Charlotta Kvarnemo

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/1908480/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	The dynamics of operational sex ratios and competition for mates. Trends in Ecology and Evolution, 1996, 11, 404-408.	8.7	552
2	Polyandry as a mediator of sexual selection before and after mating. Philosophical Transactions of the Royal Society B: Biological Sciences, 2013, 368, 20120042.	4.0	193
3	Female sand gobies gain direct benefits by choosing males with eggs in their nests. Behavioral Ecology and Sociobiology, 1996, 39, 91-96.	1.4	175
4	Sexual conflict and life histories. Animal Behaviour, 2006, 71, 999-1011.	1.9	112
5	Parental behaviour in relation to food availability in the common goby. Animal Behaviour, 1998, 56, 1285-1290.	1.9	111
6	Effects of sex ratio on intra- and inter-sexual behaviour in sand gobies. Animal Behaviour, 1995, 50, 1455-1461.	1.9	106
7	Microsatellite evidence for monogamy and sexâ€biased recombination in the Western Australian seahorseHippocampus angustus. Molecular Ecology, 1998, 7, 1497-1505.	3.9	102
8	Ventilation or nest defense—parental care trade-offs in a fish with male care. Behavioral Ecology and Sociobiology, 2006, 60, 864-873.	1.4	88
9	Variance in female quality, operational sex ratio and male mate choice in a bushcricket. Behavioral Ecology and Sociobiology, 1999, 45, 245-252.	1.4	84
10	Sympatric speciation as a consequence of male pregnancy in seahorses. Proceedings of the National Academy of Sciences of the United States of America, 2003, 100, 6598-6603.	7.1	80
11	Ejaculate expenditure by malebush crickets decreases with sperm competition intensity. Proceedings of the Royal Society B: Biological Sciences, 1997, 264, 1203-1208.	2.6	79
12	MODE OF SEXUAL SELECTION DETERMINED BY RESOURCE ABUNDANCE IN TWO SAND GOBY POPULATIONS. Evolution; International Journal of Organic Evolution, 1996, 50, 646-654.	2.3	75
13	Evolution and maintenance of male care: is increased paternity a neglected benefit of care?. Behavioral Ecology, 2006, 17, 144-148.	2.2	73
14	Why do some animals mate with one partner rather than many? <scp>A</scp> review of causes and consequences of monogamy. Biological Reviews, 2018, 93, 1795-1812.	10.4	70
15	Surprising similarity of sneaking rates and genetic mating patterns in two populations of sand goby experiencing disparate sexual selection regimes. Molecular Ecology, 2001, 10, 461-469.	3.9	69
16	Mode of Sexual Selection Determined by Resource Abundance in Two Sand Goby Populations. Evolution; International Journal of Organic Evolution, 1996, 50, 646.	2.3	61
17	The importance of sperm competition risk and nest appearance for male behavior and female choice in the sand goby, Pomatoschistus minutus. Behavioral Ecology, 2005, 16, 1042-1048.	2.2	58

18 Operational sex ratios and mating competition. , 2002, , 366-382.

CHARLOTTA KVARNEMO

#	Article	IF	CITATIONS
19	Size-assortative nest choice in the absence of competition in males of the sand goby, Pomatoschistus minutus. Environmental Biology of Fishes, 1995, 43, 233-239.	1.0	55
20	Parental behaviour in relation to the occurrence of sneaking in the common goby. Animal Behaviour, 1998, 56, 175-179.	1.9	50
21	Sexually selected females in the monogamous Western Australian seahorse. Proceedings of the Royal Society B: Biological Sciences, 2007, 274, 521-525.	2.6	48
22	Brooding fathers, not siblings, take up nutrients from embryos. Proceedings of the Royal Society B: Biological Sciences, 2010, 277, 971-977.	2.6	46
23	The definition of sexual selection. Behavioral Ecology, 2021, 32, 781-794.	2.2	46
24	Temperature affects operational sex ratio and intensity of male-male competition: an experimental study of sand gobies, Pomatoschistus minutus. Behavioral Ecology, 1996, 7, 208-212.	2.2	43
25	Food affects the potential reproductive rates of sand goby females but not of males. Behavioral Ecology, 1997, 8, 605-611.	2.2	43
26	Reproductive compensation in broad-nosed pipefish females. Proceedings of the Royal Society B: Biological Sciences, 2010, 277, 1581-1587.	2.6	41
27	Relative costs of courtship behaviours in nest-building sand gobies. Animal Behaviour, 2009, 77, 541-546.	1.9	39
28	Male potential reproductive rate influences mate choice in a bushcricket. Animal Behaviour, 1998, 55, 1499-1506.	1.9	33
29	Costs of breeding and their effects on the direction of sexual selection. Proceedings of the Royal Society B: Biological Sciences, 2006, 273, 465-470.	2.6	33
30	Continuous but not intermittent noise has a negative impact on mating success in a marine fish with paternal care. Scientific Reports, 2019, 9, 5494.	3.3	31
31	Testes investment and spawning mode in pipefishes and seahorses (Syngnathidae). Biological Journal of the Linnean Society, 2004, 83, 369-376.	1.6	30
32	Postâ€glacial establishment of locally adapted fish populations over a steep salinity gradient. Journal of Evolutionary Biology, 2021, 34, 138-156.	1.7	28
33	Endless forms of sexual selection. PeerJ, 2019, 7, e7988.	2.0	24
34	Effects of salinity on nest-building behaviour in a marine fish. BMC Ecology, 2016, 16, 7.	3.0	23
35	Immigrant reproductive dysfunction facilitates ecological speciation. Evolution; International Journal of Organic Evolution, 2017, 71, 2510-2521.	2.3	22
36	Evidence of rapid adaptive trait change to local salinity in the sperm of an invasive fish. Evolutionary Applications, 2020, 13, 533-544.	3.1	22

CHARLOTTA KVARNEMO

#	Article	IF	CITATIONS
37	Socially induced tactic change in 2 types of sand goby sneaker males. Behavioral Ecology, 2012, 23, 742-750.	2.2	20
38	Variation in Sexual Selection in Fishes. , 2008, , 303-335.		20
39	The effect of perceived female parasite load on post-copulatory male choice in a sex-role-reversed pipefish. Behavioral Ecology and Sociobiology, 2009, 63, 345-354.	1.4	19
40	The effect of maternal body size on embryo survivorship in the broods of pregnant male pipefish. Behavioral Ecology and Sociobiology, 2011, 65, 1169-1177.	1.4	19
41	Multiply mated males show higher embryo survival in a paternally caring fish. Behavioral Ecology, 2011, 22, 625-629.	2.2	19
42	Temperature modulates competitive behaviour: why sand goby males fight more in warmer water. Ethology Ecology and Evolution, 1998, 10, 105-114.	1.4	17
43	Embryo oxygenation in pipefish brood pouches: novel insights. Journal of Experimental Biology, 2015, 218, 1639-1646.	1.7	17
44	Infections may select for filial cannibalism by impacting egg survival in interactions with water salinity and egg density. Oecologia, 2015, 178, 673-683.	2.0	17
45	Non-random paternity of offspring in a highly promiscuous marine snail suggests postcopulatory sexual selection. Behavioral Ecology and Sociobiology, 2016, 70, 1357-1366.	1.4	15
46	Mating distribution and its temporal dynamics affect operational sex ratio: a simulation study. Biological Journal of the Linnean Society, 2006, 89, 551-559.	1.6	13
47	The evolutionary puzzle of egg size, oxygenation and parental care in aquatic environments. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20150690.	2.6	13
48	Odour cues from suitors' nests determine mating success in a fish. Biology Letters, 2015, 11, 20150021.	2.3	12
49	Filial cannibalism in a nest-guarding fish: females prefer to spawn in nests with few eggs over many. Behavioral Ecology and Sociobiology, 2014, 68, 1565-1576.	1.4	10
50	Mechanisms behind size-assortative nest choice by sand goby males in the absence of intrasexual competition. Animal Behaviour, 2012, 83, 55-62.	1.9	9
51	Hypoxia increases the risk of egg predation in a nest-guarding fish. Royal Society Open Science, 2016, 3, 160326.	2.4	9
52	Nutritional state – a survival kit for brooding pipefish fathers. Biological Journal of the Linnean Society, 2017, 121, 312-318.	1.6	9
53	Sperm performance limits the reproduction of an invasive fish in novel salinities. Diversity and Distributions, 2021, 27, 1091-1105.	4.1	9
54	Effects of territorial damselfish on cryptic bioeroding organisms on dead Acropora formosa. Journal of Experimental Marine Biology and Ecology, 2005, 327, 91-102.	1.5	8

#	Article	IF	CITATIONS
55	Alternative reproductive tactics are associated with sperm performance in invasive round goby from two different salinity environments. Ecology and Evolution, 2020, 10, 9981-9999.	1.9	7
56	Dark eyes in female sand gobies indicate readiness to spawn. PLoS ONE, 2017, 12, e0177714.	2.5	7
57	Title is missing!. Reviews in Fish Biology and Fisheries, 1998, 8, 93-98.	4.9	6
58	Evolutionary ecology of pipefish brooding structures: embryo survival and growth do not improve with a pouch. Ecology and Evolution, 2016, 6, 3608-3620.	1.9	6
59	Pipefish embryo oxygenation, survival, and development: egg size, male size, and temperature effects. Behavioral Ecology, 2019, 30, 1451-1460.	2.2	6
60	Sperm duct gland contents increase sperm velocity in the sand goby. Biology Open, 2019, 8, .	1.2	6
61	Ancestral Sperm Ecotypes Reveal Multiple Invasions of a Non-Native Fish in Northern Europe. Cells, 2021, 10, 1743.	4.1	6
62	The capacity for additional matings does not affect male mating competition in the sand goby. Animal Behaviour, 2006, 71, 865-870.	1.9	5
63	Understanding resource driven female–female competition: ovary and liver size in sand gobies. Royal Society Open Science, 2019, 6, 190886.	2.4	5
64	Costs and Benefits to Pregnant Male Pipefish Caring for Broods of Different Sizes. PLoS ONE, 2016, 11, e0156484.	2.5	5
65	Effects of mating order and male size on embryo survival in a pipefish. Biological Journal of the Linnean Society, 2015, 114, 639-645.	1.6	4
66	Sperm adaptation in relation to salinity in three goby species. Journal of Fish Biology, 2021, 99, 607-613.	1.6	4
67	Ten years of marine evolutionary biology—Challenges and achievements of a multidisciplinary research initiative. Evolutionary Applications, 2023, 16, 530-541.	3.1	4
68	Invader at the edge — Genomic origins and physiological differences of round gobies across a steep urban salinity gradient. Evolutionary Applications, 2023, 16, 321-337.	3.1	3
69	Female mate choice is not affected by mate condition in a fish with male care. Acta Ethologica, 2013, 16, 189-194.	0.9	2
70	Sand Goby—An Ecologically Relevant Species for Behavioural Ecotoxicology. Fishes, 2018, 3, 13.	1.7	2
71	Home range use in the West Australian seahorse Hippocampus subelongatus is influenced by sex and partner's home range but not by body size or paired status. Journal of Ethology, 2021, 39, 235-248.	0.8	2

Dark-eyed females: sexually dimorphic prespawning coloration results from sex-specific physiological response to hormone exposure in the sand goby<i>Pomatoschistus minutus</i>(Gobiiformes:) Tj ETQq0 0 0 rgBT /@erlock 10 Tf 50 57

#	Article	IF	CITATIONS
73	Molecular, behavioural and morphological comparisons of sperm adaptations in a fish with alternative reproductive tactics. Evolutionary Applications, 0, , .	3.1	1
74	Effect of sand texture on nest quality and mating success in a fish with parental care. Behavioral Ecology and Sociobiology, 2019, 73, 1.	1.4	0
