#	ARTICLE	IF	CITATIONS
1	The Emotional Word-Emotional Face Stroop task in the ABCD study: Psychometric validation and associations with measures of cognition and psychopathology. <i>Developmental Cognitive Neuroscience</i> , 2022, 53, 101054.	4.0	10
2	Neuroanatomical Correlates of Perceived Stress Controllability in Adolescents and Emerging Adults. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2022, 22, 655-671.	2.0	4
3	Context-specific activations are a hallmark of the neural basis of individual differences in general executive function. <i>NeuroImage</i> , 2022, 249, 118845.	4.2	5
4	Age-related changes and longitudinal stability of individual differences in ABCD Neurocognition measures. <i>Developmental Cognitive Neuroscience</i> , 2022, 54, 101078.	4.0	19
5	Executive Functions and Impulsivity as Transdiagnostic Correlates of Psychopathology in Childhood: A Behavioral Genetic Analysis. <i>Frontiers in Human Neuroscience</i> , 2022, 16, 863235.	2.0	9
6	Topographical functional correlates of interindividual differences in executive functions in young healthy twins. <i>Brain Structure and Function</i> , 2022, 227, 49-62.	2.3	2
7	Associations Between Age and Resting State Connectivity Are Partially Dependent Upon Cardiovascular Fitness. <i>Frontiers in Aging Neuroscience</i> , 2022, 14, 858405.	3.4	1
8	Rates of Incidental Findings in Brain Magnetic Resonance Imaging in Children. <i>JAMA Neurology</i> , 2021, 78, 578.	9.0	28
9	Heritability of brain resilience to perturbation in humans. <i>NeuroImage</i> , 2021, 235, 118013.	4.2	7
10	Children's Knowledge of Cannabis and Other Substances in States with Different Cannabis Use Regulations. <i>Substance Use and Misuse</i> , 2021, 56, 1-8.	1.4	1
11	Twin studies to GWAS: there and back again. <i>Trends in Cognitive Sciences</i> , 2021, 25, 855-869.	7.8	39
12	Identifying brain regions supporting amygdalar functionality: Application of a novel graph theory technique. <i>NeuroImage</i> , 2021, 244, 118614.	4.2	3
13	Genetic and Environmental Influence on the Human Functional Connectome. <i>Cerebral Cortex</i> , 2020, 30, 2099-2113.	2.9	22
14	Association of $\hat{1}^3$ -aminobutyric acid and glutamate/glutamine in the lateral prefrontal cortex with patterns of intrinsic functional connectivity in adults. <i>Brain Structure and Function</i> , 2020, 225, 1903-1919.	2.3	6
15	Changes to information in working memory depend on distinct removal operations. <i>Nature Communications</i> , 2020, 11, 6239.	12.8	14
16	Structural Brain Architectures Match Intrinsic Functional Networks and Vary across Domains: A Study from 15,000+ Individuals. <i>Cerebral Cortex</i> , 2020, 30, 5460-5470.	2.9	28
17	Common and specific dimensions of internalizing disorders are characterized by unique patterns of brain activity on a task of emotional cognitive control. <i>International Journal of Psychophysiology</i> , 2020, 151, 80-93.	1.0	9
18	Left posterior prefrontal regions support domain-general executive processes needed for both reading and math. <i>Journal of Neuropsychology</i> , 2020, 14, 467-495.	1.4	14

#	ARTICLE	IF	CITATIONS
19	Correspondence Between Perceived Pubertal Development and Hormone Levels in 9-10 Year-Olds From the Adolescent Brain Cognitive Development Study. <i>Frontiers in Endocrinology</i> , 2020, 11, 549928.	3.5	45
20	Image processing and analysis methods for the Adolescent Brain Cognitive Development Study. <i>NeuroImage</i> , 2019, 202, 116091.	4.2	539
21	The Stroop Effect Occurs at Multiple Points Along a Cascade of Control: Evidence From Cognitive Neuroscience Approaches. <i>Frontiers in Psychology</i> , 2019, 10, 2164.	2.1	35
22	Reward systems, cognition, and emotion: Introduction to the special issue. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2019, 19, 409-414.	2.0	14
23	Characterizing and decomposing the neural correlates of individual differences in reading ability among adolescents with task-based fMRI. <i>Developmental Cognitive Neuroscience</i> , 2019, 37, 100647.	4.0	11
24	Striatal-frontal network activation during voluntary task selection under conditions of monetary reward. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2019, 19, 568-585.	2.0	4
25	Questionnaires and task-based measures assess different aspects of self-regulation: Both are needed. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 24396-24397.	7.1	28
26	Turning down the heat: Neural mechanisms of cognitive control for inhibiting task-irrelevant emotional information during adolescence. <i>Neuropsychologia</i> , 2019, 125, 93-108.	1.6	20
27	Individual differences in mixing costs relate to general executive functioning. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2019, 45, 606-613.	0.9	7
28	A cross-sectional examination of response inhibition and working memory on the Stroop task. <i>Cognitive Development</i> , 2018, 47, 19-31.	1.3	9
29	Adolescent neurocognitive development and impacts of substance use: Overview of the adolescent brain cognitive development (ABCD) baseline neurocognition battery. <i>Developmental Cognitive Neuroscience</i> , 2018, 32, 67-79.	4.0	337
30	Emerging themes in cognitive control: Commentary on the special issue of <i>Psychophysiology</i> entitled "Dynamics of Cognitive Control: A View Across Methodologies". <i>Psychophysiology</i> , 2018, 55, e13060.	2.4	2
31	Large-scale Meta-analysis Suggests Low Regional Modularity in Lateral Frontal Cortex. <i>Cerebral Cortex</i> , 2018, 28, 3414-3428.	2.9	28
32	The Adolescent Brain Cognitive Development (ABCD) study: Imaging acquisition across 21 sites. <i>Developmental Cognitive Neuroscience</i> , 2018, 32, 43-54.	4.0	1,282
33	The utility of twins in developmental cognitive neuroscience research: How twins strengthen the ABCD research design. <i>Developmental Cognitive Neuroscience</i> , 2018, 32, 30-42.	4.0	69
34	Adjustments in Torque Steadiness During Fatiguing Contractions Are Inversely Correlated With IQ in Persons With Multiple Sclerosis. <i>Frontiers in Physiology</i> , 2018, 9, 1404.	2.8	10
35	The Relationship Between Resting State Network Connectivity and Individual Differences in Executive Functions. <i>Frontiers in Psychology</i> , 2018, 9, 1600.	2.1	47
36	Altered selection during language processing in individuals at high risk for psychosis. <i>Schizophrenia Research</i> , 2018, 202, 303-309.	2.0	3

#	ARTICLE	IF	CITATIONS
37	Neuroanatomical Correlates of the Unity and Diversity Model of Executive Function in Young Adults. <i>Frontiers in Human Neuroscience</i> , 2018, 12, 283.	2.0	24
38	Association Between Initial Age of Exposure to Childhood Abuse and Cognitive Control: Preliminary Evidence. <i>Journal of Traumatic Stress</i> , 2018, 31, 437-447.	1.8	6
39	Children's brain activation during risky decision-making: A contributor to substance problems?. <i>Drug and Alcohol Dependence</i> , 2017, 178, 57-65.	3.2	6
40	Imaging decision about whether to benefit self by harming others: Adolescents with conduct and substance problems, with or without callous-unemotionality, or developing typically. <i>Psychiatry Research - Neuroimaging</i> , 2017, 263, 103-112.	1.8	12
41	Behavioral approach and orbitofrontal cortical activity during decision-making in substance dependence. <i>Drug and Alcohol Dependence</i> , 2017, 180, 234-240.	3.2	9
42	General and emotion-specific alterations to cognitive control in women with a history of childhood abuse. <i>NeuroImage: Clinical</i> , 2017, 16, 151-164.	2.7	17
43	Reduced lateral prefrontal cortical volume is associated with performance on the modified Iowa Gambling Task: A surface based morphometric analysis of previously deployed veterans. <i>Psychiatry Research - Neuroimaging</i> , 2017, 267, 1-8.	1.8	6
44	A Tool for Interactive Data Visualization: Application to Over 10,000 Brain Imaging and Phantom MRI Data Sets. <i>Frontiers in Neuroinformatics</i> , 2016, 10, 9.	2.5	21
45	Brain Cortical Thickness Differences in Adolescent Females with Substance Use Disorders. <i>PLoS ONE</i> , 2016, 11, e0152983.	2.5	15
46	Differences in frontal and limbic brain activation in a small sample of monozygotic twin pairs discordant for severe stressful life events. <i>Neurobiology of Stress</i> , 2016, 5, 26-36.	4.0	13
47	Recreational marijuana use impacts white matter integrity and subcortical (but not cortical) morphometry. <i>NeuroImage: Clinical</i> , 2016, 12, 47-56.	2.7	61
48	Resting-state functional connectivity differentiates anxious apprehension and anxious arousal. <i>Psychophysiology</i> , 2016, 53, 1451-1459.	2.4	21
49	Functional connectivity at rest is sensitive to individual differences in executive function: A network analysis. <i>Human Brain Mapping</i> , 2016, 37, 2959-2975.	3.6	73
50	The future of CABN: A conceptual triad: Psychological theory, neurobiological approaches, computational methods. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2016, 16, 1-2.	2.0	6
51	Large-Scale Meta-Analysis of Human Medial Frontal Cortex Reveals Tripartite Functional Organization. <i>Journal of Neuroscience</i> , 2016, 36, 6553-6562.	3.6	268
52	Impaired Decision-Making, Higher Impulsivity, and Drug Severity in Substance Dependence and Pathological Gambling. <i>Journal of Addiction Medicine</i> , 2015, 9, 273-280.	2.6	45
53	Organization of the Human Frontal Pole Revealed by Large-Scale DTI-Based Connectivity: Implications for Control of Behavior. <i>PLoS ONE</i> , 2015, 10, e0124797.	2.5	57
54	Female Adolescents with Severe Substance and Conduct Problems Have Substantially Less Brain Gray Matter Volume. <i>PLoS ONE</i> , 2015, 10, e0126368.	2.5	23

#	ARTICLE	IF	CITATIONS
55	Multiple modes of clearing one's mind of current thoughts: Overlapping and distinct neural systems. <i>Neuropsychologia</i> , 2015, 69, 105-117.	1.6	12
56	Flexible brain network reconfiguration supporting inhibitory control. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 10020-10025.	7.1	93
57	Brain cortical thickness in male adolescents with serious substance use and conduct problems. <i>American Journal of Drug and Alcohol Abuse</i> , 2015, 41, 414-424.	2.1	14
58	Brain activation underlying threat detection to targets of different races. <i>Social Neuroscience</i> , 2015, 10, 651-662.	1.3	18
59	Familial risk and ADHD-specific neural activity revealed by case-control, discordant twin pair design. <i>Psychiatry Research - Neuroimaging</i> , 2015, 233, 458-465.	1.8	11
60	Individual differences in regional prefrontal gray matter morphometry and fractional anisotropy are associated with different constructs of executive function. <i>Brain Structure and Function</i> , 2015, 220, 1291-1306.	2.3	67
61	Resting-state networks predict individual differences in common and specific aspects of executive function. <i>NeuroImage</i> , 2015, 104, 69-78.	4.2	179
62	Distracted and down: neural mechanisms of affective interference in subclinical depression. <i>Social Cognitive and Affective Neuroscience</i> , 2015, 10, 654-663.	3.0	122
63	Recent advances in understanding neural systems that support inhibitory control. <i>Current Opinion in Behavioral Sciences</i> , 2015, 1, 17-22.	3.9	57
64	Adolescents' Neural Processing of Risky Decisions: Effects of Sex and Behavioral Disinhibition. <i>PLoS ONE</i> , 2015, 10, e0132322.	2.5	14
65	Individual Differences in the Balance of GABA to Glutamate in pFC Predict the Ability to Select among Competing Options. <i>Journal of Cognitive Neuroscience</i> , 2014, 26, 2490-2502.	2.3	32
66	The neural mechanisms underlying internally and externally guided task selection. <i>NeuroImage</i> , 2014, 84, 191-205.	4.2	39
67	Separate neural representations for physical pain and social rejection. <i>Nature Communications</i> , 2014, 5, 5380.	12.8	229
68	TRANSDIAGNOSTIC DIMENSIONS OF ANXIETY AND DEPRESSION MODERATE MOTIVATION-RELATED BRAIN NETWORKS DURING GOAL MAINTENANCE. <i>Depression and Anxiety</i> , 2014, 31, 805-813.	4.1	33
69	Modes of executive function and their coordination: Introduction to the special section. <i>Neuropsychologia</i> , 2014, 62, 319-320.	1.6	1
70	Default mode network activity in male adolescents with conduct and substance use disorder. <i>Drug and Alcohol Dependence</i> , 2014, 134, 242-250.	3.2	51
71	Temporal profile of fronto-striatal-limbic activity during implicit decisions in drug dependence. <i>Drug and Alcohol Dependence</i> , 2014, 136, 108-114.	3.2	15
72	All Competition Is Not Alike: Neural Mechanisms for Resolving Underdetermined and Prepotent Competition. <i>Journal of Cognitive Neuroscience</i> , 2014, 26, 2608-2623.	2.3	20

#	ARTICLE	IF	CITATIONS
73	ERPs and Neural Oscillations during Volitional Suppression of Memory Retrieval. <i>Journal of Cognitive Neuroscience</i> , 2013, 25, 1624-1633.	2.3	37
74	Sex modulates approach systems and impulsivity in substance dependence. <i>Drug and Alcohol Dependence</i> , 2013, 133, 222-227.	3.2	25
75	Resting-state activity in the left executive control network is associated with behavioral approach and is increased in substance dependence. <i>Drug and Alcohol Dependence</i> , 2013, 129, 1-7.	3.2	60
76	Insula and Orbitofrontal Cortical Morphology in Substance Dependence Is Modulated by Sex. <i>American Journal of Neuroradiology</i> , 2013, 34, 1150-1156.	2.4	34
77	Reduced Neural Tracking of Prediction Error in Substance-Dependent Individuals. <i>American Journal of Psychiatry</i> , 2013, 170, 1356-1363.	7.2	64
78	Interhemispheric transfer of spatial and semantic information: Electrophysiological evidence. <i>Psychophysiology</i> , 2013, 50, 377-387.	2.4	4
79	Developmental trends and individual differences in brain systems involved in intertemporal choice during adolescence. <i>Psychology of Addictive Behaviors</i> , 2013, 27, 416-430.	2.1	28
80	A penny for your thoughts: dimensions of self-generated thought content and relationships with individual differences in emotional wellbeing. <i>Frontiers in Psychology</i> , 2013, 4, 900.	2.1	111
81	Cortical organization of inhibition-related functions and modulation by psychopathology. <i>Frontiers in Human Neuroscience</i> , 2013, 7, 271.	2.0	39
82	Individual differences in emotion-cognition interactions: emotional valence interacts with serotonin transporter genotype to influence brain systems involved in emotional reactivity and cognitive control. <i>Frontiers in Human Neuroscience</i> , 2013, 7, 327.	2.0	22
83	A brain network instantiating approach and avoidance motivation. <i>Psychophysiology</i> , 2012, 49, 1200-1214.	2.4	66
84	Repetitive Thought and Reversal Learning Deficits. <i>Cognitive Therapy and Research</i> , 2012, 36, 714-721.	1.9	10
85	Negative reinforcement learning is affected in substance dependence. <i>Drug and Alcohol Dependence</i> , 2012, 123, 84-90.	3.2	27
86	Brain activity related to the ability to inhibit previous task sets: an fMRI study. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2012, 12, 661-670.	2.0	25
87	Cognitive Control Reflects Context Monitoring, Not Motoric Stopping, in Response Inhibition. <i>PLoS ONE</i> , 2012, 7, e31546.	2.5	134
88	When Does Stress Help or Harm? The Effects of Stress Controllability and Subjective Stress Response on Stroop Performance. <i>Frontiers in Psychology</i> , 2012, 3, 179.	2.1	90
89	Neural Mechanisms of Attentional Control Differentiate Trait and State Negative Affect. <i>Frontiers in Psychology</i> , 2012, 3, 298.	2.1	29
90	Increased inhibition and enhancement of memory retrieval are associated with reduced hippocampal volume. <i>Hippocampus</i> , 2012, 22, 651-655.	1.9	9

#	ARTICLE	IF	CITATIONS
91	Low frequency fluctuations reveal integrated and segregated processing among the cerebral hemispheres. <i>NeuroImage</i> , 2011, 54, 517-527.	4.2	54
92	Trait approach and avoidance motivation: Lateralized neural activity associated with executive function. <i>NeuroImage</i> , 2011, 54, 661-670.	4.2	151
93	Reduced cortical gray matter volume in male adolescents with substance and conduct problems. <i>Drug and Alcohol Dependence</i> , 2011, 118, 295-305.	3.2	60
94	A unified framework for inhibitory control. <i>Trends in Cognitive Sciences</i> , 2011, 15, 453-459.	7.8	489
95	Cognitive Control in Adolescence: Neural Underpinnings and Relation to Self-Report Behaviors. <i>PLoS ONE</i> , 2011, 6, e21598.	2.5	110
96	Choosing Our Words: Retrieval and Selection Processes Recruit Shared Neural Substrates in Left Ventrolateral Prefrontal Cortex. <i>Journal of Cognitive Neuroscience</i> , 2011, 23, 3470-3482.	2.3	76
97	Depression and anxious apprehension distinguish frontocingulate cortical activity during top-down attentional control.. <i>Journal of Abnormal Psychology</i> , 2011, 120, 272-285.	1.9	61
98	Co-occurring anxiety influences patterns of brain activity in depression. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2010, 10, 141-156.	2.0	101
99	Inhibitory control of memory retrieval and motor processing associated with the right lateral prefrontal cortex: Evidence from deficits in individuals with ADHD. <i>Neuropsychologia</i> , 2010, 48, 3909-3917.	1.6	113
100	Symptom-correlated brain regions in young adults with combined-type ADHD: Their organization, variability, and relation to behavioral performance. <i>Psychiatry Research - Neuroimaging</i> , 2010, 182, 96-102.	1.8	48
101	Behavioral performance predicts grey matter reductions in the right inferior frontal gyrus in young adults with combined type ADHD. <i>Psychiatry Research - Neuroimaging</i> , 2010, 182, 231-237.	1.8	72
102	Localization of asymmetric brain function in emotion and depression. <i>Psychophysiology</i> , 2010, 47, 442-454.	2.4	131
103	Risky Decisions and Their Consequences: Neural Processing by Boys with Antisocial Substance Disorder. <i>PLoS ONE</i> , 2010, 5, e12835.	2.5	124
104	Brain imaging of the neural systems affected in adults with attention-deficit/hyperactivity disorder. <i>Expert Review of Neurotherapeutics</i> , 2010, 10, 1523-1527.	2.8	0
105	Neural inhibition enables selection during language processing. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010, 107, 16483-16488.	7.1	78
106	Trait rumination and inhibitory deficits in long-term memory. <i>Cognition and Emotion</i> , 2010, 24, 168-179.	2.0	34
107	Age differences in affective decision making as indexed by performance on the Iowa Gambling Task.. <i>Developmental Psychology</i> , 2010, 46, 193-207.	1.6	390
108	Attentional Control Activation Relates to Working Memory in Attention-Deficit/Hyperactivity Disorder. <i>Biological Psychiatry</i> , 2010, 67, 632-640.	1.3	115

#	ARTICLE	IF	CITATIONS
109	The time course of activity in dorsolateral prefrontal cortex and anterior cingulate cortex during top-down attentional control. <i>NeuroImage</i> , 2010, 50, 1292-1302.	4.2	174
110	The neural basis of sustained and transient attentional control in young adults with ADHD. <i>Neuropsychologia</i> , 2009, 47, 3095-3104.	1.6	84
111	Cognitive control mechanisms, emotion and memory: A neural perspective with implications for psychopathology. <i>Neuroscience and Biobehavioral Reviews</i> , 2009, 33, 613-630.	6.1	258
