| #  | Article                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Neoadjuvant versus Postoperative Chemoradiotherapy is Associated with Improved Survival for<br>Patients with Resectable Gastric and Gastroesophageal Cancer. Annals of Surgical Oncology, 2022, 29,<br>242-252.                 | 0.7 | 4         |
| 2  | A Combination of Biochemical and Pathological Parameters Improves Prediction of Postresection<br>Survival After Preoperative Chemotherapy in Pancreatic Cancer. Annals of Surgery, 2022, 275, 391-397.                          | 2.1 | 15        |
| 3  | Prospective Phase II Trials Validate the Effect of Neoadjuvant Chemotherapy on Pattern of Recurrence<br>in Pancreatic Adenocarcinoma. Annals of Surgery, 2022, 276, e502-e509.                                                  | 2.1 | 6         |
| 4  | Arterial involvement and resectability scoring system to predict R0 resection in patients with<br>pancreatic ductal adenocarcinoma treated with neoadjuvant chemoradiation therapy. European<br>Radiology, 2022, 32, 2470-2480. | 2.3 | 9         |
| 5  | Abstract P061: Dendritic cell paucity in mismatch repair-proficient colorectal cancer liver metastases limits the efficacy of immune checkpoint blockade. , 2022, , .                                                           |     | 0         |
| 6  | The efficacy and safety of cardio-protective therapy in patients with 5-FU (Fluorouracil)-associated coronary vasospasm. PLoS ONE, 2022, 17, e0265767.                                                                          | 1.1 | 9         |
| 7  | Reverse Transcriptase Inhibition Disrupts Repeat Element Life Cycle in Colorectal Cancer. Cancer<br>Discovery, 2022, 12, 1462-1481.                                                                                             | 7.7 | 30        |
| 8  | Tumor Microenvironment Immune Response in Pancreatic Ductal Adenocarcinoma Patients Treated<br>With Neoadjuvant Therapy. Journal of the National Cancer Institute, 2021, 113, 182-191.                                          | 3.0 | 49        |
| 9  | Improving staging of rectal cancer in the pelvis: the role of PET/MRI. European Journal of Nuclear<br>Medicine and Molecular Imaging, 2021, 48, 1235-1245.                                                                      | 3.3 | 40        |
| 10 | Associations of baseline patientâ€reported outcomes with treatment outcomes in advanced gastrointestinal cancer. Cancer, 2021, 127, 619-627.                                                                                    | 2.0 | 7         |
| 11 | Conditional Survival in Resected Pancreatic Ductal Adenocarcinoma Patients Treated with Total<br>Neoadjuvant Therapy. Journal of Gastrointestinal Surgery, 2021, 25, 2859-2870.                                                 | 0.9 | 8         |
| 12 | Impact of PET/MRI in the Treatment of Pancreatic Adenocarcinoma: a Retrospective Cohort Study.<br>Molecular Imaging and Biology, 2021, 23, 456-466.                                                                             | 1.3 | 22        |
| 13 | Circulating Tumor DNA Predicts Pathologic and Clinical Outcomes Following Neoadjuvant<br>Chemoradiation and Surgery for Patients With Locally Advanced Rectal Cancer. JCO Precision<br>Oncology, 2021, 5, 123-132.              | 1.5 | 30        |
| 14 | Molecular Characterization and Therapeutic Targeting of Colorectal Cancers Harboring Receptor Tyrosine Kinase Fusions. Clinical Cancer Research, 2021, 27, 1695-1705.                                                           | 3.2 | 19        |
| 15 | The Incidence, Risk Factors, and Outcomes With 5-Fluorouracil–Associated Coronary Vasospasm. JACC:<br>CardioOncology, 2021, 3, 101-109.                                                                                         | 1.7 | 31        |
| 16 | Minimal Residual Disease Detection using a Plasma-only Circulating Tumor DNA Assay in Patients with<br>Colorectal Cancer. Clinical Cancer Research, 2021, 27, 5586-5594.                                                        | 3.2 | 178       |
| 17 | Care Patterns and Overall Survival in Patients With Early-Onset Metastatic Colorectal Cancer. JCO<br>Oncology Practice, 2021, 17, e1846-e1855.                                                                                  | 1.4 | 9         |
| 18 | Crizotinib in Patients With MET-Amplified NSCLC. Journal of Thoracic Oncology, 2021, 16, 1017-1029.                                                                                                                             | 0.5 | 84        |

| #  | Article                                                                                                                                                                                                                                                                     | IF   | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | Results and Molecular Correlates from a Pilot Study of Neoadjuvant Induction FOLFIRINOX Followed by Chemoradiation and Surgery for Gastroesophageal Adenocarcinomas. Clinical Cancer Research, 2021, 27, 6343-6353.                                                         | 3.2  | 8         |
| 20 | Clinical impact of PET/MRI in oligometastatic colorectal cancer. British Journal of Cancer, 2021, 125, 975-982.                                                                                                                                                             | 2.9  | 17        |
| 21 | Pancreatic acinar cell carcinoma: A multi-center series on clinical characteristics and treatment outcomes. Pancreatology, 2021, 21, 1119-1126.                                                                                                                             | 0.5  | 13        |
| 22 | ASO Visual Abstract:ÂNeoadjuvant versusÂPostoperative Chemoradiotherapy Is Associated with<br>Improved Survival in Patients with Resectable Gastric and Gastroesophageal Cancer. Annals of<br>Surgical Oncology, 2021, 28, 690-691.                                         | 0.7  | 0         |
| 23 | Phase II study of pembrolizumab in refractory esophageal cancer with correlates of response and survival. , 2021, 9, e002472.                                                                                                                                               |      | 13        |
| 24 | Impact of Treatment Sequencing on Survival for Patients with Locally Advanced Gastric Cancer.<br>Annals of Surgical Oncology, 2021, 28, 2856-2865.                                                                                                                          | 0.7  | 3         |
| 25 | Abstract PO-097: Addition of losartan to FOLFIRINOX and chemoradiation reduces the expression of pro-invasive and immunosuppressive genes in locally-advanced pancreatic cancer. , 2021, , .                                                                                |      | 0         |
| 26 | Radiation therapy enhances immunotherapy response in microsatellite stable colorectal and pancreatic adenocarcinoma in a phase II trial. Nature Cancer, 2021, 2, 1124-1135.                                                                                                 | 5.7  | 112       |
| 27 | A phase 2 clinical trial of the heat shock protein 90 (HSP 90) inhibitor ganetespib in patients with refractory advanced esophagogastric cancer. Investigational New Drugs, 2020, 38, 1533-1539.                                                                            | 1.2  | 13        |
| 28 | Impact of Single-organ Metastasis to the Liver or Lung and Genetic Mutation Status on Prognosis in<br>Stage IV Colorectal Cancer. Clinical Colorectal Cancer, 2020, 19, e8-e17.                                                                                             | 1.0  | 15        |
| 29 | Intraoperative Radiation Therapy (IORT) for Borderline Resectable and Locally Advanced Pancreatic<br>Ductal Adenocarcinoma (BR/LA PDAC) in the Era of Modern Neoadjuvant Treatment: Short-Term and<br>Long-Term Outcomes. Annals of Surgical Oncology, 2020, 27, 1400-1406. | 0.7  | 22        |
| 30 | Patterns of Failure and the Need for Biliary Intervention in Resected Biliary Tract Cancers After Chemoradiation. Annals of Surgical Oncology, 2020, 27, 5161-5172.                                                                                                         | 0.7  | 4         |
| 31 | Chemoradiationâ€Related Lymphopenia and Its Association with Survival in Patients with Squamous Cell<br>Carcinoma of the Anal Canal. Oncologist, 2020, 25, 1015-1022.                                                                                                       | 1.9  | 11        |
| 32 | Impact of adjuvant therapy in patients with invasive intraductal papillary mucinous neoplasms of the pancreas. Pancreatology, 2020, 20, 722-728.                                                                                                                            | 0.5  | 22        |
| 33 | Transcriptomic and Genomic Testing to Guide Individualized Treatment in Chemoresistant Gastric<br>Cancer Case. Biomedicines, 2020, 8, 67.                                                                                                                                   | 1.4  | 12        |
| 34 | Impact of Postoperative Complication and Completion of Multimodality Therapy on Survival in<br>Patients Undergoing Gastrectomy for Advanced Gastric Cancer. Journal of the American College of<br>Surgeons, 2020, 230, 912-924.                                             | 0.2  | 42        |
| 35 | Dose-escalation trial of the ALK, MET & amp; ROS1 inhibitor, crizotinib, in patients with advanced cancer. Future Oncology, 2020, 16, 4289-4301.                                                                                                                            | 1.1  | 12        |
| 36 | Antitumor activity of crizotinib in lung cancers harboring a MET exon 14 alteration. Nature Medicine, 2020, 26, 47-51.                                                                                                                                                      | 15.2 | 255       |

| #  | Article                                                                                                                                                                                                                                                                                  | IF   | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 37 | Serial ctDNA Monitoring to Predict Response to Systemic Therapy in Metastatic Gastrointestinal<br>Cancers. Clinical Cancer Research, 2020, 26, 1877-1885.                                                                                                                                | 3.2  | 67        |
| 38 | Clinical impact of PET/MR in treated colorectal cancer patients. European Journal of Nuclear Medicine and Molecular Imaging, 2019, 46, 2260-2269.                                                                                                                                        | 3.3  | 28        |
| 39 | Pencil Beam Scanning Proton Beam Chemoradiation Therapy With 5-Fluorouracil and Mitomycin-C for<br>Definitive Treatment of Carcinoma of the Anal Canal: A Multi-institutional Pilot Feasibility Study.<br>International Journal of Radiation Oncology Biology Physics, 2019, 105, 90-95. | 0.4  | 20        |
| 40 | Liquid versus tissue biopsy for detecting acquired resistance and tumor heterogeneity in gastrointestinal cancers. Nature Medicine, 2019, 25, 1415-1421.                                                                                                                                 | 15.2 | 359       |
| 41 | Impact of MET inhibitors on survival among patients with non-small cell lung cancer harboring MET exon 14 mutations: a retrospective analysis. Lung Cancer, 2019, 133, 96-102.                                                                                                           | 0.9  | 85        |
| 42 | Total Neoadjuvant Therapy With FOLFIRINOX in Combination With Losartan Followed by<br>Chemoradiotherapy for Locally Advanced Pancreatic Cancer. JAMA Oncology, 2019, 5, 1020.                                                                                                            | 3.4  | 353       |
| 43 | Protons versus Photons for Unresectable Hepatocellular Carcinoma: Liver Decompensation and<br>Overall Survival. International Journal of Radiation Oncology Biology Physics, 2019, 105, 64-72.                                                                                           | 0.4  | 99        |
| 44 | FOLFOX plus zivâ€aflibercept or placebo in firstâ€line metastatic esophagogastric adenocarcinoma: A<br>doubleâ€blind, randomized, multicenter phase 2 trial. Cancer, 2019, 125, 2213-2221.                                                                                               | 2.0  | 14        |
| 45 | High IDO1 Expression Is Associated with Poor Outcome in Patients with Anal Cancer Treated with Definitive Chemoradiotherapy. Oncologist, 2019, 24, e275-e283.                                                                                                                            | 1.9  | 18        |
| 46 | Enrichment of <i>HER2</i> Amplification in Brain Metastases from Primary Gastrointestinal<br>Malignancies.
