience, 2007, 19, 237-248.	2.3	160
22	Individual differences in some (but not all) medial prefrontal regions reflect cognitive demand while regulating unpleasant emotion. NeuroImage, 2009, 47, 852-863.	4.2	160
23	In an Absolute State: Elevated Use of Absolutist Words Is a Marker Specific to Anxiety, Depression, and Suicidal Ideation. Clinical Psychological Science, 2018, 6, 529-542.	4.0	159
24	Stability of amygdala BOLD response to fearful faces over multiple scan sessions. NeuroImage, 2005, 25, 1112-1123.	4.2	146
25	The voice of emotion: an FMRI study of neural responses to angry and happy vocal expressions. Social Cognitive and Affective Neuroscience, 2006, 1, 242-249.	3.0	144
26	Relationships Between Changes in Sustained Fronto-Striatal Connectivity and Positive Affect in Major Depression Resulting From Antidepressant Treatment. American Journal of Psychiatry, 2013, 170, 197-206.	7.2	140
27	Psychophysiological responses to appraisal dimensions in a computer game. Cognition and Emotion, 2004, 18, 663-688.	2.0	125
28	Making an effort to feel positive: insecure attachment in infancy predicts the neural underpinnings of emotion regulation in adulthood. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2014, 55, 999-1008.	5.2	106
29	Regional Response Differences Across the Human Amygdaloid Complex during Social Conditioning. Cerebral Cortex, 2010, 20, 612-621.	2.9	92
30	Insecure attachment during infancy predicts greater amygdala volumes in early adulthood. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2015, 56, 540-548.	5.2	92
31	Grey Matter Volume in the Cerebellum is Related to the Processing of Grammatical Rules in a Second Language: A Structural Voxel-based Morphometry Study. Cerebellum, 2014, 13, 55-63.	2.5	87
32	Reduced Right Ventrolateral Prefrontal Cortex Activity While Inhibiting Positive Affect Is Associated with Improvement in Hedonic Capacity After 8 Weeks of Antidepressant Treatment in Major Depressive Disorder. Biological Psychiatry, 2011, 70, 962-968.	1.3	82
33	How reward modulates mimicry: <scp>EMG</scp> evidence of greater facial mimicry of more rewarding happy faces. Psychophysiology, 2012, 49, 998-1004.	2.4	76
34	Increased Prefrontal Cortex Activity During Negative Emotion Regulation as a Predictor of Depression Symptom Severity Trajectory Over 6 Months. JAMA Psychiatry, 2013, 70, 1181.	11.0	74
35	Sweet taste pleasantness is modulated by morphine and naltrexone. Psychopharmacology, 2016, 233, 3711-3723.	3.1	61
36	Dynamic Causal Modeling applied to fMRI data shows high reliability. NeuroImage, 2010, 49, 603-611.	4.2	58

TOM JOHNSTONE

#	Article	IF	CITATIONS
37	Prefrontal social cognition network dysfunction underlying face encoding and social anxiety in fragile X syndrome. NeuroImage, 2008, 43, 592-604.	4.2	48
38	fMRI Evidence for the Involvement of the Procedural Memory System in Morphological Processing of a Second Language. PLoS ONE, 2014, 9, e97298.	2.5	46
39	Prefrontal inhibition of threat processing reduces working memory interference. Frontiers in Human Neuroscience, 2013, 7, 228.	2.0	45
40	Neural Emotion Regulation Circuitry Underlying Anxiolytic Effects of Perceived Control over Pain. Journal of Cognitive Neuroscience, 2015, 27, 222-233.	2.3	44
41	Affective Speech Elicited With a Computer Game Emotion, 2005, 5, 513-518.	1.8	42
42	Whole-brain functional connectivity during emotional word classification in medication-free Major Depressive Disorder: Abnormal salience circuitry and relations to positive emotionality. NeuroImage: Clinical, 2013, 2, 790-796.	2.7	30
43	Neural Competition for Conscious Representation across Time: An fMRI Study. PLoS ONE, 2010, 5, e10556.	2.5	29
44	The effects of difficulty and gain versus loss on vocal physiology and acoustics. Psychophysiology, 2007, 44, 827-837.	2.4	27
45	Autistic traits modulate frontostriatal connectivity during processing of rewarding faces. Social Cognitive and Affective Neuroscience, 2014, 9, 2010-2016.	3.0	27
46	Sliding-window analysis tracks fluctuations in amygdala functional connectivity associated with physiological arousal and vigilance during fear conditioning. NeuroImage, 2017, 153, 168-178.	4.2	26
47	Amygdala volume and hypothalamic-pituitary-adrenal axis reactivity to social stress. Psychoneuroendocrinology, 2017, 85, 96-99.	2.7	24
48	An fMRI study on the processing of long-distance wh-movement in a second language. Glossa, 2017, 2, .	0.5	24
49	Speaker verification with elicited speaking styles in the VeriVox project. Speech Communication, 2000, 31, 121-129.	2.8	22
50	Sex-Specific Effects of Gender Identification on Pain Study Recruitment. Journal of Pain, 2018, 19, 178-185.	1.4	19
51	Turning on the alarm: The neural mechanisms of the transition from innocuous to painful sensation. NeuroImage, 2012, 59, 1594-1601.	4.2	18
52	Inter-slice leakage and intra-slice aliasing in simultaneous multi-slice echo-planar images. Brain Structure and Function, 2020, 225, 1153-1158.	2.3	17
53	Intolerance of uncertainty, and not social anxiety, is associated with compromised extinction of social threat. Behaviour Research and Therapy, 2021, 139, 103818.	3.1	16
54	Simultaneous EEG-fMRI reveals attention-dependent coupling of early face processing with a distributed cortical network. Biological Psychology, 2018, 132, 133-142.	2.2	15

Tom Johnstone

#	Article	IF	CITATIONS
55	Social domain based modulation of neural responses to threat: The different roles of romantic partners versus friends. Social Neuroscience, 2019, 14, 398-408.	1.3	13
56	Rapid Neural Representations of Personally Relevant Faces. Cerebral Cortex, 2021, 31, 4699-4708.	2.9	12
57	Efficient modeling and inference for event-related fMRI data. Computational Statistics and Data Analysis, 2008, 52, 4859-4871.	1.2	10
58	Linguistic markers of moderate and absolute natural language. Personality and Individual Differences, 2018, 134, 119-124.	2.9	10
59	Functional MRI Responses of the Human Dorsal Amygdala/Substantia Innominata Region to Facial Expressions of Emotion. Annals of the New York Academy of Sciences, 2003, 985, 533-535.	3.8	8
60	Intolerance of uncertainty is associated with heightened responding in the prefrontal cortex during cue-signalled uncertainty of threat. Cognitive, Affective and Behavioral Neuroscience, 2022, 22, 88-98.	2.0	8
61	Altered engagement of autobiographical memory networks in adult offspring of postnatally depressed mothers. Biological Psychology, 2016, 118, 147-153.	2.2	4
62	Selective extinction through cognitive evaluation: Linking emotion regulation and extinction. European Journal of Neuroscience, 2020, 52, 2873-2888.	2.6	2
