| #  | ARTICLE                                                                                                                                                                                                                                              | IF   | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Heterogeneity of primary and secondary peristalsis in systemic sclerosis: A new model of œsophageal motility. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14284.                                                                          | 3.0  | 3         |
| 2  | Single cell transcriptomic analysis reveals cellular diversity of murine esophageal epithelium. <i>Nature Communications</i> , 2022, 13, 2167.                                                                                                       | 12.8 | 20        |
| 3  | IL-17 Kinase-1 $\beta$ Regulates Neutrophil Recruitment Through Activation of STAT3 Signaling in the Esophagus. <i>Cellular and Molecular Gastroenterology and Hepatology</i> , 2021, 12, 1743-1759.                                                 | 4.5  | 1         |
| 4  | GI Manifestations With a Focus on the Esophagus: Recent Progress in Understanding Pathogenesis. <i>Current Rheumatology Reports</i> , 2019, 21, 42.                                                                                                  | 4.7  | 9         |
| 5  | Clinical and translational advances in esophageal squamous cell carcinoma. <i>Advances in Cancer Research</i> , 2019, 144, 95-135.                                                                                                                   | 5.0  | 140       |
| 6  | Autophagy as a cytoprotective mechanism in esophageal squamous cell carcinoma. <i>Current Opinion in Pharmacology</i> , 2018, 41, 12-19.                                                                                                             | 3.5  | 23        |
| 7  | KLF4 transcriptionally activates non-canonical WNT5A to control epithelial stratification. <i>Scientific Reports</i> , 2016, 6, 26130.                                                                                                               | 3.3  | 20        |
| 8  | Esophageal Expression of Active IL-17 Kinase-1 $\beta$ in Mice Up-Regulates Tumor Necrosis Factor and Granulocyte-Macrophage Colony-Stimulating Factor, Promoting Inflammation and Angiogenesis. <i>Gastroenterology</i> , 2016, 150, 1609-1619.e11. | 1.3  | 17        |
| 9  | Esophageal Cancer: Insights from Mouse Models. <i>Cancer Growth and Metastasis</i> , 2015, 8s1, CGM.S21218.                                                                                                                                          | 3.5  | 24        |
| 10 | WNT10A promotes an invasive and self-renewing phenotype in esophageal squamous cell carcinoma. <i>Carcinogenesis</i> , 2015, 36, 598-606.                                                                                                            | 2.8  | 59        |
| 11 | Krüppel-like factors in cancer. <i>Nature Reviews Cancer</i> , 2013, 13, 701-713.                                                                                                                                                                    | 28.4 | 315       |
| 12 | Krüppel-Like Factor 5 Protects against Murine Colitis and Activates JAK-STAT Signaling In Vivo. <i>PLoS ONE</i> , 2012, 7, e38338.                                                                                                                   | 2.5  | 23        |
| 13 | Esophageal Squamous Cell Dysplasia and Delayed Differentiation With Deletion of Krüppel-Like Factor 4 in Murine Esophagus. <i>Gastroenterology</i> , 2010, 139, 171-181.e9.                                                                          | 1.3  | 65        |
| 14 | Klf4 Overexpression Activates Epithelial Cytokines and Inflammation-Mediated Esophageal Squamous Cell Cancer in Mice. <i>Gastroenterology</i> , 2010, 139, 2124-2134.e9.                                                                             | 1.3  | 52        |
