#	ARTICLE	IF	CITATIONS
1	Optimal design and performance evaluation of a cogeneration system based on a molten carbonate fuel cell and a two-stage thermoelectric generator. <i>International Journal of Ambient Energy</i> , 2022, 43, 1986-1993.	2.5	8
2	Elastocaloric cooler for waste heat recovery from proton exchange membrane fuel cells. <i>Energy</i> , 2022, 238, 121789.	8.8	19
3	Design and modeling of a honeycomb ceramic thermal energy storage for a solar thermal air-Brayton cycle system. <i>Energy</i> , 2022, 239, 122405.	8.8	10
4	A sliding-bed particle solar receiver with controlling particle flow velocity for high-temperature thermal power generation. <i>Renewable Energy</i> , 2022, 183, 41-50.	8.9	10
5	A novel triple-cycle system based on high-temperature proton exchange membrane fuel cell, thermoelectric generator, and thermally regenerative electrochemical refrigerator for power and cooling cogeneration. <i>International Journal of Energy Research</i> , 2022, 46, 7529-7541.	4.5	3
6	High-Property Anode Catalyst Compositing Co-Based Perovskite and NiFe-Layered Double Hydroxide for Alkaline Seawater Splitting. <i>Processes</i> , 2022, 10, 668.	2.8	11
7	An efficient high-temperature PEMFC/membrane distillation hybrid system for simultaneous production of electricity and freshwater. <i>International Journal of Hydrogen Energy</i> , 2022, 47, 11998-12014.	7.1	11
8	Multi-objective optimizations of solid oxide co-electrolysis with intermittent renewable power supply via multi-physics simulation and deep learning strategy. <i>Energy Conversion and Management</i> , 2022, 258, 115560.	9.2	9
9	A cost-efficient path to utilize coal via solid oxide fuel cells and alkali metal thermoelectric converters. <i>International Journal of Energy Research</i> , 2022, 46, 11109-11122.	4.5	1
10	Dependence of the Heterogeneity of Grain Boundaries on Adjacent Grains in Perovskites and Its Impact on Photovoltage. <i>Small</i> , 2022, 18, e2105140.	10.0	9
11	Performance potential of a new molten hydroxide direct carbon fuel cell-based triple-cycle system for clean and efficient coal use. <i>International Journal of Energy Research</i> , 2022, 46, 14491-14504.	4.5	3
12	Dynamic behavior of high-temperature CO ₂ /H ₂ O co-electrolysis coupled with real fluctuating renewable power. <i>Sustainable Energy Technologies and Assessments</i> , 2022, 52, 102344.	2.7	2
13	In Situ Microscopic Observation of Humidity-Induced Degradation in All-Inorganic Perovskite Films. <i>ACS Applied Energy Materials</i> , 2022, 5, 8092-8102.	5.1	4
14	Experimental and Numerical Study on Thermal Hydraulic Performance of Trapezoidal Printed Circuit Heat Exchanger for Supercritical CO ₂ Brayton Cycle. <i>Energies</i> , 2022, 15, 4940.	3.1	5
15	Achieving high energy efficiency of alkaline hybrid zinc battery by using the optimized Co-Mn spinel cathode. <i>International Journal of Hydrogen Energy</i> , 2022, 47, 27470-27480.	7.1	5
16	A combined phosphoric acid fuel cell and direct contact membrane distillation hybrid system for electricity generation and seawater desalination. <i>Energy Conversion and Management</i> , 2022, 267, 115916.	9.2	8
17	Energetic, exergetic and ecological evaluations of a hybrid system based on a phosphoric acid fuel cell and an organic Rankine cycle. <i>Energy</i> , 2021, 217, 119365.	8.8	23
18	Numerical simulation of hybrid systems based on solid oxide fuel cells. , 2021, , 91-127.		0

#	ARTICLE	IF	CITATIONS
19	High-temperature electrolysis and co-electrolysis. , 2021, , 51-73.		1
20	A new combined system consisting of a molten hydroxide direct carbon fuel cell and an alkali metal thermal electric converter: Energy and exergy analyses. Applied Thermal Engineering, 2021, 185, 116417.	6.0	15
21	Enabling thermal-neutral electrolysis for CO ₂ -to-fuel conversions with a hybrid deep learning strategy. Energy Conversion and Management, 2021, 230, 113827.	9.2	23
22	Methanol to power through high-efficiency hybrid fuel cell system: Thermodynamic, thermo-economic, and techno-economic (3T) analyses in Northwest China. Energy Conversion and Management, 2021, 232, 113899.	9.2	19
23	A hybrid system using a looped multi-stage thermoacoustically-driven cryocooler to harvest the waste heat from a direct carbon solid oxide fuel cell. International Journal of Heat and Mass Transfer, 2021, 169, 120972.	4.8	8
24	Advancing the multiscale understanding on solid oxide electrolysis cells via modelling approaches: A review. Renewable and Sustainable Energy Reviews, 2021, 141, 110863.	16.4	42
25	An efficient hybrid system using a graphene-based cathode vacuum thermionic energy converter to harvest the waste heat from a molten hydroxide direct carbon fuel cell. Energy, 2021, 223, 120095.	8.8	11
26	Performance evaluation of a hybrid alkali metal thermal electric converter-two stage thermoelectric generator system. Applied Thermal Engineering, 2021, 191, 116820.	6.0	16
27	Maximum power density analyses of a novel hybrid system based upon solid oxide fuel cells, vacuum thermionic generators and thermoelectric generators. International Journal of Hydrogen Energy, 2021, 46, 22062-22078.	7.1	23
28	Self-Assembled Structure Evolution of Mn _{1-x} Fe Oxides for High Temperature Thermochemical Energy Storage. Small, 2021, 17, e2101524.	10.0	17
29	Thermochemical Energy Storage: Self-Assembled Structure Evolution of Mn _{1-x} Fe Oxides for High Temperature Thermochemical Energy Storage (Small 29/2021). Small, 2021, 17, 2170149.	10.0	0
30	Optimization of catalyst layer thickness for achieving high performance and low cost of high temperature proton exchange membrane fuel cell. Applied Energy, 2021, 294, 117012.	10.1	35
31	Elucidating the mechanism of discharge performance improvement in zinc-air flow batteries: A combination of experimental and modeling investigations. Journal of Energy Storage, 2021, 40, 102779.	8.1	11
32	Regulating thermochemical redox temperature via oxygen defect engineering for protection of solar molten salt receivers. IScience, 2021, 24, 103039.	4.1	7
33	Stability in Photoinduced Instability in Mixed-Halide Perovskite Materials and Solar Cells. Journal of Physical Chemistry C, 2021, 125, 21370-21380.	3.1	10
34	Performance analysis of a new hybrid system composed of a concentrated photovoltaic cell and a two-stage thermoelectric generator. Sustainable Energy, Grids and Networks, 2021, 27, 100481.	3.9	11
35	Experimental and numerical investigation on the dynamic characteristics of a lab-scale transcritical CO ₂ loop. Energy Conversion and Management, 2021, 245, 114384.	9.2	4
36	Self-supported metal sulfide electrode for flexible quasi-solid-state zinc-air batteries. Journal of Alloys and Compounds, 2021, 878, 160434.	5.5	10

#	ARTICLE	IF	CITATIONS
37	Regenerable MgO-based sorbents for CO ₂ capture at elevated temperature and pressure: Experimental and DFT study. <i>Chemical Engineering Journal</i> , 2021, 425, 130675.	12.7	19
38	Al-Modified CuO/Cu ₂ O for High-Temperature Thermochemical Energy Storage: from Reaction Performance to Modification Mechanism. <i>ACS Applied Materials & Interfaces</i> , 2021, 13, 57274-57284.	8.0	10
39	A potentially non-contact monitor method for CO ₂ at the pseudo-critical region using infrared spectrometer. <i>Journal of CO₂ Utilization</i> , 2021, 56, 101842.	6.8	1
40	Numerical Study on Flow and Heat Transfer Characteristics of Trapezoidal Printed Circuit Heat Exchanger. <i>Micromachines</i> , 2021, 12, 1589.	2.9	6
41	Analysis of effects of meso-scale reactions on multiphysics transport processes in rSOFC fueled with syngas. <i>Energy</i> , 2020, 190, 116379.	8.8	8
42	Toward the rational design of cathode and electrolyte materials for aprotic Li- CO_2 batteries: A numerical investigation. <i>International Journal of Energy Research</i> , 2020, 44, 496-507.	4.5	15
43	Elimination of Light-Soaking Effect in Hysteresis-Free Perovskite Solar Cells by Interfacial Modification. <i>Journal of Physical Chemistry C</i> , 2020, 124, 1851-1860.	3.1	18
44	A-site deficient/excessive effects of LaMnO ₃ perovskite as bifunctional oxygen catalyst for zinc-air batteries. <i>Electrochimica Acta</i> , 2020, 333, 135566.	5.2	71
45	Performance analyses of a combined system consisting of high-temperature polymer electrolyte membrane fuel cells and thermally regenerative electrochemical cycles. <i>Energy</i> , 2020, 193, 116720.	8.8	32
46	Thermo-economic modeling and analysis of an NG-fueled SOFC-WGS-TSA-PEMFC hybrid energy conversion system for stationary electricity power generation. <i>Energy</i> , 2020, 192, 116613.	8.8	50
47	Dynamic modeling and operation strategy of natural gas fueled SOFC-Engine hybrid power system with hydrogen addition by metal hydride for vehicle applications. <i>ETransportation</i> , 2020, 5, 100074.	14.8	27
48	Alkali modified P25 with enhanced CO ₂ adsorption for CO ₂ photoreduction. <i>RSC Advances</i> , 2020, 10, 27989-27994.	3.6	13
49	Improved Design of a Thermophotovoltaic Device. <i>IEEE Transactions on Electron Devices</i> , 2020, 67, 4709-4712.	3.0	5
50	Achieving a broad-spectrum photovoltaic system by hybridizing a two-stage thermoelectric generator. <i>Energy Conversion and Management</i> , 2020, 211, 112778.	9.2	24
51	A comprehensive review on high-temperature fuel cells with carbon capture. <i>Applied Energy</i> , 2020, 275, 115342.	10.1	50
52	Performance improvement of perovskite solar cells via spiro-OMeTAD pre-crystallization. <i>Journal of Materials Science</i> , 2020, 55, 12264-12273.	3.7	5
53	Achieving a stable zinc electrode with ultralong cycle life by implementing a flowing electrolyte. <i>Journal of Power Sources</i> , 2020, 453, 227856.	7.8	31
54	A novel hybrid system consisting of a dye-sensitized solar cell and an absorption refrigerator for power and cooling cogeneration. <i>International Journal of Refrigeration</i> , 2020, 113, 115-125.	3.4	12

#	ARTICLE	IF	CITATIONS
55	Energetic, exergetic and ecological analyses of a high-temperature proton exchange membrane fuel cell based on a phosphoric-acid-doped polybenzimidazole membrane. Sustainable Energy Technologies and Assessments, 2020, 38, 100671.	2.7	16
56	A new hybrid system composed of high-temperature proton exchange fuel cell and two-stage thermoelectric generator with Thomson effect: Energy and exergy analyses. Energy, 2020, 195, 117000.	8.8	43
57	Techno-economic evaluation and technology roadmap of the MWe-scale SOFC-PEMFC hybrid fuel cell system for clean power generation. Journal of Cleaner Production, 2020, 255, 120225.	9.3	26
58	Thermal effects in H ₂ O and CO ₂ assisted direct carbon solid oxide fuel cells. International Journal of Hydrogen Energy, 2020, 45, 12459-12475.	7.1	21
59	Towards online optimisation of solid oxide fuel cell performance: Combining deep learning with multi-physics simulation. Energy and AI, 2020, 1, 100003.	10.6	61
60	Cation-Substitution-Tuned Oxygen Electrocatalyst of Spinel Cobaltite MCo ₂ O ₄ (M = Fe, Co, and Ni) Hexagonal Nanoplates for Rechargeable Zn-Air Batteries. Journal of the Electrochemical Society, 2019, 166, A3448-A3455.	2.9	8
61	Origination of Anomalous Current Fluctuation in Perovskite Solar Cells. ACS Applied Energy Materials, 2019, 2, 8138-8144.	5.1	3
62	Harvesting waste heat from molten carbonate fuel cells for bifunction applications. Journal of Renewable and Sustainable Energy, 2019, 11, 054301.	2.0	1
63	Charge Carrier Dynamics in Electron-Transport-Layer-Free Perovskite Solar Cells. ACS Applied Electronic Materials, 2019, 1, 2334-2341.	4.3	11
64	The thermal effects of all porous solid oxide fuel cells. Journal of Power Sources, 2019, 440, 227102.	7.8	20
65	Modeling of a combined CH ₄ -assisted solid oxide co-electrolysis and Fischer-Tropsch synthesis system for low-carbon fuel production. Energy Procedia, 2019, 158, 1666-1671.	1.8	6
66	A hybrid system using Brayton cycle to harvest the waste heat from a direct carbon solid oxide fuel cell. Applied Thermal Engineering, 2019, 160, 113992.	6.0	23
67	Achieving high energy density and efficiency through integration: progress in hybrid zinc batteries. Journal of Materials Chemistry A, 2019, 7, 15564-15574.	10.3	54
68	Modelling of a hybrid system for on-site power generation from solar fuels. Applied Energy, 2019, 240, 709-718.	10.1	11
69	Performance assessment of a combined system consisting of a high-temperature polymer electrolyte membrane fuel cell and a thermoelectric generator. Energy, 2019, 179, 762-770.	8.8	17
70	Exploring oxygen electrocatalytic activity and pseudocapacitive behavior of Co ₃ O ₄ nanoplates in alkaline solutions. Electrochimica Acta, 2019, 310, 86-95.	5.2	21
71	Combined methane reforming by carbon dioxide and steam in proton conducting solid oxide fuel cells for syngas/power co-generation. International Journal of Hydrogen Energy, 2019, 44, 15313-15321.	7.1	28
72	Performance assessment of an advanced triple-cycle system based upon solid oxide fuel cells, vacuum thermionic generators and absorption refrigerators. Energy Conversion and Management, 2019, 193, 64-73.	9.2	36

#	ARTICLE	IF	CITATIONS
73	A novel solar assisted vacuum thermionic generator-absorption refrigerator cogeneration system producing electricity and cooling. <i>Energy Conversion and Management</i> , 2019, 187, 83-92.	9.2	15
74	Synthesis of Fe ₂ O ₃ Nanoparticle-Decorated N-Doped Reduced Graphene Oxide as an Effective Catalyst for Zn-Air Batteries. <i>Journal of the Electrochemical Society</i> , 2019, 166, A616-A622.	2.9	19
75	A high-performance Zn battery based on self-assembled nanostructured NiCo ₂ O ₄ electrode. <i>Journal of Power Sources</i> , 2019, 421, 6-13.	7.8	87
76	Performance Analysis of a Hybrid System Consisting of a Molten Carbonate Direct Carbon Fuel Cell and an Absorption Refrigerator. <i>Energies</i> , 2019, 12, 357.	3.1	6
77	Low carbon fuel production from combined solid oxide CO ₂ co-electrolysis and Fischer-Tropsch synthesis system: A modelling study. <i>Applied Energy</i> , 2019, 242, 911-918.	10.1	23
78	Toward a new generation of low cost, efficient, and durable metal-air flow batteries. <i>Journal of Materials Chemistry A</i> , 2019, 7, 26744-26768.	10.3	51
79	In-situ growth of Co ₃ O ₄ nanowire-assembled clusters on nickel foam for aqueous rechargeable Zn-Co ₃ O ₄ and Zn-air batteries. <i>Applied Catalysis B: Environmental</i> , 2019, 241, 104-112.	20.2	167
80	Plastic waste fuelled solid oxide fuel cell system for power and carbon nanotube cogeneration. <i>International Journal of Hydrogen Energy</i> , 2019, 44, 1867-1876.	7.1	30
81	Modeling of all-porous solid oxide fuel cells with a focus on the electrolyte porosity design. <i>Applied Energy</i> , 2019, 235, 602-611.	10.1	28
82	Thermal modelling of ethanol-fuelled Solid Oxide Fuel Cells. <i>Applied Energy</i> , 2019, 237, 476-486.	10.1	39
83	Porous Co ₃ O ₄ nanoplates as the active material for rechargeable Zn-air batteries with high energy efficiency and cycling stability. <i>Energy</i> , 2019, 166, 1241-1248.	8.8	29
84	A direct carbon solid oxide fuel cell fueled with char from wheat straw. <i>International Journal of Energy Research</i> , 2019, 43, 2468-2477.	4.5	38
85	Experimental and modeling study of high performance direct carbon solid oxide fuel cell with in situ catalytic steam-carbon gasification reaction. <i>Journal of Power Sources</i> , 2018, 382, 135-143.	7.8	38
86	Co ₃ O ₄ Nanosheets as Active Material for Hybrid Zn Batteries. <i>Small</i> , 2018, 14, e1800225.	10.0	131
87	Performance improvement of a direct carbon solid oxide fuel cell through integrating an Otto heat engine. <i>Energy Conversion and Management</i> , 2018, 165, 761-770.	9.2	33
88	Syngas/power cogeneration from proton conducting solid oxide fuel cells assisted by dry methane reforming: A thermal-electrochemical modelling study. <i>Energy Conversion and Management</i> , 2018, 167, 37-44.	9.2	44
89	Modeling of all porous solid oxide fuel cells. <i>Applied Energy</i> , 2018, 219, 105-113.	10.1	84
90	Performance analyzes of an integrated phosphoric acid fuel cell and thermoelectric device system for power and cooling cogeneration. <i>International Journal of Refrigeration</i> , 2018, 89, 61-69.	3.4	59

#	ARTICLE	IF	CITATIONS
91	Integration of Zn ²⁺ /Ag and Zn ²⁺ /Air Batteries: A Hybrid Battery with the Advantages of Both. ACS Applied Materials & Interfaces, 2018, 10, 36873-36881.	8.0	70
92	Growth of Al and Co co-doped NiO nanosheets on carbon cloth as the air electrode for Zn-air batteries with high cycling stability. Electrochimica Acta, 2018, 290, 21-29.	5.2	29
93	Efficiency evaluation of a coal-fired power plant integrated with chilled ammonia process using an absorption refrigerator. Applied Energy, 2018, 230, 267-276.	10.1	21
94	Nanoporous NiO/Ni(OH) ₂ Plates Incorporated with Carbon Nanotubes as Active Materials of Rechargeable Hybrid Zinc Batteries for Improved Energy Efficiency and High-Rate Capability. Journal of the Electrochemical Society, 2018, 165, A2119-A2126.	2.9	35
95	Investigation on the electrode design of hybrid Zn-Co ₃ O ₄ /air batteries for performance improvements. Electrochimica Acta, 2018, 283, 1028-1036.	5.2	42
96	Numerical modeling of a cogeneration system based on a direct carbon solid oxide fuel cell and a thermophotovoltaic cell. Energy Conversion and Management, 2018, 171, 279-286.	9.2	14
97	A feasible way to handle the heat management of direct carbon solid oxide fuel cells. Applied Energy, 2018, 226, 881-890.	10.1	25
98	Two-stage thermoelectric generators for waste heat recovery from solid oxide fuel cells. Energy, 2017, 132, 280-288.	8.8	86
99	A novel design of solid oxide electrolyser integrated with magnesium hydride bed for hydrogen generation and storage – A dynamic simulation study. Applied Energy, 2017, 200, 260-272.	10.1	22
100	Modeling of direct carbon solid oxide fuel cells with H ₂ O and CO ₂ as gasification agents. International Journal of Hydrogen Energy, 2017, 42, 15641-15651.	7.1	48
101	The thermal effect in direct carbon solid oxide fuel cells. Applied Thermal Engineering, 2017, 118, 652-662.	6.0	36
102	Modelling of SOEC-FT reactor: Pressure effects on methanation process. Applied Energy, 2017, 185, 814-824.	10.1	66
103	Performance improvement of a direct carbon solid oxide fuel cell system by combining with a Stirling cycle. Energy, 2017, 140, 979-987.	8.8	37
104	Flexible Zn ²⁺ and Li ⁺ air batteries: recent advances, challenges, and future perspectives. Energy and Environmental Science, 2017, 10, 2056-2080.	30.8	477
105	Application of cascading thermoelectric generator and cooler for waste heat recovery from solid oxide fuel cells. Energy Conversion and Management, 2017, 148, 1382-1390.	9.2	148
106	Performance assessment of an integrated molten carbonate fuel cell-thermoelectric devices hybrid system for combined power and cooling purposes. International Journal of Hydrogen Energy, 2017, 42, 30156-30165.	7.1	33
107	Modelling of finger-like channelled anode support for SOFCs application. Science Bulletin, 2016, 61, 1324-1332.	9.0	29
108	Modeling of CH ₄ -assisted SOEC for H ₂ O/CO ₂ co-electrolysis. International Journal of Hydrogen Energy, 2016, 41, 21839-21849.	7.1	65

#	ARTICLE	IF	CITATIONS
109	Modelling of One-Step Methanation Process Combining SOECs and Fischer-Tropsch-like Reactor. Journal of the Electrochemical Society, 2016, 163, F3001-F3008.	2.9	27
110	Performance assessment of a hybrid system integrating a molten carbonate fuel cell and a thermoelectric generator. Energy, 2016, 112, 520-527.	8.8	70
111	Thermodynamic analysis and performance optimization of solid oxide fuel cell and refrigerator hybrid system based on H ₂ and CO. Applied Thermal Engineering, 2016, 108, 347-352.	6.0	13
112	Modeling of direct carbon solid oxide fuel cell for CO and electricity cogeneration. Applied Energy, 2016, 178, 353-362.	10.1	77
113	Thermodynamic assessment of an integrated molten carbonate fuel cell and absorption refrigerator hybrid system for combined power and cooling applications. International Journal of Refrigeration, 2016, 70, 1-12.	3.4	28
114	Modeling of Direct Carbon-Assisted Solid Oxide Electrolysis Cell (SOEC) for Syngas Production at Two Different Electrodes. Journal of the Electrochemical Society, 2016, 163, F3029-F3035.	2.9	33
115	Parametric study of a hybrid system integrating a phosphoric acid fuel cell with an absorption refrigerator for cooling purposes. International Journal of Hydrogen Energy, 2016, 41, 3579-3590.	7.1	49
116	Performance characteristics of a direct carbon fuel cell/thermoelectric generator hybrid system. Energy Conversion and Management, 2015, 89, 683-689.	9.2	99
117	Performance analysis of a direct carbon fuel cell with molten carbonate electrolyte. Energy, 2014, 68, 292-300.	8.8	45
118	Performance evaluation of an alkaline fuel cell/thermoelectric generator hybrid system. International Journal of Hydrogen Energy, 2014, 39, 11756-11762.	7.1	56
119	Electrochemical performance characteristics and optimum design strategies of a solid oxide electrolysis cell system for carbon dioxide reduction. International Journal of Hydrogen Energy, 2013, 38, 9609-9618.	7.1	32
120	Performance analysis and parametric study of a solid oxide fuel cell fueled by carbon monoxide. International Journal of Hydrogen Energy, 2013, 38, 16354-16364.	7.1	32
121	Performance analysis and multi-objective optimization of a new molten carbonate fuel cell system. International Journal of Hydrogen Energy, 2011, 36, 4015-4021.	7.1	68
