| # | Article                                                                                                                                                              | IF  | CITATIONS |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Enzymatic and structural characterization of HAD5, an essential phosphomannomutase of malaria-causing parasites. Journal of Biological Chemistry, 2022, 298, 101550. | 3.4 | 3         |
| 2 | Beyond X-rays: an overview of emerging structural biology methods. Emerging Topics in Life Sciences, 2021, 5, 221-230.                                               | 2.6 | 9         |
| 3 | Structure-guided microbial targeting of antistaphylococcal prodrugs. ELife, 2021, 10, .                                                                              | 6.0 | 7         |
| 4 | Antimicrobial Prodrug Activation by the Staphylococcal Glyoxalase GloB. ACS Infectious Diseases, 2020, 6, 3064-3075.                                                 | 3.8 | 9         |
| 5 | Potent, specific MEPicides for treatment of zoonotic staphylococci. PLoS Pathogens, 2020, 16, e1007806.                                                              | 4.7 | 12        |
| 6 | The Malaria Metabolite HMBPP Does Not Trigger Erythrocyte Terpene Release. ACS Infectious Diseases, 2020, 6, 2567-2572.                                              | 3.8 | 3         |
| 7 | Volatile biomarkers of malaria infection. , 2020, , 349-362.                                                                                                         |     | O         |
| 8 | Domains within RbpA Serve Specific Functional Roles That Regulate the Expression of Distinct Mycobacterial Gene Subsets. Journal of Bacteriology, 2018, 200, .       | 2.2 | 16        |
