List of Publications by Year
in descending order

172 papers	7,601 citations	76326 40 h-index	56724 83 g-index
174 all docs	174 docs citations	174 times ranked	2940 citing authors

#	ARTICLE	IF	CITATIONS
1	Are Methionine Sulfoxide-Containing Proteins Related to Seed Longevity? A Case Study of Arabidopsis thaliana Dry Mature Seeds Using Cyanogen Bromide Attack and Two-Dimensional-Diagonal Electrophoresis. Plants, 2022, 11, 569.	3.5	2
2	Numerical Assessment of Turbulence-Cascade Noise Reduction and Aerodynamic Penalties from Serrations. AIAA Journal, 2022, 60, 3603-3619.	2.6	2
3	Physiological and Environmental Regulation of Seed Germination: From Signaling Events to Molecular Responses. International Journal of Molecular Sciences, 2022, 23, 4839.	4.1	0
4	Interferometric Rayleigh Scattering for flow analysis : Fabry-PÃ©rot interferogram analysis. , 2022, , .		0
5	Aeroacoustic wave equation based on Pierce's operator applied to the sound generated by a mixing layer. , 2022, , .		4
6	Comprehensive acoustic modelling of the installation effects of a subsonic jet beneath a flat plate. , 2022, , .		0
7	Dynamics of Protein Phosphorylation during Arabidopsis Seed Germination. International Journal of Molecular Sciences, 2022, 23, 7059.	4.1	1
8	Opening Lecturesâ€"Wall-Pressure Wavenumber-Frequency Spectra: Experimental Challenges and Recent Advances. , 2021, , 1-23.		1
9	The Histone Chaperone HIRA Is a Positive Regulator of Seed Germination. International Journal of Molecular Sciences, 2021, 22, 4031.	4.1	9
10	Solution of Pierceâ€™s equation for Tam & Auriault's mixing noise model. , 2021, , .		1
11	3D CAA methodology using synthetic turbulence to assess turbulence-cascade interaction noise emission and reduction from serrated airfoils. , 2021, , .		0
12	Deconvolution of Wave-Number-Frequency Spectra of Wall Pressure Fluctuations. AIAA Journal, 2020, 58, 164-173.	2.6	9
13	Sound propagation using an adjoint-based method. Journal of Fluid Mechanics, 2020, 900, .	3.4	10
14	Temperature effects on the noise source mechanisms in a realistic subsonic dual-stream jet. Computers and Fluids, 2020, 213, 104720.	2.5	2
15	Spatial structure and wavenumber filtering of wall pressure fluctuations on a full-scale cockpit model. Experiments in Fluids, 2020, 61, 1.	2.4	7
16	A Correlative Study of Sunflower Seed Vigor Components as Related to Genetic Background. Plants, 2020, 9, 386.	3.5	9
17	A new MEMS microphone array for the wavenumber analysis of wall-pressure fluctuations: application to the modal investigation of a ducted low-Mach number stage. , 2019, , .		5
18	Accurate simulation of the noise generated by a hot supersonic jet including turbulence tripping and nonlinear acoustic propagation. Physics of Fluids, 2019, 31, .	4.0	27

#	Article	IF	Citations
19	High frequency temperature fluctuation measurements by Rayleigh scattering and constant-voltage cold-wire techniques. Experiments in Fluids, 2019, 60, 1.	2.4	1
20	Experimental study of the coherent vorticity in slightly under-expanded supersonic screeching jets. International Journal of Aeroacoustics, 2019, 18, 207-230.	1.3	2
21	Prediction of Fine-scale Jet Mixing Noise Using Geometrical Acoustics. , 2019, , .		0
22	Density Fluctuations Measurement by Rayleigh Scattering Using a Single Photomultiplier. AIAA Journal, 2018, 56, 1310-1316.	2.6	13
23	Experimental investigation of the turbulent density â€" Far-field sound correlations in compressible jets. International Journal of Aeroacoustics, 2018, 17, 521-540.	1.3	3
24	Deconvolution of the wave number - frequency spectra of wall pressure fluctuations. , 2018, , .		0
25	Assessment of a Two-Way Coupling Methodology Between a Flow and a High-Order Nonlinear Acoustic Unstructured Solvers. Flow, Turbulence and Combustion, 2018, 101, 681-703.	2.6	6
26	Broadband liner impedance eduction for multimodal acoustic propagation in the presence of a mean flow. Journal of Sound and Vibration, 2017, 392, 200-216.	3.9	45
27	Numerical investigation of the noise generated by a rocket engine at lift-off conditions using a two-way coupled CFD-CAA method. , 2017, , .		5
28	Experimental characterisation of the screech feedback loop in underexpanded round jets. Journal of Fluid Mechanics, 2017, 824, 202-229.	3.4	58
29	Experimental Study of Flight Effects on Slightly Underexpanded Supersonic Jets. AIAA Journal, 2017, 55, 57-67.	2.6	4
30	Characterization of absorption and non-linear effects in infrasound propagation using an augmented Burgersâ€™ equation. Geophysical Journal International, 2016, 207, 1432-1445.	2.4	9
31	High-speed jet noise. Mechanical Engineering Reviews, 2016, 3, 15-00496-15-00496.	4.7	96
32	Numerical study on the relation between hydrodynamic fluctuations and noise in hot jets at high Reynolds number. , 2016, , .		2
33	High-order Variational Multiscale model with an explicit filtering in a stabilised finite element method for LES/DES computations. , 2016, , .		0
34	Broadband eduction of liner impedance under multimodal acoustic propagation. , 2016, , .		2
35	A schlieren and nearfield acoustic based experimental investigation of screech noise sources. , 2016, , .		3
36	An experimental investigation of wall pressure fluctuations beneath pressure gradients. , 2015, , .		6

#	ARTICLE	IF	CITATIONS
37	Numerical Algorithm for Computing Acoustic and Vortical Spatial Instability Waves. AIAA Journal, 2015, 53, 692-702.	2.6	8
38	Numerical Study of Solid-Rocket Motor Ignition Overpressure Wave Including Infrared Radiation. Journal of Propulsion and Power, 2014, 30, 164-174.	2.2	14
39	A study of infrasound propagation based on high-order finite difference solutions of the Navier-Stokes equations. Journal of the Acoustical Society of America, 2014, 135, 1083-1095.	1.1	31
40	An experimental characterisation of wall pressure wavevector-frequency spectra in the presence of pressure gradients. , 2014, , .		42
41	Investigation of the mixing layer of underexpanded supersonic jets by particle image velocimetry. International Journal of Heat and Fluid Flow, 2014, 50, 188-200.	2.4	35
42	Experimental exploration of underexpanded supersonic jets. Shock Waves, 2014, 24, 21-32.	1.9	32
43	Semi-Implicit Runge–Kutta Schemes: Development and Application to Compressible Channel Flow. AIAA Journal, 2014, 52, 516-527.	2.6	6
44	Turbulence Generation from a Sweeping-Based Stochastic Model. AIAA Journal, 2014, 52, 281-292.	2.6	9
45	Effect of a tab on the aerodynamical development and noise of an underexpanded supersonic jet. Comptes Rendus - Mecanique, 2013, 341, 659-666.	2.1	12
46	Broadband Shock-Associated Noise in Screeching and Non-Screeching Underexpanded Supersonic Jets. AIAA Journal, 2013, 51, 665-673.	2.6	77
47	Numerical and experimental analysis of flow-acoustic interactions in an industrial gate valve. , 2013, , .		0
48	Influence of resolution and Reynolds number on large-eddy simulations of channel flow using relaxation filtering. , 2013, , .		1
49	Acoustic Resonance of a Steam Line Gate Valve. , 2013, , .		0
50	Experimental study of flight effects on slightly underexpanded supersonic jets. , 2013, , .		2
51	Experimental and Numerical 3D Study of Flow-Sound Interaction in a Steam-Line Gate Valve. , 2013, , .		0
52	Flow and sound fields of initially tripped jets at Reynolds numbers ranging from 25,000 to 200,000. , 2012, , .		2
53	Effects of initial shear-layer thickness on turbulent subsonic jets at moderate Reynolds numbers. , 2012, , .		3
54	Prediction of subsonic jet noise relying on a sweeping based turbulence generation process. , 2012, , .		2

#	Article	IF	Citations
55	Reliable reduced-order models for time-dependent linearized Euler equations. Journal of Computational Physics, 2012, 231, 5176-5194.	3.8	28
56	Effects of moderate Reynolds numbers on subsonic round jets with highly disturbed nozzle-exit boundary layers. Physics of Fluids, 2012, 24, .	4.0	48
57	Shock Oscillations in a Supersonic Jet Exhibiting Antisymmetrical Screech. AIAA Journal, 2012, 50, 2017-2020.	2.6	16
58	Investigation of flow features around shallow round cavities subject to subsonic grazing flow. Physics of Fluids, 2012, 24, .	4.0	11
59	Depth effects on the flow features and noise signature of shallow cylindrical cavities at a Mach number of 0.25. , 2012, , .		3
60	Statistical Modeling of BBSAN Including Refraction Effects. , 2012, , .		7
61	Influence of initial turbulence level on the flow and sound fields of a subsonic jet at a diameter-based Reynolds number of 10^5. Journal of Fluid Mechanics, 2012, 701, 352-385.	3.4	139
62	A high-order finite-difference algorithm for direct computation of aerodynamic sound. Computers and Fluids, 2012, 61, 46-63.	2.5	32
63	Investigation of flow features and acoustic radiation of a round cavity. Journal of Sound and Vibration, 2012, 331, 3521-3543.	3.9	25
64	Development of semi-implicit Runge-Kutta schemes and application to a turbulent channel flow. , 2012, , .		0
65	Shock-Tracking Procedure for Studying Screech-Induced Oscillations. AIAA Journal, 2011, 49, 1563-1566.	2.6	20
66	Investigation of high supersonic jet noise: non-linear propagation effects and flow-acoustics correlations. , 2011, , .		0
67	A further step towards grid-converged solutions for an initially nominally turbulent jet. , 2011, , .		0
68	A computational study of the effects of nozzle-exit turbulence level on the flow and acoustic fields of a subsonic jet. , 2011, , .		14
69	A study based on the sweeping hypothesis to generate stochastic turbulence. , 2011, , .		6
70	Filter shape dependence and effective scale separation in large-eddy simulations based on relaxation filtering. Computers and Fluids, 2011, 47, 65-74.	2.5	35
71	Finite differences for coarse azimuthal discretization and for reduction of effective resolution near origin of cylindrical flow equations. Journal of Computational Physics, 2011, 230, 1134-1146.	3.8	80
72	A parametric study of the noise radiated by the flow around multiple bodies: direct noise computation of the influence of the separating distance in rod-airfoil flow configurations. , 2011, , .		6

#	ARTICLE	IF	CITATIONS
73	On the spectra of nozzle-exit velocity disturbances in initially nominally turbulent, transitional jets. Physics of Fluids, 2011, 23, 091702.	4.0	23
74	Investigation of a High-Mach-Number Overexpanded Jet Using Large-Eddy Simulation. AIAA Journal, 2011, 49, 2171-2182.	2.6	56
75	Experimental study of flight effects on screech in underexpanded jets. Physics of Fluids, 2011, 23, .	4.0	26
76	Large-eddy simulation of the flow and acoustic fields of a Reynolds number 105 subsonic jet with tripped exit boundary layers. Physics of Fluids, 2011, 23, .	4.0	147
77	Influence of Reynolds number and grid resolution on large-eddy simulations of self-similar jets based on relaxation filtering. ERCOFTAC Series, 2011, , 319-328.	0.1	1
78	Progress in Direct Noise Computation. International Journal of Aeroacoustics, 2010, 9, 123-143.	1.3	35
79	On the importance of specifying appropriate nozzle-exit conditions in jet noise prediction. Procedia Engineering, 2010, 6, 38-43.	1.2	3
80	Reprint of: On the importance of specifying appropriate nozzle-exit conditions in jet noise prediction. Procedia IUTAM, 2010, 1, 38-43.	1.2	0
81	Measured wavenumber: Frequency spectrum associated with acoustic and aerodynamic wall pressure fluctuations. Journal of the Acoustical Society of America, 2010, 128, 1647-1655.	1.1	99
82	Modelling of Sound Generation by Turbulent Reacting Flows. International Journal of Aeroacoustics, 2010, 9, 461-489.	1.3	29
83	Influence of nozzle-exit boundary-layer conditions on the flow and acoustic fields of initially laminar jets. Journal of Fluid Mechanics, 2010, 663, 507-538.	3.4	227
84	Development of Noncentered Wavenumber-Based Optimized Interpolation Schemes with Amplification Control for Overlapping Grids. SIAM Journal of Scientific Computing, 2010, 32, 2074-2098.	2.8	8
85	Numerical Insight into Sound Sources of a Rod-Airfoil Flow Configuration Using Direct Noise Calculation. , 2010, , .		16
86	Flow and acoustic fields of Reynolds number 10 5, subsonic jets with tripped exit boundary layers. , 2010, , .		7
87	Direct Noise Computation of a Shocked and Heated Jet at a Mach Number of 3.30. , 2010, , .		6
88	Feasibility of Large-Eddy Simulation on Angular Sector to Evaluate Chevron Effects on Jet Noise. , 2010, , .		0
89	Numerical Investigation of Flow Features and Acoustic Radiation of a Round Cavity. , 2010, , .		2
90	A Study of the Influence of the Reynolds Number on Jet Self-Similarity Using Large-Eddy Simulation. ERCOFTAC Series, 2010, , 11-16.	0.1	6
