#	ARTICLE	IF	CITATIONS
1	Nucleon momentum gap in asymmetric nuclear matter. Physical Review C, 2022, 105, .	2.9	1
2	Probing the in-medium nucleon-nucleon inelastic scattering cross section by using an energy-dependent n/p ratio. Physical Review C, 2021, 103, .	2.9	1
3	Probing the boundary of phase transition of nuclear matter using proton flows in heavy-ion collisions at 2-8 GeV/nucleon. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2021, 815, 136138.	4.1	6
4	Symmetry energy extracted from the pion data in systems. Physical Review C, 2021, 104, .	2.9	12
5	Imprints of high-momentum nucleons in nuclei on hard photons from heavy-ion collisions near the Fermi energy. Physical Review C, 2021, 104, .	2.9	19
6	Double strangeness $\Lambda\bar{\Lambda}$ production as a probe of nuclear equation of state at high densities. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2021, 820, 136521.	4.1	15
7	Pion production and absorption in heavy-ion collisions. Physical Review C, 2021, 104, .	2.9	2
8	Quiescent luminosities of transiently accreting neutron stars with neutrino heating due to charged pion decay. Physical Review D, 2021, 104, .	4.7	3
9	Determination of the density region of the symmetry energy probed by the $\frac{\pi^-}{\pi^+}$ ratio. Journal of Physics G: Nuclear and Particle Physics, 2019, 46, 105105.	3.6	7
10	High π^-/π^+ ratio as a probe of squeezed-out neutrons. Physical Review C, 2019, 99, .	2.9	7
11	Probing nuclear bubble configurations by proton-induced reactions. Physical Review C, 2019, 99, .	2.9	9
12	Probing the density dependence of the symmetry energy by nucleon flow. Physical Review C, 2018, 97, .	2.9	6
13	Influence of the nuclear symmetry energy on the collective flows of charged pions. Physical Review C, 2018, 97, .	2.9	5
14	Probing proton transition momentum in neutron-rich matter. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2018, 776, 447-450.	4.1	14
15	Effects of retarded electrical fields on observables sensitive to the high-density behavior of the nuclear symmetry energy in heavy-ion collisions at intermediate energies. Physical Review C, 2018, 97, .	2.9	10
16	Blind spots of probing the high-density symmetry energy in heavy-ion collisions. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2018, 786, 422-425.	4.1	3
17	A possible probe of the new fifth force. European Physical Journal A, 2018, 54, 1.	2.5	2
18	Effects of the initialization of nucleon momentum in heavy-ion collisions at medium energies. Physical Review C, 2018, 98, .	2.9	5

#	ARTICLE	IF	CITATIONS
19	Beam-energy dependence of the relativistic retardation effects of electrical fields on the π^0/π^+ ratio in heavy-ion collisions. Physical Review C, 2018, 98, .		
20	Constraining nucleon high momentum in nuclei. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2017, 765, 104-108.	4.1	23
21	Modeling pion production in heavy-ion collisions at intermediate energies. Physical Review C, 2017, 96, .	2.9	20
22	Interplay of short-range correlations and nuclear symmetry energy in hard-photon production from heavy-ion reactions at Fermi energies. Physical Review C, 2017, 96, .	2.9	22
23	Effects of the high-momentum tail of nucleon momentum distribution on the isospin-sensitive observables. European Physical Journal A, 2016, 52, 1.	2.5	9
24	Neutron-proton bremsstrahlung as a possible probe of high-momentum component in nucleon momentum distribution. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2016, 755, 486-490.	4.1	13
25	Hollow nuclear matter. Physical Review C, 2016, 93, .	2.9	7
26	Cross-checking the symmetry energy at high densities. Physical Review C, 2016, 93, .	2.9	20
27	Effects of the symmetry energy in the $^{132}\text{Sn} + ^{124}\text{Sn}$ reaction at 300 MeV/nucleon. Physical Review C, 2016, 94, .	2.9	9
28	Probing nuclear bubble configuration by the π^0/π^+ ratio in heavy-ion collisions. European Physical Journal A, 2016, 52, 1.	2.5	6
29	Effects of pion potential and nuclear symmetry energy on the π^0/π^+ ratio in heavy-ion collisions at beam energies around the pion production threshold. Physical Review C, 2015, 91, .	2.9	24
30	Effect of π^0 potential on the π^0/π^+ ratio in heavy-ion collisions at intermediate energies. Physical Review C, 2015, 92, .	2.9	13
31	Probing the momentum dependence of the symmetry potential by the free n emission of pre-equilibrium emission. Physical Review C, 2015, 91, .	2.9	8
32	Decomposition of the sensitivity of the symmetry energy observables. Physical Review C, 2015, 91, .	2.9	13
33	Effects of nuclear symmetry energy and in-medium NN cross section in heavy-ion collisions at beam energies below the pion production threshold. Physical Review C, 2014, 90, .	2.9	12
34	Nucleon Emission Number as a Probe of Isospin-Dependent $N \rightarrow N$ Cross Section in Photonuclear Reactions. Chinese Physics Letters, 2014, 31, 102501.	3.3	0
35	Probing nuclear symmetry energy at high densities using pion, kaon, eta and photon productions in heavy-ion collisions. European Physical Journal A, 2014, 50, 1.	2.5	34
36	Model dependence of isospin sensitive observables at high densities. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2013, 726, 211-217.	4.1	17

#	ARTICLE	IF	CITATIONS
37	Effects of nuclear symmetry energy on $\hat{\rho}$ -meson production and its rare decay to the dark U-boson in heavy-ion reactions. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2013, 723, 388-392.	4.1	18
38	Pion production by protons and ^3He on a ^{197}Au target at beam energies of 2.8, 5, 10, and 16.587 ÅGeV/nucleon. Physical Review C, 2012, 85, .	2.9	0
39	Effects of the magnetic field on the spallation reaction implemented by BUU coupled with a phase-space coalescence afterburner. Europhysics Letters, 2012, 99, 42001.	2.0	0
40	Probing Nuclear Symmetry Energy with the Sub-threshold Pion Production. Chinese Physics Letters, 2012, 29, 052502.	3.3	5
41	Effects of Symmetry Energy in the Reaction $^{40}\text{Ca} + ^{124}\text{Sn}$ at 140 MeV/Nucleon. Chinese Physics Letters, 2012, 29, 052501.	3.3	1
42	Effect of the momentum dependence of nuclear symmetry potential on the transverse and elliptic flows. European Physical Journal A, 2012, 48, 1.	2.5	17
43	A direct probe of the in-medium pn scattering cross section. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2011, 705, 240-243.	4.1	14
44	Nuclear collision in strong magnetic field. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2011, 700, 249-253.	4.1	4
45	Nuclear symmetry energy and proton-rich reactions at intermediate energies. Physical Review C, 2011, 84, .	2.9	8
46	Effect of the momentum dependence of the nuclear symmetry potential on the $\langle \mathbf{m} \cdot \hat{\mathbf{a}} \rangle$ in heavy-ion collisions. Physical Review C, 2011, 83, .	2.9	18
47	Initialization effect in heavy-ion collisions at intermediate energies. Physical Review C, 2011, 84, .	2.9	6
48	Medium effects on π^-/π^+ in heavy-ion collisions at intermediate energies. European Physical Journal A, 2010, 46, 399-402.	2.5	13
49	Recent Progress in Constraining the Equation of State of Dense Neutron-Rich Nuclear Matter with Heavy-Ion Reactions. Nuclear Physics A, 2010, 834, 509c-514c.	1.5	1
50	System size and beam energy effects on probing the high-density behavior of nuclear symmetry energy with pion ratio. Nuclear Physics A, 2010, 834, 567c-570c.	1.5	0
51	Effects of elastic and inelastic $\langle \mathbf{m} \cdot \hat{\mathbf{a}} \rangle$ scattering cross sections on $\langle \mathbf{m} \cdot \hat{\mathbf{a}} \rangle$ in heavy-ion collisions. Physical Review C, 2010, 81, .	2.9	3
52	Can the nuclear symmetry potential at supra-saturation densities be negative?. Physical Review C, 2010, 81, .	2.9	6
53	TRITON- ^3He RELATIVE AND DIFFERENTIAL FLOWS AND THE HIGH DENSITY BEHAVIOR OF NUCLEAR SYMMETRY ENERGY. International Journal of Modern Physics E, 2010, 19, 1647-1652.	1.0	4
54	Triton- ^3He relative and differential flows as probes of the nuclear symmetry energy at supra-saturation densities. Physical Review C, 2009, 80, .	2.9	30

#	ARTICLE	IF	CITATIONS
55	Systematic study of the $\langle \sigma_{\text{in}} \rangle$ in heavy-ion collisions with the same neutron/proton ratio but different masses. Physical Review C, 2009, 80, .	2.9	30
56	Circumstantial Evidence for a Soft Nuclear Symmetry Energy at Suprasaturation Densities. Physical Review Letters, 2009, 102, 062502.	7.8	290
57	Constraining the EOS of Neutron-Rich Nuclear Matter and Properties of Neutron Stars with Heavy-Ion Reactions. , 2009, , .		4
58	Neutron \rightarrow proton bremsstrahlung from intermediate energy heavy-ion reactions as a probe of the nuclear symmetry energy?. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2008, 661, 82-87.	4.1	24
59	Constraining properties of neutron stars with heavy-ion reactions in terrestrial laboratories. Journal of Physics G: Nuclear and Particle Physics, 2008, 35, 014044.	3.6	2
60	DETERMINING THE DENSITY DEPENDENCE OF THE NUCLEAR SYMMETRY ENERGY USING HEAVY-ION REACTIONS. International Journal of Modern Physics E, 2008, 17, 1825-1837.	1.0	9
61	PROBING THE HIGH DENSITY BEHAVIOR OF THE SYMMETRY ENERGY. , 2008, , .		0
62	Differential isospin-fractionation in dilute asymmetric nuclear matter. Physical Review C, 2007, 76, .	2.9	19
63	The neutron/proton ratio of squeezed-out nucleons and the high density behavior of the nuclear symmetry energy. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2007, 650, 344-347.	4.1	30
64	Probing the nuclear symmetry energy with heavy-ion reactions induced by neutron-rich nuclei. Frontiers of Physics in China, 2007, 2, 327-357.	1.0	32
65	Double neutron/proton ratio of nucleon emissions in isotopic reaction systems as a robust probe of nuclear symmetry energy. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2006, 634, 378-382.	4.1	76
66	Progress towards Determining the Density Dependence of the Nuclear Symmetry Energy Using Heavy-Ion Reactions. Acta Physica Hungarica A Heavy Ion Physics, 2006, 25, 219-228.	0.4	0
67	Double neutron-proton differential transverse flow as a probe for the high density behavior of the nuclear symmetry energy. Physical Review C, 2006, 74, .	2.9	33
68	Single and double $\langle \sigma_{\text{in}} \rangle / \langle \sigma_{\text{out}} \rangle$ ratios in heavy-ion reactions as probes of the high-density behavior of the nuclear symmetry energy. Physical Review C, 2006, 73, .	2.9	55
69	Isospin dependence of nucleon emission and radial flow in heavy-ion collisions induced by high energy radioactive beams. Physical Review C, 2005, 71, .	2.9	27
70	Near-threshold pion production with radioactive beams. Physical Review C, 2005, 71, .	2.9	103
