#	ARTICLE	IF	CITATIONS
1	Childhood trauma and adulthood inflammation: a meta-analysis of peripheral C-reactive protein, interleukin-6 and tumour necrosis factor- α . <i>Molecular Psychiatry</i> , 2016, 21, 642-649.	4.1	775
2	Childhood Trauma and Children's Emerging Psychotic Symptoms: A Genetically Sensitive Longitudinal Cohort Study. <i>American Journal of Psychiatry</i> , 2011, 168, 65-72.	4.0	472
3	High-potency cannabis and the risk of psychosis. <i>British Journal of Psychiatry</i> , 2009, 195, 488-491.	1.7	465
4	Proportion of patients in south London with first-episode psychosis attributable to use of high potency cannabis: a case-control study. <i>Lancet Psychiatry</i> , 2015, 2, 233-238.	3.7	429
5	Daily Use, Especially of High-Potency Cannabis, Drives the Earlier Onset of Psychosis in Cannabis Users. <i>Schizophrenia Bulletin</i> , 2014, 40, 1509-1517.	2.3	364
6	Reliability and Comparability of Psychosis Patients' Retrospective Reports of Childhood Abuse. <i>Schizophrenia Bulletin</i> , 2011, 37, 546-553.	2.3	361
7	Markers of central inflammation in major depressive disorder: A systematic review and meta-analysis of studies examining cerebrospinal fluid, positron emission tomography and post-mortem brain tissue. <i>Brain, Behavior, and Immunity</i> , 2019, 81, 24-40.	2.0	326
8	The dietary pattern of patients with schizophrenia: A systematic review. <i>Journal of Psychiatric Research</i> , 2013, 47, 197-207.	1.5	293
9	The HPA axis in bipolar disorder: Systematic review and meta-analysis. <i>Psychoneuroendocrinology</i> , 2016, 63, 327-342.	1.3	273
10	HPA axis and aging in depression: Systematic review and meta-analysis. <i>Psychoneuroendocrinology</i> , 2014, 41, 46-62.	1.3	258
11	The epidemiology of trauma and post-traumatic stress disorder in a representative cohort of young people in England and Wales. <i>Lancet Psychiatry</i> , 2019, 6, 247-256.	3.7	256
12	Life Events and Psychosis: A Review and Meta-analysis. <i>Schizophrenia Bulletin</i> , 2013, 39, 740-747.	2.3	255
13	Abnormal cortisol levels during the day and cortisol awakening response in first-episode psychosis: The role of stress and of antipsychotic treatment. <i>Schizophrenia Research</i> , 2010, 116, 234-242.	1.1	253
14	Measuring childhood maltreatment to predict early-adult psychopathology: Comparison of prospective informant-reports and retrospective self-reports. <i>Journal of Psychiatric Research</i> , 2018, 96, 57-64.	1.5	249
15	Stress and Inflammation Reduce Brain-Derived Neurotrophic Factor Expression in First-Episode Psychosis. <i>Journal of Clinical Psychiatry</i> , 2011, 72, 1677-1684.	1.1	245
16	Treatment-resistant depression and peripheral C-reactive protein. <i>British Journal of Psychiatry</i> , 2019, 214, 11-19.	1.7	241
17	Stress Sensitivity, Aberrant Salience, and Threat Anticipation in Early Psychosis: An Experience Sampling Study. <i>Schizophrenia Bulletin</i> , 2016, 42, 712-722.	2.3	225
18	Cortisol and Inflammatory Biomarkers Predict Poor Treatment Response in First Episode Psychosis. <i>Schizophrenia Bulletin</i> , 2015, 41, 1162-1170.	2.3	223

#	ARTICLE	IF	CITATIONS
19	Bullying victimisation and risk of self harm in early adolescence: longitudinal cohort study. <i>BMJ</i> , The, 2012, 344, e2683-e2683.	3.0	221
20	Lonely young adults in modern Britain: findings from an epidemiological cohort study. <i>Psychological Medicine</i> , 2019, 49, 268-277.	2.7	217
21	Brain microglia in psychiatric disorders. <i>Lancet Psychiatry</i> , the, 2017, 4, 563-572.	3.7	208
22	Two distinct patterns of treatment resistance: clinical predictors of treatment resistance in first-episode schizophrenia spectrum psychoses. <i>Psychological Medicine</i> , 2016, 46, 3231-3240.	2.7	202
23	Determining the chronology and components of psychosis onset: The Nottingham Onset Schedule (NOS). <i>Schizophrenia Research</i> , 2005, 80, 117-130.	1.1	181
24	An Examination of Polygenic Score Risk Prediction in Individuals With First-Episode Psychosis. <i>Biological Psychiatry</i> , 2017, 81, 470-477.	0.7	176
25	Serum and gene expression profile of cytokines in first-episode psychosis. <i>Brain, Behavior, and Immunity</i> , 2013, 31, 90-95.	2.0	174
26	Genetic Contributions of Inflammation to Depression. <i>Neuropsychopharmacology</i> , 2017, 42, 81-98.	2.8	174
27	A Systematic Review of Cognitive Function in First-Episode Psychosis, Including a Discussion on Childhood Trauma, Stress, and Inflammation. <i>Frontiers in Psychiatry</i> , 2014, 4, 182.	1.3	168
28	Exploration of NO2 and PM2.5 air pollution and mental health problems using high-resolution data in London-based children from a UK longitudinal cohort study. <i>Psychiatry Research</i> , 2019, 272, 8-17.	1.7	160
29	Omega-3 Polyunsaturated Fatty Acids in Youths with Attention Deficit Hyperactivity Disorder: a Systematic Review and Meta-Analysis of Clinical Trials and Biological Studies. <i>Neuropsychopharmacology</i> , 2018, 43, 534-545.	2.8	149
30	Effects of psychotropic drugs on inflammation: consequence or mediator of therapeutic effects in psychiatric treatment?. <i>Psychopharmacology</i> , 2016, 233, 1575-1589.	1.5	146
31	A systematic review of the activity of the hypothalamicâ€“pituitaryâ€“adrenal axis in first episode psychosis. <i>Psychoneuroendocrinology</i> , 2013, 38, 603-611.	1.3	133
32	White matter integrity as a predictor of response to treatment in first episode psychosis. <i>Brain</i> , 2014, 137, 172-182.	3.7	130
33	Stress abnormalities in individuals at risk for psychosis: A review of studies in subjects with familial risk or with â€œat riskâ€“mental state. <i>Psychoneuroendocrinology</i> , 2012, 37, 1600-1613.	1.3	129
34	The Origins of Cognitive Deficits in Victimized Children: Implications for Neuroscientists and Clinicians. <i>American Journal of Psychiatry</i> , 2017, 174, 349-361.	4.0	129
35	Association of Air Pollution Exposure With Psychotic Experiences During Adolescence. <i>JAMA Psychiatry</i> , 2019, 76, 614.	6.0	128
36	Inflammatory biomarker profiles of mental disorders and their relation to clinical, social and lifestyle factors. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2014, 49, 841-849.	1.6	125

#	ARTICLE	IF	CITATIONS
37	Augmentation therapy with minocycline in treatment-resistant depression patients with low-grade peripheral inflammation: results from a double-blind randomised clinical trial. <i>Neuropsychopharmacology</i> , 2021, 46, 939-948.	2.8	125
38	Childhood trauma and psychosis - what is the evidence?. <i>Dialogues in Clinical Neuroscience</i> , 2011, 13, 360-365.	1.8	120
39	Adolescent Victimization and Early-Adult Psychopathology: Approaching Causal Inference Using a Longitudinal Twin Study to Rule Out Noncausal Explanations. <i>Clinical Psychological Science</i> , 2018, 6, 352-371.	2.4	118
40	Can high-intensity interval training improve physical and mental health outcomes? A meta-review of 33 systematic reviews across the lifespan. <i>Journal of Sports Sciences</i> , 2020, 38, 430-469.	1.0	116
41	Analysis of DNA Methylation in Young People: Limited Evidence for an Association Between Victimization Stress and Epigenetic Variation in Blood. <i>American Journal of Psychiatry</i> , 2018, 175, 517-529.	4.0	114
42	A Meta-analysis of Immune Parameters, Variability, and Assessment of Modal Distribution in Psychosis and Test of the Immune Subgroup Hypothesis. <i>Schizophrenia Bulletin</i> , 2019, 45, 1120-1133.	2.3	113
43	Higher cortisol levels are associated with smaller left hippocampal volume in first-episode psychosis. <i>Schizophrenia Research</i> , 2010, 119, 75-78.	1.1	112
44	Population vs Individual Prediction of Poor Health From Results of Adverse Childhood Experiences Screening. <i>JAMA Pediatrics</i> , 2021, 175, 385.	3.3	111
45	Cortical Folding Defects as Markers of Poor Treatment Response in First-Episode Psychosis. <i>JAMA Psychiatry</i> , 2013, 70, 1031.	6.0	104
46	Childhood victimization and inflammation in young adulthood: A genetically sensitive cohort study. <i>Brain, Behavior, and Immunity</i> , 2018, 67, 211-217.	2.0	104
47	Childhood trauma and cognitive function in first-episode affective and non-affective psychosis. <i>Schizophrenia Research</i> , 2011, 129, 12-19.	1.1	103
48	Abnormal cortisol awakening response predicts worse cognitive function in patients with first-episode psychosis. <i>Psychological Medicine</i> , 2011, 41, 463-476.	2.7	102
49	Associations between adolescent cannabis use and neuropsychological decline: a longitudinal co-twin control study. <i>Addiction</i> , 2018, 113, 257-265.	1.7	101
50	HPA axis response to social stress is attenuated in schizophrenia but normal in depression: Evidence from a meta-analysis of existing studies. <i>Neuroscience and Biobehavioral Reviews</i> , 2014, 47, 359-368.	2.9	99
51	Associations Between Non-neurological Autoimmune Disorders and Psychosis: A Meta-analysis. <i>Biological Psychiatry</i> , 2019, 85, 35-48.	0.7	99
52	Childhood maltreatment is associated with increased body mass index and increased C-reactive protein levels in first-episode psychosis patients. <i>Psychological Medicine</i> , 2012, 42, 1893-1901.	2.7	97
53	Is there a link between childhood trauma, cognition, and amygdala and hippocampus volume in first-episode psychosis?. <i>Schizophrenia Research</i> , 2012, 137, 73-79.	1.1	96
54	Peripheral Blood Cell-Stratified Subgroups of Inflamed Depression. <i>Biological Psychiatry</i> , 2020, 88, 185-196.	0.7	89

#	ARTICLE	IF	CITATIONS
55	Does Childhood Trauma Moderate Polygenic Risk for Depression? A Meta-analysis of 5765 Subjects From the Psychiatric Genomics Consortium. <i>Biological Psychiatry</i> , 2018, 84, 138-147.	0.7	87
56	Why Are Children in Urban Neighborhoods at Increased Risk for Psychotic Symptoms? Findings From a UK Longitudinal Cohort Study. <i>Schizophrenia Bulletin</i> , 2016, 42, 1372-1383.	2.3	81
57	Association of Adverse Experiences and Exposure to Violence in Childhood and Adolescence With Inflammatory Burden in Young People. <i>JAMA Pediatrics</i> , 2020, 174, 38.	3.3	80
58	Hypothalamic-pituitary-adrenal axis and clinical symptoms in first-episode psychosis. <i>Psychoneuroendocrinology</i> , 2012, 37, 629-644.	1.3	79
59	Associations between abuse/neglect and ADHD from childhood to young adulthood: A prospective nationally-representative twin study. <i>Child Abuse and Neglect</i> , 2018, 81, 274-285.	1.3	79
60	Patterns of Reliability: Assessing the Reproducibility and Integrity of DNA Methylation Measurement. <i>Patterns</i> , 2020, 1, 100014.	3.1	78
61	Interaction Between Functional Genetic Variation of DRD2 and Cannabis Use on Risk of Psychosis. <i>Schizophrenia Bulletin</i> , 2015, 41, 1171-1182.	2.3	73
62	FoxO1, A2M, and TGF- β 1: three novel genes predicting depression in gene X environment interactions are identified using cross-species and cross-tissues transcriptomic and miRNomic analyses. <i>Molecular Psychiatry</i> , 2018, 23, 2192-2208.	4.1	73
63	Childhood Maltreatment Predicts Poor Economic and Educational Outcomes in the Transition to Adulthood. <i>American Journal of Public Health</i> , 2018, 108, 1142-1147.	1.5	72
64	Childhood trauma, HPA axis activity and antidepressant response in patients with depression. <i>Brain, Behavior, and Immunity</i> , 2020, 87, 229-237.	2.0	70
65	Cortisol awakening response and diurnal cortisol among children at elevated risk for schizophrenia: Relationship to psychosocial stress and cognition. <i>Psychoneuroendocrinology</i> , 2014, 46, 1-13.	1.3	66
66	Childhood Parasomnias and Psychotic Experiences at Age 12 Years in a United Kingdom Birth Cohort. <i>Sleep</i> , 2014, 37, 475-482.	0.6	66
67	Pituitary volume in unaffected relatives of patients with schizophrenia and bipolar disorder. <i>Psychoneuroendocrinology</i> , 2008, 33, 1004-1012.	1.3	65
68	The Lancet Psychiatry Commission on intimate partner violence and mental health: advancing mental health services, research, and policy. <i>Lancet Psychiatry</i> , 2022, 9, 487-524.	3.7	65
69	Cumulative Effects of Neighborhood Social Adversity and Personal Crime Victimization on Adolescent Psychotic Experiences. <i>Schizophrenia Bulletin</i> , 2018, 44, 348-358.	2.3	63
70	The Developmental Nature of the Victim-Offender Overlap. <i>Journal of Developmental and Life-Course Criminology</i> , 2018, 4, 24-49.	0.8	63
71	From Childhood Conduct Problems to Poor Functioning at Age 18 Years: Examining Explanations in a Longitudinal Cohort Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2018, 57, 54-60.e4.	0.3	63
72	Pituitary gland volume in patients with schizophrenia, subjects at ultra high-risk of developing psychosis and healthy controls: A systematic review and meta-analysis. <i>Psychoneuroendocrinology</i> , 2013, 38, 2394-2404.	1.3	62

#	ARTICLE	IF	CITATIONS
73	Persistent fatigue induced by interferon-alpha: a novel, inflammation-based, proxy model of chronic fatigue syndrome. <i>Psychoneuroendocrinology</i> , 2019, 100, 276-285.	1.3	62
74	Whole-blood expression of inflammasome- and glucocorticoid-related mRNAs correctly separates treatment-resistant depressed patients from drug-free and responsive patients in the BIODEP study. <i>Translational Psychiatry</i> , 2020, 10, 232.	2.4	62
75	Effects of short-term cannabidiol treatment on response to social stress in subjects at clinical high risk of developing psychosis. <i>Psychopharmacology</i> , 2020, 237, 1121-1130.	1.5	60
76	Inflammation in cancer and depression: a starring role for the kynurenine pathway. <i>Psychopharmacology</i> , 2019, 236, 2997-3011.	1.5	59
77	Blunted Cortisol Awakening Response in People at Ultra High Risk of Developing Psychosis. <i>Schizophrenia Research</i> , 2014, 158, 25-31.	1.1	57
78	Childhood adversity and psychosis: a systematic review of bio-psycho-social mediators and moderators. <i>Psychological Medicine</i> , 2020, 50, 1761-1782.	2.7	56
79	Cortisol, inflammatory biomarkers and neurotrophins in children and adolescents with attention deficit hyperactivity disorder (ADHD) in Taiwan. <i>Brain, Behavior, and Immunity</i> , 2020, 88, 105-113.	2.0	56
80	Impact of childhood adversities on specific symptom dimensions in first-episode psychosis. <i>Psychological Medicine</i> , 2016, 46, 317-326.	2.7	55
81	Substance use, medication adherence and outcome one year following a first episode of psychosis. <i>Schizophrenia Research</i> , 2016, 170, 311-317.	1.1	55
82	Association of Neighborhood Disadvantage in Childhood With DNA Methylation in Young Adulthood. <i>JAMA Network Open</i> , 2020, 3, e206095.	2.8	54
83	Do cognitive schema mediate the association between childhood trauma and being at ultra-high risk for psychosis?. <i>Journal of Psychiatric Research</i> , 2017, 88, 89-96.	1.5	53
84	Complement system biomarkers in first episode psychosis. <i>Schizophrenia Research</i> , 2019, 204, 16-22.	1.1	53
85	Interplay between Schizophrenia Polygenic Risk Score and Childhood Adversity in First-Presentation Psychotic Disorder: A Pilot Study. <i>PLoS ONE</i> , 2016, 11, e0163319.	1.1	52
86	High-dose eicosapentaenoic acid (EPA) improves attention and vigilance in children and adolescents with attention deficit hyperactivity disorder (ADHD) and low endogenous EPA levels. <i>Translational Psychiatry</i> , 2019, 9, 303.	2.4	52
87	Cannabis users have higher premorbid IQ than other patients with first onset psychosis. <i>Schizophrenia Research</i> , 2013, 150, 129-135.	1.1	50
88	Identifying depression early in adolescence. <i>The Lancet Child and Adolescent Health</i> , 2019, 3, 211-213.	2.7	50
89	First-Episode Psychosis: An Inflammatory State?. <i>NeuroImmunoModulation</i> , 2014, 21, 102-108.	0.9	49
90	Transcriptomics in Interferon- α -Treated Patients Identifies Inflammation-, Neuroplasticity- and Oxidative Stress-Related Signatures as Predictors and Correlates of Depression. <i>Neuropsychopharmacology</i> , 2016, 41, 2502-2511.	2.8	48

#	ARTICLE	IF	CITATIONS
91	Globally Efficient Brain Organization and Treatment Response in Psychosis: A Connectomic Study of Gyri-fication. <i>Schizophrenia Bulletin</i> , 2016, 42, 1446-1456.	2.3	47
92	Effect of high-potency cannabis on corpus callosum microstructure. <i>Psychological Medicine</i> , 2016, 46, 841-854.	2.7	47
93	Connectomic correlates of response to treatment in first-episode psychosis. <i>Brain</i> , 2017, 140, 487-496.	3.7	47
94	Adolescents' perceptions of family social status correlate with health and life chances: A twin difference longitudinal cohort study. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 23323-23328.	3.3	43
95	Identifying Adolescents at Risk for Depression: Prediction Score Performance in Cohorts Based in Different Continents. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2021, 60, 262-273.	0.3	43
96	Increased serum peripheral C-reactive protein is associated with reduced brain barriers permeability of TSPO radioligands in healthy volunteers and depressed patients: implications for inflammation and depression. <i>Brain, Behavior, and Immunity</i> , 2021, 91, 487-497.	2.0	42
97	Interplay Between Childhood Physical Abuse and Familial Risk in the Onset of Psychotic Disorders. <i>Schizophrenia Bulletin</i> , 2014, 40, 1443-1451.	2.3	41
98	Fibromyalgia and Chronic Fatigue: The Underlying Biology and Related Theoretical Issues. <i>Advances in Psychosomatic Medicine</i> , 2015, 34, 61-77.	2.2	41
99	Gender differences in the association between childhood physical and sexual abuse, social support and psychosis. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2015, 50, 1489-1500.	1.6	41
100	Cytokine profile in first-episode psychosis, unaffected siblings and community-based controls: the effects of familial liability and childhood maltreatment. <i>Psychological Medicine</i> , 2020, 50, 1139-1147.	2.7	41
101	Borderline Symptoms at Age 12 Signal Risk for Poor Outcomes During the Transition to Adulthood: Findings From a Genetically Sensitive Longitudinal Cohort Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2020, 59, 1165-1177.e2.	0.3	41
102	Inflammation: its role in schizophrenia and the potential anti-inflammatory effects of antipsychotics. <i>Psychopharmacology</i> , 2014, 231, 317-318.	1.5	40
103	Brain derived neurotrophic factor (BDNF) is associated with childhood abuse but not cognitive domains in first episode psychosis. <i>Schizophrenia Research</i> , 2014, 159, 56-61.	1.1	40
104	Methylomic analysis of monozygotic twins discordant for childhood psychotic symptoms. <i>Epigenetics</i> , 2015, 10, 1014-1023.	1.3	40
105	PET imaging shows no changes in TSPO brain density after IFN- γ immune challenge in healthy human volunteers. <i>Translational Psychiatry</i> , 2020, 10, 89.	2.4	40
106	Association between air pollution exposure and mental health service use among individuals with first presentations of psychotic and mood disorders: retrospective cohort study. <i>British Journal of Psychiatry</i> , 2021, 219, 678-685.	1.7	40
107	Interaction between specific forms of childhood maltreatment and the serotonin transporter gene (5-HTT) in recurrent depressive disorder. <i>Journal of Affective Disorders</i> , 2013, 145, 136-141.	2.0	39
108	Ketamine's effect on inflammation and kynurenine pathway in depression: A systematic review. <i>Journal of Psychopharmacology</i> , 2021, 35, 934-945.	2.0	39

#	ARTICLE	IF	CITATIONS
109	Cortisol and development of depression in adolescence and young adulthood â€” a systematic review and meta-analysis. <i>Psychoneuroendocrinology</i> , 2022, 136, 105625.	1.3	39
110	Daily stressors and negative life events in children at elevated risk of developing schizophrenia. <i>British Journal of Psychiatry</i> , 2014, 204, 354-360.	1.7	38
111	Methylomic markers of persistent childhood asthma: a longitudinal study of asthma-discordant monozygotic twins. <i>Clinical Epigenetics</i> , 2015, 7, 130.	1.8	38
112	Impact of Different Childhood Adversities on 1-Year Outcomes of Psychotic Disorder in the Genetics and Psychosis Study. <i>Schizophrenia Bulletin</i> , 2016, 42, 464-475.	2.3	38
113	Protective Factors for Psychotic Symptoms Among Poly-victimized Children. <i>Schizophrenia Bulletin</i> , 2018, 44, 691-700.	2.3	37
114	Protective factors for psychotic experiences amongst adolescents exposed to multiple forms of victimization. <i>Journal of Psychiatric Research</i> , 2018, 104, 32-38.	1.5	37
115	Residential neighborhood greenery and children's cognitive development. <i>Social Science and Medicine</i> , 2019, 230, 271-279.	1.8	37
116	Loneliness and Neighborhood Characteristics: A Multi-Informant, Nationally Representative Study of Young Adults. <i>Psychological Science</i> , 2019, 30, 765-775.	1.8	37
117	Metabolic-inflammatory status as predictor of clinical outcome at 1-year follow-up in patients with first episode psychosis. <i>Psychoneuroendocrinology</i> , 2019, 99, 145-153.	1.3	36
118	Choroid plexus enlargement is associated with neuroinflammation and reduction of blood brain barrier permeability in depression. <i>NeuroImage: Clinical</i> , 2022, 33, 102926.	1.4	36
119	Developing an individualized risk calculator for psychopathology among young people victimized during childhood: A population-representative cohort study. <i>Journal of Affective Disorders</i> , 2020, 262, 90-98.	2.0	35
120	Concordance between mother and offspring retrospective reports of childhood adversity. <i>Child Abuse and Neglect</i> , 2011, 35, 117-122.	1.3	34
121	Effects of antipsychotics on cortisol, interleukin-6 and hippocampal perfusion in healthy volunteers. <i>Schizophrenia Research</i> , 2016, 174, 99-105.	1.1	34
122	Different types of childhood adversity and 5-year outcomes in a longitudinal cohort of first-episode psychosis patients. <i>Psychiatry Research</i> , 2018, 269, 199-206.	1.7	34
123	From early adversities to immune activation in psychiatric disorders: the role of the sympathetic nervous system. <i>Clinical and Experimental Immunology</i> , 2019, 197, 319-328.	1.1	34
124	Unravelling the contribution of complex trauma to psychopathology and cognitive deficits: a cohort study. <i>British Journal of Psychiatry</i> , 2021, 219, 448-455.	1.7	34
125	Abnormalities in neuroendocrine stress response in psychosis: the role of endocannabinoids. <i>Psychological Medicine</i> , 2016, 46, 27-45.	2.7	32
126	The relationship between salivary C-reactive protein and cognitive function in children aged 11â€”14 years: Does psychopathology have a moderating effect?. <i>Brain, Behavior, and Immunity</i> , 2017, 66, 221-229.	2.0	32

#	ARTICLE	IF	CITATIONS
127	A longitudinal twin study of victimization and loneliness from childhood to young adulthood. <i>Development and Psychopathology</i> , 2022, 34, 367-377.	1.4	32
128	Early-Life Adversity, Systemic Inflammation and Comorbid Physical and Psychiatric Illnesses of Adult Life. <i>Current Topics in Behavioral Neurosciences</i> , 2019, 44, 207-225.	0.8	31
129	Inflammation and metabolic changes in first episode psychosis: Preliminary results from a longitudinal study. <i>Brain, Behavior, and Immunity</i> , 2015, 49, 25-29.	2.0	30
