#	ARTICLE	IF	CITATIONS
1	Previous Syphilis Alters the Course of Subsequent Episodes of Syphilis. <i>Clinical Infectious Diseases</i> , 2022, 74, e1-e5.	5.8	20
2	Neuropathic pain correlates with worsening cognition in people with human immunodeficiency virus. <i>Brain</i> , 2022, 145, 2206-2213.	7.6	1
3	Higher buccal mitochondrial DNA and mitochondrial common deletion number are associated with markers of neurodegeneration and inflammation in cerebrospinal fluid. <i>Journal of NeuroVirology</i> , 2022, 28, 281-290.	2.1	3
4	HIV Viremia and Risk of Stroke Among People Living with HIV Who Are Using Antiretroviral Therapy. <i>Epidemiology</i> , 2021, 32, 457-464.	2.7	10
5	A Dual-Platform Point-of-Care Test for Neurosyphilis Diagnosis. <i>Sexually Transmitted Diseases</i> , 2021, 48, 353-356.	1.7	7
6	Alternatives to the Cerebrospinal Fluid Venereal Disease Research Laboratory Test for Neurosyphilis Diagnosis. <i>Sexually Transmitted Diseases</i> , 2021, 48, S54-S57.	1.7	11
7	Cognitive impairment in syphilis: Does treatment based on cerebrospinal fluid analysis improve outcome?. <i>PLoS ONE</i> , 2021, 16, e0254518.	2.5	8
8	Response to Schim van der Loeff, et al. <i>Clinical Infectious Diseases</i> , 2021, , .	5.8	0
9	Elevated plasma von Willebrand factor levels are associated with subsequent ischemic stroke in persons with treated HIV infection. <i>Open Forum Infectious Diseases</i> , 2021, 8, ofab521.	0.9	5
10	Distal Sensory Peripheral Neuropathy in Human Immunodeficiency Virus Type 1â€“Positive Individuals Before and After Antiretroviral Therapy Initiation in Diverse Resource-Limited Settings. <i>Clinical Infectious Diseases</i> , 2020, 71, 158-165.	5.8	10
11	Use of Neuroimaging to Inform Optimal Neurocognitive Criteria for Detecting HIV-Associated Brain Abnormalities. <i>Journal of the International Neuropsychological Society</i> , 2020, 26, 147-162.	1.8	15
12	Neurosyphilis Treatment Outcomes After Intravenous Penicillin G Versus Intramuscular Procaine Penicillin Plus Oral Probenecid. <i>Clinical Infectious Diseases</i> , 2020, 71, 267-273.	5.8	17
13	Hearing loss in individuals at risk for neurosyphilis. <i>International Journal of STD and AIDS</i> , 2020, 31, 1178-1185.	1.1	3
14	Higher levels of plasma inflammation biomarkers are associated with depressed mood and quality of life in aging, virally suppressed men, but not women, with HIV. <i>Brain, Behavior, & Immunity - Health</i> , 2020, 7, 100121.	2.5	15
15	Otosyphilis: A Review of the Literature. <i>Sexually Transmitted Diseases</i> , 2020, 47, 296-300.	1.7	30
16	Predictors of worsening neuropathy and neuropathic pain after 12 years in people with HIV. <i>Annals of Clinical and Translational Neurology</i> , 2020, 7, 1166-1173.	3.7	12
17	Comparative genomics and full-length Tprk profiling of <i>Treponema pallidum</i> subsp. <i>pallidum</i> reinfection. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0007921.	3.0	18
18	Epidemiology, Pathophysiology, Diagnosis, and Management of Cerebral Toxoplasmosis. <i>Clinical Microbiology Reviews</i> , 2020, 34, .	13.6	80

#	ARTICLE	IF	CITATIONS
19	Genomic epidemiology of syphilis reveals independent emergence of macrolide resistance across multiple circulating lineages. <i>Nature Communications</i> , 2019, 10, 3255.	12.8	72
20	Correlates of HIV RNA concentrations in cerebrospinal fluid during antiretroviral therapy: a longitudinal cohort study. <i>Lancet HIV</i> , 2019, 6, e456-e462.	4.7	15
21	Neurosyphilis. <i>Seminars in Neurology</i> , 2019, 39, 448-455.	1.4	56
22	Neurocognitive SuperAging in Older Adults Living With HIV: Demographic, Neuromedical and Everyday Functioning Correlates. <i>Journal of the International Neuropsychological Society</i> , 2019, 25, 507-519.	1.8	28
23	Cerebrospinal fluid viral escape in aviremic HIV-infected patients receiving antiretroviral therapy. <i>Aids</i> , 2019, 33, 475-481.	2.2	44
24	High Plasma Soluble CD163 During Infancy Is a Marker for Neurocognitive Outcomes in Early-Treated HIV-Infected Children. <i>Journal of Acquired Immune Deficiency Syndromes (1999)</i> , 2019, 81, 102-109.	2.1	9
25	Effects of comorbidity burden and age on brain integrity in HIV. <i>Aids</i> , 2019, 33, 1175-1185.	2.2	35
26	How Well Do Neurologic Symptoms Identify Individuals With Neurosyphilis?. <i>Clinical Infectious Diseases</i> , 2018, 66, 363-367.	5.8	29
27	Differences in Neurocognitive Impairment Among HIV-Infected Latinos in the United States. <i>Journal of the International Neuropsychological Society</i> , 2018, 24, 163-175.	1.8	29
28	Research advances in neurological infections in 2017. <i>Lancet Neurology</i> , 2018, 17, 18-19.	10.2	0
29	Central nervous system infection with <i>Toxoplasma gondii</i> . <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2018, 152, 117-122.	1.8	47
30	Other central nervous system infections: cytomegalovirus, <i>Mycobacterium tuberculosis</i> , and <i>Treponema pallidum</i> . <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2018, 152, 151-166.	1.8	5
31	Sequencing of <i>Treponema pallidum</i> subsp. <i>pallidum</i> from isolate UZ1974 using Anti-Treponemal Antibodies Enrichment: First complete whole genome sequence obtained directly from human clinical material. <i>PLoS ONE</i> , 2018, 13, e0202619.	2.5	14
32	Genome-wide association study of HIV-associated neurocognitive disorder (HAND): A CHARTER group study. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2017, 174, 413-426.	1.7	26
33	Cerebrospinal Fluid <i>Treponema pallidum</i> Particle Agglutination Assay for Neurosyphilis Diagnosis. <i>Journal of Clinical Microbiology</i> , 2017, 55, 1865-1870.	3.9	54
34	Cerebrospinal fluid cell-free mitochondrial DNA is associated with HIV replication, iron transport, and mild HIV-associated neurocognitive impairment. <i>Journal of Neuroinflammation</i> , 2017, 14, 72.	7.2	30
35	Evaluating the accuracy of self-report for the diagnosis of HIV-associated neurocognitive disorder (HAND): defining "asymptomatic" versus "asymptomatic" HAND. <i>Journal of NeuroVirology</i> , 2017, 23, 67-78.	2.1	25
36	Syphilis Screening in Neurology. <i>JAMA Neurology</i> , 2016, 73, 926.	9.0	5

#	ARTICLE	IF	CITATIONS
37	Reduced <i>Treponema pallidum</i> Specific Opsonic Antibody Activity in HIV-Infected Patients With Syphilis. <i>Journal of Infectious Diseases</i> , 2016, 213, 1348-1354.	4.0	37
38	Persistent CSF but not plasma HIV RNA is associated with increased risk of new-onset moderate-to-severe depressive symptoms; a prospective cohort study. <i>Journal of NeuroVirology</i> , 2016, 22, 479-487.	2.1	26
39	Anemia and Red Blood Cell Indices Predict HIV-Associated Neurocognitive Impairment in the Highly Active Antiretroviral Therapy Era. <i>Journal of Infectious Diseases</i> , 2016, 213, 1065-1073.	4.0	31
40	Article Commentary: HIV-Associated Neurocognitive Disorders and Central Nervous System Drug Penetration: What Next?. <i>Antiviral Therapy</i> , 2015, 20, 365-367.	1.0	7
41	Psychometric validation of the BDI-II among HIV-positive CHARTER study participants.. <i>Psychological Assessment</i> , 2015, 27, 457-466.	1.5	43
42	Absence of neurocognitive effect of hepatitis C infection in HIV-coinfected people. <i>Neurology</i> , 2015, 84, 241-250.	1.1	40
43	Genetic Variation in Iron Metabolism Is Associated with Neuropathic Pain and Pain Severity in HIV-Infected Patients on Antiretroviral Therapy. <i>PLoS ONE</i> , 2014, 9, e103123.	2.5	29
44	Headache in HIV-Infected Patients: Much to Consider. <i>Headache</i> , 2014, 54, 951-951.	3.9	0
45	Toll-Like Receptor Polymorphisms Are Associated With Increased Neurosyphilis Risk. <i>Sexually Transmitted Diseases</i> , 2014, 41, 440-446.	1.7	30
46	Central Nervous System Diseases due to Opportunistic and Coinfections. <i>Seminars in Neurology</i> , 2014, 34, 061-069.	1.4	8
47	Asymptomatic HIV-associated neurocognitive impairment increases risk for symptomatic decline. <i>Neurology</i> , 2014, 82, 2055-2062.	1.1	255
48	The Rapid Plasma Reagin Test Cannot Replace the Venereal Disease Research Laboratory Test for Neurosyphilis Diagnosis. <i>Sexually Transmitted Diseases</i> , 2012, 39, 453-457.	1.7	82
49	Relationship of Medication Management Test-Revised (MMT-R) Performance to Neuropsychological Functioning and Antiretroviral Adherence in Adults with HIV. <i>AIDS and Behavior</i> , 2012, 16, 2286-2296.	2.7	34
50	CXCL13 as a Cerebrospinal Fluid Marker for Neurosyphilis in HIV-Infected Patients With Syphilis. <i>Sexually Transmitted Diseases</i> , 2010, 37, 283-287.	1.7	109
51	Enhanced Molecular Typing of <i>Treponema pallidum</i> : Geographical Distribution of Strain Types and Association with Neurosyphilis. <i>Journal of Infectious Diseases</i> , 2010, 202, 1380-1388.	4.0	194
52	Impact of combination antiretroviral therapy on cerebrospinal fluid HIV RNA and neurocognitive performance. <i>Aids</i> , 2009, 23, 1359-1366.	2.2	305
53	Update on neurosyphilis. <i>Current Infectious Disease Reports</i> , 2009, 11, 127-134.	3.0	158
54	Normalization of Serum Rapid Plasma Reagin Titer Predicts Normalization of Cerebrospinal Fluid and Clinical Abnormalities after Treatment of Neurosyphilis. <i>Clinical Infectious Diseases</i> , 2008, 47, 893-899.	5.8	134

#	ARTICLE	IF	CITATIONS
55	Interpreting cerebrospinal fluid pleocytosis in HIV in the era of potent antiretroviral therapy. BMC Infectious Diseases, 2007, 7, 37.	2.9	73
56	Antibiotic Selection May Contribute to Increases in Macrolide-Resistant <i>Treponema pallidum</i> . Journal of Infectious Diseases, 2006, 194, 1771-1773.	4.0	90
57	Syphilis and Human Immunodeficiency Virus. Archives of Neurology, 2004, 61, 1505.	4.5	21
58	Normalization of Cerebrospinal Fluid Abnormalities after Neurosyphilis Therapy: Does HIV Status Matter?. Clinical Infectious Diseases, 2004, 38, 1001-1006.	5.8	135
59	Cerebrospinal Fluid Abnormalities in Patients with Syphilis: Association with Clinical and Laboratory Features. Journal of Infectious Diseases, 2004, 189, 369-376.	4.0	424
60	Neurosyphilis. Current Neurology and Neuroscience Reports, 2004, 4, 435-440.	4.2	63
61	A pilot study of cidofovir for progressive multifocal leukoencephalopathy in AIDS. Aids, 2002, 16, 1791-1797.	2.2	183
62	HIV-Associated Dementia. Science, 2000, 288, 439d-439.	12.6	54
63	Bell's palsy and HSV-1 infection. Muscle and Nerve, 1999, 22, 1476-1478.	2.2	18
64	Neurologic Manifestations of HIV Infection Without AIDS. Journal of Neuro-AIDS, 1996, 1, 41-65.	0.2	1
65	Cognitive Risk Factors and Neuropsychological Performance in HIV Infection. International Journal of Neuroscience, 1993, 70, 13-27.	1.6	4
66	Evaluation of Aqueous Penicillin G and Ceftriaxone for Experimental Neurosyphilis. Journal of Infectious Diseases, 1992, 165, 396-397.	4.0	25
67	Alterations in the Course of Experimental Syphilis Associated with Concurrent Simian Immunodeficiency Virus Infection. Journal of Infectious Diseases, 1992, 165, 1020-1025.	4.0	25
