#	ARTICLE	IF	CITATIONS
1	Adolescence is associated with genomically patterned consolidation of the hubs of the human brain connectome. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 9105-9110.	7.1	415
2	Morphometric Similarity Networks Detect Microscale Cortical Organization and Predict Inter-Individual Cognitive Variation. <i>Neuron</i> , 2018, 97, 231-247.e7.	8.1	307
3	Selective serotonin reuptake inhibitors (SSRIs) and routine specialist care with and without cognitive behaviour therapy in adolescents with major depression: randomised controlled trial. <i>BMJ: British Medical Journal</i> , 2007, 335, 142.	2.3	301
4	Developmental cognitive neuroscience using latent change score models: A tutorial and applications. <i>Developmental Cognitive Neuroscience</i> , 2018, 33, 99-117.	4.0	282
5	Shift toward prior knowledge confers a perceptual advantage in early psychosis and psychosis-prone healthy individuals. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 13401-13406.	7.1	226
6	Adolescent Tuning of Association Cortex in Human Structural Brain Networks. <i>Cerebral Cortex</i> , 2018, 28, 281-294.	2.9	195
7	Gene transcription profiles associated with inter-modular hubs and connection distance in human functional magnetic resonance imaging networks. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2016, 371, 20150362.	4.0	188
8	Cognitive behavioural therapy and short-term psychoanalytical psychotherapy versus a brief psychosocial intervention in adolescents with unipolar major depressive disorder (IMPACT): a multicentre, pragmatic, observer-blind, randomised controlled superiority trial. <i>Lancet Psychiatry</i> , 2017, 4, 109-119.	7.4	181
9	Structural covariance networks are coupled to expression of genes enriched in supragranular layers of the human cortex. <i>NeuroImage</i> , 2018, 171, 256-267.	4.2	177
10	Cortical thickness gradients in structural hierarchies. <i>NeuroImage</i> , 2015, 111, 241-250.	4.2	155
11	Friendships and Family Support Reduce Subsequent Depressive Symptoms in At-Risk Adolescents. <i>PLoS ONE</i> , 2016, 11, e0153715.	2.5	151
12	Meta-analytic evidence for neuroimaging models of depression: State or trait?. <i>Journal of Affective Disorders</i> , 2013, 151, 423-431.	4.1	146
13	The Friendships and Recent Life Events of Anxious and Depressed School-Age Children. <i>British Journal of Psychiatry</i> , 1990, 156, 689-698.	2.8	107
14	Improving mood with psychoanalytic and cognitive therapies (IMPACT): a pragmatic effectiveness superiority trial to investigate whether specialised psychological treatment reduces the risk for relapse in adolescents with moderate to severe unipolar depression: study protocol for a randomised controlled trial. <i>Trials</i> , 2011, 12, 175.	1.6	106
15	Short-Term Outcome of Major Depression: I. Comorbidity and Severity at Presentation as Predictors of Persistent Disorder. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 1997, 36, 179-187.	0.5	102
16	Post-traumatic stress disorder in children and adolescents following road traffic accidents. <i>British Journal of Psychiatry</i> , 1998, 172, 443-447.	2.8	101
17	Elevated morning cortisol is a stratified population-level biomarker for major depression in boys only with high depressive symptoms. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 3638-3643.	7.1	97
18	Conservative and disruptive modes of adolescent change in human brain functional connectivity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 3248-3253.	7.1	96

#	ARTICLE	IF	CITATIONS
19	Cost-effectiveness of selective serotonin reuptake inhibitors and routine specialist care with and without cognitive-behavioural therapy in adolescents with major depression. <i>British Journal of Psychiatry</i> , 2007, 191, 521-527.	2.8	89
20	Serotonin transporter genotype, morning cortisol and subsequent depression in adolescents. <i>British Journal of Psychiatry</i> , 2009, 195, 39-45.	2.8	87
21	Reduction in adolescent depression after contact with mental health services: a longitudinal cohort study in the UK. <i>Lancet Psychiatry</i> , 2017, 4, 120-127.	7.4	86
22	Compulsivity and impulsivity traits linked to attenuated developmental frontostriatal myelination trajectories. <i>Nature Neuroscience</i> , 2019, 22, 992-999.	14.8	86
23	Development of a Short Leyton Obsessional Inventory for Children and Adolescents. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2002, 41, 1246-1252.	0.5	80
24	Mutualistic Coupling Between Vocabulary and Reasoning Supports Cognitive Development During Late Adolescence and Early Adulthood. <i>Psychological Science</i> , 2017, 28, 1419-1431.	3.3	77
25	Assessment of Symptom Network Density as a Prognostic Marker of Treatment Response in Adolescent Depression. <i>JAMA Psychiatry</i> , 2018, 75, 98.	11.0	77
26	Imagining your child's mind: Psychosocial adjustment and mothers' ability to predict their children's attributional response styles. <i>British Journal of Developmental Psychology</i> , 2006, 24, 197-214.	1.7	74
27	Cohort Profile: The NSPN 2400 Cohort: a developmental sample supporting the Wellcome Trust NeuroScience in Psychiatry Network. <i>International Journal of Epidemiology</i> , 2018, 47, 18-19g.	1.9	68
28	Exercise and Depressive Symptoms in Adolescents. <i>JAMA Pediatrics</i> , 2014, 168, 1093.	6.2	66
29	General and specific effects of early-life psychosocial adversities on adolescent grey matter volume. <i>NeuroImage: Clinical</i> , 2014, 4, 308-318.	2.7	66
30	Social Influences on the Course of Anxious and Depressive Disorders in School-Age Children. <i>British Journal of Psychiatry</i> , 1991, 158, 676-684.	2.8	63
31	Multisystemic therapy versus management as usual in the treatment of adolescent antisocial behaviour (START): a pragmatic, randomised controlled, superiority trial. <i>Lancet Psychiatry</i> , 2018, 5, 119-133.	7.4	63
32	Cohort Profile: Risk patterns and processes for psychopathology emerging during adolescence: the ROOTS project. <i>International Journal of Epidemiology</i> , 2010, 39, 361-369.	1.9	62
33	A Community Study of Depression in Adolescent Girls. <i>British Journal of Psychiatry</i> , 1993, 163, 374-380.	2.8	61
34	Cognitive-behavioural therapy and short-term psychoanalytic psychotherapy versus brief psychosocial intervention in adolescents with unipolar major depression (IMPACT): a multicentre, pragmatic, observer-blind, randomised controlled trial. <i>Health Technology Assessment</i> , 2017, 21, 1-94.	2.8	61
35	Polymorphisms in <i>BDNF</i> (Val66Met) and <i>5-HTTLPR</i> , morning cortisol and subsequent depression in at-risk adolescents. <i>British Journal of Psychiatry</i> , 2010, 197, 365-371.	2.8	60
36	Prevalence and significance of weight and shape concerns in girls aged 11-16 years. <i>British Journal of Psychiatry</i> , 1997, 171, 542-544.	2.8	59

#	ARTICLE	IF	CITATIONS
37	Schizotypy-Related Magnetization of Cortex in Healthy Adolescence Is Colocated With Expression of Schizophrenia-Related Genes. <i>Biological Psychiatry</i> , 2020, 88, 248-259.	1.3	59
38	Enhanced emotion regulation capacity and its neural substrates in those exposed to moderate childhood adversity. <i>Social Cognitive and Affective Neuroscience</i> , 2016, 11, 272-281.	3.0	58
39	Social pain and social gain in the adolescent brain: A common neural circuitry underlying both positive and negative social evaluation. <i>Scientific Reports</i> , 2017, 7, 42010.	3.3	57
40	Positive memory specificity is associated with reduced vulnerability to depression. <i>Nature Human Behaviour</i> , 2019, 3, 265-273.	12.0	53
41	Biased Mentalizing in Children Aged Seven to 11: Latent Class Confirmation of Response Styles to Social Scenarios and Associations with Psychopathology. <i>Social Development</i> , 2007, 16, 181-202.	1.3	52
42	Revising on the run or studying on the sofa: prospective associations between physical activity, sedentary behaviour, and exam results in British adolescents. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 106.	4.6	52
43	Cortical thickness, surface area, and folding alterations in male youths with conduct disorder and varying levels of callous/unemotional traits. <i>NeuroImage: Clinical</i> , 2015, 8, 253-260.	2.7	52
44	Predicting dropout in adolescents receiving therapy for depression. <i>Psychotherapy Research</i> , 2018, 28, 708-721.	1.8	50
45	Poor family functioning mediates the link between childhood adversity and adolescent nonsuicidal self-harm. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 881-887.	5.2	49
46	An expanding manifold in transmodal regions characterizes adolescent reconfiguration of structural connectome organization. <i>ELife</i> , 2021, 10, .	6.0	47
47	Characterising the latent structure and organisation of self-reported thoughts, feelings and behaviours in adolescents and young adults. <i>PLoS ONE</i> , 2017, 12, e0175381.	2.5	42
48	White matter tract myelin maturation and its association with general psychopathology in adolescence and early adulthood. <i>Human Brain Mapping</i> , 2020, 41, 827-839.	3.6	42
49	Age and gender effects on non-suicidal self-injury, and their interplay with psychological distress. <i>Journal of Affective Disorders</i> , 2022, 306, 240-245.	4.1	41
50	5-HTTLPR and Early Childhood Adversities Moderate Cognitive and Emotional Processing in Adolescence. <i>PLoS ONE</i> , 2012, 7, e48482.	2.5	39
51	Antidepressants and the adolescent brain. <i>Journal of Psychopharmacology</i> , 2015, 29, 545-555.	4.0	39
52	Change, stability, and instability in the Pavlovian guidance of behaviour from adolescence to young adulthood. <i>PLoS Computational Biology</i> , 2018, 14, e1006679.	3.2	39
53	The association between pubertal status and depressive symptoms and diagnoses in adolescent females: A population-based cohort study. <i>PLoS ONE</i> , 2018, 13, e0198804.	2.5	37
54	Recent Achievements and Adversities in Anxious and Depressed School Age Children. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 1990, 31, 1063-077.	5.2	35

#	ARTICLE	IF	CITATIONS
55	Prospective associations between sedentary time, sleep duration and adiposity in adolescents. <i>Sleep Medicine</i> , 2015, 16, 717-722.	1.6	35
56	Magnitude and determinants of change in objectively-measured physical activity, sedentary time and sleep duration from ages 15 to 17.5y in UK adolescents: the ROOTS study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 61.	4.6	34
57	Neurodevelopment and ages of onset in depressive disorders. <i>Lancet Psychiatry</i> , 2015, 2, 1112-1116.	7.4	34
58	Decision-making ability, psychopathology, and brain connectivity. <i>Neuron</i> , 2021, 109, 2025-2040.e7.	8.1	34
59	Emanuel Miller Lecture: Early onset depressions – meanings, mechanisms and processes. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2008, 49, 1239-1256.	5.2	33
60	Cognitive Behavioral Therapy Lowers Elevated Functional Connectivity in Depressed Adolescents. <i>EBioMedicine</i> , 2017, 17, 216-222.	6.1	33
61	Multiple Holdouts With Stability: Improving the Generalizability of Machine Learning Analyses of Brain – Behavior Relationships. <i>Biological Psychiatry</i> , 2020, 87, 368-376.	1.3	32
62	Adolescents with current major depressive disorder show dissimilar patterns of age-related differences in ACC and thalamus. <i>NeuroImage: Clinical</i> , 2015, 7, 391-399.	2.7	31
63	Brain-behaviour modes of covariation in healthy and clinically depressed young people. <i>Scientific Reports</i> , 2019, 9, 11536.	3.3	31
64	Fractionation of impulsive and compulsive trans-diagnostic phenotypes and their longitudinal associations. <i>Australian and New Zealand Journal of Psychiatry</i> , 2019, 53, 896-907.	2.3	31
65	Childhood socioeconomic disadvantage predicts reduced myelin growth across adolescence and young adulthood. <i>Human Brain Mapping</i> , 2020, 41, 3392-3402.	3.6	31
66	Social adversity and mental functions in adolescents at high risk of psychopathology. <i>British Journal of Psychiatry</i> , 2002, 181, 383-386.	2.8	30
67	Psychopathic traits influence amygdala – anterior cingulate cortex connectivity during facial emotion processing. <i>Social Cognitive and Affective Neuroscience</i> , 2018, 13, 525-534.	3.0	27
68	Influence of prior beliefs on perception in early psychosis: Effects of illness stage and hierarchical level of belief. <i>Journal of Abnormal Psychology</i> , 2020, 129, 581-598.	1.9	27
69	Adolescents leaving mental health or social care services: predictors of mental health and psychosocial outcomes one year later. <i>BMC Health Services Research</i> , 2015, 15, 185.	2.2	26
70	Diet quality and depressive symptoms in adolescence: no cross-sectional or prospective associations following adjustment for covariates. <i>Public Health Nutrition</i> , 2018, 21, 2376-2384.	2.2	25
71	The ROOTS study: a 10-year review of findings on adolescent depression, and recommendations for future longitudinal research. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2016, 51, 161-170.	3.1	24
72	Changes in General and Specific Psychopathology Factors Over a Psychosocial Intervention. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2019, 58, 776-786.	0.5	24

#	ARTICLE	IF	CITATIONS
73	Recent stressful life events: Their long term effects. <i>European Child and Adolescent Psychiatry</i> , 1993, 2, 1-9.	4.7	23
74	Neurocomputational mechanisms underpinning aberrant social learning in young adults with low self-esteem. <i>Translational Psychiatry</i> , 2020, 10, 96.	4.8	23
75	Toward precision therapeutics: general and specific factors differentiate symptom change in depressed adolescents. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 998-1008.	5.2	22
76	Perceived family functioning and friendship quality: cross-sectional associations with physical activity and sedentary behaviours. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 23.	4.6	21
77	Trajectories of depression symptom change during and following treatment in adolescents with unipolar major depression. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 565-574.	5.2	20
78	Practitioner Review: Therapeutics of unipolar major depressions in adolescents. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 232-243.	5.2	19
79	Emotional Reactivity and the Emergence of Conduct Problems and Emotional Symptoms in 7- to 11-Year-Olds: A 1-Year Follow-up Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2008, 47, 565-573.	0.5	18
80	Functional MRI of emotional memory in adolescent depression. <i>Developmental Cognitive Neuroscience</i> , 2016, 19, 31-41.	4.0	18
81	Adolescent Major Depressive Disorder: Neuroimaging Evidence of Sex Difference during an Affective Go/No-Go Task. <i>Frontiers in Psychiatry</i> , 2017, 8, 119.	2.6	18
82	Multisystemic therapy versus management as usual in the treatment of adolescent antisocial behaviour (START): 5-year follow-up of a pragmatic, randomised, controlled, superiority trial. <i>Lancet Psychiatry</i> , 2020, 7, 420-430.	7.4	17
83	Aberrant brain responses to emotionally valent words is normalised after cognitive behavioural therapy in female depressed adolescents. <i>Journal of Affective Disorders</i> , 2016, 189, 54-61.	4.1	16
84	Reinforcement learning as an intermediate phenotype in psychosis? Deficits sensitive to illness stage but not associated with polygenic risk of schizophrenia in the general population. <i>Schizophrenia Research</i> , 2020, 222, 389-396.	2.0	16
85	Preference uncertainty accounts for developmental effects on susceptibility to peer influence in adolescence. <i>Nature Communications</i> , 2021, 12, 3823.	12.8	16
86	Semi-Metric Topology of the Human Connectome: Sensitivity and Specificity to Autism and Major Depressive Disorder. <i>PLoS ONE</i> , 2015, 10, e0136388.	2.5	16
87	Child and adolescent mental health services: longitudinal data sheds light on current policy for psychological interventions in the community. <i>Journal of Public Mental Health</i> , 2017, 16, 96-99.	1.1	15
88	â€˜Interaction structuresâ€™ between depressed adolescents and their therapists in short-term psychoanalytic psychotherapy and cognitive behavioural therapy. <i>Clinical Child Psychology and Psychiatry</i> , 2019, 24, 446-461.	1.6	15
89	Do sleep disturbances in depressed adolescents improve following psychological treatment for depression?. <i>Journal of Affective Disorders</i> , 2020, 262, 205-210.	4.1	15
90	Mapping the structural organization of the brain in conduct disorder: replication of findings in two independent samples. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2016, 57, 1018-1026.	5.2	14
